MESSRS.

SOTHEY, WILKINSON & HODGE, Auctioneers of Literary Property and Works connected with the Fine Arts, will SELL by AUCTION, at their House, 13, Wellington-street, Strand, EARLY in the SEASON,

The UNIQUE LIBRARY of the late Rev. F. J. STAINFORTH

This celebrated and unrivalled series, formed by the late proprietor with great industry and skill in the selection, comprises the poetical works of female writers, natives of England and America, ranging during a period of 300 years, and containing many productions of remarkable interest and rarity. It may be justly designated unique, as no other collection of similar pretensions is known, nor would it be possible to get together another assemblage of works of a kindred nature, after the most anxious and laborious research. Many of the volumes are enriched and greatly enhanced by the biographical and bibliographical remarks of the late Mr. Stainforth, whose successful exertions, we trust, will be duly appreciated by the curious collector and amateur.

Further notice of this remarkable Sale will be duly given.

Theological, Classical, and Miscellaneous Library of the Rev. Dr. BLOOMFIELD, Author of 'Recessus Synoptica.'

THE

ELECTRIC TELEGRAPH:

WAS IT INVENTED BY PROFESSOR WHEATSTONE?

By WILLIAM FOTHERGILL COOKE, Esq.

(First published in 1854.)

Price SIXPENCE.

Also,

WITH ANSWER, REPLY, AND EVIDENCE.

In 2 vols. with Plates, price 10s.

W. H. SMITH & SON, Strand; and all Booksellers.

The ELECTRIC TELEGRAPH. Award of the late Sir ISAMBARD BRUNEL and Professor DANIELL.

"As the ELECTRIC TELEGRAPH has recently attracted a considerable share of public attention, our friends, Messrs. COOKE and WHEATSTONE, have been put to some inconvenience, by a misunderstanding which has prevailed respecting their relative positions in connexion with the invention. The following short statement of the facts has, therefore, at their request, been drawn up by us, the undersigned, Sir M. ISAMBARD BRUNEL, Engineer of the Thames Tunnel, and Professor DANIELL, of King's College, a document which either party may at pleasure make publicly known.

"In March, 1836, Mr. COOKE, while engaged at Heidelberg in scientific pursuits, witnessed, for the first time, one of those well-known experiments on electricity, considered as a possible means of communicating intelligence, which have been tried and exhibited from time to time, during many years, by various philosophers. Struck with the vast importance of an instantaneous mode of communication to the railways then extending themselves over Great Britain, as well as to Government and general purposes, and impressed with a strong conviction that so great an object might be practically attained by means of electricity, Mr. COOKE immediately directed his attention to the adaptation of electricity to a practical system of Telegraphing; and, giving up the profession in which he was engaged, he, from that hour, devoted himself exclusively to the realization of that object. He came to England in April, 1836, to perfect his plans and instruments. In February, 1837, while engaged in completing a set of instruments for an intended experimental application of his Telegraph to a tunnel on the Liverpool and Manchester Railway, he became acquainted, through the introduction of Dr. ROGET, with Professor WHEATSTONE, who had for several years given much attention to the subject of transmitting intelligence by electricity, and had made several discoveries of the highest importance connected with this subject. Among these were his well-known determination of the velocity of electricity when passing through a metal wire; his experiments, in which the deflection of magnetic needles, the decomposition of water, and other voltaic and magneto-electric effects, were produced through greater lengths of wire than had ever before been experimented upon; and his original method of converting a few wires into a considerable number of circuits, so that they might transmit the greatest number of signals, which can be transmitted by a given number of wires, by the deflection of magnetic needles.

"In May, 1837, Messrs. COOKE and WHEATSTONE took out a joint English patent, on a footing of equality, for their existing inventions. The terms of their partnership, which were more exactly defined and confirmed in November, 1837, by a partnership deed, vested in Mr. COOKE, as the originator of the undertaking, the exclusive management of the invention in Great Britain, Ireland, and the Colonies, with the exclusive engineering department, as between themselves, and all the benefits arising from the laying down of the lines, and the manufacture of the instruments. As partners standing on a perfect equality, Messrs. COOKE and WHEATSTONE were to divide equally all proceeds arising from the granting of licences, or from sale of the patent rights; a percentage being first payable to Mr. COOKE, as Manager. Professor WHEATSTONE retained an equal voice with Mr. COOKE in selecting and modifying the forms of the Telegraphic Instruments, and both parties pledged themselves to impart to each other, for their equal and mutual benefit, all improvements, of whatever kind, which they might become possessed of, connected with the giving of signals or the sounding of alarms by means of electricity. Hence the formation of the partnership, the undertaking has rapidly progressed, under the constant and equally successful exertions of the parties in their distinct departments, until it has attained the character of a simple and practical system, worked out scientifically on the sure basis of actual experience.

"While Mr. COOKE is entitled to stand alone, as the gentleman to whom this country is indebted for having practically introduced into use the Electric Telegraph as a useful undertaking, promising to be a work of national importance; and Professor WHEATSTONE is acknowledged as the scientific man, whose profound and successful researches had already prepared the public to receive it as a project capable of practical application; it is to the united labours of two gentlemen so well qualified for mutual assistance, that we must attribute the rapid progress which this important invention has made during the five years since they have been associated.

(Signed) { Mr. Dr. BRUNEL.
J. F. DANIELL."

"London, 27th April, 1841."

"London, 27th April, 1841.

"GENTLEMEN, "We cordially acknowledge the correctness of the facts stated in the above document, and beg to express our great sense of the very friendly and gratifying manner in which you have recorded your opinion of our joint labours, and of the value of our invention.

"We are, Gentlemen,
"With feelings of the highest esteem,

"Your obedient Servants,

(Signed) { WILLIAM F. COOKE.
C. WHEATSTONE."

"Sir M. ISAMBARD BRUNEL and
J. F. DANIELL, Esq., Professor, &c."

W. Tweedie, 337, Strand, London.

PHYSICAL GEOGRAPHY.

INTRODUCTORY TEXT-BOOK of PHYSICAL GEOGRAPHY. By DAVID PAGE, F.R.S.E. F.G.S. With Sketch-Maps and Illustrations. Second Edition.

"The author of this 'Introductory Text-Book' has produced a work which cannot fail to be useful to all who are entering on a study of Physical Geography. We believe, indeed, that many will be induced to enter on the study from a perusal of this little work. The divisions of the subject are so clearly defined, the explanations are so lucid, the relations of one portion of the subject to another are so satisfactorily shown, and, above all, the bearing of the Allied Sciences to Physical Geography are brought out with so much precision, that every reader will feel that difficulties have been removed, and the path of study smoothed before him. With these opinions it is our pleasant duty to recommend the 'Introductory Text-Book of Physical Geography' to all who are in any way interested in the external conditions of the globe which we inhabit."
—Athenæum.

By the same Author.
ADVANCED TEXT-BOOK of PHYSICAL GEOGRAPHY. With Engravings 5s.
"A thoroughly good Text-Book of Physical Geography."
—Saturday Review.

"A comprehensive outline of the science, well suited for private study, or for use in schools."
—Examiner.

COME TO GRIEF in the SHIRES. By the Author of 'Charlie
Thornhill.'
A REQUIEM.

RICHARD BENTLEY, New Burlington-street.

NEW AND POPULAR WORKS,
At all Libraries and Booksellers'.

THIRD EDITION of UP THE
COUNTRY. By the Hon. EMILY EDEN, Author of 'The
Semi-Detached House' and 'The Semi-Attached Couple.'
3 vols. crown 8vo. 21s.

"In cabinet pictures of domestic life in India Miss Eden's book
is scarcely equalled. To those who have never seen the country
they will be as full of interest and amusement as to the old Indian,
for of all the letters here reprinted there is not one which is not
full of life and humour."—*Times*.

FOR EVER and EVER: a Novel.
By FLORENCE MARRYAT, Author of 'Love's Conflict'
and 'Too Good for Him.' 3 vols. post 8vo.

"Miss Maryat has made a long step in advance since her last
production. Her characters are well rendered, full of life and
action, and her style is spirited. It is a feverishly-exciting book,
and few will lay it down unfinished."—*Athenæum*.

The NATURALIST in VANCOUVER
ISLAND and BRITISH COLUMBIA. By JOHN KEAST
LORD, F.Z.S., late Naturalist to the British North American
Boundary Commission. 2 vols. crown 8vo. with many beau-
tiful Illustrations. 2s.

From the *Times*.—"This book may be considered a model book
to all sportsmen and naturalists on their travels. They will find
in it very many instructive and valuable hints. To the general
reader these volumes will prove a rich store, from which both
amusement and instruction can be readily gleaned; and the
scientific naturalist will add much to his stock of knowledge by
perusing them."

WHICH SHALL IT BE? a Novel.
In 3 vols. post 8vo.

"No one can read this book without being struck by the more
than ordinary ability it displays. The character of Madeline
throughout is of great psychological power, and the way in which
she trembles on the confines of terrible faults shows a rare power
of discrimination."—*Saturday Review*.

AFTER the STORM; or, Brother
Jonathan and his Neighbours in 1865-66. By J. E. HILARY
SKINNER, Barrister-at-Law, Author of 'The Tale of Danish
Herolms.' 3 vols. post 8vo. 12s.

"Mr. Skinner is the brightest and pleasantest of writers,
shrewd, sensible, closely observant, with a keen and ready sense
of humour. He is undoubtedly one of the pleasantest and most
skilful raconteurs who ever crossed the Atlantic."—*Morning Post*.

Also, in a few days,

LETTERS from HELL. From the
Danish. In 3 vols. post 8vo.

Hodgkin who order Copies of the Work not later than the 25th of
October, if sent to the Publisher, will be inserted in the volume.

NEW NOVELS, AT EVERY LIBRARY.

TRODDEN DOWN. By the Author of
'Kate Kennedy,' 'Common Sense,' &c. Second Edition.
"Nothing has come from Mrs. Newby's pen better than this
narrative of a woman's trial, error, penitence, and atonement."
—*Athenæum*.

"It will firmly establish its author in the same rank as Miss
Muloch and the Author of 'Adam Bede.'"—*Obser.*
"The story is told in a most affecting manner."—*Observer*.

THE STORY of NELLY DILLON. By
the Author of 'Myself and my Relatives.'

"A vigorous tale, most true in its sketches of Irish life."
—*Dublin Packet*.

"It is written with the finished simplicity of an experienced
storyist."—*Advertiser*.

OUR BLUE JACKETS, Afloat and
Ashore. By C. F. ARMSTRONG.

"Not one of our celebrated novelists ever wrote a better
tale. There is no modern fiction that will afford more pleasure to
readers of both sexes."—*Harrogate Advertiser*.

"Mr. Armstrong has given us one continued series of interest-
ing incidents, from first to last. It will compare with 'Midship-
man Easy' without losing thereby."—*Reader*.

"It is a long time since we have read so thoroughly interesting
a book as this."—*Observer*.

TROWN on the WORLD.

"A well written and pleasing story."—*Observer*.

HETTY GOULDWORTH. By George

MACAULAY. 3 vols.

THE MASTER of WINGBOURNE.

"It is a well written and deeply interesting novel; and the
incidents are told with force and cleverness."—*Observer*.

"The scenes are thoroughly and forcibly dramatic, and show
great power."—*Morning Star*.

LILIAN'S INHERITANCE. By Mrs.

W. MEERING. 2 vols.

THE NEW NOVELS.

AT ALL THE LIBRARIES.

KINGSFORD. By the Author of
'SON and HEIR.' 2 vols. 12s.

ANNALS of a QUIET NEIGHBOUR-
HOOD. By GEORGE MACDONALD, M.A., Author of
'Alice Forbes,' 'David Elginbrod,' &c. 3 vols.

"This story is one to be read. No skimming of it will do. There
is scarcely a page in the book which has not an attraction of its
own, either in the shape of some peculiar beauty of expression or
of some thought which deserves examination. The characters
stand out life-like on the canvas."—*Star*.

"A tale of a more pleasing, entertaining, and instructive nature
could hardly be met with."—*Observer*.

RACHEL'S SECRET. By the Author
of 'THE MASTER of MARTON.' 3 vols.

"A deeply interesting and affecting story, artistically and
powerfully wrought. Whoever takes up the first of these deligh-
tful volumes is sure to read them all."—*Morning Post*.

"A novel of very considerable merit. Its story is interesting
and touching. Its style is graceful and correct."—*Star*.

NORA'S TRIAL. 3 vols.

"There is much to interest and entertain in the history of
'Nora's Trial.'"—*Star*.

"This story is touching and well written."—*Star*.

LORDS and LADIES. By the Author

of 'MARGARET and HER BRIDESMAIDS,' &c. 3 vols.

"'Lords and Ladies' is one of the most charming books with
which the literature of fiction has been enriched this season.
The truth and the value of the moral of the story will recommend
it as highly as the vivacity and beauty of its style and the
ingenuity of its construction."—*Morning Post*.

A NOBLE LIFE. By the Author
of 'JOHN HALIFAX,' 'CHRISTIAN'S MISTAKE,' &c.

"A story of powerful and pathetic interest."—*Daily News*.

The WILD FLOWER of RAVENS-

WORTH. By the AUTHOR of 'JOHN and I,' &c. 3 vols.

"A beautiful tale, written with deep feeling. It charms by its
elegance and moves by its pathos."—*Illustrated News*.

"A charming story, of great originality, full of pathos and
grand nobility of thought and action."—*Observer*.

The MOTHER'S FAVOURITE. By

S. RUSSELL WHITNEY. 3 vols.

"This story is interesting and well sustained. The character
of Margaret Wendell is an exquisite creation."—*Post*.

"Mr. Whitney has worked out an ingenious, complicated, and
clever plot with much accuracy and justness of proportion."—*Star*.

HURST & BLACKETT, 13, Great Marlborough-street.

Messrs. Blackwood & Sons'
NEW PUBLICATIONS.

1. In small 4to. with numerous Illustrations, price 36s. cloth,
The Operations of War Explained and ILLUSTRATED. By Col. E. B. HAMLEY, R.A., formerly Professor of Military History, Strategy, and Tactics, at the Staff College; Member of the Council of Military Education.
2. In 6 vols. 8vo.
The History of Scotland; from Agricola's Invasion to the Revolution of 1688. By JOHN HILL BURTON, LL.D., Author of 'The Scot Abroad,' &c. [Vols. I. to IV. in November.]

19. In 15 vols. crown 8vo.
Works of Professor Wilson. Uniform Edition, each sold separately, 4s. per vol. NOCTES AMBROSIANÆ, 4 vols.—RECREATIONS OF CHRISTOPHER NORTH, 2 vols.—TALES—POEMS—CRITICAL ESSAYS, 4 vols.

45, George-street, Edinburgh; and 37, Paternoster-row, London.

NEW WORKS.

FRASER'S MAGAZINE, No. CCCCXLIII.
NOVEMBER. Price 2s. 6d. [On Wednesday next.]

Contents.

Why we want a Reform Bill. Field-Marshal Viscount Combermere.
Heinrich Heine.
The Bridal Song of Helen: a Translation from the Eighteenth Idyll of Theocritus. By Sir Edmund Head.
A Lost Man. Mr. Swinburne and his Critics. Gregory VII. Sacrifice. The Conventional Laws of Society. By Frances Power Cobbe.
The Provision Trade of Ireland.

2. A HUNTER'S EXPERIENCES in the SOUTHERN STATES OF AMERICA. By Captain FLACK (The Ranger). 1 vol. post 8vo. 10s. 6d. [On Wednesday next.]

3. THE CHURCH and the WORLD: Essays on Questions of the Day. Edited by the Rev. ORBY SHIPLEY, M.A. Second Edition. [In a few days.]

4. SUNDAY AFTERNOONS at the PARISH CHURCH of a UNIVERSITY CITY. By A. K. H. B. Author of 'The Recreations of a Country Parson.' Crown 8vo. [Early in November.]

5. MINIATURE EDITION of LORD MACAULAY'S LAYS OF ANCIENT ROME, illustrated by Schartz. Imperial 16mo. 10s. 6d. cloth; or 21s. morocco. [On November 15.]

6. ILLUSTRATED EDITION of JEAN INGELW'S POEMS: with nearly 100 Vignettes, engraved on Wood, from Original Drawings. Fcap. 4to. price 31s. cloth; or 42s. bound in morocco. [On November 15.]

7. EARL RUSSELL'S Work on the ENGLISH GOVERNMENT and CONSTITUTION from the REIGN of HENRY VII. to the PRESENT TIME. Fourth Edition. Crown 8vo. 6s.

8. HISTORY of ENGLAND from the FALL of WOLSEY to the DEATH of ELIZABETH. By JAMES ANTHONY FROUDE, M.A. Vols. IX. and X. price 32s.

9. LIFE and CORRESPONDENCE of RICHARD WHATELY, D.D., late Archbishop of Dublin. By E. JANE WHATELY. With 3 Portraits. 2 vols. 8vo. 38s.

10. MAX MÜLLER'S LECTURES on the SCIENCE of LANGUAGE, delivered at the Royal Institution. Fifth Edition of the First Series. 8vo. 12s.

11. The ÆNEID of VIRGIL, translated into ENGLISH VERSE. By JOHN CONINGTON, M.A., Corpus Professor of Latin in the University of Oxford. Crown 8vo. 9s.

12. The PUBLIC SCHOOL LATIN PRIMER. Edited with the sanction of the Head Masters of the Public Schools included in Her Majesty's Commission. 12mo. 2s. 6d.

13. GOETHE'S LETTERS to LEIPZIG FRIENDS. Edited by Professor OTTO JAHN. Translated by ROBERT SLATER, Jun. Post 8vo. with 3 Portraits, price 7s. 6d.

14. CHRISTIANITY without JUDAISM. By BADEN POWELL, M.A., late Savilian Professor in the University of Oxford. Second Edition. Crown 8vo. 5s.

15. The ELEMENTS: an Investigation of the Forces which determine the Position and Movements of the Ocean and Atmosphere. By W. L. JORDAN. Vol. I. royal 8vo. with Map, price 5s.

16. MAUNDER'S SCIENTIFIC and LITERARY TREASURY. New Edition, for the most part rewritten, with upwards of 1,000 New Articles, by JAMES YATE JOHNSON, Corr. M.Z.S. Fcap. 8vo. 10s. 6d.

17. THE STATES of the RIVER PLATE; their Industries and Commerce. By WILFRID LATHAM, Buenos Ayres. 8vo. price 5s.

London: LONGMANS, GREEN, READER, and DYER.

COMPLETION OF DR. FAIRBAIRN'S
BIBLE-DICTIONARY.

This day is published,

In 2 large vols. Imperial 8vo. cloth, 8l. 12s.

THE
IMPERIAL
BIBLE-DICTIONARY,

HISTORICAL, BIOGRAPHICAL,
GEOGRAPHICAL, AND DOCTRINAL.

By numerous Eminent Writers.

EDITED BY
REV. PATRICK FAIRBAIRN, D.D.,

Author of 'Typology of Scripture,' 'Commentary on Ezekiel,' &c.

With many Hundred Engravings on Wood and Steel.

BLACKIE & SON, 44, Paternoster-row.

FOR SCHOOL, COLLEGE, AND
GENERAL REFERENCE.

Imperial 16mo. 836 pp. cloth, red edges, 10s. 6d.; half morocco, 13s.

THE STUDENT'S ENGLISH
DICTIONARY,

ETYMOLOGICAL, PRONOUNCING and EXPLANATORY.

By JOHN OGILVIE, LL.D.

With about 300 Wood Engravings.

"Altogether we think this is a very commendable work. Dr. Johnson has said that 'Dictionaries are like watches; the worst is better than none, and the best cannot be expected to go quite true;' but he who relies on this one will hardly ever find himself mistaken."—*Daily News*.

"A complete though comprehensive Dictionary for the higher class of English students, carefully prepared, well printed, and published at a very moderate price."—*Notes and Queries*.

"A very valuable work, and one which, though chiefly intended for the young student, will not seldom aid the mature scholar."—*Educational Times*.

"This is the best etymological dictionary we have yet seen a all within moderate compass."—*Spectator*.

"This excellent work supplies a want which has long been felt by teachers and pupils in our colleges and advanced schools."—*Press*.

DR. OGILVIE'S
LARGER DICTIONARIES.

THE COMPREHENSIVE ENGLISH
DICTIONARY,

EXPLANATORY, PRONOUNCING, and ETYMOLOGICAL. By JOHN OGILVIE, LL.D. The Pronunciation adapted to the best Modern Usage, by RICHARD CULL, F.S.A. Above 900 Engravings on Wood. Large 8vo. cloth, 25s.

THE IMPERIAL DICTIONARY,

ENGLISH, TECHNOLOGICAL and SCIENTIFIC; with Supplement. Adapted to the present state of Literature, Science, and Art. By JOHN OGILVIE, LL.D. Upwards of 2,500 Engravings on Wood. 2 large vols. imp. 8vo. cloth, 4l.

BLACKIE & SON, 44, Paternoster-row.

Mr. Bentley's Announcements

FOR

NOVEMBER and DECEMBER.

EARL RUSSELL.COMPLETION of the **LIFE of CHARLES JAMES FOX.** By the Right Hon. EARL RUSSELL. K.G. Vol. III. Crown 8vo. 12s.**LADY HERBERT OF LEA.**

IMPRESSIONS of SPAIN. By the Right Hon. LADY HERBERT OF LEA. Royal 8vo. with many beautiful illustrations.

LADY LLANOVER.

GOOD COOKERY from the Recipes of the Hermit of St. Gover. By the Right Hon. LADY LLANOVER. Crown 8vo.

DR. MOMMSEN.

COMPLETION of the HISTORY of ROME to the FALL of the REPUBLIC. By Dr. THEODOR MOMMSEN. Translated by Professor DICKSON. Vol. IV. In Two Parts. Crown 8vo. 16s.

HURST & BLACKETT'S ANNOUNCEMENTS

FOR

OCTOBER AND NOVEMBER.

COMPLETION OF THE LIFE OF WEDGWOOD. Vol. II. of the LIFE of WEDGWOOD.

From his Private Correspondence and Family Papers in the possession of Joseph Mayer, Esq. F.R.S., Francis Wedgwood, Esq., C. Darwin, Esq. F.R.S., Miss Wedgwood, and other authentic sources.

By ELIZA METEYARD.

Dedicated to the Right Hon. W. E. GLADSTONE.

8vo. price 21s. bound.

(Now ready.)

. This volume (completing the work) is embellished with above 200 beautiful illustrations.

"We have to congratulate the authoress on the publication of her second volume of the 'Life of Wedgwood.' We can award her the praise due to the most painstaking and conscientious application. She has devoted her whole mind and energy to her subject, and has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The two volumes before us are in themselves marvels of decorative and typographical skill. More beautifully printed pages, more creamy paper, and more dainty woodcuts have seldom met our eyes. It is seldom that an author is so well seconded by his coadjutors as Miss Meteyard has been by her publishers, printer, and the staff of draughtsmen and engravers who have contributed the numerous illustrations which adorn this sumptuous book."—*Saturday Review*.

"An admirable, well-written, honourably elaborate, and most interesting book."—*Athenæum*.

"A very beautiful, accurate, and valuable book. The second volume is even better and handsomer than the first."—*Standard*.

A BOOK ABOUT LAWYERS.

By J. C. JEAFFRESON, Barrister-at-Law, Author of 'A Book about Doctors,' &c. 2 vols. 8vo.

ANNALS OF A QUIET NEIGHBOURHOOD.

By GEORGE MAC DONALD, M.A.

Author of 'Alec Forbes,' 'David Elginbrod,' &c. 3 v. [Ready.]

"Mr. Mac Donald is a true poet. The 'Annals of a Quiet Neighbourhood' are as full of music as was Prospero's Island; rich in strains that take the ear captive when they are first heard, and afterwards linger long upon it. Many of the scenes Mr. Mac Donald has painted are very beautiful in themselves, besides being thoroughly in keeping with the pleasantly sketched characters with which he peoples them."—*Saturday Review*.

MADONNA MARY.

By Mrs. OLIPHANT,

Author of 'Agnes,' &c. 3 vols. [Next week.]

LIGHTS AND SHADOWS OF LONDON LIFE.

By the Author of 'MIRK ABBEY,' 'LOST SIR MASSINGBERD,' &c. 2 vols. [This day.]

CHRISTIE'S FAITH.

By the Author of

'NO CHURCH,' 'OWEN,' 'MATTIE,' &c. 3 vols.

A WINTER with the SWALLOWS.

By MATILDA BETHAM EDWARDS.

8vo. with Illustrations, 15s.

CHEAP EDITION OF CHRISTIAN'S MISTAKE.

By the Author of 'JOHN HALIFAX.'

Illustrated by Sandys.

8s. bound, forming the New Volume of HURST & BLACKETT'S STANDARD LIBRARY. [Ready.]

MY PILGRIMAGE TO EASTERN SHRINES.

By ELIZA C. BUSH. 8vo. with Illustrations, 15s.

KINGSFORD.

By the Author of 'SON AND HEIR,' 2 vols.

[This day.]

Also, in Preparation,

NEW WORKS BY

The Hon. Mrs. Norton.

The Author of 'John Halifax.'

Miss Amelia B. Edwards.

Miss Kavanagh.

Mr. Hepworth Dixon.

Mr. Mark Lemon.

The Rev. J. M. Bellevue.

New Works for November.

In One Volume, 4to. price 21. 2s.

Large Paper, India Proofs, 21. 8s.

THE LIFE

OF

DAVID ROBERTS, R.A.

Compiled from his Journals and other sources,

By JAMES BALLANTINE.

Including a Set of Etchings by the Artist, Fac-similes of the Pen-and-Ink Sketches found in his Journal, and Portrait after Sir J. W. Gordon, P.R.S.A., engraved by T. O. Barlow.

The Etchings which are published here for the first time were, as the Artist remarks, "the commencement of a series of Monastic Remains of Scotland for a work I had begun in 1831, and only a few impressions were taken for myself and a limited circle of friends."

The Large-Paper Edition, with India Proof impressions of the Plates, is limited to 110 copies, which will be supplied according to priority of order.

In One Volume, crown 8vo. (uniform with 'Quiet Neighbourhood'), price 6s.

THE STORY OF JONAH.

By the Rev. ALEXANDER RALPH, D.D.

Canonbury.

KITTO'S CYCLOPÆDIA

OF

BIBLICAL LITERATURE.

NEW EDITION, Edited by

WM. LINDSAY ALEXANDER, D.D. F.S.A. &c.

Assisted by numerous Contributors, whose Initials are affixed to their various Articles.

This Edition is entirely new, and is increased by a whole volume.

Edinburgh: ADAM & CHARLES BLACK.

LONDON, SATURDAY, OCTOBER 27, 1866.

LITERATURE

The Resources, Products, and Industrial History of Birmingham and the Midland Hardware District. A Series of Reports, collected by the Local Industries Committee of the British Association at Birmingham, in 1865. Edited by Samuel Timmins. (Hardwicke.)

ALTHOUGH this collection of Reports is in many respects a less satisfactory volume than 'The Industrial Resources of the District of the Three Northern Rivers, the Tyne, Wear, and Tees,' for which we took occasion to thank the British Association during the course of last year, it is an honest and instructive book, from which statisticians may draw a vast number of important facts, and gossip-loving antiquaries may glean a wealth of curious information suited to their taste. Upon the whole, the labour of reporting was assigned to suitable writers; and with the exception of a few cases of notable incompetence or carelessness, the contributors have not only done their best, but have succeeded in accomplishing all that could be fairly demanded from them. So far as its outline and general features are concerned, the book, no doubt, tells a story with which all Englishmen are more or less familiar; but many of its papers comprise details that will have the charm of novelty to the majority of readers; and many are noteworthy specimens of industrious and exhaustive compilation, from which the inquirer may learn everything that is recorded anywhere of the origin and growth of the industries under consideration. That the manufactures and interests noticed by the reporters are neither few nor trivial, there is no need to inform the reader who has even a tourist's acquaintance with the counties of Stafford and Warwick,—a district not less remarkable for the variety than the aggregate value of its productions; but it is not till he has passed his eye over the complete schedule of his obligations to the dark and busy region that the average holder of a warm English homestead sees how largely he is indebted to Midland energy and skill for the comforts and conveniences of his daily life. From the cradle to the grave, Birmingham—that is to say, the field of country of which Birmingham may be regarded as the metropolis—is our obsequious attendant and lavish benefactor. Having heaped coals upon our hearth, she furnishes the homely utensils in which our food is prepared for the table. The salt for our porridge may be purchased in her stores, from which the schoolboy gets his knife, the sportsman his gun, the soldier his sword, the tradesman his strong chest, the merchant his iron safe, the timid householder his patent lock, the bachelor his latch-key, the carpenter his tools, the angler his fish-hooks, the beauty of the ball-room her pins and ribbons, children their toys, and connoisseurs their choicest relics of ancient Art. Even when life's battle has been fought out, and the discharged soldier no longer requires her sewing-machines and roasting-jacks, her fire-irons and umbrellas, Birmingham does not desert from affectionate concern for his dignity until she has placed her hand upon his coffin, and adorned it with mountings—varying in price between fourpence and twenty-five sovereigns.

Of the skilled industries of South Staffordshire none has a more entertaining history than its manufacture of locks and keys, chiefly carried on in Wolverhampton, Willenhall, Wednesfield, Walsall, and adjacent hamlets; and Mr. J. C. Tildesley deserves praise for the

zeal with which he has ransacked literature for quotations to illustrate the progress of the art of which he is the able chronicler. Having directed attention to the passages where keys are mentioned in the Old Testament, and established the antiquity of locks by reference to Homer and Pliny, he successively explains the mechanism of Egyptian, warded, tumbler, and letter locks. The Egyptian lock—representations of which are found on the *bass-reliefs* which adorned the temples of Karnak and Herculaneum—is described in the words of Mr. E. B. Denison, Q.C., who observes, "In this lock, three pins fall into a similar number of cavities in the bolt when it is pushed in, and so hold it fast; they are raised again by putting in the key through the large key-hole in the bolt, and raising it a little, so that the pins of the key push the locking-pins up out of the way of the bolt. The security afforded by this lock is very small, as it is easy to find the places of the pins by pushing in a piece of wood covered with clay or tallow, on which the holes will leave their impress, and the depth can easily be ascertained by trial." The first great improvement on this simple and inefficient bolt was the warded lock, mentioned in missals and other literature at an early period of the Christian era, and brought to a high state of mechanical exactness and artistic adornment by the mediæval locksmiths. To Chinese ingenuity is due the merit of inventing the tumbler-lock, the security of which is derived from levers or tumblers, which "differ from wards in being movable instead of fixed obstructions to any but the proper key." The letter lock, or combination padlock, is a comparatively recent invention; but that the German writer, Varnhagen von Ense, was wrong in assigning it to M. Reigner, a French locksmith of considerable repute at the close of the seventeenth century, Mr. Tildesley shows by citing from Beaumont and Fletcher's 'Noble Gentleman,' which was printed in 1615:—

A cap case for your linen and your plate,
With a strange lock that opens with A.M.E.N.

In allusion to the same contrivance, which was clearly regarded as a novelty by the authors of 'The Noble Gentleman,' Carew, in the year 1620, wrote

As doth a lock
That goes with letters, for till every one be known
The lock's as fast as if you had found none.

The Egyptian was the earliest lock used in this country, our ancestors being presumed to have learnt its use from Phœnician merchants who had dealings with Cornish miners. That the lock was thus introduced to the south-western extremity of Britain is less surprising than the "fact that articles of the description given by Mr. Denison may still be found in the Faroe Islands, and in some parts of Cornwall and Devon." The early history of the manufacture of locks in England is involved in considerable obscurity; but though it is open to doubt whether any of Alfred's artisans were locksmiths, it is matter of certainty that English workmen of the twelfth century turned out locks that were both secure and elaborately ornamented. The parish church of Snodland, in Kent, possesses a key of fourteenth-century manufacture. Amongst cathedrals, Winchester is fortunate in having a massive and richly embellished key of sixteenth-century workmanship, made at a time when mechanics were daily growing more expert and curious in lock-manufacture. Recent excavations at Salisbury prove conclusively that latch-keys—those frequent causes of domestic bickering—were in use before the sixteenth century; and the two next centuries witnessed successive displays of cunning in the construction of novel locks.

Under Elizabeth, a smith named Mark Scalist made a lock, "consisting of eleven pieces of iron, steel and brass, all of which, with a pipe key, weighed only two grains of gold." The year 1640 saw the manufacture of the first detector lock, of which the Marquis of Worcester in his 'Centurie of Inventions' says, "This lock is so constructed that if a stranger attempt to open it, it catches his hand as a trap catches a fox, though so far from maiming him for life, yet so far marketh him that if suspected he might easily be detected." It was in the reign of Elizabeth that the lock trade was planted in South Staffordshire, but the art did not flourish on the new soil until it had lived through many trying years. During Charles the Second's reign, however, Wolverhampton had achieved a high reputation for skill in this department of industry. "The greatest excellency of the blacksmith's profession in this county," Dr. Plot wrote in 1686, "lies in their making of locks for doores, wherein the artisans of Wolverhampton seem to be preferred to all others, they making them in suites, six, eight, or more in a suite, according as the chapman bespeakes them, whereof the keys shall neither of them open the other's lock, yet one master-key shall open them all. Nay, so curious are they in lock-work that they can contrive a lock that the master or mistress of a family sending a servant into their closets, either with the master-key or their own, can certainly tell by the lock how many times that servant has been in at any distance of time, or how many times the lock has been shot for a whole year together, some of them being made to shew it 300, 500, or 1,000 times,—nay, one of the chief workmen of the town told me he could make one that should shew it 10,000 times. Further yet, I was told of a very fine lock, made in this town, sold for 20*l.*, that had a set of chimes in it, that could go at any hour the master should think fit."

The first patent for a new lock bears date 1774, by which instrument Robert Barron, of London, secured to himself the privilege of "constructing locks in which the security was effected by fixed wards, with the addition of lifting tumblers or levers." Such is the merit of Barron's lock that it is still in great demand, as a secure and serviceable contrivance, although, since its first production, successive inventors have taken out more than one hundred and twenty patents for novel locks, of which the most important are those known by the names of their respective inventors, Bramah, Chubb, and Hobbs. Joseph Bramah's lock, patented in 1784, was for more than two generations regarded as a contrivance that would baffle the cleverest mechanic who should venture to pick it. For years a specimen of this beautiful arrangement was exhibited in the window of Mr. Bramah's shop in Piccadilly, together with this placard: "Notice.—The artist who can make an instrument that will pick or open this lock will receive two hundred guineas the moment it is produced." The reward was not claimed till 1851, when an American mechanician, named Hobbs, who had been drawn to the English metropolis by the Great Exhibition, saw the challenge, accepted it, and after a tough fight that lasted sixteen days proved victorious. The success of Mr. Hobbs not only caused lively excitement in the public mind, but for a time gave his lock a decided advantage in the market over the defeated Bramah, and also over the Chubb, which excellent lock—originally invented in 1818 by Jeremiah Chubb, and subsequently improved by Charles Chubb, Ebenezer Hunter and John Chubb—

had for more than thirty years divided public favour with Bramah's invention. That the Chubb has not lost its hold on public confidence may be inferred from the fact that "Messrs. Chubb & Son manufacture about 30,000 locks per annum, the cheapest of which is sold at 10s. nett, while many of them are worth from 2l. to 3l. each." It is almost needless to observe, that the distinctive and most valuable feature of the Chubb is its detector, i.e. the spring which renders the bolt immovable as soon as the lock is tried with a false key. Like Bramah's and Hobbs's locks, Chubb's locks are made in series, each lock having its separate key, and all the locks of a series obeying a master-key. "So extensive are the combinations," observes Mr. Tildesley, "that it would be quite practicable to make locks for all the doors of all the houses in London, with a distinct and different key to each lock, and yet there should be one master-key to pass the whole! A most complete series of locks was constructed some years ago by the late Mr. Chubb for the Westminster Bridewell. It consists of 1,100 locks, forming one series, with keys for the master, sub-master and warders."

Amongst the seats of the South Staffordshire lock trade, which supplies us with trumpery "pads" as well as unpickable "safeties," Willenhall enjoys an unenviable celebrity for the cheapness and corresponding worthlessness of her wares. There is a familiar saying that "if a Willenhall locksmith happens to let fall a lock in the process of manufacture, he does not stay to pick it up, as he can make another in less time. The late Mr. G. B. Thorneycroft, who resided at Willenhall for a time, was once taunted that some padlocks were made in Willenhall which would only lock once; but when he was told the price, namely, twopence, he replied, 'Well, it would be a shame if they *did* lock twice for that money.' The same articles are now being sold at one halfpenny each!" The average activity of the whole district is thus stated: "The total weekly production of locks in the district is estimated as follows:—Pad, 24,000 dozen; cabinet, till, and chest, 3,000 dozen; rim, dead, mortice, and draw-back, 3,000 dozen; fine plate, 1,000 dozen; and secure levered locks and other descriptions, 500 dozen; being an aggregate production of 31,500 dozens of locks per week." Of course, a large proportion of that prodigious supply is absorbed by foreign markets.

One of the best papers in the volume is the report on "The Coventry Ribbon and Watch Trades," the writer of which able contribution informs us that "the silk trade of Coventry at the present time is at once more healthy and more extensive than at any previous period." Summing up his statement of the case with respect to the weavers and the sufferings which they were called upon to endure a few years since, he says, "When the cry of Coventry distress was still ringing in the nation's ears, it was very generally believed that the disastrous condition of the ribbon trade was due to the commercial treaty then lately concluded with France. The foregoing statement shows how very small a portion of the distress was due to this cause. Foreign competition, indeed, or rather the terror of foreign competition, may have somewhat hastened the crisis; but the crisis itself was inevitable, and would have been equally disastrous had the French treaty never been concluded. On the other hand, while the direct competition of the produce of French looms can hardly be said to be felt by the Coventry manufacturer, the indirect competition produced by abolishing the restrictions on trade has undoubtedly been the mainspring of the renewal of his prosperity on

a sounder and more enduring basis." Coming from Coventry, this is cheering and noteworthy testimony.

Writing with some pleasantry on a grim subject, Mr. W. C. Aitken lays bare the secrets of the gloomy manufacture which supplies us with the fittings and ornaments of our coffins:—

"It is strange to observe the influence of taste and fashion, and even of nationality, in the character of mortuary ornamentation. The metropolitan undertaker rejects convex or raised coffin breast-plates. He patronises not 'improved' designs. He hates plates to handles, and ignores screws wherewith to fasten them so long as a nail is to be had. He abhors lace. He demands that his plates shall be of white metal. He paints not the name of the occupant on the coffin, as do our unenlightened provincial artists, but pricks it on with a punch in a series of dots on the plate, which he then smears over with black varnish. On the other hand, the Celtic taste of the green Isle of the West affects gilded ornament for the funeral chest round which the wake is held and the 'keen' chanted. The Gael and Scot and half-Cymri of the West of England also participate in the desire for gilt, although the pure Cymri of Wales prefers the magpie mixture of black and white. It is only the melancholy Anglo-Saxon who chooses the sadness of unmitigated black. The prices of coffin-furniture vary even more widely than the fashions. The pauper reposes in a coffin the mountings of which cost little more than 4d. a set. The well-to-do citizen demands adornments to the value of 8s. or 10s., while your landed gentleman or church dignitary carries mountings with him to his brick grave or family vault to the value of 5l. or 6l. sterling. Very marvellous are the designs of these adornments—these cherub-heads, bodiless but winged, though guillotined, still smiling and puffy-cheeked,—this tall damsel, trumpet in hand, about to announce the crack of doom thereon,—this disconsolate, but no less classical matron, embracing the urn over which the cypress, if indeed it be not a weeping willow, is drooping so impossibly,—these terrible pagan inverted torches, symbolic of a fire that is quenched and of nought beyond, if it be not of a fire unquenchable,—these serpents of eternity diligently engaged for ever in the mastication of their own indigestible tails,—these amorphous things that stand for the 'restful poppy,' or flowers emblematic of the frailty of life. Who shall tell how architecture—classical, gothic, and barbaric—has been ransacked to furnish the ornamentation of coffin breast, foot, and handle-plates? what heterogeneous hash of design has helped to disfigure the metallic lace! * * The blacking used is Pontypool varnish for the bright portions, the dead being a vegetable black ground with turpentine and a 'drier.' The japanning is done entirely by women, and the varnish is dried in a japanner's stove. External coffin-nails are made of cast-iron by cast-nail manufacturers, the small pins with which the lace is attached being cut in the same manner as ordinary cut-nails. More expensive varieties of mounting are made of Britannia metal or brass, occasionally electro-plated or gilt. In these the plates are cut out of sheet or Britannia metal, or sheet brass hammered, the handles being also of brass. Occasionally a set of coffin-furniture is executed in bright brass, in the mediæval style, with the shield emblazoned, &c., at a cost of from 20l. to 25l. This, however, is quite an exceptional case, the friends even of lords temporal and spiritual rarely caring to incur the additional expense. It is said that as much as from sixty to eighty tons of block tin are consumed annually in Birmingham in the manufacture of coffin-lace. The number of work-people employed in the manufacture has not been accurately ascertained, but it is stated, on good authority, to be about 150. The number of manufacturers is twelve. Girls are employed, who make from 3s. 6d. to 5s. per week. Women, as blackers, make from 10s. to 12s., payment being made by the piece. The men, who also all work by the piece, make from 18s. to 20s.; superior workmen (who cut away the surplus metal, &c.), from 20s. to 25s. or 30s.; boys, 'up' in the trade, from 5s. to 7s. per week. 'Coffin-furniture discount' has passed

into a proverb. While the old gross prices per set have remained unchanged on the manufacturer's list, competition has advanced the discounts to such an extent that the net cost generally represents considerably less than a third of the nominal charge. Far be it from us, however, to reveal the mysteries of the trade. The large consumer is entitled to stand on a better footing than the retailer, and the retailer than the public."

With lugubrious jocosity, the editor remarks that he makes Mr. Aitken's contribution the concluding article of the volume, because it appears to him that a paper on coffin furniture "not inappropriately ushers in—the end."

The Æneid of Virgil. Translated into English Verse by John Conington, M.A. (Longmans & Co.)

THE great extent to which translation from the ancient classics has been practised and discussed of late is a striking and gratifying feature of our present literature. Within the last two or three years English versions of Homer in almost every possible variety of metre and manner have sprung up, and a new one in hexameter verse by Sir John Herschel has been announced as on the eve of publication. The Greek tragedians also and the Latin poets, with the strange exception of Virgil, have been recently presented to English readers. But numerous, and in some instances successful, as these efforts have been, a translation by so accurate and accomplished a scholar as Prof. Conington must always be welcome, more especially when, as in the present case, the original author happens to have been passed over by others, and to have been the translator's special study. Hence we think it was scarcely necessary for him to make any sort of apology for his translation of the *Æneid*; and yet his remarks are so just that we are tempted to quote them:—

"It may be said that the great works of antiquity require to be translated afresh from time to time, in order to preserve their interest as part of modern literary culture. Each age will naturally think that it understands an author whom it studies better than the ages which have gone before it: and it is natural that this increased appreciation should take the concrete form of a new translation. The translation, if in any degree successful, will contribute in its turn to extend and deepen the appreciation. It is not merely that different passages will be better understood as criticism advances, though that is something: it is that the work itself is better comprehended as a literary work; that the poet's art is more fully realized, as shown in the thousand minutiae which make the poem what it is. A translation, as I have elsewhere remarked, may have as a piece of embodied criticism a value which it would not possess in virtue of its intrinsic merit. Again, there is something in the mere fact of novelty; something in disturbing the cluster of conventional associations which gathers round an author, and compelling the reader to regard what he has hitherto admired traditionally from a new point of view. It is well that we should know how our ancestors of the Revolution period conceived of Virgil: it is well that we should be obliged consciously to realize how we conceive of him ourselves."

The metre which Prof. Conington has selected is the octosyllabic ballad-epic of Scott and Byron, the former rather than the latter being his model, and 'The Lord of the Isles' rather than 'The Lady of the Lake.' With the late Mr. Worsley, he considers blank verse, really worthy of the name, beyond the reach of more than one or two distinguished authors in a generation. He shuns the heroic couplet from a dislike of coming into comparison with Dryden, and does not think it worth while even to mention the hexameter. Of course, as he observes, in deciding upon a metre the translator should consider not only what is abstractedly the best,

but what is best adapted to him. His chief reason for preferring the ballad-epic measure seems to have been its "rapidity of movement, which is indispensably necessary to a long narrative poem." No metre, he thinks, can be suitable which does not afford the translator a prospect of sustaining the interest of the reader. To this doctrine few would demur; but it must not be forgotten that there are other qualities essential to an adequate rendering of an epic poem like the *Æneid*; and the question is, whether the measure Prof. Conington has adopted is a suitable vehicle for these. With all its advantages of rapidity, liveliness, and variety, it lacks the breadth, weight, and dignity requisite to express the grandeur of Virgil. Its movement is too light and tripping to represent the majestic march of his elaborate verse. It partakes too much of the ballad and too little of the epic. What Mr. Arnold calls the grand style, and claims for Homer as one of his chief characteristics, distinguishes Virgil in a high degree, and is of the very essence of epic poetry. If an epic poem is not grand, it is nothing. Now it appears to us that the octosyllabic metre of Scott is, from its structure alone, unsuitable for the grand style, as well as from its modern origin and its associations with a state of society and species of character very different from those depicted in the *Æneid*. Prof. Conington, in the Preface to his verse translations of Horace's Odes, mentioned "some kind of metrical conformity" to the original as the first requisite of a successful translation of a Latin poet. "Without this," he added, "we are in danger of losing not only the metrical, but the general effect of the Latin; we express ourselves in a different compass, and the character of the expression is altered accordingly." This is just what we mean; and we are not surprised to find him confessing that, in the course of his work, he could not help feeling the difference between poetry like Scott's and that of Virgil, and that consequently he has been obliged to deviate from his model in order to express the original more aptly and effectively.

It appears to us that the metre which in our language most nearly corresponds to the Virgilian hexameter, is heroic blank verse, after the manner of Milton or Cowper's Homer. If, however, this must be avoided, because Miltons and Cowpers are not to be met with every day, and the charm of rhyme is considered necessary to enliven the narration and relieve the work from any tendency to dullness, we should give our vote in favour of the heroic couplet adopted by Pope and Dryden, whose example would seem in itself a strong recommendation, though it appears to have operated as a deterrent upon Prof. Conington. As he could not muster up courage enough to run the risk of a comparison with Dryden, we think the Spenserian stanza in which he is announced to be completing Worsley's *Iliad*, might have been employed for the *Æneid* with advantage. There is, no doubt, some truth in his remarks as to the greater difficulty of adapting this measure to the rhetorical structure of Virgil's composition than to the simple and easy flow of Homer's verse; but Worsley's success with his Homer is at least sufficient to prove that there is nothing in the stanza itself to disqualify it as a representative of epic hexameter verse. Without, however, indulging in useless regrets for what has not been done, or vain conjectures as to what might have been accomplished, let us rather be thankful for so delightful a translation as Prof. Conington has produced. In faithful accuracy of rendering, the prime requisite, he may, without presumption, claim a superiority over preceding metrical

translators. Having had occasion, in preparing his commentary upon Virgil, to study closely the meaning of every word, with all the aids of modern scholarship, it would be strange indeed if he had not obtained a more thorough insight into the original than others less favourably situated. Those who are conversant with the original cannot but observe the frequent felicity with which the precise shade of meaning is brought out. But Prof. Conington's version, besides being a faithful copy of the original, has all the freshness, life and beauty of genuine poetry. Polished without coldness, easy without tameness, the verse flows on with lively rapidity, varying in its measure with the changing tone and cadence of the original, always charming, and, if not always grand, never mean. As we are enticed on and on by its magic music, we begin to doubt whether, after all, upon the principle that "whate'er is best administered is best," Prof. Conington has not chosen the best metre; and it is only when we compare the general impression left upon the mind with our recollection of the original, that we are conscious of that deficiency in weight and dignity to which we have referred.

Amid so many beautiful passages we are almost at a loss which to choose. We cannot be wrong in extracting the following from the episode of Nisus and Euryalus in the ninth book:—

Meanwhile a troop is on its way,
From Latium's city sped,
An offshoot from the host that lay
Along the plain in close array,
Three hundred horsemen, sent to bring
A message back to Turnus king,
With Volscens at their head.
Now to the camp they draw them nigh,
Beneath the rampart's height,
When from afar the twain they spy,
Still steering from the right;
The helmet through the glimmering shade
At once the unwary boy betrayed,
Seen in the moon's full light.
Not lost the sight on jealous eyes:
"Ho! stand! who are ye?" Volscens cries:
"Whence come, or whither tend?"
No movement deign they of reply,
But swifter to the forest fly.
And make the night their friend.
With fatal speed the mounted foes
Each avenue as with network close,
And every outlet bar.
It was a forest bristling grim
With shade of ilex, dense and dim:
Thick brushwood all the ground o'ergrew:
The tangled ways a path ran through,
Faint glimmering like a star.
The darkling boughs, the cumbering prey
Euryalus's flight delay:
His courage fails, his footsteps stray:
But Nisus onward flees;
No thought he takes, till now at last
The enemy is all o'erpast,
E'en at the grove, since Alban called,
Where then Latinus' herds were stalled:
Sudden he pauses, looks behind
In eager hope his friend to find:
In vain; no friend he sees.
"Euryalus, my chiefest care,
Where left I you, unhappy? where?
What clue may guide my erring tread
This leafy labyrinth back to thread?"
Then, noting each remembered track,
He thrills the wood, dim-seen and black.
Listening, he hears the horse-hoofs' beat,
The clatter of pursuing feet:
A little moment—shouts arise,
And lo! Euryalus he spies,
Whom now the foemen's gathered throng
Is hurrying helplessly along,
While vain resistance he essays,
Trapped by false night and treacherous ways.
What should he do? what force employ
To rescue the beloved boy?
Plunge through the spears that line the wood,
And death and glory win with blood?
Not unresolving, he poises soon
A javelin, looking to the Moon:
"Grant, goddess, grant thy present aid,
Queen of the stars, Latonian maid,
The greenwood's guardian power;
If, grateful for success of mine,
With gifts my sire has graced thy shrine,
If e'er myself have brought thee spoil,
The tribute of my hunter's toil,
To ornament thy roof divine,
Or glitter on thy tower,
These masses give me to confound,
And guide through air my random wound."

He spoke, and hurled with all his might;
The swift spear hurtles through the night:
Stout Sulmo's back the stroke receives:
The wood, though snapped, the midriff cleaves.
He falls, disgorging life's warm tide,
And long-drawn sobs distend his side.
All gaze around: another spear
The avenger levels from his ear,
And launches on the sky.
Tagus lies pierced through temples twain,
The dart deep buried in his brain.
Fierce Volscens storms, yet finds no foe,
Nor sees the hand that dealt the blow,
Nor knows on whom to fly.
"Your heart's warm blood for both shall pay,"
He cries, and on his beautiful prey
With naked sword he sprang.
Scared, maddened, Nisus shrieks aloud:
No more he hides in night's dark shroud,
Nor bears the overwhelming pang:
"Me, guilty me, make me your aim,
O Rutules! mine is all the blame;
He did no wrong, nor e'er could do;
That sky, those stars attest 'tis true:
Love for his friend too freely shown,
This was his crime, and this alone."
In vain he spoke: the sword, fierce driven,
That alabaster breast had riven,
Down falls Euryalus, and lies
In death's enthralling agonies:
Blood trickles o'er his limbs of snow:
"His head sinks gradually low:"
Thus, severed by the ruthless plough,
Dim fades a purple flower:
Their weary necks so poppies bow,
O'erladen by the shower.
But Nisus on the midnight flies,
With Volscens, Volscens in his eyes:
In clouds the warriors round him rise,
Thick hailing blow on blow:
Yet on he bears, no stint, no stay:
Like thunderbolt his falchion's sway:
Till as for aid the Rutule shrieks
Plunged in his throat the weapon reeks:
The dying hand has reft away
The life-blood of its foe.
Then, pierced to death, asleep he fell
On the dead breast he loved so well.

Want of space compels us to omit many passages that we had marked, but we must give the description of Rumour, in the fourth book:

Now through the towns of Libya's sons
Her progress Fame begins,
Fame than who never plague that runs
Its way more swiftly wins:
Her very motion lends her power:
She flies and waxes every hour.
At first she shrinks, and cowers for dread:
Ere long she soars on high:
Upon the ground she plants her tread,
Her forehead in the sky.
Wroth with Olympus, parent Earth
Brought forth the monster to the light,
Last daughter of the giant birth,
With feet and rapid wings for flight.
Huge, terrible, gigantic Fame!
For every plume that clothes her frame
An eye beneath the feather peeps,
A tongue rings loud, an ear upsleaps.
Hurling 'twixt earth and heaven she flies
By night, nor bows to sleep her eyes:
Perched on a roof or tower by day
She fills great cities with dismay:
How oft so'er the truth she tell,
She loves a falsehood all too well.
Such run from town to town she flew
With rumours mixed of false and true:
Tells of Æneas come to land,
Whom Dido graces with her hand:
Now, lost to shame, the enamoured pair
The winter in soft dalliance wear,
Nor turn their passion-blinded eyes
On kingdoms rising or to rise.
Such viperous seed where'er she goes,
On tongue and lip the goddess sows:
Then seizes Iarbas, stirs his ire,
And fans resentment into fire.

It will be observed that in the third line the words "*than who*" occur. We noticed them elsewhere also, but as they came at the end of a line, and the word *who* was wanted to make the rhyme, we took less notice of the peculiarity. In this case we cannot see why *whom* should not have been employed, according to the idiom of our language. We have noticed a few other blemishes, as might be expected in the course of so many lines; but they are too trifling to be worth specifying. Unless we are greatly mistaken, this translation will prove more popular with English readers than Dryden's, which was by no means his happiest effort, while its greater closeness to the original must certainly render it more acceptable to classical scholars.

A General Survey of the History of the Canon of the New Testament. By B. F. Westcott, B.D. (Macmillan & Co.)

THE question of the evidences of Christianity has changed its aspect of late years. What is called the external evidence was relied upon in the time of Lardner, and still later in that of Paley, as the main proof of the divine origin of Christianity. Miracles and prophecy were adduced to confront and convict gainsayers. The testimony of early writers, and even of heretics, was carefully collected for the purpose of showing the early origin of the New Testament writings, and their general reception as authoritative by the Christian churches. Less importance was attached to the characteristic features of the books themselves. At the present day the question turns on internal evidence derived from the sacred volume. What evidence of authenticity and genuineness does the New Testament itself present? The right method seems to lie in a proper combination of the two. When they appear to clash, as is sometimes the case, the internal should outweigh the external.

The volume before us suggests to the mind the recent works of Reuss and Credner, both learned and valuable. It fills a place in English literature similar to theirs in French and German respectively. When we say that it is worthy to be put beside them, our estimate of its excellence is at once indicated. The literature of the subject has been mastered by the author. His learning is extensive and varied. His materials are lucidly arranged. He indulges in no rash hypotheses, but exhibits a sober judgment which commends his conclusions to the acceptance of the reader. The book is comprehensive and complete. The student who dispenses with it must possess several others in different languages to supply its place; and even then he will be under the disadvantage of not knowing what Mr. Westcott says. The opinion of such a scholar on a subject which he has long studied is worth knowing.

It is very probable that our estimate of the value of the evidence collected by the writer differs from his; for, after all, the true character of the sacred books must be tested in another way and settled on another basis. A history of the Canon of the New Testament like the present one does not go to the root of the great questions which are being agitated at the present day. It does little else than touch their borders. Those who are cognizant of the critical discussions through which the Gospels, for example, have passed in recent times, know well that a survey of the history of the canonical books which gathers up all the evidence favourable to their early origin cannot reach up to the very time of the authors themselves, nor even to a period near enough to preclude the rise of difficulties that interfere with the question of authenticity, if they do not unsettle it altogether.

There are two essays in the volume that touch upon points of chief importance in relation to the whole subject: those in Appendices A and B. But the author throws little light upon them, and seems disinclined to their thorough examination. By what criterion did the persons or churches who first admitted a book as sacred, inspired, authoritative, judge of it? What was the precise test applied in the separation of the early literature into canonical and apocryphal? Did various considerations enter into that test, or only one thing? This is the fundamental topic upon which the student will find little satisfaction in the present book. The author is at home in the collection and marshalling of authorities witnessing to the early existence and influence of the New Testament books; but he seems incompetent to the discussion of ulterior

and more momentous points which involve the higher criticism. His mind is essentially conservative; and it is certain that he would disapprove of the application of "the verifying faculty" in the way which the 'Essays and Reviews' exhibited it.

It cannot be said that Mr. Westcott has exhausted the subject. He has discussed but one part of it, and that the easiest. What he has undertaken is well done; what remains must be left to some other and bolder scholar, uniting speculative ability with comprehensive scholarship.

Much attention has been paid by the author to the writings of Justin Martyr and the citations from Scripture contained in them. The topic had been discussed by several eminent critics before, especially by Credner. In the interval between the present edition and the first, Hilgenfeld had investigated it. We cannot help thinking, that Mr. Westcott might have got hints and suggestions in the latter author that would have corrected and modified some of his statements. And he is evidently unacquainted with Zeller's copious discussion of all the passages in Justin having any resemblance to the Gospel of John, in the 'Theologische Jahrbücher' for 1845. Hence the short paragraph on page 145 and the accompanying note are unsatisfactory, conveying an opinion which cannot be made probable. The Logos doctrine of Justin effectually neutralizes the paragraph as far as it relates to John; and it is illogical to infer, as our author does in the note, that Justin's acquaintance with the Valentinians proves his knowledge of the fourth Gospel.

"Though Marcion only used St. Luke's Gospel, it appears that he was acquainted with the others." This is an easy way of disposing of the question. Instead of showing the probability of an opinion, it is simply stated. All the evidence goes to show that Marcion knew nothing of the fourth Gospel. Among the most important essays on Marcion's gospel mentioned by Mr. Westcott, he should not have neglected that of Baur, which adopts the same view as Ritschl's,—a view disproved by Volkmar.

The account of Tatian's Harmony given by Mr. Westcott is another example of loose statement of evidence and illogical reasoning. We do not indeed agree with all that Credner says of it, though several of his statements are more correct than those given here; but he is right in saying that there is no Syrian authority for the assertion of Bar Salibi that Tatian's work commenced with the first words of John's Gospel. Probably Ammonius's Harmony did so. No reliance can be placed on Eusebius's attribution of the title to Tatian himself; indeed the language of Epiphanius implies that it did not proceed from the author. Yet Westcott reasons from the assumption that the title was given from Tatian.

In like manner there are baseless assertions respecting Basilides and Valentinus quoting some of the gospels, which can only have arisen from superficial acquaintance with the work of Hippolytus, upon which they are founded. The whole context of these supposed citations shows that no reliance can be placed on them. Mr. Westcott has not been careful enough in several minute critical points which are of considerable importance; or at least he has not looked at the side of them unfavourable to his own views. We observe, however, that he is silent respecting the apocryphal work 'The Acts of Pilate,' on which Tischendorf has laid so much stress in his declamatory pamphlet. Here we commend his judgment. In most of our author's statements we are glad to coincide with him, valuing, as we do, his researches highly; but in

several instances he has gone beyond evidence, and assumes what is incapable of proof. This arises, in part at least, from the fact that he is better acquainted with the literature of the subject proceeding from the more conservative theologians than with that of the negative critics. But his mind is essentially objective; and wherever external evidence requires to be handled by the help of a high critical faculty, he is apt to fail.

Our Hymns: their Authors and Origin. Being Biographical Sketches of nearly Two Hundred of the Principal Psalm and Hymn-Writers, with Notes on their Psalms and Hymns. A Companion to the New Congregational Hymn-Book. By Josiah Miller, M.A. (Jackson, Walford & Hodder.)

THE number of foolish books on the subject of hymns has been large of late years. This makes a welcome for a volume such as the one under notice naturally cordial. In nothing (all doctrinal differences allowed for) are bad taste and puerility less supportable than in the services of the Temple. Let them take the frippery fashion of a performed ritualism, dependent on colours, clothes, postures and tones for its effect,—let them come noisily forth, in the coarse displays of Congregational excitement,—they are alike irreverent, because they suggest the devices of man rather than the glory, awe and mercy of Divinity. This choir of poets, nearly a couple of hundred strong, is ushered in by a prefatory essay, which is in most respects satisfactory. The editor, however, broaches one opinion which seems to us dangerous, to say the least of it. He defends the alteration of hymns, not merely as excusable, but in some cases as necessary. We have been used to think that meddling meant anything rather than mending. There are enough and to spare of noble sacred lyrics, in which the whole body of worshippers can unite,—enough of those (so to say) special and dogmatic breathings of prayer and praise, which suit persons who demand that their own precise interpretation should be represented in every word they say and sing—to make a Congregational hymn-book comprehensive and satisfying,—without any devout poet's strains being tampered with. Mr. Miller may rest assured that the most devout and the most poetical of hymn-writers would abstain most scrupulously from fanciful amendment. Keble would never have laid hands on the work of Watts; Heber would not have re-touched the Olney Hymns. Such practices have been the most largely encouraged by the eccentric, the illiterate, the bigoted, or the lovers of "immediate sensation,"—by such a man, for instance, as Rowland Hill, who spiced his sermons with good stories, who made a foray into the Evil One's playground by bringing the roaring, ranting tunes found effective in "the pit" into the Temple of the Most High, and who died, we are told, with such a piece of doggerel as the following (passing with him, for celestial poetry) on his lips:—

"And when I'm to die,
Receive me, I'll cry,
For Jesus hath lov'd me, I cannot tell why;
But this I can find,
We two are so join'd,
He'll not be in glory and leave me behind."

Mr. Miller is unfortunate in the illustration, by aid of which he defends his argument:—

"To attempt such a thing while the author is still living, and without consulting him, would indeed be an impertinence. But the time comes when, if such alteration be carried out judiciously, and in the spirit of the original author, and by those who are themselves hymn-writers, as it has been by the Wealeys, Montgomery, and others, it

may be a positive advantage to the productions of the original author, and to all who use them; just as an ancient cathedral, the magnificent design of some master builder of old, but whose details were not elaborated in his day, and whose lines of beauty are beginning to be effaced by the fingers of decay, may be successfully restored, and may at the same time put on a splendour the first designer never saw, by the toil and skill of humbler labourers of later times."

It was during a time of vulgarity, indifference and disrespect, that the restorers of our "ancient cathedrals" altered them,—could palm a Palladian front on a Norman building, and displace the rigid Gothic rood-screen in favour of some dropical composition of cherubs' heads and husk garlands and composite pillars and festoons of towel drapery. We know better now than to play such tricks with our ecclesiastical buildings. Why, then, should not the noble ancient verses, in which we are so rich, be also left untouched, not therefore alone in their glory? No singer, whatever might be his horticultural predilections, would venture to change "the last Rose" for

the last Pink of Summer.

The example is a purposely familiar one; not, therefore, inapplicable. But the caution we insist on can only be partially extended to musical strains; these having in their melody a vagueness of expression which precludes finality. A phrase is entirely transformed by being played fast or slow. "Scots wha hae" (one of the finest battle-tunes in being) is identical with the pathetic 'Land o' the Leal,' one of the most touching death-melodies existing. Meanwhile, it is only the fingers of the feeble that long to disturb what their betters have done in the matter of sacred verse,—to lay hold of Calvin and dip him anew in the font of Arminius or of Socinus, and press him into the service of the Trinity,—or to change (as we have heard done) the magnificent 'Stabat Mater' of the Romish rite for a safer and less compromising 'Stabat Pater.' Leave to each section of Christian faith its own forms of worship, is our motto. Prevail not on the Quakers to sing; for with those grave, quiet folk, Music was, and is still, according to their Book of Extracts, a hissing and a reproach. Neither compel congregations desiring organs (as was said not long ago, in reference to the thunderous Dr. Begg) to sit and join in a disorganized psalmody. The world is wide; human interpretation is not infallible; still less human efforts "to add and to take," as the lawyers say,—to make every one kneel down in "my" way, and to prescribe to "your" voice, what is, more or less, safe to say. These considerations are not merely literary, they belong to the wide question of authority and private judgment, not till now, and never to the end of time, set, or to be set, at rest.

A special note or two may now be offered to those who turn over the pages of this

Companion to the New Congregational Hymn-Book. With the great Greek hymn-writers, who open it, we will not intermeddle. Their work is awkwardly represented by translation. But so early as page 5, in the article on "David Dickson" (1583—1662), we find a support of our remarks,—such as Mr. Miller cannot have adverted to when he laid down the law in his Preface. This David Dickson, says our author, "is but one of the numerous poets who have found in the ancient Latin hymn, probably of the eighth century, a fount of Christian song." * * The early Latin hymn, as given by Daniel in his 'Thesaurus Hymnologicus,' consists of forty-eight lines, and begins—

Urbs beata Hierusalem,
Dicta pacis visio.

The Latin writer, whose date and name have not been discovered, favoured by the language in which he wrote, has written with a compression and a

force which we miss in the more diffuse productions of later times. Dr. Mason Neale, referring to the Latin form this hymn had taken in the beginning of the seventeenth century, says, 'This grand hymn of the eighth century was modernized in the reform of Pope Urban VIII. into the 'Coelestis urbs Jerusalem,' and lost half of its beauty in the process.'

* * The discovery of an earlier work containing this hymn has destroyed Dickson's claim. This work is a book of religious songs, in the British Museum, No. 15,225. Dr. Bonar, who has treated this subject very fully in his valuable contribution to hymnology, 'The New Jerusalem,' 1852, shows, from internal evidence, that this book was probably not published prior to 1616, when Dickson had attained to manhood, so that the date does not destroy his claim. But the work consists of poems of a much earlier date; and the hymn is ascribed, not to Dickson, but it is entitled 'A Song made by F. B. P., to the tune of Diana.' It is a different piece, consisting of only 104 lines, and beginning, 'Hierusalem, my happy home!' It has traces of a Popish origin, while Dickson's appears to be an expansion of it with Presbyterian modifications. 'Our Ladie sings Magnificat,' in the original, becomes, in Dickson's piece, 'There Mary sings Magnificat.'

"The tune of Diana"! This statement is offered to those who have been trying lately to raise a Christian storm in vindication of the origin of the once Romish, now Protestant, church chants, as something unsuggested, pertinent, original, owing nothing to the Pagan altar, and altogether and for ever unsurpassable!—folk who forget Charon's boat in the Last Judgment mosaic at Torcello, and other symbols, more grossly sensual and pagan, which were to be seen, within this century, over the altars of churches in Southern Italy.

When we come nearer to our own time among our hymn-writers, such as Sandys, and Wither, and Milton, and Baxter (passing glorious John Dryden as more showy than substantial), and Bishop Ken, we breathe a higher—may we not say a diviner?—air of Poetry; and not merely this, but an atmosphere which assorts better with our English forms of congregational worship. The difference, we cannot but conceive, will at once be felt, if we compare the massive, simple specimens which our great men have bequeathed to the Church with such high-flown and sentimental breathings as those of Madame Guyon, which have, disproportionately we think, engaged the sympathies of some of our devout countrymen; among these, no less real a poet than Cowper. Apart from every consideration of their poetical merits, the wide and, to our thinking, clear difference which separates the Roman Catholic from the Reformed hymnology has yet to be traced. And any writer bent on the task would find a rich field of minute speculation, not merely in the dogmas, but in the very forms of the sacred songs contributed to the worship of Dissenters; in their boldness, in their familiarity, in an occasional rude and uncultivated grandeur, owing little to school and college,—owing everything to the strong and resolute faith of those who impress hearts and consciences because their own have been impressed. With all their errors in taste, and their absence of such a refined and reserved spirit of meditation as is carried to its extremest expression in Keble's 'Christian Year,' the Methodist and Baptist hymns form a group noticeable for its power no less than its beauty. We are rid, in them, of the subduing and enervating fumes of incense, not, it may be, without having gained in vigour what we have lost in artistic seduction and polish.

Enough has been said to indicate our judgment of this book as one more than ordinarily suggestive, and carefully executed. Some of the specimens, it is true, are more curious than

beautiful; as, for instance, the following, from one of Mrs. Voke's "pleasing missionary hymns":—

When Jesus on the cross was lifted high,
O, was there no Tabethan in His eye!

How an editor who could so justly appreciate Miss Parr's ("Holme Lee") touching song, judiciously transferred to these pages from 'The Wreck of the Golden Mary,'—how one who could overlook some of the grandest lyrics of Scott, and Joanna Baillie, and Byron, and Hemans, and latest, yet not least lovely, Adelaide Procter's delicious 'Evening Hymn,'—could fancy such a ridiculous sacred frisk as the above endurable, is among the inconsistencies which prove that an editor, be he even as sedulous as Mr. Miller, is, after all, a man, and mortal. He must perceive, we think, that we find his work one meriting respect and kindly attention.

The Works of Epictetus. Consisting of his Discourses, in Four Books, the Enchiridion and Fragments. A Translation from the Greek, based on that of Elizabeth Carter, by Thomas Wentworth Higginson. (Boston, U.S., Little & Co.)

"Bear and forbear" was the favourite maxim of Epictetus, the great Stoic philosopher in Rome under the Empire; and this he deemed to be the great practical rule of human life. To what extent the people of the United States of America have of late years shown themselves to be governed by this principle, above all others, it is neither our province nor our purpose to inquire. In the present instance, however, we have one at least of their number, and one, too, comparatively fresh from the frightful realities of civil strife, whom we have every reason to suppose to be a warm, perhaps an enthusiastic, admirer of the stern and unflinching precepts of Stoicism, as they have been enunciated by the patient and all-enduring Phrygian, the slave-philosopher. "It has not seemed to me strange," Mr. Higginson says, "but very natural, to pass from camp life to the study of Epictetus. Where should a student find contentment in enforced withdrawal from active service, if not in 'the still air of delightful studies'? There seemed a special appropriateness, also, in coming to this work from a camp of coloured soldiers, whose great exemplar, Toussaint l'Ouverture, made the works of this his fellow-slave a favourite manual. Moreover, the return of peace seems a fitting time to call anew the public attention to those eternal principles on which alone true prosperity is based: and in a period of increasing religious toleration, to revive the voice of one who bore witness to the highest spiritual truths, ere the present sects were born."

In revising the last-century translation of "Mistress Elizabeth Carter"—she died unmarried—a work which already had the reputation of coming from the pen of a writer whom Dr. Johnson pronounced to be the best Greek scholar of England in his time, Mr. Higginson has had an excellent foundation, and comparatively little heavy work on his hands. That little, however, he seems to have done carefully and successfully; he has illustrated and explained some few passages which the learned lady, his predecessor, had left in more or less obscurity; and in several instances has traced quotations to their original authorities, which she had either neglected to point out, or had failed to discover. To what extent he may have been indebted to Schweighæuser, in the latter respect, not having that edition at hand, we will not undertake to say. The book is put before us in a pleasing form; printed upon excellent wire-wove paper, and in

the brilliant type of the Cambridge University Press (U.S.), it may take its place, without any fear of disparagement, by the side of the best printed English volumes of the present day.

Of Epictetus himself very little is known. A native of Hierapolis, in Phrygia, and born in the later years of Nero's reign, in early life he was the slave of one Epaphroditus, who had himself been a freedman of Nero, and one of his body-guard. That Epaphroditus treated his bondman with great cruelty there is every reason to believe. Freed at length from the control of his master—how, is now unknown—upon the banishment of the Philosophers in the eighth year of Domitian's reign, A.D. 89, he left Rome for Nicopolis, in Epirus, where he continued to teach philosophy till his death, at some unknown period, in probably the first half of the second century. Poverty seems to have been his companion through life, and extreme lameness throughout at least the greater part of it. He does not appear to have ever written anything himself. His Discourses were taken down by his pupil, Arrian, and published after his death, in either six or eight books (the accounts differ), of which but four survive. These, with his *Enchiridion*, Manual or Handbook of Morals, and a few fragments gathered from various writers, are the only memorials of him that we now possess.

It has been very much the fashion for the last two centuries to quote the philosophy taught by Epictetus as essentially a "practical" philosophy. There is, no doubt, a great deal of high and refined morality to be found in it; amounting, in fact, to real religion, in the Scriptural sense of the word. But, on the other hand, there is very much in his code, we feel bound to say, that to man, as living not for himself only, but as a member of society—whether the society of the days of Epictetus or of the present day makes no difference—is altogether unpractical—if we may be allowed to coin the word—unsuited, in fact, to human nature, as it is and always will be. Wedded to the theory of contentment with things as they are, and perfect resignation to things as they may be—almost to downright apathy, as it seems to us—the Philosopher is for ever inculcating regardlessness of externals; the result being, that outward circumstances are not to have any effect whatever in shaping our rule of life. Even here, however, though unbending, he is not selfish; but his principles, if carried out, would expose society to even more dangers than if he were so. So far would he be from unduly pressing for proselytes, that he absolutely sues for immunity, and not punishment, for every evil-doer (thieves and robbers for example, p. 54), on the assumption that the very fact of his evil-doing of necessity implies that he does not know what is evil, and that if he cannot be converted to a knowledge of what is really good, he must be let alone; the fault really being with those who put a fictitious value upon the beauty and virtue which he violates, or the property which he steals! It seems hardly necessary to remark that, were such a doctrine as this to have full scope, the whole earth would very soon be but scantily peopled, and that with savages only, and its face reduced to a hideous wilderness. Briefly to sum up our opinion of the contents of these treatises,—much of the morality which they teach us is sound and unimpeachable, and not a little of it impracticable. A good deal, too, of the matter in them is so obscurely expressed, or so ill preserved, as to be all but unintelligible; while, again, we meet with some passages that are in the nature of truisms, mawkish and insipid.

Great as were his powers of endurance, and

extreme as was his forbearance, the philosopher seems to have been much like other men, after all. When the opportunity offered, he could not resist having a fling at the master who had formerly owned him, and to whose wanton cruelty, according to the story preserved by Origen, he was indebted for his broken limb. Thus, for example, as an illustration of "flunkeyism," as we suppose Mr. Higginson would call it (see page 59), he tells us that—

"Epaphroditus owned a shoemaker (as a slave), whom, because he was good for nothing, he sold. This very fellow, being by some strange luck bought by a courtier, became shoemaker to Cæsar. Then you might have seen how Epaphroditus honoured him. 'How is good Felicio, pray?' And if any of us asked what the great man himself was about, it was answered, 'He is consulting about affairs with Felicio.' Did he not tell him previously as good for nothing? Who, then, has all on a sudden made a wise man of him? This it is to reverence externals."

Again, when speaking of wealth-worship:—

"I once saw a person weeping and embracing the knees of Epaphroditus, and deploring his hard fortune, that he had not more than 150,000 drachmæ left. What said Epaphroditus then? Did he laugh at him, as we should do? No, but cried out with astonishment, 'Poor man! how could you be silent under it? How could you bear it!'"

The half a thousand pages which Mr. Higginson's comely volume contains can hardly fail to afford something to the taste, and very possibly the edification, of each and every of the many readers it deserves to gain.

Travels in France and Germany in 1865 and 1866; including a Steam Voyage down the Danube, and a Ride across the Mountains of European Turkey from Belgrade to Montenegro. By Capt. Spencer. 2 vols. (Hurst & Blackett.)

Two volumes were hardly needed to tell us that British sight-seers began travelling on the Continent immediately after the downfall of the first Napoleon, and that steam has shared with our long exemption from the calamities of war in causing general progress both in Europe and Asia. Lighting upon such an exordium as this, we know pretty well what we are to expect from Capt. Spencer. We are bound to say that he never deceives us. The whole of his book—with, perhaps the exception of the latter part, relating to tracks less beaten and countries less familiar—bears out the promise of his opening platitudes. Capt. Spencer seems to have crossed France and Germany with his eyes shut and his ears open. He has reversed Sir Henry Wotton's maxim, and kept his looks close and his thoughts loose. Instead of telling us what he saw in Paris and Carlsruhe and Munich and Vienna, he gives us wordy conversations he held with natives; and he seems to have exercised remarkable sagacity in picking out natives who had nothing to say about their own country. The gossip he overhears is of that sort which commercial travellers are full of at the mid-day *tables d'hôte* of Germany. No doubt it is amusing to an English traveller to hear that the ruler of some small country is unpopular, and that the Queen has too much to say in state questions. We know many men who think they have lighted on wonderful revelations when they hear what the Emperor of the French said at dinner, or what the King of Bavaria did when he received a new *attaché*. A book made up of such things might be amusing, though it would be scandalous. But then the composition of it must not be entrusted to Capt. Spencer, who merely hints at what he ought to tell, and leaves out the points that would give a value to his stories.

Those happy readers who have the facility of skipping will, perhaps, think us unnecessarily harsh. They will have jumped over all the disquisitions, all the long speeches which tell them nothing, and have lighted on scraps of personal experience, told fluently if not gracefully, and in a style which does not hobble, although it is slipshod. One long story about a swindler will impress them favourably, though they will not believe it. They will not care to inquire how far it is true that the French character is given to despotisms and systematizing, and that with the French anything approaching to perfection must be organized according to a given system, which is only another name for servility. They will not be impressed by Capt. Spencer's horror at centralization, and his discovery that the adoption of it has reduced the French to the condition of children in leading-strings. But the critic who reads Mr. Spencer's book with an eye to its merits, and does not merely skim through it for half-an-hour's amusement, cannot fail to notice these points, and to rate the book accordingly.

It would not be worth our while to enter into the details which have led us to this conclusion. We may perhaps observe that Capt. Spencer is as inaccurate in small things as he is incapable of grasping those of greater moment. He tells us, for instance, that the system of railway travelling in Germany is much better than in France,—“You are not driven about and penned up like a flock of sheep until the moment arrives to let you loose; you are as free to move about and take your seat in a carriage as in England.” If this is Capt. Spencer's experience, he was exceptionally favoured. For ourselves, we have travelled a good deal in Germany on all the main lines, and the despotism of the guards was generally most offensive. We never found any station where the waiting-room was not locked up till a certain time before the train started. When the passengers were let out, they were always made to fill one carriage after another, and no one was allowed his choice between a compartment with all the corners taken, and an empty one just beside it.

Speaking of Munich, Capt. Spencer says that King Louis entertained a decided predilection for the glorious works left to us by the ancient Greeks, and it is therefore not surprising that “whatever noble building you meet with in Munich, having on it the gloss of newness, is certain to be modelled after one of these. Perhaps the circumstance that his favourite son, Otho, was crowned King of Greece, may have contributed to strengthen this predilection.” Now of all the new buildings in Munich, there are only three in the Grecian style, and two Grecian gates. One of the gates was professedly built in honour of King Otho; but the chief Grecian building was begun by King Louis before he mounted the throne, and was completed before the crown of Greece was offered to Prince Leopold of Saxe-Coburg. King Louis was much more universal in his tastes than he is represented by Capt. Spencer.

Again, Capt. Spencer lays great stress on an extract from the *Allgemeine Zeitung* against the over-abundance of monastic establishments. He tells us that this is written by a liberal Roman Catholic, which, of course, adds to its value. But as he gives us no authority for his statement, we are not certain if he knows that the paper in question is edited by Protestants, and has a great many writers of that persuasion. We can hardly say what is to be made of such a sentence as, “Among the nonsense that has issued from the German press on this subject, Wolfgang Menzel is the only writer worth quoting.” Does Capt. Spencer mean that

Wolfgang Menzel writes the most signal nonsense, or that he is the only one who does not write nonsense? The two things have not quite the same meaning.

When Capt. Spencer brings us to Erdöd, where you do not pay for wine if you eat anything with it, and very little for the food itself; or to the Servian forests with their stock of wild game; or to the yet remoter scenes which he traversed on horseback; we find him fairly pleasant. The following extract shows him at his best:—

"We had now entered one of those magnificent forests so frequently met with in this part of Servia. Gigantic oaks, several centuries old, threw their wide-spreading branches over our heads, forming a canopy of foliage, so dense as nearly to exclude the light of day. As we trotted along we had for our companions immense flocks of starlings and wood-pigeons, whose incessant chattering and cooing served to relieve the solitude; and that we should not want for excitement, a lynx, a stealthy fox, or a wolf now and then crossed our path, while more than once a bear made its appearance. Master Bruin was generally of a dun colour, and rather diminutive in size, and was too wary, too well accustomed to the sight of man to come within range of my rifle. In addition to these, we were sometimes enlivened with the sight of immense droves of pigs, grunting in chorus as they turned up the earth in search of roots. They were guarded by the most primitive, and at the same time the most warlike-looking swineherds I ever saw. Their dress consisted of a loose sheepskin wrapper and an enormous turban-like cap of the same material, simple in form and well adapted to their calling; but when I add to this a red silk sash, filled with pistols and daggers, a long gun slung across the shoulder, richly inlaid with gold or silver, and a fierce countenance bronzed by exposure to the sun, a stranger might be excused if, in this wild district, he had taken them for brigands."

We hope the next time Capt. Spencer writes and prints, he will confine himself to wilder regions, and leave politics to those who can combine their information.

NEW NOVELS.

A Prodigy: a Tale of Music. By the Author of the 'History of German Music,' and 'Roccabella.' 3 vols. (Chapman & Hall.)

It is from the long-tried hand of a veteran in literature that we have, under the form of a romance, a tale of music which has an air of being possibly built upon a substructure of facts. A generation has passed away, one-and-thirty years have been added to the account of Time, since we noticed Mr. Chorley's 'Sketches of a Seaport Town,' and later in the same year, 1835, his 'Conti the Discarded,' and other tales.

Ten years subsequently, in 1845, Mr. Chorley published his 'Pomfret,' which exhibited progress in style, in imaginative power, and in conception as well as execution. In the following year, if we remember rightly, he produced his 'Roccabella,' anonymously; and that he desires to be remembered by it, or that he holds it as being the most in esteem by the novel-reading public, is perhaps to be inferred by his describing 'A Prodigy' as being by the author of 'Roccabella.'

It will be seen that Mr. Chorley is not one of those who by rapidity of execution only weaken their powers. He takes time for thought, and does not hurry himself at labour; "fair and softly" seems to be his wholesome maxim, and the results are all the more to the profit both of author and readers. It is quite as true now as ever it was, that easy writing is often very hard reading. If Mr. Chorley is not strong at construction of plot, and perhaps occasionally obscure in details, there is genuine

honest aim to achieve a certain perfection; and if he falls short of this, a good word is due to him for the earnestness of his attempt. The old quality which distinguished him continues his distinction still. In certain shortcomings, mannerisms, sudden breaks, and parenthetical remarks which somewhat confuse the sense, he is, perhaps, stronger than before. No doubt it is difficult for a writer, after years of sustained labour, to change the style which is a consequence of that labour; neither is it to be expected, except in persons of rare and brilliant genius, as in the case of Bulwer, that the power to charm increases in proportion to the endeavour to exercise it. The spirit of the worker may be as vigorous as ever, but the brain will sometimes flag, though the spirit be buoyant. Thus, trusting to our impressions, we should not be disposed to rank 'A Prodigy' so high as 'Pomfret'; but there are many traces of the quality which distinguished 'Pomfret' in every chapter of 'A Prodigy.'

In the latter, the author has succeeded best where his success was greatest in his preceding novels. Whenever the writer leaves his maxims, or even his story, to deal with music, with the science, or with its professors, and to sketch some enthusiast in song or instrumental harmony, he at once arrests attention, secures the interest of his readers, and wins applause. With music we may include the drama. The best, perhaps, of his stories in his 'Sketches of a Seaport Town,' was the powerfully drawn one representing the missionary and the actress. In 'Conti,' there was also a musical prodigy, though of a different quality altogether from the fitful hero of the present work. Every one was interested in Giulio and Costanza, their *début* and their fortunes; while in 'Pomfret,' the heroine was almost altogether overlooked in the striking figure of Helena Porzheim, who was sketched with that cleverness at character-painting which seems to give warrant of something taken from the life, even when the production is but a fancy portrait.

In this sort of character-painting, if Mr. Chorley does not pretend to be a great master, he is so much the more to be commended for the spirit of his sketches, and for the vigour of their outline. They are not, indeed, to our thinking, invariably truthful or agreeable. Thus, he has, no doubt, bestowed some pains on the boyhood of his prodigy, Carl Einstern, to whose bearing he applies the word "gracious," a term singularly misapplied to a handsome little scamp who spits in the face of a person who remonstrates with him. In these details of early life lie the weakest parts of the novel. So far as the hero is concerned, we cannot say that the author is much more successful in the subsequent portions. The effect does not correspond with the labour lavished on the work, and Carl Einstern, instead of refuting, seems to confirm, the impudent old saying of "Show me a great musician, and I'll show you a great fool." On the other hand, for the development of a story which has no lack of strange turns and surprises in it, there is a great variety of character, very well portrayed, and localities—especially some abroad, with the well-known figures to be found there—described with the facile pen of a writer who has been an acute observer, and is able to give a picture in words of the places and persons he has seen and studied. This remark applies particularly to German places and their personality. These are reproduced to the life in the author's word-painting; and, considering what a sensational drama life is, the naturalness of the scene and characters is not affected, in a damaging sense, by one or two rather melo-dramatic individuals who cross the stage, and add zest to the story.

To the enjoyment of the plot we commit all readers without reserve, by declining to unravel it. We will only say that, a tale of to-day, it has a good deal of what the taste of to-day seems to savour with greatest pleasure,—mystery, a spice of spirit interference, and mischief in muslin and fine linen. If we were to make especial objection to anything, it would be to a little carelessness of style, that could easily be amended, and obscurity of expression that might as easily be avoided. When one brother is five years older than another, it is an approach to superfine writing to say that "a chasm of five years separated Charles from Justin"; and such phrases as "He would do better if he saw the world, had ran her argument—once having become the Baroness Einstern," are difficult to understand at first, even with the context to help the reader. But a book must have considerable merit when the critic can only point to trivial shortcomings.

Lords and Ladies. By the Author of 'Margaret and her Bridesmaids.' 3 vols. (Hurst & Blackett.)

For little children constitutionally simple-minded, for men and women in a premature state of mental inactivity, for very old people who are easily amused, for middle-aged single ladies, for philanthropical anti-tobaccoists who distribute tracts to prove that the love of smoking is the root of all evil, and for angry men who write to newspapers that they have given up summer trips because railway carriages smell of extinct pipes, we can imagine 'Lords and Ladies' to be not only an agreeable book, but a very admirable one. It is one of those which may be said to guarantee, on every page, always not to inebriate, and sometimes—as in the case of the particular forms and grades of intelligence that we have specified—to be capable of even cheering. It combines the most appropriate peculiarities and charms for all of these. There is a plot which is simplicity itself for the feeble-minded. There is a large number of short tales, compared with which the dove is harmful, for the young; and a style as steady and unpretending as a jog-trot, for the old. There are domestic details by the dozen (which appear to us to be quite accurate) for unwedded womanhood. And there is a moral, whose good old-fashioned orthodoxy is only equalled by its uncompromising heartiness, for the sympathizer with the contra-nicotine half of the world. As to this last, indeed, whatever may be the measure of success of the book in other respects, there are few who will not find difficulty in expressing their concurrence in terms that do not sound too cold and hesitating. That gentlemen ought not to smoke in the dining-room if the lady of the house dislikes it, is a proposition which does honour to the writer's head and heart, as it does honour, we believe, to the head and heart of ninety-nine out of every hundred of her neighbours who are not perfect snobs. Like its twin-companion, the second of the two truths in whose glory we presume this book to have been written, one's only feeling about it is of wonderment and sorrow that the world is thought by anybody so stupid as to need to have it demonstrated. Ladies, says the writer of these thousand pages, can cook dinners and wait upon themselves without the aid of gentlemen, better than gentlemen can manage the same feats without the aid of ladies. Well, so be it. So we should have said too, even though a thousand pages nearly had not been written to prove it. So we grant that the moral is excellent. We give the author all that even a lady ought to want—unhappily, however, the very last thing which a lady likes to receive—an un-

equivocal concession, from the very first, of all that she is wasting so much kind trouble to prove. As a matter of fact she ought to be both contented and thankful that it is so; first, because, judging from appearances, if she really had chosen to build up her novel on a theory which wanted proof, she would have made but a weak job of her effort; and secondly, because, if the two truths in question depended upon her for advocacy, we fear poor wilful human nature would be much inclined to take the other side, and the result would be the grimmest possible consequences to dining-room curtains and digestion. As it is, no harm is done. A particularly weak and uninteresting book has been launched in a very sound and safe boat, and the voyage will in all probability be both short and uneventful. In other words, one more silly caricature of a novel has been written, which very few people are likely to read. The particular sections of society which we have mentioned above may read it, and may settle down to it without hesitation, with no fear either of having their thinking powers tried injuriously, or of having their taste infected with romantic tendencies, or of being perverted to the belief that smoking is the whole duty of man. To the novel-reading world at large—the ordinary run of intelligent men and women—we cannot in honesty say one single word of recommendation of these three volumes. Not even the strongest considerations of friendly feeling towards their author, and respect for her pen, could induce us to do so to the least valued of our acquaintance.

Our Australian Colonies; their Discovery, Resources, and Prospects. By Samuel Mossman. (Religious Tract Society.)

Mr. Mossman is an authority on Australian history and statistics, and his book is written more for instruction than for amusement. In the midst, however, of much valuable information, it will be found to contain quite enough of the romance of early discovery to prove an interesting work even to those who merely take it up *pour passer le temps*. The rapid advance of Australia during the last few years is probably without a parallel in history. Eighty years ago, as Mr. Mossman reminds us, the Great South Land was only known by bits and scraps; its outline was imperfectly defined, and its interior entirely unexplored. The interior was, indeed, a land of fable even at a much more recent date, and there was a prevalent idea that it was occupied by a vast inland sea, which received the waters of the numerous rivers flowing westward from the grand watershed of New South Wales. There was some excuse for this fanciful notion, in the peculiar conformation of the country. The mountains of New South Wales, running parallel with the eastern coast of Australia for a distance of more than a thousand miles, throw out fine rivers east and west,—the former easily finding their way to the neighbouring coast, while the latter are debarred from it by an insurmountable rampart. The ultimate destination of the western streams was a moot problem among the earlier colonists. They might, indeed, flow across to the west, and empty themselves into the Indian Ocean, after traversing and draining a whole continent, like the Amazon and Orinoco in South America. This was actually, as lately as 1813, the view of Mr. Evans, a diligent explorer, who traced one river for 140 miles, and concluded that it must have its estuary on the western coast, or somewhere far away to the north-west. A few years later, however, this theory and that of an inland sea received a com-

mon blow, as it was found that every one of these streams took a southerly direction sooner or later, and found their way to the sea which washes the south-east coast, or to one or other of the larger rivers flowing into it. It was not thought enough, however, to prove a negative, and one adventurous traveller after another organized expeditions for the purpose of penetrating into the interior. The map of Australia now presents the singular feature of more than one zigzag line from south to north, showing the course of bold adventurers who have scaled mountains, crossed rivers, traversed pathless wilds, jotting down each natural feature as they passed, in regions where no chart could be laid down to guide them, and no human voice but the yell of the savage had yet been heard. The names of Sturt, Mitchell, Strzlecki will ever be sacred as those of men whose courage set the early example; while the colonist will drop a tear to the memory of Leichhardt, Kennedy, Burke, and Wills, who fell victims to their enthusiastic love of knowledge; and will crown with unfading laurels the statue of John M'Douall Stuart, who came home to tell them that the words *Terra Australis incognita* must be erased from the map of their country. Worthily did the sturdy South Australian perform his task, starting, with only four companions, in March, 1861, from the head of Spencer Gulf, and reaching Van Diemen's Gulf, on the north (after a journey which, even in a straight line, would have been over 1,400 miles), on the 19th of July, 1862. More fortunate than Burke and Wills, he lived to tell the tale, while they, after having made their way from Melbourne to the Gulf of Carpentaria (a journey of almost exactly the same length), perished miserably from privation on their return, within 150 miles of the home where honour awaited them.

The plan of Mr. Mossman's work does not admit of his entering very fully into the details of the various expeditions; but these may be found in other works more especially devoted to the subject. A very touching account of Mr. Kennedy's death, taken from the narrative of the faithful and affectionate native, Jackey-Jackey (who, at the risk of being accused of foul play, presented himself to his master's friends, and told the sad tale), may be found in the 'Voyage of H.M.S. Rattlesnake,' written by Capt. Owen Stanley. Mr. Mossman, after a comparatively brief account of the discoveries in Australia, and of its natural products, enters into a detailed history and description of each colony, beginning with New South Wales and ending with Queensland. In each case he gives figures of the present exports, imports, revenue, &c.; and the book concludes with a 'Prospective and Retrospective Summary,' accompanied by a few suggestions as to the manner in which it behoves England to conduct herself towards this her youngest and most vigorous offspring.

Across the Continent: a Summer's Journey to the Rocky Mountains, the Mormons, and the Pacific States, with Speaker Colfax. By Samuel Bowles. (Springfield, U.S., Bowles & Co.; London, Low & Co.)

In the May of last year a party of Americans made an excursion in search of better health, new scenes, and fresh knowledge, after a fashion that may be recommended for imitation to the thousands of their wealthy fellow countrymen who, like the English, are given to spending, on foreign travel, time and money that might be disbursed to greater advantage on journeys in their own land. The party comprised politicians and men of letters, Bohemians and shrewd business-men. On the

road it gathered companions, who found their convenience and security in travelling with so distinguished a set; but at first it consisted of six persons—Speaker Colfax and Lieut.-Governor Bross, of Illinois, being of the number, together with Mr. George K. Otis, of New York, a special agent of the Overland Stage Line, by which route the friends had resolved to journey as far as it would take them on their way from the eastern civilization to the western cities of the American continent. It is almost needless to say that the discomforts of such a journey were made as few and slight as possible to the Speaker of the United States House of Representatives and his fellow-travellers. Well provided with "rifles and revolvers for Indians and game, sardines for those who could not digest bacon, segars for the smoking Speaker, black tea for the nervous newspaper-men, crackers for those fastidious stomachs that rejected saleratus biscuit, and soap for those so aristocratic as to insist on washing themselves *en route*," they had been equally prudent in taking measures for their security and precautions for their comfort. In every large city through which they passed, hospitable reception was accorded them by lavish entertainers whose courtesies were repaid by the Speaker with semi-official orations on the power, magnanimity, and glorious destiny of the American people. The influence of Mr. George K. Otis, of course, contributed in no slight degree to the quickness and ease of the travellers' progress along the line of the Overland Stage. But even under these favourable circumstances, the run through the great republic from Massachusetts to the Pacific was not unattended by fatigue, exposure, and peril. Comprising 1,500 miles of railway at the outset, 2,000 miles of staging through the interior, another 60 miles of iron road, and 150 miles of steamboat passage down the Sacramento, the journey occupied seven weeks of steady travelling, and during its course the tourists witnessed many striking contrasts of scenery, and as many noteworthy varieties of character and society. They slept in populous and rapidly-increasing capitals that have risen upon ground which, fifty years since, had never rendered service to the white man; they spent days in traversing wide ranges of country where the pioneers of civilization are busy in clearing primeval forests; they journeyed many hundreds of miles under reasonable apprehensions that before reaching the next station they would be compelled to exchange shots with predatory Indians; and in the prairies of the West they rested their eyes on "illimitable stretches of exquisite green surface, rolling like long waves of sea." A few days later they were working their toilsome way through "an alkali region where the soil for two or three feet seemed saturated with soda, and so poisons the fallen water that, if drunk by man or beast after a shower, it is sure to be fatal." Their wheels and the tramping of their horses' feet broke the sacred silence of the Rocky Mountains, and their own light voices were hushed in reverential quiet, and their habitual mirth was exchanged for a higher happiness, as they studied the superb loveliness and caught the lessons of the everlasting hills that rise "one upon another, one after another, tortuous, presenting every variety of form and surface, every shade of cover and colour." Having inspected the gold mines of Colorado, they paid similar attention to the silver mines of Nevada; they feasted with Mormons at Utah, and were entertained with an elaborate dinner of Chinese dishes by the Chinamen of the Pacific States. On their way through the picturesque valleys of Nevada, the Truckee, the Washoe, and the Carson, they heard the

music of the wind sighing among the tall pines of the sierras, and were deafened by the deep resonance of mighty waters falling down the sides of bold ravines from the cold heights to the hot and fertile plains. Having reached San Francisco by way of Yosemite and the Big Trees, they went northwards to Vancouver's Island and British Columbia, returned to the capital of California, and then made the voyage home by steamship and the Isthmus.

The volume which gives us an account of this successful tour is made up of hot, hasty, photographic letters, which one of the party, Mr. Samuel Bowles, dashed off during pauses in locomotion, and despatched to the office of the *Springfield Republican*, of which paper he is the editor. Of course, the epistles thus struck off present the reader with nothing more than the first impressions of an energetic tourist scampering through novel scenes; but as an American's view of his own land and people, put forward with humorous smartness, the book is very amusing. Thoroughly in accordance with the popular theory of the American character, and with notions generally entertained respecting American life is the frankness with which Mr. Bowles speaks about his travelling companions, and "takes stock" of the moral, intellectual and physical endowments of every person whom he encounters. With a facetious sprightliness which the "haughty islanders" of the Anglo-Saxon race would be apt to stigmatize as "impertinence," with a strong epithet prefixed, this American editor writes of the American statesman who honours him with his friendship: "Mr. Colfax is short, say five feet six, weighs one hundred and forty, is young, say forty-two, has brownish hair and light blue eyes, is a childless widower, drinks no intoxicating liquors, smokes *à la* General Grant, is tough as a knot, was bred a printer and editor, but gave up business for public life, and is the idol of South Bend and all adjacencies." Having thus touched in the portrait of his patron, Mr. Bowles goes on to notice the less illustrious members of the party. Of a brother editor and fellow-traveller he says, in the same spirit of friendly candour, "Mr. Richardson, of the *New York Tribune*, has lived on the borders of Bohemia for many years, sometimes on one side, sometimes on the other, and presents all the contradictions of such an existence." To fully unmask this literary Bohemian, and deprive him of that "benefit of appearances" to which adventurers of all kinds are proverbially entitled, Mr. Bowles goes on to say, "Notwithstanding this long Bohemian life, amid rough people and in out-of-the-way places, Mr. Richardson imposes on you with the style and air of a man who has had a very narrow escape from the pulpit, and cherishes a natural hankering for it yet. Certainly you would never recognize in him a true child of Bohemia. He wears black broadcloth, and 'biled shirts' (the Western phrase for white underclothes), does not chew tobacco, disdains whisky, but drinks French brandy and Cincinnati Catawba, carries a good deal of baggage, does not know how to play poker, and shines brilliantly among the ladies. He is a young widower of less than thirty-five, of medium size, with a light complexion and sandy hair and whiskers, and is a very companionable man." Nor is Mr. Bowles less frank about matters than men, or about women than either. Of the virtue of San Francisco ladies he expresses a low opinion; but he gives emphatic testimony to their taste for dress, and outward decorum. "Perhaps," he observes, with an air of judicial hesitation, "in no other American city would the ladies invoice so high per head as in San Francisco, when they go out to the opera, or to party, or

ball. Their point-lace is deeper, their moire antique stiffer, their skirts a trifle longer, their corsage an inch lower, their diamonds more brilliant—and more of them—than the cosmopolite is likely to find elsewhere." Speaking of the external appearance of morality that characterizes the city where "gamblers join in outward observance of the Sabbath, help to build churches, and make orderly the street life of the town," he observes, "the San Franciscan police system is admirable, and a woman may walk the streets of this city in the evening, with less danger of insult and annoyance than in those of Springfield even." How much does this evidence say for Springfield!

With respect to the ladies of Salt Lake City he is less able to form positive judgments, as the etiquette of that agreeable capital did not allow him frequent or confidential access to the ladies who were best qualified to speak of their peculiar institution. He found that polygamy was not practised by more than a fourth of the Mormons; and, on rather insufficient data, he came to the conclusion that the system did not contribute to the happiness or enjoy the unreserved approval of the ladies who had tried it. But on this point the reporter speaks with uncertainty: for though the Mormon aristocracy entertained the travellers with costly dinners, luscious fruits, and good theatrical representations, they kept Speaker Colfax and party at a distance from their wives, save on occasions when unrestrained intercourse and free exchange of opinions were impossible,—“this, indeed,” says Mr. Bowles, in a tone of grievance, “being the only feature of their hospitality that has been measured and chary.” Still, Mr. Bowles was so fortunate as to obtain sight of some of Brigham Young's wives, and he gives his opinion that, “considering his opportunities, the head of the Church of Latter Day Saints has made a rather sorry selection of women on the score of beauty.” Nor does the second prophet of the Church seem to have made a better use of his advantages, for says the author, “Heber Kimball, who in church and theatre keeps the cold from his bare head and the divine afflatus in by throwing a red bandana handkerchief over it, is even less fortunate in the beauty of his wives; it is rather an imposition upon the word beauty, indeed, to suggest it in their presence.” Perhaps the polygamy of the Mormons will be less severely judged in this country, when it is known that the prophets content themselves with ugly women. Indeed, the conspicuous want of comeliness that marks the Mormon ladies, and the abundance of beauty amongst the women of the Gentiles of Utah, are facts that induce Mr. Bowles to think that polygamy must be unfavourable to the production and preservation of feminine loveliness. That polygamy, “cleverly worked,” may, however, be a convenient system for gentlemen in difficulties the author shows in the following manner:—

“In many cases, the Mormon wives not only support themselves and their children, but help support their husbands. Thus a clerk or other man, with similar limited income, who has yielded to the fascinations and desires of three or four women, and married them all, makes his home with number one, perhaps, and the rest live apart, each by herself, taking in sewing or washing, or engaging in other employment, to keep up her establishment, and be no charge to her husband. He comes around, once in a while, to make her a visit, and then she sets out an extra table and spends all her accumulated earnings to make him as comfortable and herself as charming as possible, so that her fraction of the dear sainted man may be multiplied as much as possible. Thus the fellow, if he is lazy and has turned his piety to the good account of getting smart wives, may really board around continually, and live in clover, at no per-

sonal expense but his own clothing. Is not this a divine institution indeed!”

But nothing in Salt Lake City pleased the tourists more than the performances in the grand theatre, of which Brigham Young is proprietor and manager:—

“Later in the evening we were introduced to another, and perhaps the most wonderful, illustration of the reach of social and artificial life in this far off city of the Rocky Mountains. This was the Theatre, in which a special performance was improvised in honour of Speaker Colfax. The building is itself a rare triumph of art and enterprise. No eastern city of 100,000 inhabitants,—remember Salt Lake City has less than 20,000,—possesses so fine a theatrical structure. It ranks, alike in capacity and elegance of structure and finish, along with the opera-houses and academies of music of Boston, New York, Philadelphia, Chicago and Cincinnati. In costumes and scenery, it is furnished with equal richness and variety, and the performances themselves, though by amateurs, by merchants and mechanics, with wives and daughters of citizens, would have done full credit to a first-rate professional company. There was first a fine and elaborate drama, and then a spectacular farce, in both which were introduced some exquisite dancing, and in one some good singing also. I have rarely seen a theatrical entertainment more pleasing and satisfactory in all its details and appointments. Yet the two principal male characters were by a day-labourer and a carpenter; one of the leading lady parts was by a married daughter of Brigham Young, herself the mother of several children; and several other of his daughters took part in the ballet, which was most enchantingly rendered, and with great scenic effect. The house was full in all its parts, and the audience embraced all classes of society, from the wives and daughters of President Young,—a goodly array,—and the families of the rich merchants, to the families of the mechanics and farmers of the city and valley, and the soldiers from the camp. President Young built and owns the theatre, and conducts it on his private account, or on that of the church, as he does many other of the valuable and profitable institutions of the Territory, such as cotton, saw and flour mills, the best farms, &c.; and as he is at no expense for actors or actresses, and gets good prices for admission, he undoubtedly makes a ‘good thing’ out of it. During the winter season, performances are given twice a week; and the theatre proves a most useful and popular social centre and entertainment for the whole people. Its creation was a most wise and beneficent thought.”

With a true American's pride in the magnitude of his country and its operations, Mr. Bowles in the following sketch of Mr. Ben Holladay, the colossal capitalist who “runs” the Overland Stage Line, shows how the Union, after whipping all creation on various other points, has produced the tallest coach-proprietor that ever worked a road on the earth's surface:

“The great Overland Stage Line, by which we are travelling, was originated by Mr. William H. Russell, of New York, and carried on for a year or two by himself and partners, under the name of Russell, Majors & Waddell. They failed, however, and some three years ago it passed into the hands of their chief creditor, Mr. Ben Holladay, an energetic Missourian, who had been a successful contractor for the government and for great corporations on the Plains and the Pacific. He has since continued the line, improving, extending and enlarging it until it is now, perhaps, the greatest enterprise owned and controlled by one man which exists in the country, if not in the world. His line of stages commences at Atchison, on the Missouri River: its first section extends across the great Plains to Denver, six hundred and fifty miles; from here it goes on six hundred miles more to Salt Lake City, along the base of and through the Rocky Mountains at Bridger's Pass. From there to Nevada and California, about seven hundred and fifty miles further, the stage line is owned by an eastern company, and is under the management of Wells, Fargo & Co., the express agents.

All this is a daily line, and the coaches used are of the best stage pattern, well known in New England as the 'Concord coach.' From Salt Lake, Mr. Holladay runs a tri-weekly coach line north and west, nine hundred and fifty miles, through Idaho to the Dalles on the Columbia River, in northern Oregon, and branching off at Fort Hall, also a tri-weekly line to Virginia City, in Montana, four hundred miles more. From Denver, too, he has a subsidiary line into the mountain centers of Central City and Nevada, about forty miles. Over all these routes he carries the mail, and is in the receipt for this service of six hundred and fifty thousand dollars per annum from the government. His whole extent of staging and mail contracts,—not counting, of course, that under Wells, Fargo & Co., from Salt Lake west,—is two thousand seven hundred and sixty miles, to conduct which he owns some six thousand horses and mules and about two hundred and sixty coaches. All along the routes he has built stations at distances of ten to fifteen miles; he has to draw all his corn from the Missouri River; much of his hay has also to be transported hundreds of miles; fuel for his stations comes frequently fifty and one hundred miles; the Indians last year destroyed or stole full half-a-million dollars' worth of his property,—barns, houses, animals, feed, &c.; he pays a general superintendent ten thousand dollars a year; division superintendents a quarter as much; drivers and stable-keepers get seventy-five dollars a month and their living; he has to mend, and in some cases make, his own roads—so that, large as the sum paid by the government, and high as the prices for passengers, there is an immense outlay and a great risk in conducting the enterprise. During the last year of unusually enormous prices for everything, and extensive and repeated Indian raids, Mr. Holladay has probably lost money by his stages. The previous year was one of prosperity, and the next is likely to be. But with so immense a machine, exposed to so many chances and uncertainties, the returns must always be doubtful. * * The passenger fares by his stages are now, from Atchison to Denver one hundred and seventy-five dollars, to Salt Lake three hundred and fifty dollars, to Nevada five hundred dollars, to California five hundred dollars, to Idaho five hundred dollars, to Montana five hundred dollars. These are much higher than they were two years ago, and will probably be reduced during the season, as safety from the Indians and lower prices for food and corn are assured, from thirty-three to fifty per cent. Mr. Holladay now resides in New York City, and is reported to be immensely wealthy—say five millions. He owns and runs, also, lines of steamships in the Pacific Ocean from San Francisco, north to Oregon and British Columbia, and south to Mazatlan, Mexico, with contracts for the mails on both routes from our government or from Maximilian of Mexico. He conducts all this immense business successfully by the choice of able and trusty managers to whom he pays large salaries. * * Mr. Holladay visits his overland line about twice a year, and when he does, passes over it with a rapidity and a disregard of expense and rules, characteristic of his irrepressible nature. A year or two ago, after the disaster to the steamer Golden Gate on the Pacific shore, by which the only partner he ever had, Mr. Edward Rust Flint, son of old Dr. Flint of Springfield, lost his life, and himself barely escaped a watery grave, he made the quickest trip overland that it is possible for one man to make before the distance is shortened by railway. He caused himself to be driven from Salt Lake to Atchison, twelve hundred and twenty miles, in six and one-half days, and was only twelve days and two hours from San Francisco to Atchison. The trip probably cost him twenty thousand dollars in wear and tear of coaches and injury to and loss of horses by the rapid driving. The only ride over the Plains, at all comparable with this, was that made by Mr. Aubrey, on a wager, from Santa Fe to Independence, seven hundred miles, in six and one-half days. But this was made on horseback, and when the rider reached his destination, he was so exhausted that he had to be lifted from his horse. How exciting the

thought of such rides as these across these open fields and through these mountain gorges, that make up the half of our Continent!"

Surely it is no matter for indignation or surprise that the citizen of a country whose mere coach-proprietors are merchant princes should be so thoroughly convinced of his nation's right to possess and ability to govern the whole world, that he cannot publish his notes of a trip to Vancouver's Island and British Columbia without observing, "More surely than the Canadas, even, when these provinces become really important and worth having, they will be ours. They will drift to the Union by the inevitable law of gravitation, and by the influence of the leaven of American nationality and sentiment, already large throughout their borders, they will grow with their growth, and flavour their whole progress." England is deeply grateful to the editor of the *Springfield (Mass.) Republican* for his good wishes and flattering prophecies with respect to her American dependencies.

OUR LIBRARY TABLE.

The Year of Prayer: being Family Prayers for the Christian Year, suited to the Services and Commemorations of the Church. By H. Alford, D.D., Dean of Canterbury. (Strahan.)

THE usual arrangement of household prayers for a month commits the same phrases to utterance, "whether the season be one of penitence or triumph." Dean Alford has produced a collection of prayers for an entire year, suitable to the season, to fast or festival, and in simple language, such as the humbler worshipper may join in, with understanding. It may not be amiss to add just now, that a large proportion are addressed to Our Lord. The Dean of Canterbury thinks that no remedy is likely to be "so efficacious for the cold-heartedness and decline of faith, in our time, as more humble devotion and more ardent personal love towards our great and merciful High Priest, the Divine Hearer and Answerer of Prayer." These words have, at this time, a special meaning, and will, doubtless, give additional recommendation to a book that, in reality, needs none.

Quotations from Shakespeare. A Collection of Passages from the Works of William Shakespeare, selected and arranged by Edmund Routledge. (Routledge & Sons.)

'The Beauties of Shakespeare,' by the unfortunate Dr. Dodd, is one of those books which, in their especial way, cannot be excelled. If that unhappy man did most things ill, his gleaming from Shakespeare was not one of them. He had taste, judgment, and a quick perception, not only of the beautiful in poetry, but what was best suited for the popular pleasure and profit. His selections were excellently made, and they are all of a quality which admitted of a title; they are not indeed classified, but made from each play right through, with a distinctive title to each. This will always give Dodd's 'Beauties' an abiding value, and, we may add, that of all the editions of the work, we remember none that, for compactness and clearness, and for convenience of size, can match with that printed at the Chiswick Press in 1821. Mr. Routledge, like Dodd, takes passages from each play in rotation, though not in the same rotation as Dodd, nor in the same profusion, neither does he give titles to the extracts. Nevertheless, he has compiled a graceful little book, that may lie on a table to be often taken up in half-hours of idle yet profitable delight. There are a few passages without any particular beauty or sentiment to warrant their being admitted into the list; but taken altogether the little volume is one that will be welcome in every home where for poetry there is love, and for the poet, reverence.

Routledge's Every Boy's Annual. An Entertaining Miscellany of Original Literature. Edited by Edmund Routledge. With Illustrations. (Routledge & Sons.)

DURING the past year Mr. Edmund Routledge has been exerting himself to raise the character of the

'Every Boy's Annual' of which he is the editor, and we can congratulate him on the success of his endeavours to deserve the applause of his special public. He has acted wisely in discontinuing the arithmetical puzzles, which added nothing to the attractions of his volume for the year 1866; and in other respects he exhibits an increase of discretion and good taste. His staff of contributors is strong both in reputation and actual ability, and the principal writers have done their best to strengthen their hold on the good opinion of schoolboys. Mr. Adams, author of 'The White Brunswickers' and other excellent literature for youngsters, contributes 'Barford Bridge; or, School-Boy Trials,' a tale of good design and able execution. The late Col. Stodare has revealed some of the elementary secrets of his art in a series of excellent papers, entitled 'Fly Notes; or, Conjuring made Easy for Juvenile Amateurs.' Mr. Kingston tells the story of Reginald Warrender's "Early Days at Eton"; an old Harrovian gives us his reminiscences of Harrow; an "old boy" talks about cricket with a spirit and personal interest in the sport that are scarcely compatible with the usual characteristics of advanced age; Mr. Ballantyne says something more about 'Our Life-Boats'; Mr. Temple Thorold explains the mechanism of the lathe, and in a series of papers tells us how to use it; and Mr. Thomas Miller's 'Jack of all Trades' runs side by side and sustains a comparison with the very different, but not superior, story by Mr. Adams. When we add, that mention is here confined to the chief dishes, no notice being taken of *entremets* and sweetmeats, readers will need no further assurance that the caterer has furnished a liberal and various entertainment for his youthful supporters.

Little Lays for Little Folk. Selected by John G. Watts. (Routledge & Sons.)

THREE dozen Little Lays, from the 'Twinkle, twinkle, little Star' of Jane Taylor, to the 'Morning Mist' of Southey, and the 'Lucy Gray' of Wordsworth, with marginal, vignette, and other illustrations, amounting to above a hundred woodcuts, arranged and engraved under the direction of Mr. J. D. Cooper, will serve to indicate that good provision has been made for the eyes and ears of the nursery, and wherever else the little folk may congregate to read, sing, or listen. Mr. Watts has shown good discretion in selecting, and has done well in contributing a few pieces of his own. He has catered wisely for the little public to whom the book is addressed, and from whom it will meet with ready and warm acceptance.

Illuminated Texts. (Nelson & Sons.)

THIS publication comprises a series of religious texts and pious injunctions from the Scriptures, which are illuminated in Gothic characters, on cardboard, with colours and gold; the style chosen for the lettering being that of the fourteenth century, which is very legible, and, of course, well adapted to the purpose. The drawing and colouring of these texts are excellent; as to the latter, it is unusually good, harmonious and effective.

Cecile Raye: an Autobiography. By Mrs. Blake. (Tweedie.)

THE size, shape, embellishments, and general appearance of this volume seem to indicate that 'Cecile Raye' is offered to the public as a tale for children; but the plan and details of the story warrant us to speak of it as a novelette with a religious tone and moral purpose. Mrs. Blake is not without literary power, and in some places her work deserves a certain measure of not enthusiastic commendation; but she would have done greater justice to her powers had she exerted them in producing a genuine novel or a genuine story for young people, instead of a hybrid narrative that is neither the one nor the other, though something like both.

Warwickshire Arms and Lineages: compiled from the Herald's Visitations and Ancient MSS. By the Rev. F. W. Kittermaster. (Birmingham, Cornish; London, Macintosh.)

THIS little compilation professes to show what families of Shakespeare's county belong to the old gentry before the year 1650. The earliest visitation to the county was made by Chester Herald, for

Clarenceux, in 1563; the latest by Thomas May and others in 1682-83. An appendix gives the names of a few arms-bearing families who have settled in the county since the first date, or whose names do not occur in the registries of the older visitations. To heralds and genealogists this book will be so useful that we could wish every county in Britain were as carefully illustrated as that of Warwick has been by the Rev. F. W. Kittermaster.

The King with the Queen—[*Le Roi chez la Reine*, par Armand Baschet]. (Paris, Plon.)

THE second edition of M. Armand Baschet's '*Le Roi chez la Reine*' is enriched with some new documents. The history of the secret marriage of Louis the Eleventh with Anne of Austria, as told in the king's private journal, in the despatches of ambassadors, and in a medical diary, is one on the details of which the lovers of indiscreet history delight to dwell. In the papers at Simancas, in the correspondence of the Papal nuncio, and in the medical notes of Dr. Hérouard, which describe the daily doings of his royal patient during twenty-nine years, there is much material for the historian. The description of the birth of Louis the Fourteenth is a bit of the past, preserved as fresh as though it had happened yesterday. M. Baschet has arranged his valuable materials with a fair connecting narrative; which explains and gives force to the pictures of the times as painted on the spot.

LIST OF NEW BOOKS.

Althaus's 3 Lectures on Epilepsy, Hysteria, &c., cr. 8vo. 4/6 cl.
Arthur's Home Heroines, fo. 8vo. 3/6 cl.
Beatty's Contributions to Medicine and Midwifery, 8vo. 15/ cl.
Bancroft's History of United States, Vol. 9, royal 8vo. 12/ cl.
Bash's Martyr Missionary, fo. 8vo. 3/6 cl.
Bonc's Abécédair Français, 2/6 cl.
Carpenter's Penny Readings, Vol. 8, 12mo. 1/ bds.
Doctor Johns. Narrative of a Connecticut Minister, 2 vols. 18/ cl.
Erdle Elton at School, fo. 8vo. 3/ cl.
Edwards's Archie Lovell, 3 vols. post 8vo. 3/18 cl.
Fenn's Original Penny Readings, Vol. 2, 12mo. 1/ bds.
Grace Harvey and her Cousins, fo. 8vo. 1/6 cl.
Guesses at Truth, new edit. 1 vol. 12mo. 6/ cl.
Hales's Lessons from Women's Lives, fo. 8vo. 2/6 cl.
Ingelow's Poems, illustrated edit. 4to. 21/ cl.
Lemon from Rose Hill, fo. 8vo. 1/6 cl.
Longfellow's Poetical Works (Red-Line Edit.), sm. 4to. 10/6 cl.
Macaulay's Lays of Ancient Rome, Illust. Miniature Edit. 10/6 cl.
Maclean's Training in Theory and Practice, 8vo. 7/6 cl.
My New Home, fo. 8vo. 4/6 cl.
Mansel's Philosophy of the Conditioned, post 8vo. 6/ cl.

Mathias's En Avant, Messieurs! a Tutor's Counsel, &c. 12mo. 6/8
Read's Student's Text-Book, Electricity, cr. 8vo. 12/6 cl.
Rendell's Seeing the World, fo. 8vo. 2/6 cl.
Newton's Bible Lessons, fo. 8vo. 1/6 cl.
Newton's Best Things, fo. 8vo. 1/4 cl.
Newton's Great Pilot and his Lessons, fo. 8vo. 1/6 cl.
One Hour a Week, fo. 8vo. 1/6 cl.
Parker's Pulpit Analyst, Vol. 1, cr. 8vo. 7/6 cl.
Reddy's Headless Horseman, Vol. 2, 8vo. 6/ cl.
Seignior's Great and Good Women, fo. 8vo. 1/6 cl.
Tytler's Memorable Wars of Scotland, fo. 8vo. 3/6 cl.
Vanham's Ritualism in the English Church, 12mo. 4/6 cl.
Waring's Tropical Resident at Home, cr. 8vo. 5/ cl.
Wonderer in Africa, by A. C. O. E., fo. 8vo. 1/6 cl.
What Elise Loved Best, 12mo. 1/ cl.
Werboise's Sir Julian's Wife, fo. 8vo. 5/ cl.

ORIGINAL BENEFACTORS.

October 24, 1866.

I have been interested in seeking the origin of several of the institutions for the good of various classes of the community that now flourish around us, and the public may also desire to know who first sowed those grains of mustard-seed that have grown into great trees.

"The National Benevolent Institution" was founded by a good man and a very poor miniature-painter, Mr. Peter Hervé,—a little unpretending person, whose means were scant and whose friends were few, but who laboured most successfully, as only those can labour whose hearts are in their work, and who thereby secured to himself a monument of blessings.

"The Consumption Hospital" at Brompton owes its birth to a gentleman who, in his early manhood, and on the threshold of an arduous profession, was moved to undertake the task by finding that no London hospital would receive a poor clerk who was prevented by consumption from earning his daily bread. The name of Philip Rose will go down to posterity as one of the greatest of our modern philanthropists.

The list might be greatly enlarged of persons who, engaged in the daily duties of life,—in a word, hard-working people,—were the originators of many of the most practically beneficent institutions of charity in the kingdom, among the best

of those that are "supported by voluntary contributions."

The history of the Early Closing Movement—which has revolutionized our shopping and labouring system—is as singular as any. A young man named Lilwall was employed in one of the West End drapery establishments. The nature of his duties compelled him to remain longer at work than some of his companions. At Midsummer he has frequently seen the sun rise as he went home to bed. Nature had blessed him with a good constitution, and he endured the fatigue of twelve—fourteen—sixteen—and sometimes eighteen hours' employment better than many young men and women who shared in and succumbed to such toil. The passing away of his young companions preyed on the mind of Mr. Lilwall, and he resolved to bring about a different arrangement, so that the shop attendants, men and women, should have fewer hours of labour. Some of the employers to whom he appealed scouted the idea; others said they would take the subject into consideration if he could get up a meeting. A few thought with him, and cordially co-operated with him. There were no sympathizing ladies of rank at that time to patronize the movement; but Mr. Lilwall worked steadily at his object, called on employers, and clergymen, and gentlemen "suspected" of philanthropy; and all the necessary time for this was stolen from his hours of rest. Amongst others, he applied to Mr. S. C. Hall, who consented to take the chair at the first meeting in behalf of the movement, and who in one year took the chair for the same object nine times. In the same year, Mrs. S. C. Hall got up a pledge, called "The Ladies' Early Closing Pledge." A great many valuable signatures were obtained, which some eighteen years ago considerably lessened evening trading. In the present day, ladies of rank and influence, ministers of State, prelates, many noblemen, have advocated the principle; and recently a list has been published of great ladies who have earnestly taken up the cause. God speed their work! But it should be known that its earliest promoters were actual labourers, and that the movement found fervent and zealous supporters long before such support received the advocacy of the aristocracy.

LIFE IN SPAIN.

Gibraltar.

FROM Malaga to the Rock of Gibraltar is but a few hours' steaming. Gibraltar is, geographically, in Spain; but that is all. You land and enter the water-gate of the fortress, and find yourself inside a miniature Portsmouth. High Street and Ramp Street stare you in the face, the writing intensely legible—white upon black. The Clubhouse Hotel occupies the place of honour on one side of the principal square, and is a brickery (with sea-side shutters) of the Georgium Sidus style of architecture, admirably adapted to the requirements of a "small" gentleman's family in Baker Street, but in a furnace like Gibraltar suggestive of an ogre's kitchen with a dinner-party pending; in fact, it is one of the hottest hostilities I ever was compelled to spend a week in. This style of Baker Street architecture suggests suffocation. On another side of the square you find quarters for the guard,—the guard in a small square cellar even with the ground, no side window or back door, probably for fear of a draught; the officers' quarters are on the first floor, and some brilliant genius originally planned and carried out a balcony. The houses generally, judging from outward signs of interior size, resemble those four-roomed palaces erected for the working classes in the suburbs of London. How intensely British John Bull is! He scorns to consider climate, and removes Ratchiff Highway bodily to the Rock of Calpe. Capt. Cuttle would be in clover here as far as house accommodation is concerned; and the strictest military martinet would joy to see the British soldier trussed like a turkey for the spit,—stiff, glossy, leather stock included. This impregnable rock, I am informed by a Genoese proud of his "Inglees," is honeycombed from end to end,—batteries here, there and everywhere; cannons by thousands, peeping out of all sorts of impossible apertures, ready to pour destruction upon an enemy

who never comes; and never will come, in these days of steam, when, by keeping near to the African coast, he can work into the French lake without let or hindrance. If I were attached to that service which sports an anchor for its device and which locates partly in Somerset House, I could a pretty tale unfold of the cost this barren, useless rock has been to the British nation since the days of Drinkwater. Thered tapealone would put "a girdle round about the earth," and the sovereigns sunk there would have materially reduced the national debt. A menace to Spain, a stumbling-block in the way of English influence, when it might be well and profitably employed, and a pickle which France uses occasionally to flavour her relations with Isabella. A royal George plighted his kingly word that it should be restored, but he did not keep his word, keeping Gibraltar instead. Of course England is the home of freedom, and all that sort of thing, and Englishmen scorn everything in the shape of meanness. The intelligent Spaniard replies, "Deeds, not words." The Manchester and Sheffield interests induced the British Government of the Georgian era to keep the rock as a snug smuggling station, and José Maria and the contrabandistas flourished; but the Spanish Government caught and hanged so many that the picturesque science became unattractive and died out, and snug smuggling clippers have been chased from the sea by Spanish gunboats. Commercially, therefore, Gibraltar remains a dead letter, and Manchester and Birmingham now feebly cry, Restore it to its proper owners. When a certain British plenipotentiary tossed up to decide whether the British lion should retain the magnificent Island of Minorca or the Rock of Calpe, Calpe won the toss, and Spain retained an island with a harbour in which the navies of the world might at all times ride without an anchor down, and England lost the finest sanatorium in the Mediterranean Sea. Hurrah! red tape holds on like grim Death, and abuses Spain because she will not arrange her little account with the high-minded British creditor.

I am not impressed with the accuracy of the sanitary statistics of this little "Orcus." Gibraltar must be unhealthy,—it is hot, and "smells a trifle." Your fruit and vegetables are brought in daily, and so are your beef and mutton; but as you are generally for a certain number of weeks of each year in quarantine, the population is cut off from communication landwards, which means, No fresh fruit or vegetables; and if the Barbary traders, on their return trip, are placed in quarantine, you may whistle for your fresh beef. Of course, the public health is most satisfactory, and Gibraltar, as far as the British soldier or sailor is concerned, a perfect red-tape Paradise. But I suppose I am mortal, and the air of Paradise does not suit my "airthy nature." In truth, to my mind, the daily cry is to cholera and fever, "Come, eat me." A dense mixed population, packed like herrings in a barrel, at the foot of a red-hot rock, in an almost tideless sea, cut off at times from the usual daily supplies of fresh provisions, at the caprice of a neighbour who naturally hates you and enjoys your misery, may produce a red-tape Arcadia;—but I am sceptical. All the hotel appliances are British. You are served upon willow-pattern plates and dishes; the bed-rooms remind you of an old-fashioned English inn, in a back street out of Holborn. Fancy the thermometer so high that you expect every moment to see the quicksilver jump out of the tube, and your letter to Julia is marked as with salt tears upon the Bath post. You are summoned to the banquetting-hall. In due course the dinner is served. English soup as thick as porridge, roast beef, baked potatoes, Yorkshire pudding, plum ditto. It is too hot to be angry, and swear; so I drink sherry and soda-water, and wonder why Boniface gives us such fare, and where he finds a salamander to dress it. The tea is excellent, and I enjoy English dry toast, and so to bed. Dream I'm in a furnace, wake with a start, and hear the clock chime twelve. The clock strikes the quarters. They are always changing the guard or all's-well-ing. Oh, for a cool grot and plashing water. But sleep cries No, and won't come. Mosquitoes amuse themselves buzzing, and more offen-

sive invaders hop and crawl. I will complain to the landlord; but I knew he will say that I brought my companions from the Spanish steamer, and it will be far too hot to argue the point. I suffer therefore, but do not feel particularly athletic in consequence.

Gibraltar has her regular routine guide-book sights, and they are worth seeing, and are seen by red-hot tourists; but this time I will read about them. The waiter tells me that there is a splendid view from the flagstaff at the apex of the rock; but at 90° in the shade I would rather not, thank you, even in a dandy chair. I prefer the cane sofa, and will take Murray's word for it. Monkeys up there, indeed! I am not partial to those animals; they do say that they pass under the sea to and from the African side. I doubt it, but it is much too hot to dispute it. I take up a book containing tales translated from the French, with *estampes* illustrative of the text. One tale has Attila for its hero: he is, in the illustration, represented with a horse, the Third pig-tail and swallow-cut coat, on horseback, kissing his hand to a lady in a very short-waisted dress, leaning over a balcony. I dare say that Attila did kiss his hand to a lady, and did swear at his cook when the dinner was ill dressed; but I fancy no precedent exists which would justify an artist to depict him in a pig-tail and uniform of the date of the third George. Perhaps, as the latter plighted his kingly word to restore Gibraltar to Spain, but did not do so, the artist intended to "point a moral," the engraving, most certainly, in no way adorning the tale. I am glad to leave this furnace, and find myself upon the ocean—in sight of Cadiz, which appears in the distance as a city of marble palaces; but when you land, you find it stucco and whitewash. F. W. C.

SUPPLEMENT TO THE BUDGET OF PARADOXES. (No. IX.)

THERE is a point about Mr. Shanks's 608 figures of the value of π which attracts attention, perhaps without deserving it. It might be expected that, in so many figures, the nine digits and the cipher would occur each about the same number of times; that is, each about 61 times. But the fact stands thus: 3 occurs 68 times; 9 and 2 occur 67 times each; 4 occurs 64 times; 1 and 6 occur 62 times each; 0 occurs 60 times; 8 occurs 58 times; 5 occurs 56 times; and 7 occurs only 44 times. Now, if all the digits were equally likely, and 608 drawings were made, it is 45 to 1 against the number of sevens being as distant from the probable average (say 61) as 44 on one side or 78 on the other. There must be some reason why the number 7 is thus deprived of its fair share in the structure. Here is a field of speculation in which two branches of inquirers might unite. There is but one number which is treated with an unfairness which is incredible as an accident: and that number is the mystic number seven! If the cyclometers and the apocalyptic would lay their heads together until they come to a unanimous verdict on this phenomenon, and would publish nothing until they are of one mind, they would earn the gratitude of their race.

Redit labor actus in orbem. Among the matters which have come to me since the Budget opened, there is a pamphlet of quadrature of two pages and a half from Prof. Recalcatti, already mentioned. It ends with "Quelque objection qu'on fasse touchant les raisonnements ci-dessus on tombera toujours dans l'absurde." A civil engineer—so he says—has made the quadrature "no longer a problem, but an axiom." As follows: "Take the quadrant of a circle whose circumference is given, square the quadrant, which gives the true square of the circle. Because $30 \div 4 = 7.5 \times 7.5 = 56.25$ = the positive square of a circle whose circumference is 30." Brevity, the soul of wit, is the "wings of mighty winds" to quadrature, and sends it "flying all abroad." A *surbeddicary*—something like M.A. or LL.D., I understand—at Calcutta, published in 1869 the division of an angle into any odd number of parts, demonstration and all in—when the diagram is omitted—one page, good-sized, well-lead type, small duodecimo. But in the Preface he acknowledges "sheer inability" to execute his task. Mr. William Dean, of Todmorden, in 1863,

announced $3\frac{1}{2}$ as proved both practically and geometrically: he has been already mentioned anonymously. Next I have the tract of Don Juan Larrija, published at Leiria in 1856, and dedicated to Queen Victoria. Mr. W. Peters, already mentioned, who has for some months been circulating diagrams on a card, publishes (August, 1865) 'The Circle Squared.' He agrees with the Archpriest of St. Vitus. He hints that a larger publication will depend partly on the support he receives, and partly on the castigation, for which last, of course, he looks to me. Cyclometers have their several styles of wit; so have anticyclometers too, for that matter. Mr. Peters will not allow me any extra-journal being: I am essentially a quotation from the *Athenæum*; "A De Morgan" et *præterea nihil*. If he had to pay for keeping me set up, he would find out his mistake, and would be glad to compound handsomely for a stereotype. Next comes a magnificent sheet of pasteboard, printed on both sides. Having glanced at it and detected quadrature, I began methodically at the beginning—"By Royal Command," with the lion and unicorn, and all that comes between. Mercy on us! thought I to myself: has Her Majesty referred the question to the Judicial Committee of the Privy Council, where all the great difficulties go now-a-days, and is this proclamation the result? On reading further I was relieved by finding that the first side is entirely an advertisement of Joseph Gillott's steel pens, with engraving of his premises, and notice of novel application of his unrivalled machinery. The second side begins with "the circle rectified" by W. E. Walker, who finds $\pi = 3.141594789624155$ This is an off-shoot from an accurate geometrical rectification, on which it is to be presumed Mr. Gillott's new machinery is founded. I have no doubt that Mr. Walker's error, which is only in the sixth place of decimals, will not hurt the pens, unless it be by the slightest possible increase of the tendency to open at the points. This arises from Mr. Walker having rectified above proof by .000002136034362....

Lastly, I, even I myself, who have long felt that I was a quadrature below par, have solved the problem by means which, in the present state of the law of libel, I dare not divulge. But the result is permitted; and it goes far to explain all the discordances. The ratio of the circumference to the diameter is not always the same! Not that it varies with the radius; the geometers are right enough on that point: but it varies with the time, in a manner depending upon the difference of the true longitudes of the Sun and Moon. A friend of mine—at least until he misbehaved—insisted on the mean right ascensions: but I served him as Abraham served his guest in Franklin's parable. The true formula is, A and a being the Sun's and Moon's longitudes,

$$\pi = 3\frac{1}{2} + \frac{1}{2} \cos(A - a).$$

Mr. James Smith obtained his quadrature at full moon; the archpriest of St. Vitus and some others at new moon. Until I can venture to publish the demonstration, I recommend the reader to do as I do, which is to adopt 3.14159, and to think of the matter only at the two points of the lunar month at which it is correct. The *Nautical Almanac* will, no doubt, give these points in a short time: I am in correspondence with the Admiralty, with nothing to get over except what I must call a perverse notion on the part of the Superintendent of the *Almanac*, who suspects one correction depending on the Moon's latitude; and the Astronomer Royal leans towards another depending on the date of the Queen's accession. I have no patience with these men: what can the Moon's node or the Queen's reign possibly have to do with the ratio in question? But this is the way with all the regular men of science; Newton is to them &c. &c. &c. &c.

The following method of finding the circumference of a circle (taken from a paper by Mr. S. Drach in the *Phil. Mag.*, Jan. 1863, Suppl.) is as accurate as the use of 3.14159265 . From three diameters deduct 8-thousandths and 7-millionths of a diameter: to the result add five per cent. We have then not quite enough; but the shortcoming is at the rate of about an inch and a sixtieth of an inch in 14,000 miles.

The squaring of the circle and the discovery of the Beast are the two goals—and goals also—of many unbalanced intellects, and of a few instances of a better kind. I might have said more of 666, but I am not deep in its bibliography. A work has come into my hands which contains a large number of noted cases: to some of my readers it will be a treat to see the collection; and the sight will perhaps be of some use to those who have read controversy on the few celebrated cases which are of general notoriety. It is written by a learned decipherer, a man who really knew the history of his subject, the Rev. David Thom, of Bold Street Chapel, Liverpool, who died, I am told, a few years ago.

Anybody who reads his book will be inclined to parody a criticism which was once made on Paley's Evidences—"Well! if there be anything in Christianity this man is no fool." And, if he should chance to remember it, he will be strongly reminded of a sentence in my opening chapter,—"The manner in which a paradoxer will show himself, as to sense or nonsense, will not depend upon what he maintains, but upon whether he has or has not made a sufficient knowledge of what has been done by others, especially as to the mode of doing it, a preliminary to inventing knowledge for himself." And this is reinforced by the fact that Mr. Thom, though a scholar, was not conspicuous for learning, except in this his great pursuit. He was a paradoxer on other points. He reconciled Calvinism and eternal reprobation with Universalism and final salvation; showing these two doctrines to be all one.

This gentleman must not be confounded with the Rev. John Hamilton Thom (no relation), at or near the same time, and until recently, of Renshaw Street Chapel, Liverpool, who was one of the minority in the Liverpool controversy when, nearly thirty years ago, three heretical Unitarian schoolmasters exchanged shouted sermons with thirteen Orthodox ships of the line, and put up their challengers' dander—an American corruption of *d-d-eager*—to such an extent, by quiet and respectful argument, that those opponents actually addressed a printed intercession to the Almighty for the Unitarian triad, as for "Jews, Turks, Infidels, and Heretics." So much for the distinction, which both gentlemen would thank me for making very clear: I take it quite for granted that a guesser at 666 would feel horrified at being taken for a Unitarian, and that a Unitarian would feel queerified at being taken for a guesser at 666. Mr. David Thom's book is 'The Number and Names of the Apocalyptic Beasts,' Part I., 1848, 8vo.: I think the second part was never published. I give the Greek and Latin solutions, omitting the Hebrew: as usual, all the Greek letters are numeral, but only M D C L X V I of the Latin. I do not give either the decipherers or their reasons: I have not room for this; nor would I, if I could, bias my reader for one rather than another.

D. F. Julianus Cæsar Atheus (or Aug.); Diocles Augustus; Ludovicus; Silverter Secundus; Linus Secundus; Vicarius Filii Dei; Doctor et Rex Latinus; Paulo V. Vice-Deo; Vicarius Generalis Dei in Terris; Ipse Catholicus Ecclesie Visibile Caput; Dux Cleri; Una, Vera, Catholica, Infallibilis Ecclesia; Auctoritas politica ecclesiasticaque Papalis (Latina vel also do); Lutherus Doctor Gregis; Calvinus tristis fidei interpres; Die Lux; Ludovic; Will. Laod; Λατίνος; ἡ λατινὴ βασιλεία; ἐκκλησία ἰταλικά; εὐαγγέλιος; τείραν; ἀρροῦμε; λαμπέρις; ὁ νεκρῆς; κακὸς ὁδῆγος; ἀληθὴς βλαβερὸς; παλαιὸς βασιλεὺς; ἀμνὸς ἁγίος; ἀντίμοις; γένησθαι; εὐναίς; Βενεδίκτος; Βονοβαζιός γ. παπα ε. η. ε. ε. α., meaning Boniface III. Pope 68th, bishop of bishops the first! ὁβλίπτος; ὁιὸς εἰμι ἡ ἡράς; ἡ μισσα ἡ παύση; λευθέρηνα; σαξένιος; Βιζζα ἀντίθεος (Beza); ἡ ἀλαζονεία βίου; Μαομετῆς β.; θεὸς εἰμι ἐπὶ γαλῆς; λατρεῖς; παρῆστος; διοκλασιανός; χίμα; βρακί; ἰὼν Πανν; κοῦπος (cowpox, ε being the vow: certainly the vaccinated have the mark of the Beast); Βοννεπαρῆ; Ν. Βοννεπαρῆ; εἰσπορία; παραδοσις; το μεγαθῆρον.

All sects fasten this number on their opponents. It is found in *Martin Luther*, affirmed to be the true way of writing the name, by carrying numbers through the Roman alphabet. Some Jews, accord-

ing to Mr. Thom, found it in *Ἰησοῦς τῆς Ναζαρέθ*, *Jesus of Nazareth*. I find on inquiry that this satire was actually put forth by some mediæval rabbi, but that it is not idiomatic: it represents quite fairly "Jesus Nazarene," but the Hebrew wants an article quite as much as the English wants "the."

Mr. David Thom's own solution hits hard at all sides: he finds a 666 for both beasts; *ἡ φῶν* (the mind) for the first, and *ἡ σαρκὶς σαρκας* (fleshly churches) for the second. A solution which embodies all mental philosophy in one beast and all dogmatic theology in the other, is very tempting: for in these are the two great supports of Antichrist. It will not, however, mislead me, who have known the true explanation a long time. The three sixes indicate that any two of the three subdivisions, Roman, Greek, and Protestant, are, in corruption of Christianity, six of one and half a dozen of the other: the distinctions of units, tens, hundreds, are nothing but the old way (1 Samuel xviii. 7, and Concordance at *ten, hundred, thousand*) of symbolizing differences of number in the subdivisions.

It may be good to know that, even in speculation on 666, there are different degrees of unreason. All the diviners, when they get a colleague or an opponent, at once proceed to reckon him up: but some do it in play and some in earnest. Mr. David Thom found a young gentleman of the name of St. Claire busy at the beast-number: he forthwith added the letters in *σκληρὸς*, and found 666: this was good fun. But my spiritual tutelary, when he found that he could not make a beast of me except by changing *κ* into *τ*, solemnly referred the difficulty to the Almighty: this was poor earnest.

I have come in the way of a work entitled 'The Grave of Human Philosophies,' (1827) translated from the French of R. de Bécourt by A. Dahmas. It supports, but I suspect not very accurately, the views of the old Hindoo books. That the sun is only 450 miles from us, and under 40 miles in diameter, may be passed over; my affair is with the state of mind into which persons of M. Bécourt's temperament are brought by a fancy. He fully grants, as certain, four millions of years as the duration of the Hindoo race, and 1956 millions as that of the universe. It must be admitted he is not wholly wrong in saying that our errors about the Universe proceed from our ignorance of its origin, antiquity, organisation, laws, and final destination. Living in an age of light, he "avails himself of that opportunity" to remove this veil of darkness, &c. The system of the Brahmins is the only true one: he adds that it has never before been attempted, as it could not be obtained except by him. The author requests us first, to lay aside prejudice; next, to read all he says in the order in which he says it: we may then pronounce judgment upon a work which begins by taking the Brahmins for granted. All the paradoxers make the same requests. They do not see that complacence would bring thousands of systems before the world every year: we have scores as it is. How is a poor candid inquirer to choose? Fortunately, the mind has its grand jury as well as its little one: and it will not put a book upon its trial without a *prima facie* case in its favour. And with most of those who really search for themselves, that case is never made out without evidence of knowledge, standing out clear and strong, in the book to be examined.

There is much private history which will never come to light, *carè quia vate sacro*, because no Budgeteer comes across it. Many years ago a man of business, whose life was passed in banking, amused his leisure with quadrature, was successful of course, and bequeathed the result in a sealed book, which the legatee was enjoined not to sell under a thousand pounds. The true ratio was 3:1416: I have the anecdote from the legatee's executor, who opened the book. That a banker should square the circle is very credible: but how could a City man come by the notion that a thousand pounds could be got for it? A friend of mine, one of the twins of my zodiac, will spend a thousand pounds, if he have not done it already, in black and white eulometry: but I will answer for it that he, a man of sound business notions, never entertained the idea of *π* recouping him, as they now say. I speak of individual success: of course if a company

were formed, especially if it were of unlimited liability, the shares would be taken. No offence; there is nothing but what a pun will either sanctify, justify, or nullify—

It comes o'er the soul like the sweet South
That breathes upon a bank of *vitis hirs.*

The shares would be at a premium of 3/4 on the day after issue. If they presented me with the number of shares I deserve, for suggestion and advertisement, I should stand up for the Archpriest of St. Vitus and 3/4, with a view to a little more gold on the bridge.

A. DE MORRAN.

OUR WEEKLY GOSPEL.

On Monday next (the 29th inst.) the Passmore Edwards Banquet will take place at The Albion, Mr. John Hodge in the chair. This is in honour of the guest of the evening, Mr. Passmore Edwards, "who, after having been compelled, some years since, to avail himself of a legal release from his debts, has, by his self-denying labours and economy, recently paid the whole of his creditors, or their representatives, in full."—This is a man!

The fire at the Standard Theatre, so short a time after three thousand persons had left it, has aroused the wholesome fears of play-goers who nightly run the risk of being burnt alive. The Lord Chamberlain's Department (when before a Committee of the House of Commons) protested that they took all possible means to protect the public. Nevertheless, the peril of the latter is indescribable. Drury Lane, by its being a house within a house, and its numerous issues, stands at the head of those theatres in which a panic might be got over at a small sacrifice. But there are some houses with nothing but narrow passages, surrounded by buildings, and with, perhaps, a spirit-shop at the entrance or hanging on to the sides, whereby the dangers of an audience are quintupled. In such cases a fire outside the theatre might be as calamitous as one within. Such a condition of things, piling danger on danger, should not be permitted. As for the paraphernalia of hose and buckets within the house, they are well meant, but they are little better than "properties." How could any fireman reach them with a frantic and savage mob impeding and killing one another in a fierce and selfish struggle to escape?

Faust has had a singular career in England, from the days in which he appeared in old tales of magic, down to his production on the boards at Drury Lane. Marlowe made a thrilling tragic drama out of the wondrous story, and good Edward Alleyn was the original Faust, in "a surplice with a cross upon his breast," to the admiration of Elizabethan and Stuart playgoers. About three-quarters of a century later, in James the Second's reign, the graceful but luckless actor Will Mountfort, converted the old fiery drama by Marlowe into a burlesque, in which Leigh and Jevon acted *Harlequin* and *Scaramouch*. In the season of 1723-4, the theatres of Drury Lane and Lincoln's Inn Fields took the subject of Faustus for a pantomime. Rich beat Thomond, and the town poured thousands of pounds into the treasury of "L. I. F." Then, except in revivals of this pantomime, the stage, we think, saw no more of Faustus till he was brought out at Drury Lane in 1825. There was this originality in the piece then produced, —namely, Terry acted *Mephistophiles* whenever speaking was required, and O. Smith whenever pantomimic action only was necessary. As Terry was rather short, and Smith very tall, the absurdity of this arrangement was manifest. We believe that of the company engaged in the performance of this piece in 1825, only two survive, Miss Stephens (Dowager Countess of Essex) and Mr. Paul Bedford, the veteran, who should now rest and be thankful, for his own and his reputation's sake.

An event of to-day connects us with individuals of "a long time ago." It is a hundred and seventeen years since Garrick married (in 1749) the Viennese ballet-dancer, Eva Veigel, *alias* Violetta, whose father was supposed to be an English nobleman, —a friend of Garrick. The grand-niece of Mrs. Garrick, Madame von Sear, has just died at Vienna, and in her family may perhaps be found some elucidation of the mystery

which always hung about the history of: the paternity of Garrick's good and charming wife. There are yet some among us who remember her in her old age, crunched stink in hand, walking in the sunshine on Adelphi Terrace.

The Rev. Morley Punshon, a graceful writer and an eloquent preacher, of whom the Wesleyans are justly proud, is so seriously ill as to preclude any hope, though he may yet live many years, of his being able ever to write or preach again.

Lady Georgiana Fullerton's 'Too Strange not to be True' is an adaptation of 'Die Prinzessin von Wolfenbüttel,' a story by Zschokke.

It is not easy to look up at what is left of Wyatt's Pantheon facade, and fancy that nearly a hundred years ago people watched its progress with intense interest. It will, probably, soon disappear altogether. It has been the frontpiece to a "Winter Ranelagh," a ridotto, a theatre, a bazaar, and the last is about to be converted into a wine depot. Though the house was once burnt down and twice rebuilt, Wyatt's front has kept its position. While the original splendid house was building, 1770-72, people talked in tones of wonder of the new bank and houses that had been thrown down for it, and of the cost of land and compensation, amounting to 300,000*l.* The outlay for building reached about 40,000*l.* Just before it opened, in 1772, Oxford Road was paved for its sake, and during the laying of the pavement cartloads of wretches on their way from Newgate to be strangled at Tyburn, were carried round by the New Road. Then, that opening masquerade!—Goldsmith was there, in an old English dress, and the tippling Duchess of Ancastrer, and the wild young queen of beauty and of folly, Gertrude Conway, and crowds besides, all streaming through the glittering suite of fourteen rooms, the ceilings of which glowed with artistic art and invention. Around the rooms were marble statues of gods and goddesses, with three in porphyry attracting all loyal hearts,—great George, the white-armed Charlotte, and Britannia smiling on both. Such another night even the Pantheon never saw. It was calculated that in dresses and "refreshments" the guests expended on that occasion full 10,000*l.* One cannot look on the smoke-grimed face of the Pantheon now, and dream of the brilliant madness which was once noisily, drunkenly, and licentiously enthroned behind it. Those were days when the "company," sober and drunken, modest and immodest, used to breakfast at dawn, on the remnants of supper, and then fling the bottles and broken viands among the howling and hungry crowd without. The Pantheon, however, was not successful, though Walpole admired, and said that Henry the Eighth, who had taste, would have patronized it. Boswell, of course, agreed with Johnson, that it was inferior to the Summer Ranelagh, near Chelsea. Even as a theatre it failed. Sydney Smirke admirably converted its interior into a bazaar, and now it is undergoing a transformation, to end as a depot for foreign wines.

In connexion with the disputed point as to whether an Englishman can legally bear a foreign title, or wear a foreign order in England, without the sanction of the Crown, we may refer to a precedent in the case of Nelson. He was informed that he could not appear at court as Duke of Bronte and Knight of various foreign orders, until he had received the usual sanction. Nelson replied that those honours had been conferred on him by his royal master's allies for service he had been deputed by his royal master to render them. He would go to court, he said, with all his titles and all his honours, and he did not suppose anybody would stop him. The supposition was correct; nobody ventured to "stop Nelson."

An interesting public meeting was held last week in the school-rooms of St. Mary's, Charterhouse, in Golden Lane, not far from the site of the once famous Nursery for players. It was attended chiefly by the working men of the district, its object being to call public attention to the unhealthy state of the neighbourhood, especially of the courts by which the space between Golden Lane and Whitecross Street is filled. These a squalid and sickly population is huddled together, for the most part

destitute of anything like comfort, and but scantily provided with even the necessities of life. The chairman of the meeting, Mr. McCullagh Torrens, drew a sad picture of the state of the wretched habitations in which too many of the neighbouring poor have to pass a miserable existence till death comes to their aid at last. Much as has been done with a view to improving the sanitary condition of the metropolis, much more still remains to be done; and the task at times seems almost hopeless. Meetings like that of last week, however, will go far towards strengthening the hands of such workers as Mr. Walrond, the Incumbent of St. Mary's, Charterhouse, who has taken up his residence in a model lodging-house in Golden Lane, in order to be near his work, and who, with the aid of a local sanitary committee, whose exertions deserve the highest praise, has fought a good fight during this terrible season of cholera, with the want and uncleanness and disease by which his strange and unenviable dwelling-place is girt about.

We learn from the *Dublin Evening Mail* a singular fact with respect to the success of Irish authors in Ireland. Balfe's operas and Knowles's dramas were (we are told) less attractive in Ireland than anywhere else. O'Rourke's 'Amelie' and Wallace's 'Maritana,' successful in England, were neglected by Dublin. 'Sylla, the Dictator' (a classical tragedy by Banim, of high pretensions), brought out for the benefit of the author, scarcely commanded a receipt equal to half the expenses. Maturin's tragedy of 'Osmyn, the Renegade,' and Griffin's 'Gisippus' expired after a brief existence of a night or two, though in each the principal character was supported by Macready.

The York Exhibition will close on the 31st inst., after what is already known to be a most successful and profitable career. About 12,000*l.* has been received for admissions; this sum will, after all expenses are paid, probably leave nearly 3,000*l.*

The General Works and Purposes Committee of the Metropolitan Board of Works, such is the somewhat ornate title of the working body in question, recommends the Board to proceed, in the next session of Parliament, with the Bills of last session to effect the Chelsea embankment, Park Lane improvement, and approaches to the northern embankment, the clause referring to the proposed approach through the Northumberland House site being omitted in the latter Bill.

It is anticipated that by January next a beginning will be made with the new street from Blackfriars Bridge to the Mansion House.

It is proposed to take away the much-broken and bedaubed statue of George the Second, by Buchard, which has so long and ignominiously occupied the centre of Leicester Square. It may be well to remind the reader that this work stood originally at Canons, the seat of the Duke of Chandos, whence, in 1747, it was purchased, and placed where it now is. It was formerly gilt.

One of the schemes now in practice for the aid of the poor is "The Evicted Tenants' Aid Association," which was formed, we believe, to help and protect persons injured or liable to be injured by the progress of railways in large towns, especially in the metropolis. This society intends to promote the formation of a village for working men in Epping Forest, with a railway for service there. The idea does not seem a bad one; but it will, if put in practice, be destructive to the Forest.

At length the recent Act of Parliament for the union of City benefices and parishes is to take effect. The parishes to which this wholesome law is about to be applied are—St. Benet, Gracechurch Street; with St. Leonard, Eastcheap (these parishes have been united since 1685); and Allhallows, Lombard Street. The church of the first-named parish, which stands at the junction of Fenchurch Street and Gracechurch Street, is to be demolished. Allhallows Church will, in future, serve the three parishes. A portion of the site of the removed edifice is to be applied to widen Fenchurch Street, which is very narrow at the spot in question; the price to be paid to the Ecclesiastical Commissioners for this fragment is 3,000*l.* The entire site is

estimated to be worth about 45,000*l.* With the proceeds of the sale a new church and residence will be erected at Stepney. Allhallows Church is to be re-pewed at the cost of 4,000*l.* The church of St. Benet dates originally from the end of the twelfth century: the edifice which occupied the site in the seventeenth century was, with the exception of the spire, burnt in the Great Fire of 1666. Wren pulled down the spire, and built the present structure, which is very small, its internal measurements being only sixty feet by thirty feet. The parish books of St. Benet are said to contain many interesting records.

The progress of metropolitan changes has impelled the destruction of the well-known Surrey Chapel, in the Blackfriars Road, which, in 1783, was built for Rowland Hill. Here he preached until his death in 1833. This famous minister died in the adjoining house, and was buried in the chapel. The congregation of Surrey Chapel will build a new place of worship on the site of the Magdalen Hospital.

A story has appeared in the French papers about the late Marquis de Boissy which appears to be too good to be true. The eccentric Marquis, as is well known, in spite of his furious onslaughts on *la perfide Albion* in the Corps Législatif, was a complete *Anglomane* in private life. He dressed in the English fashion, entertained English guests, and kept up his household with *English servants*. During his last illness a lady called upon him, and as she sat by his side she remarked, with some alarm, that her companion played carelessly with a revolver. M. de Boissy said, "I beg pardon, Madame, but all my servants are English, and I am obliged to be on my guard, as the rascals are capable of anything."

Subscription lists for the victims of the inundations of the Loire have appeared in the *Moniteur*; but the amount already subscribed for the sufferers by this terrible calamity has not reached a million of francs (40,000*l.*), and Frenchmen seem to give 50 francs where in England they would give 50*l.* M. Dupanloup has, however, set an example by adopting one hundred poor children, whose parents have been reduced by this infliction to absolute destitution. The Episcopal Palace is full at present of these poor little ragged wretches, until the Bishop is able to place them all out in schools.

Further news has been received from the Russo-American telegraph expedition. The Russian engineer-in-chief, accompanied by three officers of the United States corps of engineers, appointed to survey the line of route, set out from Petropaulovsk in August last. After almost incredible labour and fatigue, they have completed their task from Anadyrsk to the Amoor, a distance of 6,000 versts; and on the opening of the navigation next year vessels will be despatched to the Sea of Okhotsk with the necessary stores and materials for erecting the line of wire. Labourers have been hired among the native Yakoutes; hundreds of trees have been felled to be used as poles; and it is believed that within three years the line will be carried up to Behring's Strait, there to be linked by a submarine wire to the American continent.

To the valuable and voluminous Reports published within the past ten years by the Geological Survey of Canada, is now added an Atlas, containing twelve coloured maps and sections. The first of the series, on a reduced scale of 125 miles to the inch, embraces the whole region from the eastern extremity of Newfoundland to the Assiniboin, and from James's Bay, on the north, to the confines of Virginia on the south. It is to be regarded as preliminary to a large map of the same region, on a scale of 25 miles to the inch, which has been engraved in Paris, and is shortly to be published, showing the true character of the geology of the British North-American provinces, its relations to that of adjacent territories, and especially to the great coal-bearing areas.

A project has been set on foot for desicating the Zuyder Zee, by which it is estimated 380,000 acres will be gained for agricultural purposes. The calculated cost is 10,500,000*l.*

The judicial statistics for 1865 contain several interesting statements. The total number of sum-

mary convictions before magistrates during the year was 312,882. Of these, 470 offenders were flogged. In 1864 the number whipped was 443. Assault cases appear to be greatly on the increase. In 1865 the number amounted to 13,834, being an augmentation of 388 over the preceding year. Under the head of Coroners' Inquests, it appears that the number in 1865 amounted to 25,011. Of these, no fewer than 8,667 were upon children under sixteen years of age, and 11,397 are returned under the head of Accidental Death. There is an addition of 275 to the number of offences against the Game Laws, which were 10,392 during the past year.

INSTITUTE OF PAINTERS IN WATER COLOURS.—THE WINTER EXHIBITION OF SKETCHES AND STUDIES WILL BE OPENED, at their Gallery, 53, Pall Mall (opposite Marlborough House), on Monday, November 5.—Admission, 1*s.*; Catalogue, 6*d.* JAMES FAHEY, Secretary.

MR. MORREY'S COLLECTION OF MODERN HIGH-CLASS PICTURES IS ON VIEW at the Royal Exchange Fine Arts Gallery, 54, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Frith, R.A.—Rosa Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswell, R.A.—C. Pickersill, R.A.—Calderon, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Naumyth—Linnell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Faed—Frère—Buipers—Liddersdale—George Smith—Dunmore—Peter Graham, &c.—Admission on presentation of address card.

MR. and MRS. GERMAN REED, with MR. JOHN PARRY, in a YACHTING CRUISE, with THE WEDDING BREAKFAST, by Mr. John Parry. Every Evening (except Saturday) at Eight Saturday only at Tice's, Royal Gallery of Illustration, 14, Regent Street.—Admission, 1*s.*, 2*s.*, 3*s.*, and 5*s.* The Gallery has been entirely re-decorated, and is now ventilated on an improved system.

SCIENCE

Mineral Statistics of the United Kingdom of Great Britain and Ireland for the Year 1865. With an Appendix. By Robert Hunt. (Longmans & Co.)

THIS is the most detailed and the most significant of all the annual mineral returns collected by Mr. Hunt. Their statistical arrangement and tabular form render them repulsive to general readers, and they are, therefore, likely to be left unread. But several important results lie hid under this mass of tabulated figures—results which concern every Englishman interested in the material resources of his country. Only, however, a competent interpreter of these tabulated figures can bring out such results in an appreciable and intelligible manner. The figures are dumb and dead until their significance is unfolded.

The subject which at present more particularly occupies public attention is the rapid consumption of our coal, and its consequences. Not until we have an official announcement of the probable remaining and available coal stores in our several coal-measures can we definitely state the consequences of our immense annual extraction. But as official inquiries are proverbially slow in progress, and the results tardy in making their public appearance, we may opportunely present a few remarks on the statistics before us relating to this momentous matter.

In 1865 the total produce of coal and earthy minerals in the United Kingdom was 98,150,587 tons, of which Durham and Northumberland yielded rather more than one-fourth part. The annual increase of production has been most rapid,—a fact which is shown both by the large additional number of tons raised and the continually increasing number of collieries opened. The latter were 2,614 in the year 1855, and in the year 1865 they were 3,256 in number; thus displaying the opening of 642 additional collieries in the last ten years. Now, it requires no Royal Commission to inform us, that while we are thus opening about sixty-four new collieries every year, and when we have arrived at an annual extraction of nearly 100,000,000 tons, (to represent which in a popular manner several obvious calculations might be made,) we must be yearly approaching, not the period of the final exhaustion of our coal-fields, but

certainly the period of the exhaustion of all the best coal. Assuming, for instance, that the estimate of Mr. Vivian may be approximately correct,—viz., that we have 2,770 square miles of coal-measures, containing 84,000,000,000 tons of coal,—then we can, for the present, readily calculate how long these will last at an annual extraction of 100,000,000 tons. But the answer would be fallacious, since of the whole remaining quantity only a certain proportion consists of the best kinds of coal. This is the fact to be kept in view, and the necessary distinction which the otherwise occupied public so seldom draw. People who pay merely a passing moment's attention to the matter, have heard that some great colliery owner or viewer has declared that we have coal enough for some thousands of years; so they are satisfied that all the publicly expressed fears of an early lack of coal are groundless. Do such persons know that several of the best Newcastle seams of coal are already nearly wrought out?—that the pits are continually deepening and widening?—and that, therefore, all mining difficulties are continually increasing, together with the expenses of working? Do they consider that the cost of coal will augment as the coal itself decreases?—that pits rapidly fill with water, or from other causes become unworkable?—that enormous and costly steam-power must be employed to overcome inundations?—and, in short, that deep coal-pits become very expensive and onerous undertakings? Do they know that the annual 100,000,000 tons of coal imply a very serious run upon our coal-measures, which alarms men who are cognizant of its full effect? With reference to any coal deposits which may or may not lie under the Permian strata, the question whether they exist is geological; and the question whether, if existing, they can be reached and profitably wrought is mechanical.

Some of the facts brought before the public during the recent severe financial panic will aptly illustrate our coal condition; and we adduce them because they are now familiar and fresh to most minds. It was daily City talk not many months ago that no bank in England could stand proof against an urgent and incessant run upon its resources,—that any one even of the best reputed joint-stock banks could be broken by a combined rush to withdraw deposits. Every banker and competent mercantile man had known this from the beginning, but the public lately seemed to learn it for the first time. The scene which we ourselves witnessed on what was called "Black Monday" in the city of London, and which was thought so extraordinary and exceptional that some have declared it will never again recur,—viz., the hurrying of hundreds of depositors to banks and discount-houses for the purpose of demanding their deposits at one time:—this very scene may be paralleled every working-day in the year in our great coal-fields. *Mutatis mutandis*, the coal-fields are the banks, the pits are the banking offices, and the miners are the active agents of the withdrawing public. There is but a certain reserve fund in the subterranean coffers, and upon this fund the pitmen are daily drawing at a rapid and accelerating rate. Annual collective drafts for 100,000,000 tons of coal cannot be continually honoured without causing great fears for the ultimate stability of the subterranean bank. When we are favoured with an authorized valuation of the assets, we shall be able at once to ascertain our carbonaceous solvency, and to prepare a mineral fuel balance-sheet.

Of the absolute deficiency of coal—that is, of the seams of secondary or tertiary value—we have no apprehension; but of the too rapid diminution of the best bituminous and the best

steam-fuel coal, we have no doubt. Of course this cannot be prevented by any restrictive legislation. The coal-owners will invariably sell their coals as fast as they can find a market for them, and the recognized principles of free trade will continue in irresistible operation. All that geological science and annual statistics can effect is, to make the facts known and patent to the world. Let the public know our actual resource of this invaluable fuel, and if they persist in their indifference to the matter, and, what is far worse, to the present heedless waste of inferior coals, then the issue is manifest. When that is made manifest, it is probable that scientific men will devote their earnest attention to possible substitutes for superior coal. Perhaps Government may encourage their researches. At all events, the recently issued parliamentary paper upon experiments made with petroleum give us no great encouragement to look to this kind of mineral as a substitute for good coal.

If we had space, we should advert to the instructive tables which are now first presented, showing the quantities of coal brought within the district of the city of London for the last twelve years,—the amount of coal used in all the branches of iron manufacture,—the total home consumption,—and the relation which these data bear to our increasing population. Besides our own produce, we have brief statistics of the coal production of several foreign countries; and, to pass away from coal, there are the usual statistics of metallic mining, together with a useful Appendix of the metaliferous mines, other than iron, of the United Kingdom, with the names of purser, manager, and chief agent to each mine. The iron ore and iron manufacture returns are now full and suggestive, and are followed by lists of the mills and forges in the United Kingdom, including names of works and of firms. In short, this volume, unpretending and unattractive as it appears, is replete with mineral statistics of great mining and manufacturing value.

After all the expenditure lavished upon our Geological Survey, and the School of Mines with the Museum, we are rejoiced to receive and to commend so practical and serviceable a publication as that now before us, in preparing which Mr. Hunt must have encountered many minor difficulties. We fear that his labours may pass unregarded amidst the tumult and hurry of great events and public changes; but we have, we hope, said something to secure their just appreciation.

SOCIETIES.

NUMISMATIC.—Oct. 18.—W. S. W. Vaux, Esq., President, in the chair.—Mr. Smallfield exhibited, on behalf of the Kent Archaeological Society, three Saxon sceattas, two of them from the cemetery at Sarre, and the third from Canterbury, found during the restoration of the cathedral.—Mr. Evans read a paper, communicated by W. Allen, Esq., 'On a find of Coins of Allectus at Old Ford, Bow, in February, 1866.'—Mr. Madden read a short note from Gaston Feuardent, Esq., 'On the Gold Staters of Athens,' in which the writer came to the conclusion that there were specimens of these coins existing which may be considered genuine.—Mr. Madden read a paper by himself 'On some Roman Coins and Medallions recently purchased for the British Museum.' Of these may be especially mentioned a bronze medallion of Hadrian, who wears on his head the lion's skin, and a unique silver medallion of Domitian; of this latter Mr. Madden gave a detailed historical, as well as numismatic, account.

MEETING FOR THE ENSUING WEEK.

THURS. LINNEAN, 8.—'Experimental Investigations with Cestoid Entozoa,' Dr. Cobbold. 'Indian Acanthaceae,' Dr. Andersen. 'Sclerotium stipitatum,' Dr. Shortt.

FINE ARTS

FINE-ART GOSSIP.

THE King of the Belgians has conferred the Order of Leopold on Mr. Frith, R.A., whose picture of 'Ramsgate Sands' has recently been exhibited at Brussels. This is only one out of many instances in which the merits of Englishmen have met with honourable recognition at foreign Courts.

The Winter Exhibition of the Institute of Painters in Water Colours will open on the 5th proximo. The private view will take place on Saturday next, the 3rd proximo.

Large subscriptions are being sought for the building of a nave to Bristol Cathedral; for this purpose 7,000*l.* is promised; 30,000*l.* will, it is estimated, be required. It will be remembered that no nave exists to Bristol Cathedral, the original nave having been destroyed several centuries ago, although by whom, how or why, has been a matter of discussion. Bristol was one of Henry the Eighth's new dioceses, the structure appropriated to the bishop's seat having been the ancient monastic church of the Augustine order in the city; this was founded by Robert Fitzharding, Lord of Berkeley, and ultimately Canon at Bristol, in the middle of the twelfth century, c. 1142. Abbot Elliot, who died in 1526, is, on excellent grounds, believed to have removed the Norman nave, with the intention of building a new one, as is now proposed. During the last five years works of restoration have been progressing in this church.

The *Fine-Arts Quarterly Review* comprises in its eighth number a series of articles of less interesting character than is usual. Among those which display valuable thought and critical analytical power are a keen-witted and most delicately handled review, by Mr. W. Rossetti, of Mr. Palgrave's admirable 'Essays on Art.' Although we fail to see that several of the conclusions of the former are justified by his premises, and are disposed to question their aptitude to Mr. Palgrave's case, especially when recent sculpture is in question, it is undeniable that Mr. Rossetti has produced an elegant piece of English, the charm of which is enhanced in power by his candour, modesty and moderation, enlivened as these are by wit and the true sense of Art. He certainly hits the truth in ascribing to the author of the "Essays" a rather fanatical devotion to that mode of sculptural expression which is proper to Greek Art, of which no one denies the perfectness, although many would hesitate to class with it those other developments of sculpture which under differing circumstances have differing aims. A laboured article, by Mr. Ræ, 'On the History of Painting in England,'—another, by M. H. de Triqueti, 'On Tuscan Sculptors,' the rickety of which is in painful contrast with Mr. Rossetti's good workmanship,—an interesting archaeological paper, by Mr. J. C. Robinson, 'On the Early Portuguese School of Painting,'—a very interesting account, by the Keeper of Prints and Drawings, of that ingeniously wrought imposition, the so-called Albert Dürer's 'La Vierge à la Porte,' are the noteworthy contents of this number.

Messrs. Mason & Co., Old Bond Street and Norwich, send us an instalment of a series of 'Photographs of English Cathedrals,' folio size; the subject in this case being Norwich, as represented from the south-east, exterior,—a view in which the photographer has contrived to include the spire up to the very vane, also the south transept and St. Luke's Chapel, which advances from the *chevet* on that side, as the Jesus Chapel does on the opposite. This view includes the Beauchamp Chapel, the statue-capped buttresses of the east-end and the radial flying-buttresses of the same portion of the structure. It is therefore the most interesting view. Having been taken while the trees of the close were bare, the architecture is as much open to examination as possible.—A second view shows the interior, nave, looking east, comprising eight of the twelve bays of the arcade, all, doubtless, that could be included. This displays the great Romanesque galleries over the aisles, the clerestory and its wall-passage within the windows, and

stretches to the extreme east end; the choir and *chevet* being, however, hidden by the screen, which, at Norwich, advances two bays to the west of the crossing.—A third view exhibits the choir and apse. These photographs are highly satisfactory; especially so is the second named here. The third, owing probably to the gloom in the lower part of the choir, is a little obscure; above, the work is perfectly plain. The size of the photographs renders them available to architects who may be in search of general views, and displays much of the detail in nearer objects. On the whole, they are eminently successful transcripts, and well adapted for use. A brief history of the Cathedral accompanies the views, gives dates and dimensions; also the names and dates of the bishops and deans. It is startling to find the attack by the men of Norwich upon the cathedral of their city described in this memoir as "a freak." This is hardly the right term for that very serious business.

A few weeks since we stated that, at the sale of Dr. Wellesley's collection of works of Art, one of the most famous drawings by Raphael, a work which is commonly supposed to be a study, or first sketch, for the Garvagh Raphael, a Virgin and Child, had been purchased for the British Museum Print Room. The picture itself having been lately bought for the National Gallery, the acquisition to the Print Room has more than ordinary interest. It is not on this account alone, however, that we again refer to this exquisite study; but rather that its supreme merits may be made known to the reader; and his attention invited to the treasure. Strictly to write, this comprises two drawings, heads which were evidently intended for those of a Virgin and Child. The former was probably made—here the common belief seems well founded—for the picture in question. The materials employed were those so frequently in use during the early period of Raphael's career; these are "silverpoint" on paper prepared with a wash of body-colour of a pale salmon tint, nearly identical with that of the study by Raphael of 'Petrarch and Sappho,' for the fresco, 'Parnassus,' in the Segnatura of the Vatican,—a work which was formerly part of the Payne Knight Collection of Drawings, now in the Print Room, and well known to students. The heads appear to us as studies proper, that is, to have been made from some fair model and vivacious child, and are, to a great extent, portraits executed with the inspiration of the theme of the picture for which they were intended. Accordingly there is a great deal of character in the Virgin's face, distinguishable through the conception of the master. Individuality is there, as in the plump, yet delicate cheeks; the little, round, Raphaelian chin, broad eyelids, the full lips of the high-curved mouth, are due to the draughtsman; also the long and by no means perfectly-drawn neck is mannered in its contour no less than in its action. The eyes look downwards and sideways, and are veiled by their lids; the mouth is exquisitely tender; these, like the rest of the features, are carefully and very delicately modelled. The relief is expressed with a brighter tint of colour than that of the paper, and in the high lights with white. The hair, which is not modelled like the rest of the countenance, is shown to be drawn off the forehead and fastened behind; this, if nothing else served, may be said to decide the question whether or not this is an ideal sketch or a study from a model. In fact, this is just such a study as Raphael might make with a view to after-reference and refining upon when he painted the picture. On the same piece of paper is an almost equally valuable and elaborate study by the same hand, and probably for the head of an infant Christ. The countenance of the latter is full before us, looks downwards and sideways with wonderfully rendered expression of infantine gleefulness. A certain quaintness and extraordinary spirit are imparted to this face by the sideways turn of the jaw in laughing; this is an action such as is often seen in faces of the extremes of life, in those of babies and very aged persons, and due to the same cause in both. The position of the child's head indicates that the model was placed in some one's lap, and was sustained by the hand. This position is not that of Christ in the Garvagh Raphael, but nearly the same as

appears in the Orleans Madonna. These studies are of the most exquisite character and highest rarity; we have thus acquired what its late owner considered the gem of his famous collection. The drawings in question were exhibited with the Art-Treasures at Manchester, in 1857: see 'Catalogue of Drawings,' No. 55, where they were described as studies for the Raphael at Panshanger, which was clearly a mistake.

MUSIC AND THE DRAMA

HER MAJESTY'S THEATRE.—THE WINTER DRAMATIC SEASON WILL COMMENCE ON MONDAY, November 19, when will be produced a NEW DRAMA by EDMUND FALCONER.

DRURY LANE.—A great work, whatever the amount of its unpopularity on its first appearance, is sure in the end to triumph. Scholars in England failed to appreciate the beauties of Goethe's 'Faust,' as a poem, long after Mr. Carlyle had called their attention to it. Critics of those early days ran considerable risk in venturing on its commendation, and the journal that admitted a serious article on the subject imperilled its circulation by the daring act. Meanwhile the fame of the poem spread, and thoughtful minds returned to it as a problem of which the solution would repay the labour. The theme had been more than once treated before it was undertaken by Goethe, but never so elaborately, profoundly and discursively. It required, indeed, the German philosophical development, and the mystical reading of the poet, before even the materials of such a poem as Goethe had projected could be collected. Goethe made it the recipient of all the knowledge that he possessed, and the medium of every opinion that he wished to publish. And thus the poem grew and grew, until it not only expanded into a great book, but suggested another, which was to occupy the remainder of the poet's life, and which was, indeed, only completed a short time before his death. It was published as a posthumous work.

An adaptation of 'Faust,' by Mr. Bayle Bernard, was produced on this stage on Saturday. The house was immensely crowded by a highly-excited audience. With the argument of the poem the English public are familiar, nor can the English playgoer be very ignorant of its general bearing. Both in Germany and England a desire was felt to see it on the stage; but Goethe was rather adverse to the theatrical exhibition of his poem, and by others it was deemed not sufficiently dramatic. The subject itself had been seen frequently on the boards, in the *Puppenspiele* which were derived from the Volksbücher that abound, and continued to be treated in the dramas of Klingemann and Maler Müller; but the great poem itself was shunned as impracticable. An enthusiastic young man in England tried his hand at the theme about the year 1825, when 'Faustus' was performed on the boards of Drury. Mr. George Soane was helped in his experiment by Bishop's music and some fine scenery by Stanfield. The characters were powerfully cast, James Wallack, Terry, O. Smith, Harley, and the Misses Isabella Paton, Stephens and Povey being included in the arrangement. The whole was effective, but stagey,—clever, but melodramatic,—crude in thought, and hasty in execution,—in diction it was turgid; and, though successful at the time, had no power in itself to retain the stage after serving the immediate purpose. Other attempts on the theme were subsequently made by Mr. H. P. Grattan and Mr. Leman Rede; but the greatest prominence was gained by Mr. C. Kean's experiment in 1852, when a version by Mr. Boucicault of M. Michel Carré's French adaptation of the German poem was placed on the boards of the Princess's, under the title of 'Faust and Marguerite.' In this, certain scenes from Goethe's poem were taken, but the dialogue was re-written. Something closer to the original was desirable, and this something Mr. Bayle Bernard has sought to give us in the present production.

Mr. Bernard's leading idea was to convert the poem into a five-act drama, and his selection of scenes has been controlled by the form into which the whole was thrown. The first act contains the temptation of *Faust*, concluding with a vision in

the magic mirror of *Margaret* at her spinning-wheel, forming a tableau which proved astonishingly effective. These details are all made to take place in *Faust's* study; and considerable ingenuity is shown in bringing them together under one roof. The author has retained the reception by *Mephistopheles* of the students—a scene which told well in representation, Mr. Phelps making the most of the sarcasm implied in the speeches. Mr. Edmund Phelps looked *Faust* admirably, but spoke so strictly in his father's style of elocution that the resemblance was startling, notwithstanding the evident pains taken to produce a difference. The second act opens with the scene of the grand *Platz*, made up of certain passages from the earlier scenes, the incidents of Auerbach's cellar, and *Faust's* first meeting with *Margaret*. Here Mr. Harrison, as *Valentine*, sang the Soldier's Song, to Weber's music. Two pieces by Spohr, 'The Festival Chorus' and 'The Students' Chorus,' and the two *morceaux* in the first act from Bishop, served to lighten the dialogue. The third act, the most complete and satisfactory of the whole, consists of two scenes—*Margaret's* bedroom, in which the jewels are left, and *Martha's* garden, in which the double courtship proceeds. Here Goethe is more closely followed, and we feel more clearly the inspiration of his genius. Mrs. H. Vezin and Mrs. H. Vandenhoff impersonated very skilfully the innocent heroine and her worldly neighbour. The most attractive portion of the play, in the fourth act, is illustrated by three pieces of Spohr's music, and one of Mendelssohn's, and includes a representation of the *Walpurgis Night*. The adapter skips over the Witch's kitchen, the forest, and the cave scene, that of *Margaret* at her spinning-wheel, and others in which the poetic spirit will not be constrained within the limits of theatrical possibility, and takes us at once to the City Fountain, where *Margaret* is compelled to listen to the chatter of *Lisette*, and the tale of *Barbara's* fall, so like her own. *Margaret* pours out her sorrows before the *Mater Dolorosa*, and suffers from the evil suggestions of *Mephistopheles*. The next scene prepares us for the May-night. We see *Faust* and *Mephistopheles* ascending the Harz Mountains; the former pursues the beautiful Witch, and is thus led to the *Walpurgis* glen, on which Mr. William Beverley has expended all the resources of his scenic art. The revels take place under changing lights, which give to them a weird variety, while *Faust* chases the Spirit of Beauty from ledge to ledge of the rocky scenery until the spirit of *Margaret* rises to reproach and restrain him with stretched-out arms. On this tableau the drop falls. In the fifth act, poor *Margaret* is arraigned not for infanticide, but for matricide. Meanwhile her brother *Valentine* returns, and the fatal dual takes place between him and *Faust*. The madness of *Margaret* renders vain the patience of the latter, and she dies of the great agony that renders life insupportable. Here Mr. Bernard has endeavoured to anticipate the catastrophe of Goethe's Second Part, by indicating that *Faust* is after all saved. Expressing his determination to perish with *Margaret*, *Mephistopheles* is vanquished by *Faust's* fidelity to the dead, and leaves his victims to the repose of the grave. Whereupon the apotheosis of *Margaret* is revealed; and while she appears in the act of "ascension to the seraphs" the curtain falls. The acting throughout was highly creditable to the whole company. Mrs. Hermann Vezin was an admirable *Margaret*; *Faust* was adequately represented by Mr. Edmund Phelps, and *Mephistopheles* was interpreted by Mr. Phelps in a way that could not be surpassed by any English actor of the present day. It was a genuine triumph.

STANDARD.—On Saturday another version of 'Der Freischütz,' in the form of a burlesque, was placed on this stage. It was got up in the continental style, illustrated with beautiful scenery by Mr. Richard Douglass, who promises to be one of the best of our scenic artists, and succeeded so decidedly that the manager on its conclusion gave directions to proceed with the preparations for the pantomime, as no change in the bill would be needed up to Christmas. Little did he expect

what would happen in the course of a few hours. At six o'clock on Sunday morning the theatre was in flames; and in a remarkably brief space the roof of the magnificent building fell in. Mr. Douglass had from year to year enlarged and ornamented this edifice, until, as a theatre, it was scarcely second to any, whether in accommodation for the public or in regard to the grandeur of its interior. The ambition of the manager was to make it the national theatre of the East End, and for this purpose he constantly employed as stars the best actors and actresses engaged in the performance of the legitimate drama. Mr. Charles Kean, Mr. Phelps, Mr. Creswick, Mr. James Anderson, Miss Glyn, Miss Edith Herard, and other favorites of the public, have all appeared on its boards in support of the poetic drama; and it was Mr. Douglass's expressed design to emulate in future the worthiest efforts of West-End managements. These good intentions, however, must be now deferred until a new theatre can be erected on the spot. Mr. Douglass will suffer great loss, as the building was insufficiently insured; but his characteristic energy will enable him to surmount all difficulties.

STRAND.—A new piece has been produced here, written by Mr. W. H. Swanborough, and entitled 'In the Wrong Box.' The plot is by no means remarkable for novelty, but Mr. Parselle's acting carried it through, and it was accepted by the audience.

MUSICAL AND DRAMATIC GOSSIP.

THE Committee of the Society of Arts devoted to musical education has resumed its sittings. It seems now agreed that the Royal Academy of Music will migrate to South Kensington.

Mr. Halle's winter Concerts at the Free-Trade Hall, Manchester, began on Thursday last.

M. Gounod's special felicity in "curtain-tunes," otherwise act-preludes, was never more clearly to be recognized than in his *Entr'acte* from 'Colombe,' one of the most dainty orchestral movements ever performed at the Crystal Palace, which was given there this day week. The song from the same opera, delivered by Mr. Cummings, is less to our liking. The *Symphony* was Beethoven's 'Eroica'; the new Overture was that of Mr. Sullivan's opera, 'The Sapphire Necklace,' (which, however, had already been performed and favourably received at his Benefit Concert.)—a bright, melodious, provocative prelude, if there was ever such a thing. The *coda* produces an effect potent enough to make the "forfeitable" of modern transcendentalism bite their nails to the quick, without hope of equalling it. Yet, like all real music, it is as unforced as clear. The lady singers were Mdlle. Liebhart and Miss Julia Elton. The latter promises well as a *contralto*. To-day, Schumann's *Symphony* in c major is to be played; and Madame Arabella Goddard will appear in Prof. Bennett's Pianoforte Concerto in c minor. The steady growth of musical interest in this country was never more transparently displayed and illustrated than in the case of this same Crystal Palace. Now, apart from what may be called its set solemnities, and in addition to the performances of its excellently-conducted band, the managers are "taking on" frequent extra-neous attractions and expenses, *vide* these attendant on the clever and complete performances of "The London Glee and Madrigal Union."

No end of the signs and tokens showing in which direction the wind of England's musical time blows! The love of ballads and glees is as strong to-day as it was when Arne and Hook wrote Vauxhall songs, and Stevens, and Dabry, and Cooke, and Webbe, poured out their glees. Co-existent with a singular, in cases painful, cultivation of what may be called frippery and formality in the music laid out for divine worship, and with heartier and more wholesome expressions of religious care applied to the services of the Temple,—contemporary with the spread of honest, intellectual appreciation of the masterpieces of foreign orchestral and operatic music,—the love of secular vocal tunes is unquestionably on the increase. Here we read of touring party after touring party carrying

its meagre wallet of slender ware from the Land's End to the Orkneys: anon are regaled in the *Times* by the confessions of good-natured amateurs who have been at once gratifying their harmless vanity and doing something to keep "winter and rough weather" from pressing ruthlessly on the poor, by getting up village concerts. To-day we have to tell that Mr. Mellon has found it expedient to fall into the fashion, by alternating his promenade waltzes and symphonies and classical nights—devoted to Mozart, Beethoven, Mendelssohn, and others—with ballad concerts. Yet all this while the good professional ballad-singers of England could be numbered on the ten fingers; such scantiness being, in large part, owing to the trash which composers consent to set, and (natural if not inevitable consequence to such trashiness) the heroic disregard on the part of our vocalists as to whether the words are audible or the contrary. Perhaps, by repeatedly calling attention to truths not to be gained, some slight good may be done in aid of public discrimination, and to raise the standard of opinion among those who make, execute and hear the popular songs, which keep so strong a hold on British ears.—Mr. Ransford's *Ballad Concert* took place on Monday last.

Six *Chamber Concerts*, to be given during the course of the winter, are advertised at the Hanover Square Rooms.—The Brixton Amateurs are "up and doing" again.

We understand that a new set of songs, by our Laureate, may be expected, and that they are to be set to music by Mr. A. S. Sullivan.

An Italian Correspondent informs us that Mr. Frederic Clay intends to attempt an Italian opera, with the view of producing the same at Milan. The *libretto*, it is added, will be by Signor Piave.

Il *Trovatore* states that Signor Rossini has consented to write a comic opera for Paris, to be represented there next year; and gives as its title, 'Il Cavallo di Troja.'

We are told by the *Orchestra* that M. Gounod's 'Romeo and Juliet' is complete, and that a copy of it is already in London.—It is now said that the tenor who will "create" the hero's part at the Théâtre Lyrique is to be M. Capoul.

A collection of 'Rhymes Old and New, written for Music,' by Mr. Henry F. Chorley, with a Preface, is in preparation.

Madame Parepa and her party have commenced their representations in the United States.

Madame Vilda is engaged for twelve performances of 'Norma' at the Teatro Fenice, Venice.

The first number of a new theatrical and musical journal, appearing at Leipzig, bearing for title, *Neue Allgemeine Zeitschrift für Theater und Musik*, has come to hand. It is edited by Herr Yourij von Arnold.

We have the following from the *Gazette Musicale*:—"Crispino" has been given at the Italian Opera.

—MM. Fétis and Berlioz have been exchanging in print stately compliments on the revival of 'Alceste.'—Signor Verdi's 'Don Carlos' is in active rehearsal.—M. Semet has finished an opera on the story of 'La Petite Fadette.'—Five hundred persons failed to obtain entrance at the Théâtre Lyrique, for the last representation of 'Don Juan,' which has led to the re-engagement of its *Donna Anna*, Madame Chanton-Deneur, for a few nights.—There is, this winter, to be a double series of concerts at the Conservatoire.—M. Pasdeloup's popular orchestral concerts have been resumed.—M. Sivori is in Paris.—Herr Abert's 'Astorga' is to be the first winter novelty given at the Prague Opera.—There is a rumour of an opera just completed, by Signor Pavesi, 'Il Mercante di Venezia,' which may be given at our Royal Italian Opera.—The death of Herr Gollmick is announced; also, the production of a solemn Mass for four choirs, by Herr Grell, at the *Sing-Academie* of Berlin; thirdly, the completion of an opera on the subject of Schiller's 'Wallenstein,' by Herr von Adelburg, of Vienna.—The veteran Signor Pacini's 'Saffo' seems coming into request again. It is significant that, at the late revival of this opera at Madrid, the part of the heroine, a clearly characterized *soprano*, should have been allotted to the unlively Madame Borghi-Mamo; that of *Climene* was given to Mdlle. Barbara Marchisio.

These parts, it may be remembered, to the advantage of our countrywomen, were played in the English version of the opera, given under Mr. Macready's management, by Madame Novello and Mrs. Alfred Shaw,—when, also, Mr. Sims Reeves appeared as second tenor. The *Faone* at Madrid is Signor Naudin.

The opening of the new theatre at Liverpool is said to have gone off to the fullest satisfaction of all concerned. Great was the excitement on the occasion. The building is spoken of in the highest terms as handsome, commodious, and well ventilated. An opera was given by the Italian troop, headed by Mdlle. Tietjens, who was crowned on the stage; and an address, rich in pleasant promises, was spoken by Mr. and Mrs. A. Wigan.—The new theatre at Brighton was also auspiciously opened a few evenings ago.

A new theatre is about to be opened at Passy, close to Paris—to bear the name of the Théâtre Rossini.—Another new theatre was inaugurated at Malaga on the 4th of this month.

A new play, 'Les Amours de Paris,' by MM. Dennery and Thibout, was brought out the other night at the Ambigu, Paris.

We must defer some musical correspondence for a week.

MISCELLANEA

Literary Parallels.—Those persons who find interest in this subject are referred by a Correspondent (for whose communication we have not room) to Book X., line 90 and following lines, for a parallel to the passages cited from Chaucer and Spenser, under the head 'Anatomy of Foliage,' in the *Athenæum* for September 15th.

White on Billiards.—Allow me in your columns to correct a misapprehension. 'White on Billiards' is sometimes referred to as a recent and valuable book. Allow me to say that it is neither the one nor the other. White's 'Practical Treatise on the Game of Billiards' was published as long ago as 1807, and has been for years out of print. In White's day the side-stroke was unknown; the mace was more generally used than the cue; India-rubber cushions were not yet invented, and various points of excellence in modern billiard-play were but dimly appreciated. All that is valuable in White's treatise he derived from a previous French work, in which occurs the oft-quoted sentence, that the "angle of reflexion equals the angle of incidence,"—an axiom, as I have said in 'The Billiard Book,' which can never be more than an approximation to the truth. White's treatise is incorporated in the account of billiards in 'Bohn's Handbook of Games,' and the little book sometimes mistaken for it possesses no claim to scientific value or authority. By inserting the above you will oblige scientific billiard-players, and your obedient servant,
CAPT. CRAWLEY.

Geological Miracle Assumers.—Mr. Garbett has favoured us in your number for the 6th of this month with certain calculations respecting the number of times during a million of years that we may expect the earth to be struck by a comet, judging from recorded facts. Admit for argument's sake his estimate of 593 cometary visits, or 1186 passages through the sphere raised upon the earth's orbit, during a century, and that it would require 2398 x 1186 such average passages fairly to hit, or have a chance of hitting, every part of such sphere. The circumference of the earth's orbit (a great circle of such sphere) would be 72,250 earth-diameters, and taking the average of the holes made as 31½ earth-diameters long, it would require at the very least 2294 such passages to hit, or have a chance of hitting, every part of such orbit. Such being the case, are not the chances that only once in such 2294 passages would the earth happen to be where the comet came? Unless Mr. Garbett can negative this view, does it not follow that we must alter his result from 4 hits of the earth by a comet during a million of years, or one in 250,000 years, by multiplying the figure last given by 2294? The result will be the somewhat less critical situation for the stability of our special comical institution of one hit by a comet per

574 millions of years; and then:—Why the chances are we may not have been hit yet.

THOS. M. RICKMAN.

Old Books and Periodicals.—Some clergymen at Gravesend, who visit the ships there, undertake to receive old books and periodicals, and get them bound and made up into ships' libraries. These are put on board ships not otherwise provided with books, or reading of any kind, for the sailors; many ships are totally unprovided. All this is done without any charge on board, and no subscription is solicited from either officers or men. Parcels of books addressed by goods train to the St. Andrew's Waterside Church Mission, Gravesend are carried free from London by the railways on both sides of the Thames.

Tansley's Safe.—In the *Athenæum* of the 29th of September we commended a Mr. Bryant's safe. "Will you allow me," says a Correspondent, "to correct the above? Bryant is in my employ, and is the maker of the model only; I am the sole inventor and patentee." JAMES TANSLEY.

Bone-fire.—As the place of my birth seems to have put me in possession of some arguments, relevant to the "Bone-fire" controversy, which no one else comes forward to supply, I beg leave to submit them to your tribunal. I well remember, in my childhood, seeing parties of boys set out to range the fields in search of bones for the fires which were lighted in almost every hamlet, on the eve of St. John (23rd of June). These bones were supposed to yield oil (marrow) enough to revive the illuminations towards the close of the display, when the other fuel had begun to burn dim; but I think I have heard it argued that "bones" were essential to the due celebration of the rite. Again, the vernacular Gaelic for bone-fire (of modern English) is *tine enar* (I write phonetically—I don't understand the language), i.e., literally, "fire of bones"; and I have been assured that this is the commonly received distinctive term, and not a metonym. Is it not, then, a fair logical deduction, that the modern English word is a precise translation of the primitive Pagan Irish? But what appears to me the most irrefragable evidence in favour of "bone" is, that to "drag like a horse's head to a bone-fire" is a vulgar "trope" in familiar use (among the Irish) to this day, to express the act of hurrying anything (or even recalcitrant person) along by sheer violence. This much as to the mere etymology of the word, drawn from my recollections of my native county, Dublin, and early in this century. But might it not even be contended that "bone" was the primary member of the compound word, and the essential element of the original solemnities which consecrated the fire? If it be assumed that the modern Christian festival might have been designed to supersede some barbarous heathen observance, which was more sacrificial than commemorative, might it not be justifiable, or even necessary, to enjoin the use of the bones of any dead animals for the purposes of the new ritual, in order to abolish the sacrifice of living victims for ever. The Bealtine, or fire of Baal, though often alluded to in Gaelic mythology, seems now to have lost all mystic or idolatrous significance. In my young days the custom was continued merely by an illumination by candles fixed on the thorns (of the May-bush), and was but the consummation of the childish games and dances indulged in upon the return of May-day. I have, moreover, resided for many years of my later life in Lincolnshire, and candour induces me to add that I have never heard of any such custom of seeking bones as you refer to in this county for any public solemnity or rejoicings. In fact, there is no annual festival, still observed here, but the anniversaries of the Patron Saints of the rural churches (Patterns, of Ireland): and they have lost all religious or ecclesiastical import. They are only observed as seasons of friendly intercourse and social relaxation. They are simply called "Feasts." B. ABBOTT.

Brigg, Lincolnshire, Oct. 16, 1866.

TO CORRESPONDENTS.—T. G.—J. M., A.—F. Z. S.—received.

NEW BOOKS, THIS WEEK.

I. THE WAR WITH AMERICA.

THE NEW VOLUME of Mr. BANCROFT'S HISTORY of AMERICA, comprising the Period from the Declaration of the Independence of the Thirteen United States to the End of the Campaign of 1778. 8vo. cloth, price 12s.

II.

RICHMOND and ITS INHABITANTS, from the Olden Times. With Memoirs and Notes by RICHARD CRISP. With Illustrations. Post 8vo. cloth, 10s. 6d.

III.

A PRACTICAL GUIDE to the MANUFACTURE of PAPER and BOARDS. By A. PROTEAUX. With Additions by L. S. DE NORMAND. Translated from the French. With Illustrations. 8vo. price 15s.

IV.

SPANISH PAPERS and other MISCELLANIES, hitherto Unpublished or Uncollected, by WASHINGTON IRVING. Arranged and Edited by PIERRE M. IRVING. With a Portrait of the Author, from a Drawing by Wilkie. 2 vols. 8vo. cloth, price 24s.

London: SAMPSON LOW, SON & MARSTON, Milton House, Ludgate-hill.

THE NEW CHRISTMAS GIFT-BOOKS.

I.

TWO CENTURIES of SONG, comprising Melodies, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the last 200 Years. With Critical and Biographical Notes. By WALTER THORNBURY. Illustrated by Original Pictures of Eminent Artists, drawn and engraved especially for this work. Printed on toned paper, with coloured Borders, designed by Henry Shaw, F.R.S. A very handsomely bound with clasp. [Early in November.]

II.

An ILLUSTRATED EDITION of BISHOP HEBER'S HYMNS, with upwards of One Hundred Designs. Engraved, in the first style of Art, under the superintendence of J. D. Cooper. Small 4to. handsomely bound, price 10s. 6d. [November 1.]

III.

VARIA: Rare Readings from Scarce Books. By the Author of 'The Gentle Life,' reprinted by permission from the 'Saturday Review,' 'Spectator,' &c. Crown 8vo. price 6s. [Ready.]

IV.

The TRUE HISTORY of DAME PERKINS and HER GREY MARE, told from the Country-side and the Fireside. By LINDON MEADOWS. With Eight Coloured Illustrations by Philz. Small 4to. cloth, price 6s. [Ready.]

London: SAMPSON LOW, SON & MARSTON, Milton House, Ludgate-hill.

THE NEW STORIES.

I.

The MASQUE at LUDLOW, and other Romanesques. By the Author of 'Mary Powell.' Crown 8vo. price 8s.

II.

The JOURNAL of a WAITING GENTLE-WOMAN. Edited by BEATRICE A. JOURDAN. Post 8vo. price 8s.

"We have never read a more tender tale of woman's love, told by a woman, than the autobiographical record before us. The characters are all true to the life, and all well drawn, without exaggeration or affectation."—*London Review*.

"In this delicately-finished novelette, Miss Jourdan has got the true, quiet old-world manner, which gives the impression of conveying sentiments with as much womanly deliberation as if she was working them out on an old tapestry hanging. The antique manner is well kept up, but it is quite subordinate to nature. There is nothing to indicate that the story is chosen for the sake of the old-fashioned phrases and the old-fashioned ideas, as a chimney-piece might be chosen to set off the old china upon it. On the contrary, the old-world touches are singularly moderate; and the reader is made to feel how like the life then was to the life now, rather than how different. The story itself is natural, simple, and yet original, and very artistically worked out."—*Spectator*.

"This is a quiet, simple story, of which the idea is well conceived, and which is told with a great deal of sprightliness, piquancy, and tender grace.... The story of true love which runs through the Journal is charmingly simple and natural. Love so fervent and yet so pure, so free and yet so modest, so jealous and yet so self-denying, let us hope, still abides amongst us."—*Illustrated London News*.

III.

DOCTOR JOHNS: a Narrative of Certain Events in the Life of an Orthodox Minister. By IK. MARVELL. Author of 'The Reveries of a Bachelor.' 2 vols. post 8vo. price 16s.

IV.

HOBBY'S CHOICE: a Story. By DUTTON COOK. Reprinted from 'Once a Week.' Post 8vo. [Shortly.]

London: SAMPSON LOW, SON & MARSTON, Milton House, Ludgate-hill.

CASSELL, PETTER & GALPIN'S NEW VOLUMES.

MILTON'S PARADISE LOST. Illus-

trated with Large Designs by GUSTAVE DORÉ. Edited with Notes and a Life of Milton, by ROBERT VAUGHAN D.D. In One Large Folio Volume, bound in cloth, 5s.; bound in best polished morocco, gilt, 10s.

THE HOLY BIBLE. Illustrated

by GUSTAVE DORÉ. DIVISIONAL VOLUME I. Folio, cloth, 12. 12.

LITTLE ONES. Twenty-seven Original Drawings by PROCTOR. With Prose and Verse by GRANDMAMMA. Square 8vo. cloth gilt, 7s. 6d.

FOXES BOOK of MARTYRS. Edited

by the Rev. W. BRAMLEY-MOORE, M.A. Illustrated with Full-Page Designs by the best Artists. Complete in One Volume. Plain cloth, 12s.; handsomely bound in cloth gilt, 15s.

Ready with the NOVEMBER Magazines, price Sixpence,
THE FIRST MONTHLY PART OF

CASSELL'S PENNY READINGS,

ILLUSTRATED.

Conducted by TOM HOOD.

The popularity which has been attained by Penny Readings, as at present given in the great cities and villages where they have been introduced, clearly indicates the appreciation by all classes of short, well-chosen passages from the heart-shirring literature with which our language abounds. To form such a selection, to illustrate it by the pencil of the artist, and to publish it at such a price as to bring it within the reach of all, is the object of CASSELL'S ILLUSTRATED PENNY READINGS.

The Selections, under the able Editorship of Tom Hood, will consist of Prose and Verse Extracts from all our great English Authors, each Weekly Number of which will form by itself a complete Reading, which still suitable for binding up into handsome and valuable volumes. It is intended that these Readings shall comprise the choicest portions of the Standard Literature of our country, and shall impart such a general knowledge of English Authors as could only be secured by a very extensive and prolonged course of study. Not only will contributions be derived from the great authors who flourished before the present age, but, through the kind permission of many celebrated living Authors and the Publishers of their works, extracts will be given from the most popular and eminent compositions of our own times. The grave, the sentimental, the gay, the comic will all find a place in this Collection; and it is hoped that it will form not only a useful Handbook for the various Public Readings throughout the country, but an entertaining and cheerful companion at every fireside where the English language is spoken.

OPINIONS OF THE PRESS.

"The selections are all illustrated, and there is promise in the first number of the making of a good volume."—*Athenæum*.
"An admirably-arranged Publication. The Readings are capitally selected, and they are excellently illustrated."—*Morning Star*.

Ready with the November Magazines, price 6d.

THE QUIVER MAGAZINE,

ILLUSTRATED.

Contents.

Deepdale Vicarage. New Tale. By the Author of 'Mark Warren.' Chapters XII. to XXIII.—From Weakness to Strength. With Illustrations by C. Green.—Lessons of the Season.—A Parson's Week in the Alps. By the Rev. Newman Hall, LL.B. With Illustrations by R. P. Leitch.—Sheila. A Poem. By Walter Thornbury.—'All Right at Last.' With Illustration by C. J. Staniland.—Christ and the Young Ruler. By the Rev. F. C. Willis, B.A.—Ballads commemorative of Christian Heroism. I. St. Columba of Iona. A Lay of the Culdees. By R. J. Stiles, B.A. Author of 'Lyra Fidelium.' Baby Loo. A Poem. With Illustration by A. B. Houghton.—The Youth of Marmontel. By the Author of 'Mad Howell.' With Illustration by C. J. Staniland.—Song.—On Thoughtlessness. By the Rev. W. M. Statham. Author of 'Surre Standards of the Faith,' &c.—Rest. A Poem. With Illustration by M. E. Edwards.—Judas the Type of Self-Deception. By the Rev. J. E. Owen, M.A., Rector of St. Jude's, Chelsea.—Margaret. With Illustration by G. J. Finlay.—No more at Sea.—The Midnight Lamp. By I. Fryer. With Illustration by C. J. Staniland.—M. Doré's Illustrated Works.—Stories for the Young: Hester's Motto.—Of Growing Up.—The Three Sisters of Stormyloft.—The Two Ways.—Scripture Enigmas, &c.

HERALDRY ILLUSTRATED.

In No. 94 of CASSELL'S FAMILY PAPER is commenced a Series of Papers on English Heraldry, from the pen of the Rev. Chas. Boutell, M.A., Author of 'Heraldry, Historical and Popular,' &c. A complete set of Illustrations will accompany the text, and no pains will be spared to render the Papers a very valuable as well as a very interesting Series.

CASSELL, PETTER & GALPIN, Ludgate-hill, London, E.C.; and New York.

MESSRS. CHURCHILL'S PUBLICATIONS.

The QUARTERLY JOURNAL of SCIENCE.

Containing Original Articles, Chronicles of Science, Reviews of Books, Proceedings of the British Association at Nottingham, Notes and Correspondence. Vol. III. (for the Year 1866), 8vo. with Plates, cloth, 21s.

JOURNAL of MICROSCOPICAL SCIENCE,

including the Transactions of the Microscopical Society of London. Edited by E. LAN- KESTER, M.D. F.R.S., and G. BUSK, F.R.S. Vol. VI., New Series, 8vo. with 17 Litho- graphic Plates and numerous Wood Engravings, cloth, 17s.

The CLIMATE of PAU; with a Description

of the Watering-places of the Pyrenees, and of the Virtues of their respective Mineral Sources in Disease. By Sir ALEXANDER TAYLOR, M.D. F.R.S.E. Third Edition, considerably altered, post 8vo. cloth, 7s.

WINTER in the SOUTH of EUROPE; or,

Menton, the Riviera, Corsica, Sicily, and Biarritz, as Winter Climates. By J. HENRY BENNET, M.D. Third Edition, considerably enlarged, with Chromo-lithographs, pic- turesque Maps, and Wood Engravings, post 8vo. cloth, 10s. 6d.

By the same Author, nearly ready.

On the TREATMENT of PULMONARY

CONSUMPTION by HYGIENE, CLIMATE, and MEDICINE. 8vo. 2s. 6d.

A. WINTER in PARIS: being some Expe-

riences and Observations of French Medical and Sanitary Matters gained during the Season of 1855-6. By FREDERICK SIMMS, M.B. Lond. Fcap. 8vo. with Photographs, cloth, 4s.

ARMY HYGIENE. By C. A. Gordon, M.D.

C.B., Deputy Inspector-General of Hospitals, Army Medical Department, Member of the Sanitary Commission for Bengal. 8vo. cloth, 30s.

On APOPLEXY and ALLIED AFFECTIONS

of the BRAIN. By W. BOYD MUSHET, M.B. M.R.C.P., Physician to the North London Hospital for Consumption. 8vo. cloth, 7s.

ACHOLIC DISEASES: comprising Jaundice,

Diarrhoea, Dysentery, and Cholera. By Dr. A. C. MACLEOD, Surgeon-Major, Madras Army. Post 8vo. cloth, 5s. 6d.

On DISEASES of the HEART and GREAT

VESSELS. By HENRY WM. FULLER, M.D. Cantab., F.R.C.P., Physician to St. George's Hospital. 8vo. cloth, 7s. 6d.

On DISEASES of the VEINS, HÆMOR-

RHOIDAL TUMOURS, and other AFFECTIONS of the RECTUM. By HENRY LEE, F.R.C.S., Surgeon to St. George's Hospital. Second Edit., entirely re-written, 8vo. cloth, 5s.

CURVATURES of the SPINE: their Causes,

Symptoms, Pathology, and Treatment. By BERNARD E. BRODTHURST, F.R.C.S., of St. George's Hospital, and the Royal Orthopædic Hospital. Second Edition, revised and enlarged, with Engravings, cloth, 7s. 6d.

On SOME of the MORE OBSCURE FORMS

of NERVOUS AFFECTIONS. By HARRY W. LOBB, M.R.C.S. Re-issue, with the Chapter on Galvanism entirely re-written. 8vo. cloth, 8s.

IMPERFECT DIGESTION: its Causes and

Treatment. By ARTHUR LEARED, M.D., Physician to the Great Northern Hospital. Fourth Edition, fcap. 8vo. cloth, 4s.

The MODERN TREATMENT of SYPHILITIC

DISEASES: comprising the Treatment of Confirmed and Constitutional Syphilis by a safe and successful method. By LANGSTON PARKER, Honorary Surgeon to the Queen's Hos- pital, Birmingham. Fourth Edition, 8vo. cloth, 10s.

The IMMEDIATE TREATMENT of

STRICTURE of the URETHRA. By BARNARD HOLT, F.R.C.S., Senior Surgeon to the Westminster Hospital. Second Edition, 8vo. cloth, 3s.

The SURGERY of the RECTUM: with Cases

illustrating the Treatment of Hemorrhoids and Prolapsus by the Improved Clamp. Lett- erman Lectures. By HENRY SMITH, F.R.C.S., Assistant-Surgeon to King's College Hospital. Fcap. 8vo. 3s. 6d.

A MANUAL of BOTANY. By Robert Bent-

LEY, F.L.S., Professor of Botany, King's College, and to the Pharmaceutical Society. Fcap. 8vo. with nearly 1,300 Engravings on Wood, cloth, 12s. 6d.

A MANUAL of ANIMAL PHYSIOLOGY.

With an Appendix of Examination Questions. By JOHN SHEA, M.D. B.A. Fcap. 8vo. with Engravings, cloth, 5s. 6d.

The INDUCTION COIL: being a Popular Ex-

planation of the Electrical Principles on which it is constructed. With a Series of beautiful and instructive Experiments. By HENRY M. NOAD, Ph.D. F.R.S., Author of 'A Manual of Electricity.' Second Edition, enlarged, fcap. 8vo. with numerous Engravings, cloth, 3s.

A MANUAL of PRACTICAL HYGIENE. By

E. A. PARKES, M.D. F.R.S., Professor of Military Hygiene in the Army Medical School. Second Edition, enlarged, 8vo. with numerous Plates and Woodcuts, cloth, 16s.

CHOLERA in its HOME. With a Sketch of

the Pathology and Treatment of the Disease. By JOHN MACPHERSON, M.D., late Deputy Inspector-General of Hospitals, H. M. Bengal Army, and formerly of the European General Hospital, Calcutta. Crown 8vo. cloth, 5s.

The ARREST and PREVENTION of CHO-

WM. H. ALLEN & CO.'S PUBLICATIONS.

The History of the British Empire in India.

From the APPOINTMENT of LORD HARDINGE in 1844 to
the DEATH of LORD CANNING in 1859.

By LIONEL JAMES TROTTER,
Late of the 2nd Bengal Fusiliers.
2 vols. 8vo. cloth. 1866.

"Written with great animation, and often with considerable graphic power.... The narrative of the spirit-stirring events of the Mutiny will of course have the greatest attraction for most readers, and it is, in truth, the best, as it is the principal part of the present volume.... It appears to us that Mr. Trotter has been eminently successful in his treatment of a very exciting and interesting period of recent history."—*London Review*.

"Here we have before us the first volume of an eminently readable history.... The arrangement of the matter, the style, and, above all, the spirit which pervades his pages, are worthy of great commendation. Mr. Trotter is singularly free from the faults of a partisan writer.... The volume concludes with a masterly criticism on Lord Dalhousie's character and services."—*Calcutta Englishman*, March 17.

Yesterday and To-Day in India.

By SIDNEY BLANCHARD, Esq.
In 1 vol. post 8vo. [Just ready.]

The Moghul Empire,

AFTER THE DEATH OF AURUNGZEB.
AN HISTORICAL SKETCH.

By H. G. KEENE, Esq., Bengal Civil Service.
1 vol. 8vo. [In December.]

Physical Geography.

By PROFESSOR D. T. ANSTED, M.A.
1 thick vol. post 8vo. [In November.]

Domestic Life, Character, and Customs of the Natives of India.

By JAMES KERR, M.A.,
Late Principal of the Hind College, Calcutta.

"A work of considerable interest, abounding in observation and anecdote, and written in a spirit of honesty and fairness."—*Daily News*, August 5, 1866.

"The work is worthy of cordial recommendation."—*Indian Mail*.

Celebrated Naval and Military Trials.

By PETER BURKE, Sergeant-at-Law,
Author of 'Celebrated Trials connected with the Aristocracy'
and of 'The Romance of the Forum.'

"* This volume contains, in a popular form, a Series of Trials never before collected together—namely, those stirring and most remarkable judicial investigations which have been at various periods connected with the Army and Navy.

"The style in which Sergeant Burke writes is both lucid and pleasing, and his comments upon the various public events introduced into his narratives, and on the state of party feeling in England during the last century, display a soundness of judgment and freedom from prejudice. His work, therefore, is of a higher order altogether than to afford mere amusement, or to gratify a morbid love of exciting narratives."—*Morning Post*.

The First Age of Christianity.

By the Rev. H. N. OXENHAM.
2 vols. post 8vo. 21s.

German Life and Manners

AS SEEN IN SAXONY IN THE PRESENT DAY.

With Illustrations.
By HENRY MAYHEW, Esq.
Second Edition, 1 thick vol. post 8vo. 7s.

The English Stage from Betterton to Edmund Kean.

By Dr. DORAN.
Second Edition, post 8vo. 6s.

At Home in Paris, and a Trip through the Vineyards to Spain.

By W. BLANCHARD JERROLD.
Post 8vo. price 10s. 6d.

The Mysteries of the Vatican;

Or, CRIMES of the PAPACY.

2 vols. post 8vo. 21s.

"The work is entitled to considerable praise. The style is both clear and spirited."—*London Review*, December 10, 1864.

London: WM. H. ALLEN & Co. 13, Waterloo-
place, S.W.

OUR CHARADES, and HOW WE PLAYED

BRADBURY, EVANS & Co. 11, Bouverie-street, Fleet-street, E.C.

Foolscap 8vo. price 7s. cloth,

RELIGIO ANIMÆ;

And other Poems.

By ALFRED BATE RICHARDS.

"With great and grand solemnity, he proceeds in verses which, to their praise we speak it, recall George Withers's glorious invocation to praise God. . . . It is impossible to deny that Colonel Richards in 'Religio Animæ' has produced a poem of singular power and significance. Its verse has a sweep of melody seldom surpassed."—*Sunday Times*.

"His muse accords well with the voices of children and the song of birds, the ripple of sunlit water, and the dying splendour of evening clouds. He writes with tenderness and feeling of all that is beautiful, loving, and gracious; all that makes home dear—of wife and children, of woman's love and man's honour, of chivalry and true daring, and of all that makes England dear to the patriot."—*Standard*.

"Colonel Richards is a true poet. He has much of the fluent, flexible, versifying power which is admirable in Mr. Swinburne, while entirely free from that young writer's passionate effeminacy. . . . Here are two exquisite quotations."—*Globe*.

"Most sterling and undeniable poetry. . . . The whole library of the highest contemporary English poetry can produce nothing to excel these very exquisite stanzas."—*Atlas*.

"These poems contain passages scarcely surpassed for grandeur of diction and beauty of imagery."—*Glowworm*.

"The new volume of poems, 'Religio Animæ,' by A. B. Richards, is welcome. There is great originality of thought and expression about it."—*Pan*.

"We congratulate Messrs. Moxon on having produced this volume. It is the work of a man who is, undoubtedly, in the truest sense, a poet. Mr. Richards's poetry ought to make and leave its mark. His book is a rare combination of strength and tenderness."—*Liverpool Albion*.

"It is some time since a new poet has come under our notice with such genuine promise of lasting fame. . . . The *Athenæum* has attacked it fiercely, and added point to its criticism by the old *Athenæum* trick of misquoting. THE 'ATHENÆUM' HAS LOST ALL LEGITIMATE INFLUENCE AMONGST INTELLECTUAL LITERARY SOCIETY."—*Worcester Journal*.

"Seldom have we taken up for notice a volume of modern poetry which has yielded us so much exquisite delight."—*Universal News*.

".....Our author is no poet. . . . Flat and out of tune. . . . Carpentry, not poetry. Sheer lack of the informing imagination. . . . How could he print such incongruity!"—*Athenæum*.

London: EDWARD MOXON & Co. Dover-street, W.

FRITH'S LARGE-SIZED PHOTOGRAPHS

OF

GREAT BRITAIN, SWITZERLAND, ITALY, NORMANDY, &c.

Size, 8½ by 6½ inches, on Mounts 14½ by 11½ inches.

The scale of prices is very low; whilst in artistic beauty, and as specimens of the Art, the series is certainly unequalled.

About 500 sample Subjects may be seen at 81, Cornhill—BROOK & BROS; and 180, Strand—W. ROUGH & Co.; or, address the Publisher,

F. FRITH, Brightlands, Reigate, Surrey.

NATIONAL SELF-KNOWLEDGE: A Lecture delivered in the Town Hall, Manchester, October 2, 1866, introductory to the Session of Owens College, 1866-7. By ADOLPHUS WILLIAM WARD, M.A., Fellow of St. Peter's College, Cambridge, and Professor of History and English in Owens College. London: Munnithan & Co. Manchester: Thos. Bowler & Sons.

SALOMON'S NEW OPERA AND FIELD GLASS, AND THE RECONNOITERER GLASS, price 10s. 12d., sent free.—This "Tourist's Favourite," through extraordinary landscape of labour, distinctly shows small windows 10 miles off, distance of 20 miles, Jupiter's moons, &c.—The Reconnoiterer GLASS: "The Reconnoiterer is very good."—EARL OF BRADFORD: "I find it all you say, and wonderfully powerful for so very small a glass."—EARL OF CAITHNESS: "It is a beautiful glass."—Rev. Lord Scarsdale: "approves of it."—Lord Gifford: "Most useful."—Lord Galloway: "Remarkably good."—Sir DIONYS CAYLER: "It gives me complete satisfaction, and is wonderfully good."—Capt. Sander, Royal Small Arms Factory, Enfield: "I have found it effective at the 1,000-yards range."—F. H. HAWKES, of Farnley, Esq.: "I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many a glass combining so much power for its size with so much clearness."—The Field: "We have carefully tried it at an 800-yard range against all the glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price."—Notes and Queries: "What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated "HYTHE" GLASS shows bullet-marks at 100 yards, and men at 25 miles, price 31s. 6d. All the above glasses, respectively bearing the registered trademarks "Salom," "Reconnoiterer," and "Hythe," are only to be had direct from SALOM & CO. 98, PRINCE-STREET, EDINBURGH, and 127, REGENT-STREET, LONDON. No Agents of any kind anywhere.

SUN LIFE ASSURANCE SOCIETY, THREADNEEDLE-STREET, AND

GRAIG'S-COURT, CHANCERY CROSS, LONDON.

The attention of persons desirous of making a provision for their Families, by means of Life Assurance, is directed to the paramount importance of resorting for that purpose to an Office of established credit.

Among the advantages offered by this old-established Society to persons effecting assurances now are—Low rates of premium, especially for young lives, payable annually, half-yearly, or quarterly.

Participation in 80 per cent. of the profits. A Bonus every five years, apportioned to Policies on which three or more annual premiums have been paid at the period of division, and receivable in cash, or applied in augmentation of the sum assured or reduction of the premiums, at the option of the Policy-holder.

N.B. Proposals are now received and Assurances may be effected at the Office in Graig's-court, as well as at the Chief Office in Threadneedle-street. JAMES HARRIS, Actuary.

ATKINSON & CO. CABINET-MAKERS, UPHOLSTERERS, CARPET WAREHOUSEMEN, FURNISHING DRAPERS, and HOUSE-AGENTS, WESTMINSTER BRIDGE ROAD.

A BEAUTIFUL DESCRIPTIVE CATALOGUE, with Illustrative Sketches of Cabinet Furniture and Decorative Upholstery, sent free per post, or given on application. The Stock, corresponding to the List, is marked in Plain Figures, and comprises

DRAWING-ROOM FURNITURE.

In new and elegant designs, covered in Rep. Terry Cloth, French silk Damask, &c. This Department is also combined with the latest Parisian Novelties, Châise, Whiskies, Champagne, &c.

Good Solid Dining-room Sets, in Mahogany and Oak. Iron and Brass Bedsteads in great variety. The new patent Spring Mattress still stands alone for cheapness and comfort.

The Bedding is all made on the Premises, and under personal inspection.

Their famous polished Pine Bed-room Suits demand special attention.

Extract from the *Builder*.

"We were shown a short time since a bed-room fitted up by an Earl for his own occasional occupation at the seaside, in which every piece of furniture, save the iron bedstead, was made of the white wood in question. Dressing-table, washstand, drawers, towel-rack, and chairs, were as spotless as the crest of the waves beating on the shore, and the very height of cleanliness seemed attained."

The STOCK OF CARPETS

Is one of the choicest in London, embracing Turkey, Velvet, Frie, Brussels, Kidder, Felts, &c. Floor-cloth, Kamptulphong, Linoleum, and Cork Carpet, cut, fitted, and laid down to any size and plan. Furnishing Drapery of every description. Damask, Rep, and Pekin Cloths, French and English Chintzes, &c.

The STOCK OF HOUSEHOLD LINEN

Is well worthy the attention of Clubs, Hotels, and large Consumers, who will be treated with on most liberal terms.

ATKINSON & CO.,

195, 200, 202, 204, 206, 208 and 210,

WESTMINSTER BRIDGE ROAD, LONDON.

TO CHARITABLE DONORS, the Managers of Public Institutions, Asylums and Homes.

The peculiar circumstances of this year, the late monetary crisis, and the consequent depression of the markets, in the midst of which ATKINSON & Co. made large cash purchases, enable them now to offer unusual advantages in the supply of BEDDING, BLANKETS, COUNTERPANES, and SHEETINGS, besides every description of material for warm Winter Clothing.

ATKINSON & CO.,

195, 200, 202, 204, 206, 208 and 210,

BREAKFAST.—EPPS'S COCOA
(more commonly called Epps's Homoeopathic Cocoa, as being
prepared and introduced by James Epps, the Homoeopathic Chem-
ist first established in England). The very agreeable character
of this preparation has rendered it a general favourite. For
breakfast no other beverage is equally invigorating and sustain-
ing. This Cocoa is used by thousands who never used Cocoa
before. "Cocoa stands far higher than tea or coffee," Dr. Hassall
says.—Sold in 1 lb., 1 lb., and 1 lb. packets.

DESCRIPTION OF ARTIFICIAL TEETH, fixed without
springs, wires, or ligatures. They so perfectly resemble the natu-
ral teeth, as not to be distinguished from the originals by the
closest observer; they will never change colour or decay, and will
be found superior to any teeth ever before used. This method does
not require the extraction of roots, or any painful operation, and
will support and preserve teeth that are loose, and is guaranteed
to restore articulation and mastication. Decayed teeth stopped
and rendered sound and useful in mastication.—52, Fleet-street.

THE POPE'S HEALTH RESTORED by DU BARRY'S FOOD.
—Cure No. 66,413.—"Home, July 31st, 1866.—The health of
the Holy Father is excellent, especially since abandoning all
other remedies he has confined himself entirely to Du Barry's
Revalenta Arabica Food, which has produced a surprisingly
beneficial effect on his health, and his illness cannot praise
this excellent food too highly."—From the *Gazette du Midi*,
July 25th.

**DU BARRY'S delicious, health-restoring REVA-
LENTA ARABICA FOOD** restores good appetite, perfect
digestion, strong nerves, sound lungs and liver, refreshing sleep,
functional regularity and energy to the most enfeebled or disor-
dered, without medicine, inconvenience, or expense, as it saves fifty
times its cost in other remedies, curing dyspepsia, indigestion,
constipation, flatulency, rhegma, debility, consumption, nervous
bilious, liver and stomach complaints, low spirits, as proved by
60,000 cases which had been considered hopeless.—In tins, at
1s. 1d.; 1lb. 2s. 6d.; 2lb. 4s. 6d.; 12lb. 22s.—DU BARRY & CO. 77,

BOOKS FOR PRESENTS, THE DRAWING-ROOM, OR THE LIBRARY.

THE GLOBE SERIES.

(Uniform with the Globe Shakespeare.)

1. The POETICAL WORKS of JOHN MILTON. Edited, with Text collated from the best Authorities, with Introduction and Notes, by Professor MASSON. *[In the press.]*
2. The POETICAL WORKS of ROBERT BURNS. Edited, with Life, by ALEXANDER SMITH. *[In the press.]*
3. The POETICAL WORKS of Sir WALTER SCOTT. With Biographical and Critical Memoir by FRANCIS TURNER PALGRAVE, and New Introductions to the Larger Poems. *[In the press.]*

THE GLOBE EDITION OF

SHAKESPEARE'S COMPLETE WORKS. In 1 compact vol. royal fcap. 8vo. beautifully printed on toned paper, and bound in extra cloth. Edited by W. G. CLARK and W. ALDIS WRIGHT. Sixty-third Thousand. Extra cloth, 3s. 6d.; ditto, gilt edges, 4s. 6d.

A marvel of beauty, cheapness, and compactness. The whole works—plays, poems, and sonnets—are contained in one small volume; yet the page is perfectly clear and readable. The text is that of Messrs. Clark and Wright, freed from all encumbrances of notes and commentaries. For the busy man, above all for the working student, this Globe Edition is the best of all existing Shakespeare books.—"Athenæum."

ILLUSTRATED GIFT-BOOKS, &c.

The FOUNTAIN of YOUTH. Translated from the Danish of Frederik Paludan Müller, by HUMPHRY WILLIAM FREELAND, late M.P. for Chichester. With numerous illustrations, designed by Walter J. Allen, and engraved by J. D. Cooper. Crown 8vo. *[Nearly ready.]*

THE FIFTH THOUSAND OF

ALICE'S ADVENTURES in WONDERLAND: a Tale for Children. By LEWIS CARROLL. With Forty-two illustrations by John Tenniel, engraved by Dalziel Brothers. Crown 8vo. cloth, 7s. 6d.

"An excellent piece of nonsense.... Illustrated with extraordinary taste."—*Times*.
 "A piece of downright hearty drollery and fanciful humour."—*London Review*.

LEGENDARY FICTIONS of the IRISH CELTS. Collected and arranged by PATRICK KENNEDY. With Vignette Title and Frontispiece, crown 8vo. cloth, 7s. 6d.

LEGENDS of NUMBER NIP. By MARK LEMON. With Six illustrations by Charles Keene. Extra fcap. 8vo. 5s.

"The best advice we can give the boys is to buy the book, if they have enough pocket-money, or if it be all spent, to tease the governor for more with pertinacity."—*Daily News*.

The WATER BABIES: a Fairy Tale for a Land Baby. By the Rev. CHARLES KINGSLEY, M.A. With Two illustrations by J. Noel Paton, R.S.A. New Edition, crown 8vo. cloth, 6s.

"Full of imagination, of clever observation, of picturesque fancy, and of graphic narrative." *Saturday Review*.
 "It is like fresh air..... A book that is not likely to find an equal."—*Examiner*.

"Mr. Kingsley must have the credit of having revealed to us a new life..... There is in 'The Water Babies' an abundance of wit, fun, good humour, and geniality, and we heartily recommend it to the reader's enjoyment."—*Times*.

GUESSES at TRUTH. By Two BROTHERS. New Edition, with New Biographical Preface and Portraits. Extra fcap. 8vo. cloth. *[Just ready.]*

A PAINTER'S CAMP. In Three Books. I. England—II. Scotland—III. France. By P. G. HAMERTON. Second and Cheaper Edition, condensed, extra fcap. 8vo. cloth, 6s. Also, 2 vols. crown 8vo. price 11s.

ESSAYS on ART. By FRANCIS TURNER PALGRAVE, M.A., late Fellow of Exeter College, Oxford. Mulready-Dyce-Holman Hunt-Herbert-Poetry, Prose, and Sensationalism in Art—Sculpture in England—The Albert Cross, &c. Extra fcap. 8vo. cloth, price 6s. (Uniform with 'Arnold's Essays'.)

THE GEM EDITION.

SONNETS and SONGS by WILLIAM SHAKESPEARE. Edited by FRANCIS TURNER PALGRAVE, M.A., late Fellow of Exeter College, Oxford. With a Vignette Title engraved by Jeens, from an Antique Gem, 3s. 6d.

The ILIAD of HOMER. Translated into English Accented Hexameters, by Sir JOHN F. W. HERSCHEL, Bart. K.H. M.A. F.R.S., &c. Beautifully printed on toned paper, with Vignette, after the Antique, engraved by Jeens. Demy 8vo. price 18s.

BALLADS and SONGS of BRITTANY. By TOM TAYLOR. Translated from the 'Barzaz Breiz' of Vicomte Hersart de la Villemarqué. With some of the Original Melodies harmonized by Mrs. TOM TAYLOR. With illustrations by J. Timot, J. E. Millais, J. Tenniel, C. Keene, E. Corbould, and H. K. Browne. Small 4to. cloth, 12s.

"The book has every external attraction:—it is beautifully got up and illustrated:—the pieces are real translations from genuine ancient Breton poems, and the translations are executed with great spirit and power. The poems are really vigorous and beautiful."—*Saturday Review*.
 "We have not indeed for an age had such a volume of ancient ballads."—*Times*.
 "A book equally fit for the drawing-room as for the study. All the ballads are good, and the translations peculiarly spirited and faithful."—*Archæologia Cambrensis*.

THE GOLDEN TREASURY SERIES.

Beautifully printed on toned paper, in 18mo. With Vignette Titles by Millais, Woolmer, Holman Hunt, Noel Paton, &c.
 Bound in extra cloth, price 4s. 6d. each volume.

"Some of the choicest books in the world, carefully edited, and presented in a form which fits the hand and delights the eye."—*Pall Mall Gazette*.

"The Golden Treasury Series disputes, if it do not bear away, the palm of excellence amongst works in which the taste of the publisher, printer, stationer, engraver, and binder is jointly exercised to give additional grace to the production of writers."—*Illustrated London News*.

The ADVENTURES of ROBINSON CRUSOE. Edited from the Original Editions, by J. W. CLARK, M.A., Fellow of Trinity College, Cambridge. With a Vignette Title by J. E. Millais.

"This edition, in pleasant, old-fashioned type, reproduces faithfully the original text..... Calculated to afford quite a new sensation to those who are acquainted only with modern editions." *Spectator*.

The REPUBLIC of PLATO. Translated into English, with Analysis and Notes, by J. L. DAVIES, M.A., and D. J. VAUGHAN, M.A. With Vignette Portraits of Plato and Socrates, engraved by Jeens from an Antique Gem.

"The most successful attempt to render into English that flexibility of expression which, like Catullus's sprightliness and Horace's compression, no pen, however cunning, can altogether reproduce."—*Scotsman*.

The SONG-BOOK. Words and Tunes. From the Best Poets and Musicians. Selected and arranged by JOHN HULLAH, Professor of Vocal Music in King's College, London. With Vignette by Caroline F. Hullah, engraved by Jeens.

"Mr. Hullah's selection has been judiciously made, so as to enable the reader to compare the national melodies of the different countries with each other..... Like the rest of the series, it is a specimen of correct and beautiful typography."—*Scotsman*.

The POETICAL WORKS of ROBERT BURNS. Edited, from the best Printed and Manuscript Authorities, with Copious Glossarial Index and a Biographical Memoir, by ALEXANDER SMITH. 2 vols. handsomely bound in cloth, with Vignette and Design by J. B.; engraved by Shaw. 2 vols. 18mo. cloth, price 8s.

"Beyond all question, this is the most beautiful edition of Burns yet out."—*Daily Review*.

A BOOK of GOLDEN DEEDS of ALL COUNTRIES and ALL TIMES. Gathered and Narrated by the Author of 'The Hair of Redclyffe.' With a Vignette from a Statuette of Miss Nightingale, by Miss Bonham Carter.

"A most interesting collection of thrilling tales, well told. We have seen no prettier gift-book."—*Athenæum*.

The BOOK of PRAISE. From the best English Hymn-Writers. Selected and arranged by ROUNDELL PALMER. A New Edition, with Additional Hymns.

"All previous compilations of this kind must undeniably, for the present, give place to 'The Book of Praise.'"—*Saturday Review*.

The SUNDAY BOOK of POETRY. Selected and arranged by C. F. ALEXANDER. With a Vignette by R. Farran.

"A well-studied volume of sacred poetry."—*Spectator*.

The GOLDEN TREASURY of the best Songs and Lyrical Poems in the English Language. Selected and arranged, with Notes, by FRANCIS TURNER PALGRAVE. With a Vignette by T. Woolmer.

"There is no book in the English language which will make a more delightful companion than this."—*Spectator*.

The BALLAD-BOOK. A Selection of the Choicest British Ballads. Edited by WILLIAM ALLINGHAM. With a Vignette by J. Noel Paton.

"The most perfect Ballad-book ever produced."—*Nonconformist*.

The CHILDREN'S GARLAND from the BEST POETS. Selected and arranged by COVENTRY PATMORE. With a Vignette by T. Woolmer.

"Selected with the matured judgment of a man concentrated on obtaining insight into the feelings and tastes of childhood."—*Morning Post*.

The FAIRY BOOK. Classic Fairy Stories. Selected and rendered anew by the Author of 'John Halifax.' With a Vignette by J. Noel Paton.

"A delightful selection in a delightful external form."—*Spectator*.

The JEST-BOOK. The Choicest Anecdotes and Sayings. Selected and arranged by MARK LEMON, Editor of *Punch*. With a Vignette by Charles Keene.

"The amplest and best Jest-book that has yet been produced. There is some ring of wit in every scrap of it."—*Examiner*.

The PILGRIM'S PROGRESS from this World to that which is to Come. By JOHN BUNYAN. With a Vignette by W. Holman Hunt. A few copies on large paper, crown 8vo. cloth, 7s. 6d.; half bound morocco, 10s. 6d.

"A prettier and better edition of 'The Pilgrim's Progress,' and one more exactly suited for use as an elegant and inexpensive gift-book is not to be found."—*Examiner*.

BACON'S ESSAYS and COLOURS of GOOD and EVIL. With Notes and Glossarial Index by W. ALDIS WRIGHT, M.A., Trinity College, Cambridge; and a Vignette-Engraving, after Woolmer's statue of Bacon, by Jeens. A few copies on large paper, crown 8vo. cloth, 7s. 6d.; half bound morocco, 10s. 6d.

"By far the most complete as well as the most elegant edition we possess."—*Westminster Review*.

the College Office.
E. H. PLUMPTRE, M.A., Dean.

THE KEBLE MEMORIAL.
SUBSCRIPTIONS FOR THE PROPOSED COLLEGE AT
OXFORD, IN MEMORY OF THE AUTHOR OF
'THE CHRISTIAN YEAR.'

It is proposed to give public and permanent expression to the
love and reverence entertained for the Author of 'The Christian
Year,' by building and endowing a College Hall, at Oxford,
worthy to take its place among the stately foundations of ancient
days, and to call it by his name.
Here young men, whom want of means would otherwise deprive
of a University education, may, at a very small cost, be trained
as Christian gentlemen, many of them, it is hoped, as Pastors of
the Church he so much loved.
The Committee earnestly invite all who have been taught, comforted,
and strengthened by this sweet Singer of the Church to
join in this tribute to his memory.

Names of Committee.
(Those marked * are also Trustees.)
* His Grace the ARCHBISHOP of CANTERBURY, President.
* Earl Nelson.
* Earl Beauchamp.
* Lord Richard Cavendish.
* Bishop of Oxford.
* Bishop of Salisbury.
* Bishop of Gloucester & Bristol.
* Lord Lytton.
* Sir Roundell Palmer, Q.C. M.P.
* Sir William Heathcote, Bart.
* M. P.

Henry E. Pellew, Esq., 22, Bolton, S.W., London.
Office.—3, WATERLOO-PLACE, S.W., London.
Clergymen and Laymen in any part of the United Kingdom, in
the Colonies, or in Foreign Countries, who are willing to aid
in carrying out the objects of the KEBLE MEMORIAL, are in-
vited to communicate immediately with the Hon. Secretary, to
arrange plans for collecting and remitting contributions to the
Fund.
Subscriptions may be spread over five years without becoming
a claim on the estate in case of death, and should be paid to the
Hon. Treasurer, or to the account of the Trustees, at Messrs.
Herries, Farquhar & Co., 16, St. James's-street, S.W., London; the
Bank of England, Western Branch, Burlington-gardens, W.;

A. MANSELL & SON, Photographic Publishers, Gloucester.

PHOTOGRAPHIC REPRODUCTIONS of the OLD MASTERS.—The Gallery of Photographs consists of above one thousand faultless Photographic Fac-similes of celebrated Paintings by the Old Masters, and is the most extensive series yet placed before the public. Published in three sizes, price, unmounted, 12. 3s., 8d. and 6d. each; mounted, 2s., 1s. 3d. and 6d. each.—For further particulars see Prospectus and Catalogue, sent post free on receipt of one stamp, or with a specimen Photograph on receipt of nine stamps.

A. MANSELL & SON, Photographic Publishers, Gloucester.

THE CHADBURN LANTERN, for projecting enlarged Images upon a Screen (similar to the Magic Lantern) from opaque objects. This instrument supplies a great want in scientific and artistic illustration, by its Coins, Medals, Moving Mechanisms (interior of watches), Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their colour and detail,—thus rendering paintings on glass needless.—To be had direct from C. H. CHADBURN & SON, Opticians and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

THE LITTLE MODELLER; or, How to Make the Cardboard Models, 18 sorts, post free for 14 stamps.—Miss F. cannot resist expressing her admiration of the ingenuity displayed in the designs of the Models, and also how much pleasure she has seen children derive from painting and constructing them."—*H. G. CLARKE & CO.* 252, Strand.

Her Majesty.

WALTON & MABERLY,
Booksellers and Publishers to University
College,
137, GOWER-STREET.

ATLANTIC TELEGRAPH.

Nearly ready, small 8vo. many Illustrations.

The TELEGRAPH MANUAL. By
Dr. LARDNER. A New Edition. Revised and Re-written
by E. B. BRIGHT, F.R.A.S., Secretary of the British and
Irish Magnetic Telegraph Company.

"* This Edition will contain Chapters on the Atlantic
Telegraph and Telegraph to India, with Descriptions of the
Cables and the Apparatus employed in Laying, Testing and
Working them; also of the Means adopted in Raising the
Atlantic Cable of 1865.

SMITH'S HISTORY OF THE WORLD.

Complete in 3 vols. 8vo. with Maps and Plans, 5s. 2s.

**AN ANCIENT HISTORY, from the
EARLIEST TIMES to the FALL of the WESTERN
EMPIRE:** forming the First Period of the "History of
the World." By PHILIP SMITH, B.A., one of the Principal
Contributors to Dr. Smith's Classical Dictionary.

"His points of transition are well chosen, and his wide
and various panoramas of principalities, powers, and do-
minions clearly arranged. He has availed himself liber-
ally of the new lights thrown by recent discovery and
philology upon the annals of the East, and in so that
relates to the Oriental empires and African kingdoms or
republics his work is far in advance of any Ancient His-
tory in our language."—*Saturday Review*.

"The style of the volumes is sustained with the equal
tone of a single, able, unimpassioned and dignified his-
torian throughout."—*Athenæum*.

"He writes the history as well as comments upon it, so
that any ordinary reader who shall master the contents
of the volumes as they appear will find himself at the end
tolerably well furnished in historic knowledge. It should
be added that Mr. Smith writes in a clear and agreeable
manner, and that he displays in the choice and handling
of his topics the skill of a discreet, devout, and well-read
man."—*Daily News*.

"The style is admirable, clear, expressive, animated,
and often singularly forcible and happy. In his descrip-
tion of 'decisive battles' Mr. Smith shows the same talent
for military engineering which is so conspicuous in the
pages of Dr. Arnold: and the human interest as well as
the ethical value of the work is sustained throughout by
its just and noble sympathies."—*Evangelical Christendom*.

MANUAL OF ELECTRICITY, COMPLETED TO THE
PRESENT TIME.

Small 8vo. 500 Illustrations, 2s. cloth.

**ELECTRICITY, MAGNETISM, and
ACOUSTIC.** By Dr. LARDNER. New Edition. Revised
and Edited by GEORGE CAREY FOSTER, B.A., Professor
of Experimental Physics in University College, London.

Uniform with the above.

MECHANICS. 357 Illustrations. 1 vol. 5s.

**HYDROSTATICS, PNEUMATICS, and
HEAT.** 293 Illustrations. 1 vol. 5s.

OPTICS. 290 Illustrations. 1 vol. 5s.

Forming together a Course of Natural Philosophy, in 4 vols.
with 1,334 Illustrations, price 30s.

**LARDNER'S MUSEUM OF SCIENCE
and ART.** In a NEW and ELEGANT BINDING for a
CHRISTMAS PRESENT. 6 vols. Small 8vo. 1s. 1s.

POETRY FOR SCHOOLS.

The POET'S HOUR. Poetry selected
and arranged for Children. By FRANCES MARTIN, Super-
intendent of the Bedford College School. Fcap. 8vo. 2s. 6d.
cloth.

"The principle of selection here is not one chiefly of personal
taste, but experience. She has formed it on the strength of a
careful induction of children's taste; not, indeed, left to them-
selves, but guided 'by a light hand, that directs rather than con-
trols'; in other words, of children's taste under the influence of
her personal preferences. Anyhow, it is a very good and whole-
some taste, refined, but not too refined, for ordinary children."—*Spectator*.

SPRING-TIME with the POETS.

Poetry selected and arranged by FRANCES MARTIN,
Superintendent of the Bedford College School. Printed on
tinted paper. Fcap. 8vo. 4s. 6d. cloth.

"The selection is a very full one, and represents our national
poetic literature in its whole range. It is especially rich in speci-
mens of our best living poets—to a degree, indeed, which would
not have been possible without the most willing and liberal co-
operation of authors, publishers, and the owners of copyright.
We have no hesitation in saying that the purposes which the
author has set forth, this little volume of poetry in the
language."—*Daily News*.

WALTON & MABERLY,
BOOKSELLERS AND PUBLISHERS TO UNIVERSITY COLLEGE,
137, GOWER-STREET, LONDON.

ERICHSEN ON RAILWAY and other

INJURIES of the NERVOUS SYSTEM. Small 8vo. 2s. 6d.

"We welcome this as perhaps the most practically useful treatise
written for many a day."—*Medical Times*.

"It will serve as a most useful and trustworthy guide to the
profession in general, many of whom may be consulted in such
cases, and it will, no doubt, take its place as a text-book on the
subject of which it treats."—*Medical Press*.

QUAIN'S ANATOMY. Extensively

Illustrated, with Figures for the most part New, and on a
large scale. The Seventh Edition. Edited and in parts re-
written by Dr. SHARPEY, Dr. ALLEN THOMSON, and
Dr. JOHN CLELAND. 3 vols. 8vo. 1l. 11s. 6d.

Part I. Bones, Joints, Muscles, and a Portion of the General
Anatomy. 241 Illustrations. 8vo. 10s. 6d. [Ready.]

Part II. Heart, Blood-vessels, Absorbents, Brain, Nerves,
and a further Portion of the General Anatomy. 273 illus-
trations. 8vo. 10s. 6d. [Ready.]

Part III. Organs of Sense, Viscera, Surgical Anatomy, Dis-
section, and the Completion of the General Anatomy. Many
Illustrations. 8vo. 10s. 6d. [November.]

ERICHSEN'S SCIENCE and ART

of SURGERY. A Treatise on Surgical Injuries, Diseases and
Operations. Fourth Edition, revised and enlarged. 500 illus-
trations. 1 vol. 8vo. 1l. 10s.

"The entire work, complete, as the great English treatise on
Surgery of our own time, is, we can assure our readers, equally well
adapted for the most junior student, and, as a book of reference,
for the advanced practitioner."—*Dublin Quarterly Journal*.

KIRKES'S HANDBOOK of PHYSI-

OLGY. Fifth Edition, thoroughly revised. With Illustra-
tions on Steel and Wood. 1 vol. small 8vo. 2s. 6d.

"The authors have succeeded in producing a work well adapted
for students. The copious references made, both to elementary
works, and to original papers, are most valuable; more especially
as this species of research is of great importance to students, and
is apt to be neglected by the authors of manuals."—*Edinburgh Monthly Journal*.

ELLIS'S DEMONSTRATIONS of

ANATOMY. Illustrated Edition. A Guide to the Knowledge
of the Human Body by Dissection. Fifth Edition, with 120
Illustrations on Wood. Small 8vo. 12s. 6d.

ILLUSTRATIONS of DISSECTIONS,

in a Series of Original Coloured Plates, the size of Life. By
Prof. ELLIS and G. H. FORD, Esq. The Drawings are on
Stone by Mr. Ford, from Dissections by Prof. Ellis. A Part,
containing Two Plates, with Letter-press, price 3s. 6d. every
alternate Month.

* Parts 1 to 24, each 3s. 6d., are now ready (Nov. 1, 1866).

"With these plates, and such as these, by his side, the learner
will be well guided in his dissection; and under their guidance he
may safely continue his study when out of the dissecting-room.
With such plates as these, the surgeon will be fully reminded of
all that is useful in anatomy when engaged in planning an opera-
tion."—*Medical Times*.

"The plates are of the highest order of merit."—*Lancet*.

Dr. ROBERTS on URINARY and

RENAL DISEASES. A Practical Treatise. Illustrated by
numerous Cases and Engravings. By WILLIAM ROBERTS,
M.D., Physician to the Royal Infirmary, Manchester. Small
8vo. 12s. 6d.

"It will take its place beside the best treatises in our language
upon urinary pathology and therapeutics."—*Medical Times*.

"We commend the work most cordially as admirably adapted to
supply in medical literature a treatise which every intelligent
physician must have felt to be needed."—*American Journal of Medical Science*.

Dr. GARROD'S ESSENTIALS of

MATERIA MEDICA and THERAPEUTICS. Second Ed-
ition, revised and much enlarged. Fourth Thousand. Small
8vo. 10s. 6d.

"Dr. Garrod's work is not only an explanation, and in some
respects a Commentary on the new Pharmacopoeia, but it is a com-
plete treatise on Materia Medica. We must not omit to notice a
very useful feature in the shape of a posological table, in which
may be seen at a glance the appropriate dose of all the articles of
the Materia Medica."—*Edinburgh Medical Journal*.

Dr. GARROD on GOUT and RHEU-

MATIC GOUT. Second Edition, with extensive Alterations.
Coloured and other Illustrations. Small 8vo. 15s.

"Dr. Garrod has in this edition incorporated the results of his
increased experience of the nature and treatment of gout; and has
added a chapter on the diseases to which gouty people are pecu-
liarly liable."—*British Medical Journal*.

Dr. HILLIER'S HANDBOOK of

SKIN DISEASES, for PRACTITIONERS and STUDENTS.
By THOMAS HILLIER, M.D. Lond., Physician to the
Skin Department of University College Hospital. With illus-
trations from the Parasitic Diseases. Small 8vo. 7s. 6d. cloth.

"A text-book well adapted to the student."—*Lancet*.

"The treatment laid down by the author is simple, rational,
and in accordance with the results of an extended experience."
—*American Journal of Medical Science*.

Dr. HOFMANN'S MODERN CHE-

MISTRY, EXPERIMENTAL and THEORETICAL. Many
Illustrations. Small 8vo. 4s. 6d.

"It is, in the truest sense, an introduction to chemistry; and
as such it possesses the highest value—a value which is equally
great to the student new to the science and to the lecturer who
has spent years in teaching it."—*Reader*.

"It is a clear and concise explanation of the most recent views
entertained by modern chemists, and of the experimental proofs
by which they are supported. It should be in the hands of every
young student of the science."—*Quarterly Journal of Science*.

BARON LIEBIG'S WORKS.

"Side by side, as long as husbandry shall last, will these three
names shine in co-equal glory—Antoine Lavoisier, Humphry
Davy, Justus Liebig. To Lavoisier belongs the noble initiation
of the work; to Davy, its splendid prosecution; to Liebig, its
glorious consummation. Embracing in its mastery induction
the results of all foregoing and contemporary investigation,
and supplying its large defects by his own incomparable researches,
Liebig has built up an imperishable foundation, as a connected
whole, the code of simple general laws on which respectable
agriculture must henceforth, for all time, repose."
—*International Exhibition Report, 1862*.

The NATURAL LAWS of HUSBANDRY.

8vo. 10s. 6d.

FAMILIAR LETTERS on CHEMISTRY, in

its Relations to Physiology, Dietetics, Agriculture, Commerce,
and Political Economy. Fourth Edition, enlarged. Small
8vo. 7s. 6d.

LETTERS on MODERN AGRICULTURE.

Small 8vo. 6s.

Dr. EDWARD SMITH'S PRAC-

TICAL DIETARY for FAMILIES, SCHOOLS, and the
LABOURING CLASSES. Fourth Thousand. Small 8vo. 2s. 6d.

"Dr. Smith's book is by far the most useful we have met upon
all the practical questions connected with the regulation of food,
whether for individuals or families."—*Saturday Review*.

Dr. MURPHY'S PRINCIPLES and

PRACTICE of MIDWIFERY. Second and greatly improved
Edition. With many Illustrations. Complete in 1 vol. small
8vo. 13s. 6d.

"The object of Dr. Murphy has been to make his lectures as
practically useful as possible."—*British Medical Journal*.

"In discussing the treatment, Dr. Murphy is not content with
laying down arbitrary rules, but refers constantly to the prin-
ciples on which he acts; while his directions are clear, explicit,
sound, and eminently practical."—*Dublin Quarterly Journal of Medical Science*.

Mr. QUAIN on DISEASES of the

RECTUM. Second Edition. Coloured Plates. 7s. 6d.

Dr. WALSH on DISEASES of the

HEART and GREAT VESSELS, including the Principles
of Physical Diagnosis. Third Edition. Revised and greatly
Enlarged. Small 8vo. 12s. 6d.

The chief additions have been made in the practical portions
of the book. Several affections, of which little or no account had
been given in the previous editions, are now treated of in detail.

Dr. WALSH on DISEASES of the

LUNGS, including the Principles of Physical Diagnosis.
Third Edition, revised and greatly enlarged. Small 8vo.
12s. 6d.

Descriptions of several diseases, previously omitted, are now
introduced; the causes and mode of production of the more im-
portant affections, so far as they possess practical significance, are
succinctly inquired into; and the diagnosis and prognosis of each
complaint are more completely considered. The sections on treat-
ment and climate have been largely extended.

NEW BOOKS.

NEW BOOK by Rev. F. D. MAURICE, M.A., Professor of Moral Philosophy, Cambridge.

THE COMMANDMENTS CONSIDERED as INSTRUMENTS of NATIONAL REFORMATION. By the Rev. F. D. MAURICE, M.A. Crown 8vo. [In the press.]

The MAKING of the AMERICAN NATION; or, the Rise and Decline of Oligarchy in the West. Showing how the American Nation and Democracy have been Made and what they Are, with Considerations on their Tendency and Destiny. By J. ARTHUR PARTRIDGE, Author of 'Coalitions and Frontiers,' 'The False Nation and its Bases,' &c.

New Edition, 18mo. cloth, price 1s. 6d.

SIMPLE SKETCHES from CHURCH HISTORY, for YOUNG PERSONS. By Mrs. TOOGOOD.

NATIONAL MANUSCRIPTS.—In course of Publication a Series of PHOTO-ZINCGRAPHIC FAC-SIMILES of some of the most interesting of our National MSS., copied by order of Her Majesty's Government, by Col. Sir HENRY JAMES, R.E., Director of the Ordnance Survey; with Translations and Introductory Notes by W. BASEVI SANDERS, Esq., Assistant-Keeper of Her Majesty's Records. This Series, consisting of Royal Charters and Grants, and the Letters of Royal and Eminent or Remarkable Persons, includes some of the most remarkable Original Documents deposited in Her Majesty's Record Office, together with a few from other repositories, including the most perfect Original copy of Magna Charta now extant. The Fac-similes are arranged chronologically, and the Translations are interwoven so as to appear opposite to each page of the Fac-simile of the Original Manuscripts. The Series will be published in Four Parts, at 21s. for each Part. [Parts I. and II. are now ready.]

Crown 8vo. limp cloth, 4s. 6d.

HANDBOOK to GOVERNMENT SITUATIONS; or, the Queen's Civil Service considered with Reference to Nomination, Mode of Appointment, and Pay. With Examination Papers, and Specimens of Hand-writing extracted from the Reports of the Commissioners.

Price 6d., per post 7d.

ORDNANCE SURVEY.—STANFORD'S CATALOGUE (with Supplement) of the Maps, Plans, and other Publications of the Ordnance Survey of Great Britain and Ireland, published under the superintendence of Col. Sir HENRY JAMES, R.E. F.R.S. and sold by EDWARD STANFORD, Agent by Appointment. The Supplement may be had gratis on application, or per post for one stamp.

London: EDWARD STANFORD, 6, Charing Cross, S.W.,
or, by Appointment, for the Sale of the Ordnance Maps, Geological Survey Maps, and Admiralty Charts.

MAPS.

Scale, 94 miles to an inch; size, 65 inches by 58.

AFRICA.—STANFORD'S LIBRARY MAP of

AFRICA. Constructed by A. KEITH JOHNSTON, LL.D. F.R.S.E. F.R.G.S. The geographical knowledge recently acquired on the great Continent of Africa presents most surprising examples of the rapid progress of Modern Science.

The Great Sahara, formerly represented as a vast sandy waste, has been shown by a succession of noble explorers, from Denham and Clapperton to Duveyrier, to contain grand ranges of Mountains, with varieties of Scenery and other conditions very different from the terrible desert of our imagination.

Further south nearly the whole range of Soudan, from the Atlantic to the Red Sea, has been remodelled from the labours of the French in Senegal; of Barth, Baikie, and others on the Niger; and of Von Heuglin, Petherick, Speke, and Baker, &c., in the Upper Basin of the Nile. South of the Equator vast spaces have been filled up by Livingstone, Burton, Speke and Grant, Du Chaillu, and Andersson, while great improvements have been made by the Surveys of the Colonial Governments.

Stanford's Library Map presents this accumulation of New Discoveries for the first time in a General Map on a large scale. Price, full coloured and mounted, in morocco case, 3l. 13s. 6d.; on roller, varnished, 3l.; on spring roller, 6l.

On Fifteen Sheets; size of each, 19 inches by 24.

ENGLAND and WALES.—STANFORD'S

LARGE RAILWAY MAP of ENGLAND and WALES, with the Sanctioned Lines; also, the Stations, High Roads, Towns, Villages, &c. Scale, 5 miles to an inch; size of the complete Map, 6 feet by 7 feet. Price, full coloured and mounted, in morocco case, 3l. 13s. 6d.; on roller, varnished, 3l.; on spring roller, 6l. Any sheet can be had separately, price, plain, 1s. 6d.; or coloured and folded in cover, 2s. each.

* * * An Index-Map, showing the division of the sheets, may be had, gratis, on application, or, post free, for stamped envelope.

Third Edition, with Corrections and Additions; scale, 12 miles to an inch; size, 36 inches by 42.

GEOLOGICAL MAP of ENGLAND and

WALES. By ANDREW C. RAMSAY, F.R.S. and G.S., Local Director of the Geological Survey of Great Britain, and Professor of Geology at the Royal School of Mines. This Map shows all the Railways, Roads, &c., and, when mounted in case, folds into a convenient pocket size, making an excellent Travelling Map. In sheets, 25s.; mounted, in case, 30s.; on roller, varnished, 32s.

Scale, 2 inches to a mile; size, 80 inches by 35.

NEW LONDON RAILWAYS.—STANFORD'S

NEW MAP of METROPOLITAN RAILWAYS and MISCELLANEOUS IMPROVEMENTS sanctioned in 1866; also, the Railways in operation, and those sanctioned before 1866, as far as Croydon, Hounslow, and Barnet; accompanied by a List of the Plans, numbered to correspond with the Map and with the Private Bill Office List, the Names of the Engineers, and the Lengths of the Lines now sanctioned. Price, in sheet, 2s. 6d.; mounted, in case, 6s.

Scale, 25 miles to an inch; size, 42 inches by 34.

NEW ZEALAND.—This new Map of the Colony

of New Zealand is constructed from the most recent Official Documents. The Provinces are coloured distinctly; the Discoveries on the West Coast, including the new Gold Fields of Canterbury, are inserted, and also the latest Surveys in Otago, Nelson, and Auckland. Price, mounted on roller, varnished, or in case, 9s.

NEW SERIES OF SCHOOL MAPS.

Scale, 8 miles to an inch; size, 58 inches by 50.

ENGLAND and WALES.—This entirely new Map is an accurate reduction of the Ordnance Survey, drawn in the first place with the utmost precision, and afterwards strengthened boldly for the use of Schools. The Hills in particular are more correctly delineated than they have ever been in School Maps. The Names are systematically engraved, according to population; the Episcopal Sees, County and Assize Towns, Municipal Boroughs, Parliamentary Representation, and Towns which are Counties of themselves, are severally distinguished. The Railways are also correctly laid down. Price, mounted, on roller, varnished, 13s.

Scale, 118 miles to an inch; Size, 58 inches by 50.

AFRICA.—In many respects Africa is presented with a new face in this Map. Its connexion with Europe and Asia is preserved, and all the latest Discoveries of Livingstone, Burton, Speke, Grant, Baker, &c. are inserted. Price, mounted on roller, varnished, 13s.

Uniform in Size and Price,

EUROPE, ASIA, HOLY LAND, and AUSTRALASIA.

Smaller Series; Size, 42 inches by 34.

MAPS to illustrate the OLD TESTAMENT, NEW TESTAMENT, The PLACES MENTIONED in the ACTS and EPISTLES, AUSTRALIA, and NEW ZEALAND. Price, mounted on roller, varnished, 9s. each.

Size, 16 inches by 14, price 3d. each,

The OXFORD SERIES of OUTLINE MAPS.

Europe—British Isles—England—Scotland—Ireland—Austrian Empire—France—Germany—Italy—Russia in Europe—Spain—Switzerland—Asia—Ceylon—India—Palestine—Africa—North America—Canada—United States—South America—Australia—New Zealand.

NEW WORKS of the PRESENT SEASON.

LIFE and CORRESPONDENCE of RICHARD WHATELY, D.D.,

late Archbishop of Dublin. By E. JANE WHATELY, Author of 'English Synonyms.' With Two Portraits. 2 vols. 8vo. price 28s.

"No memoir of Archbishop WHATELY has yet been published so complete in every respect as that which is now produced by his daughter. She has proved her heritage of talent by the ability displayed in its compilation, and she deserves especial commendation for the impartiality with which she writes."

MORNING POST.

"Miss WHATELY'S memoir of her father, the late Archbishop of Dublin, modestly introduced, is really all that one could wish. Dr. WHATELY speaks for himself through a well-arranged sequence of letters, with connecting facts simply narrated; and the vigorous honesty with which his healthy and kindly mind worked becomes unmistakable even by the worst bigots whom his liberality of thought offended."

EXAMINER.

HISTORY of ENGLAND from the FALL of WOLSEY to the

DEATH of ELIZABETH. By JAMES ANTHONY FROUDE, M.A., late Fellow of Exeter College, Oxford. Vols. I. to X., in 8vo., may now be had, price 7l. 2s.

Reign of Henry VIII., Vols. I. to IV., Third Edition, 54s. — Vols. V. and VI., Edward VI. and Mary, Second Edition, 28s. — Vols. VII. and VIII., forming Vols. I. and II. of the Reign of Elizabeth, Fourth Edition, 28s. — Vols. IX. and X., Elizabeth, Vols. III. and IV. (just published), price 32s.

The ÆNEID of VIRGIL translated into ENGLISH VERSE. By

JOHN CONINGTON, M.A., Corpus Professor of Latin in the University of Oxford. Crown 8vo. price 9s.

"The very lightest, liveliest, and yet most accurate metrical translation of VIRGIL that has yet been added to our literature. . . . The result of this choice of a measure (SCOTT'S ballad metre) is that the new English ÆNEID is likely to be in large request at all the circulating libraries."

EXAMINER.

"Professor CONINGTON'S version, besides being a faithful copy of the original, has all the freshness, life, and beauty of genuine poetry. . . . As we are enticed on by its magic

music, we begin to doubt whether, after all, on the principle that *whate'er is best administered is best*, Professor CONINGTON has not chosen the best metre."

ATHENÆUM.

"It is scarcely possible within our present limits to do justice to the critical and poetic qualities displayed in this translation. . . . Take it where we will, the translation comes up to the mark, and will more than satisfy those who hold Virgil among the three or four greatest names of Roman literature."

SATURDAY REVIEW.

The LAKE DWELLINGS of SWITZERLAND and other Parts of

EUROPE. By Dr. FERDINAND KELLER, President of the Antiquarian Association of Zurich. Translated and arranged by J. E. LEE, F.S.A. F.G.S. Royal 8vo. with several Woodcuts and nearly 100 Plates, price 31s. 6d.

LECTURES on the SCIENCE of LANGUAGE. By Max Muller, M.A.,

Taylorian Professor of Modern European Languages and Literature in the University of Oxford. Fifth Edition of the FIRST SERIES, carefully revised. 8vo. price 12s. — SECOND SERIES, Third Thousand, price 18s.

HISTORY of the RISE and INFLUENCE of the SPIRIT of

RATIONALISM in EUROPE. By W. E. H. LECKY, M.A. Third Edition. 2 vols. 8vo. price 25s.

"It is scarcely possible to overrate the value of Mr. Lecky's able and vigorous book, the style of which is as luminous and attractive as its learning is profound."

SPECTATOR.

"The writer of this book has many special qualifications for the work he has under-

taken. A clear and rhythmical style, considerable powers of analysis, various and extensive reading, with a happy skill in selecting the illustrations most likely to interest his readers, are among the literary resources he brings to his task. Above all, he has a thorough sympathy with the cause whose fortunes he records."

GUARDIAN.

A HUNTER'S EXPERIENCES in the SOUTHERN STATES of

AMERICA; being an Account of the Natural History of the various Quadrupeds and Birds which are the Objects of Chase in those Countries. By Captain FLACK (The Ranger). Post 8vo. price 10s. 6d.

SUNDAY AFTERNOONS at the PARISH CHURCH of a UNIVER-

SITY CITY. By A. K. H. B., Author of 'The Recreations of a Country Parson.' 1 vol. crown 8vo.

[Next week.]

POEMS. By Jean Ingelow. A New Edition, with 97 Vignettes from

Original Drawings by Eminent Artists, engraved on Wood by the Brothers Dalziel, and bound in cloth boards, elaborately ornamented in gold and enamel from a New Design by Albert Warren. Fcap. 4to. price 21s. cloth, gilt edges; or 42s. bound in morocco by Rivière.

[On Thursday, the 15th instant.]

LAYS of ANCIENT ROME. By Lord Macaulay. With 90 Illustra-

tions, Original and from the Antique, drawn on Wood by G. Scharf. London: RICHARD BENTLEY, New Burlington-street,

Publisher in Ordinary to Her Majesty.

18, Great Marlborough-street.

HURST & BLACKETT'S
NEW WORKS.

The LIFE of JOSIAH WEDGWOOD.

From his Private Correspondence and Family Papers in the possession of Joseph Mayer, Esq. F.S.A., Francis Wedgwood, Esq., C. Darwin, Esq. F.R.S., Miss Wedgwood, and other authentic sources. By ELIZA METEYARD. Dedicated to the Right Hon. W. E. GLADSTONE. Complete in 2 vols. 8vo. embellished with Portraits and above 300 beautiful illustrations, &c. bound.

"We have to congratulate the authors on the publication of her Life of Wedgwood. We can assure her the praise due to the most painstaking and conscientious application. She has devoted her whole mind and energy to her subject, and has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The two volumes before us are in themselves marvels of decorative and typographical skill. More beautifully printed pages, more creamy paper, and more dainty woodcuts have seldom met our eyes. It is rarely that an author is so well seconded by his coadjutors as Miss Meteyard has been by her publishers, printer, and the staff of draughtsmen and engravers who have contributed the numerous illustrations which adorn this sumptuous book."—*Saturday Review*.

TRAVELS in FRANCE and GER-

MANY in 1855 and 1856; including a Steam Voyage down the Danube, and a Ride across the Mountains of European Turkey, from Belgrade to Montenegro. By Capt. SPENCER, Author of 'Travels in Circassia,' &c. 3 vols. 12s.

"The clearness, good temper, and sound sense with which Capt. Spencer describes every subject that comes under his notice, the picturesque variety of his descriptions, and the minuteness as well as comprehensiveness of his observations, can be appreciated only by reading his volumes."—*Daily News*.

"This work would at any time be read with pleasure, but at this moment it is invested with peculiar interest. Capt. Spencer's style is lucid, anecdotal, and the range of his book gives scope for much pleasing variety as well as for much useful information."—*Post*.

A BOOK ABOUT LAWYERS. By

J. C. JEAFFRESON, Barrister-at-Law, Author of 'A Book about Doctors,' &c. 2 vols. 8vo. (November 2.)

FIELD-MARSHAL VISCOUNT

COMBERMERÉ'S MEMOIRS and CORRESPONDENCE. From his Family Papers. By the RIGHT HON. MARY, VISCOUNTESS COMBERMERÉ, and Capt. W. W. KNOLLYS. 2 vols. 8vo. with Portraits, &c. 30s. bound.

The SPORTSMAN and NATURAL-

IST IN CANADA; or, Notes on the Natural History of the Game, Game-Birds, and Fish of that Country. By MAJOR W. ROSS KING, F.R.G.S. F.S.A.S. Royal 8vo. illustrated with beautiful Coloured Plates and Woodcuts. 30s. bound.

LIGHTS and SHADOWS of LONDON

LIFE. By the Author of 'MIRK ABBEY,' 'LOST SIR MASSINGBERD,' &c. 2 vols. 21s.

"Good sense, good feeling, and good humour characterise these 'Lights and Shadows' as strongly as shrewdness, observation, drollery, and originality mark them."—*Star*.

CHEAP EDITION of CHRISTIAN'S

MISTAKE. By the Author of 'JOHN HALIFAX.' Illustrated by Sandys. 5s. bound, forming the New Volume of 'HURST & BLACKETT'S STANDARD LIBRARY.'

THE NEW NOVELS.

MADONNA MARY. By Mrs.

OLIPHANT, Author of 'Agnes,' &c. 3 vols.

ANNALS of a QUIET NEIGHBOUR-

HOOD. By GEORGE MAC DONALD, M.A., Author of 'Alec Forbes,' 'David Elginbrod,' &c. 3 vols.

"Mr. Mac Donald is a true poet. The 'Annals of a Quiet Neighbourhood' are as full of music as was Prospero's Island; rich in strains that take the ear captive when they are first heard, and afterwards linger long upon it. Many of the scenes Mr. Mac Donald has painted are very beautiful in themselves, besides being thoroughly in keeping with the pleasantly sketched characters with which he peoples them."—*Saturday Review*.

"The charm and value of Mr. Mac Donald's work need not be sought. They present themselves unasked for in the tender beauty of his descriptions, whether of nature or of life and character; in his almost supernatural insight into the workings of the human heart and in his unceasing fertility of thought and happy exactitude of illustration. Whoever reads the book once will read it many times."—*Pall Mall Gazette*.

KINGSFORD. By the Author of

'SON and HEIR.' 2 vols. 21s.

"'Kingsford' is one of the most interesting stories we have read this season, and we are sure our readers will thank us for recommending to them a work so attractive and enthralling. The plot is of a very interesting character, and there is powerful ability displayed in the creation of the characters."—*Sun*.

LORDS and LADIES. By the Author

of 'MARGARET and HER BRIDESMAIDS,' &c. 3 vols.

"'Lords and Ladies' is one of the most charming books with which the literature of fiction has been enriched this season. The truth and the value of the moral of the story will recommend it as highly as the vivacity and humour of its style and the ingenuity of its construction."—*Morning Post*.

RACHEL'S SECRET. By the Author

of 'THE MASTER OF MARTON.' 3 vols.

"A deeply interesting and affecting story, artistically and powerfully wrought. Whoever takes up the first of these delightful volumes is sure to read them all."—*Morning Post*.

"A novel of very considerable merit. Its story is interesting and touching. Its style is graceful and correct."—*Star*.

LITERATURE

Curious Myths of the Middle Ages. By S. Baring-Gould. (Rivingtons.)*The Sight of Hell.* By the Rev. J. Furniss, C.S.S.R. Permissu Superiorum. (Duffy.)

IN a dozen chapters, in which there is somewhat too much both of fine and flippant writing, Mr. Gould treats, and, if we may take his word for it, disposes of, or demolishes, various traditional stories, touching the truth or falsehood of some of which the world had come to a sensible decision before he was born. The subjects which he brings before us are the Wandering Jew, Prester John, the Divining Rod, the Seven Sleepers, William Tell, the Dog Gellert, Tailed Men, Antichrist and Pope Joan, the Man in the Moon, the Mountain of Venus, Fatality of Numbers, and the Terrestrial Paradise.

With respect to the story of the Wandering Jew, Mr. Gould asks, "Who can say for certain that it is not true?" and he asserts that "no myth is wholly without foundation." He quotes Our Lord's words, "There be some standing here which shall not taste of death till they see the kingdom of God;" "and there is no improbability," he adds, "in Our Lord's words being fulfilled to the letter." A thousand years elapsed before one of these deathless Jews appeared in the world. There were various assumers of the character, with various stories of their own. One had bidden Jesus go "quicker!" on His way to Calvary, and another had refused Him water, as He paused on His road to the Cross, and to each had been said, "Tarry thou till I come!" When it is remembered that these Wandering Jews were received at great men's tables and were kept as guests as long as they had any wild story to tell (they all grew old till they were a hundred, and then began again, at the age at which Christ found them), it is simply astonishing that we do not hear more of these clever and erratic parasites. Mr. Gould has his finger on a good many of them, but he has overlooked the last on the mysterious roll. From the year 1818 (perhaps earlier) to about 1830, a handsomely-featured Jew, in semi-eastern costume, fair-haired, bare-headed, his eyes intently fixed on a little ancient book he held in both hands, might be seen gliding through the streets of London, but was never seen to issue from or to enter a house, or to pause upon his way. He was popularly known as "the Wandering Jew," but there was something so dignified and anxious in his look, that he was never known to suffer the slightest molestation. Young and old looked silently on him as he passed, and shook their heads pitifully when he had gone by. He disappeared, was seen again in London some ten years later, still young, fair-haired, bare-headed, his eyes bent on his book, his feet going steadily forward as he went straight on; and men again whispered as he glided through our streets for the last time, "The Wandering Jew!" There were many who believed that he was the very man to whom had been uttered the awful words, "Tarry thou till I come!"

The tradition of this errant Jew was little more than a century old when a rumour spread over Europe that there existed a powerful Christian priest and emperor in Asia who had broken the power of those whom Mr. Gould styles "Mussulmen," and was coming to the assistance of the Crusaders. The latter were in such need of the help, that the report was probably first started by the promoters of Crusades, whose business it was to raise men and subscriptions of money. It was a bit of Stock

Exchange or Limited Liability rascality of that day. A thundering letter from Prester John himself, bristling with mendacity and denouncing lying as a baseness worthy of death, was circulated throughout Europe. At various times, various names were assigned to this pseudo-being, and various localities as his seat of empire. He is sometimes, and not without some reason perhaps, identified with a conquering Tartar Khan, who was not under Moslem influences; but Mr. Gould has perhaps hit the right nail on the head when he assigns the Prester John myth to the "wonderful successes of Nestorianism in the East," which doubtless gave rise to a marvellous amount of lying. Something resembling the character of Prester John may, however, be seen in a sacerdotal monarch such as the King of Abyssinia.

The Divining Rods employed in charms, if not older than the Jews, were well known and in use long before the Wandering Jew began to walk, or Prester John kept his stationary state in Cloudland. The rod, as a special means for divining the hidden presence of water, metals, and criminals, was not much known in Europe before the fifteenth century. The most wonderful feats were performed by it, in presence of unbiassed and scrutinizing persons; yet the performers invariably broke down under continued supervision. Nevertheless, undeniably wonderful feats were performed by the alleged agency of the rod. These were really so full of wonder, that it would be matter for greater wonder still to find them attributed to the rod if they might be more truly ascribed to any other means, whereby the result would be equally miraculous. Some of the stories cited by Mr. Gould are nothing less than astounding: there is enough evidence to convince one of the efficacy of the rod in properly endowed hands, and quite enough also to satisfy us that the ablest of diviners by the rod were, if not absolute rogues, utterly without power under stringent tests. Mr. Gould states that in Wiltshire the rod "is still employed for the purpose of detecting water,"—the rod bending or turning in the hand of the bearer, to indicate that there is water beneath the soil. It is even said that there are persons who cannot pass over hidden water or metals without a painful sensation, which enables them to assert the presence below of what is concealed from all other persons.

The story of the Seven Sleepers of Ephesus, Christian men who fell asleep under Decius (A.D. 250) and awoke under Theodosius (479), is really of older birth than any of the myths we have been considering. Endymion, Epimenides, and others, slept before the Ephesian sleepers, and since then others have not lacked, including Rip van Winkle. Mr. Gould asserts that Napoleon Bonaparte is still believed by the French peasantry to be sleeping somewhere, like Charlemagne, ready when "time and the hour" arrive for his mission. This is an echo of Béranger's song; the French peasantry can hardly believe in a returning Napoleon the First when they see on the throne an abiding Napoleon the Third; and if the first could awake and come back, how unwelcome he would be, and what pretty work he would make of it!

We agree with Mr. Gould in the probability of the story of the Seven Sleepers being founded on the possible fact of their having suffered under Decius and of their remains having been discovered under Theodosius. But having allowed thus much, he overturns the theory by expressing his own belief that the myth of the Seven Sleepers is only "a Christianized myth of Paganism." While inferring that these Ephesians never slept, he turns to the most

sacred page in Swiss history to maintain that William Tell was never awake! "I can show," he says, "that the story of William Tell is as fabulous as—what shall I say?—any other historical event." His method of arriving at such end is to point to various similar stories in the history of many nations far and near; and some of these are of the utmost singularity. But Gessler may have heard of any one of them; and because Tell was an expert archer and had a son, he may have resorted to the same means of punishing him for disrespect to the Austrian symbol of power. However this may be, the author annihilates the personality of the Swiss patriot, on the ground of the universality of the legend with its various heroes, and he commences his attack on the next myth, "The Dog Gellert," with the self-complacent remark, "Having demolished William Tell, I proceed to the destruction of another article of popular belief." He does not allude to the adverse sifting of the story by learned German critics who are expert at making facts agree with their theory, and who have exasperated all Switzerland accordingly; not that the Swiss have treated their demi-god with much more real respect. The statue they have erected to him in the market-place of his native town of Altorf is certainly the most hideous idol before which "popular belief" ever performed an act of worship.

The Ancient Britons of the present time will be as little grateful as the Swiss for the demolition of one of their favourite stories. Here, Mr. Gould is really a demolisher. The story of the hound which was slain by its knightly master, who supposed it had killed his child, whereas Gellert had really preserved its life by slaying the wolf who would have destroyed it, is not Welsh. It comes from the East, and was told in Sanscrit story-books before the first Welshman breathed, which was pretty early, if "Taffy's" own word is to be taken for it.

Mr. Gould is as successful with the old legend of men with tails pendent from the *os sacrum*. He does not believe in them either in Kent or Cornwall. The men of Strood may be examined with the most curious eyes, but no trace will be detected of the punishment inflicted on them for pulling the tail off a Becket's horse as the prelate crossed Rochester Bridge. Besides, Mr. Gould settles the whole matter by declaring that "it is impossible that a human being can have a tail; for the spinal vertebrae in men do not admit of elongation, as in many animals." But this does not settle the matter; for men would not have been affrighted at tails growing from them, if they had been naturally prepared for such an appendage.

If Mr. Gould's chapter on "Antichrist" and "Pope Joan" be the most amusing in his book, it is in some respects the most unsatisfactory and contradictory. The myths themselves, springing out of the opinions held by the early and mediæval Church, are contradictory too. In some, the great Adversary is to come with such signs of power that it would seem folly to deny his credentials. In others, he is a mere Moslem destroyer, who will leave nothing upright in the world, except Mecca and other holy cities of the Turks. In the seventeenth century the Knights of St. John had their spies in the East, looking out for the birth of the unwelcome stranger, and they gravely announced to the world that they had at last come upon him in the person of a baby, born near Babylon, who "incontinent on his birth walked and talked perfectly well, . . . admonishing the people that he is the true Messiah and the Son of God, and that in him

all must believe." Mr. Gould's opinion, if we understand him rightly, is that Antichrist will be found amongst those naughty people who hold cheap the "millinery" and "pernicious nonsense," as those sad persons call certain costumings and performances of the exclusively good and true children of the Church as its Founder meant it.

We need not dwell on "Pope Joan," but we may all be forgiven for a reasonable amount of curiosity to ascertain whence that circumstantial story sprang. Mr. Gould leads us about in all directions, and lands us nowhere. He names Marianus Scotus as "perhaps the earliest writer to mention Pope Joan." Scotus died in 1086. De Gemblours, Mr. Gould says, repeated the story, and he died in 1112. A page or two later, after saying that the legend is fabulous, void of all historical foundation, he tells us that "even Martin Polonus (A.D. 1282), who is the first to give the details, does so merely on popular report." A couple of pages later he again says, "Marianus Scotus, the first to relate the story, died in 1088." Then he is as unfair with regard to Mosheim as he is careless in his arrangement of dates and authorities. "A melancholy example of the blindness of party feeling and prejudice is seen in Mosheim, who assumes the truth of the ridiculous story." But when Mr. Gould quotes Mosheim, we find that the statement of the latter is qualified by an all-important "It is said" at the beginning of the narrative; and speaking of the abundant testimony, so called, offered in support of the myth, Mosheim concludes by stating that "prior to the time of Luther the alleged fact was not regarded as incredible or disgraceful to the Church." So far from this being, as Mr. Gould considers it, "malignity," or "a disregard for truth," it seems to be but a fair statement, in which Mosheim assumes nothing, but that the story was told, and that it was not accounted incredible.

Of the story of the Man in the Moon, founded on that of the luckless Hebrew who gathered sticks on the Sabbath, for which he was stoned to death outside the camp, Mr. Gould has much pleasant illustration. The legend is universal and everywhere modified. In Scandinavia, Mani, the Moon, steals two children, and these, Hjiuki and Bil, are now seen in their shadows on the moon's surface. These two children Mr. Gould detects in the verse—

Jack and Jill went up the hill,
To fetch a pail of water.
Jack fell down and broke his crown,
And Jill came tumbling after.

"This verse I have no hesitation in saying has a high antiquity,"—so it may have, but it illustrates the old *Church and King* sentiment,—implying safety in union, and teaching that if the crown be cast down, the church will soon go "tumbling after."

We pass the "Fatality of Numbers" and the "Mountain of Venus" as samples of "make-weight," and notice the "Terrestrial Paradise" as an amusing paper, showing how mortals have presumed to fix its locality and to perplex honest folk who read the details. Dr. Cumming, we believe, if he has not settled that the future paradise of the few chosen shall be in Scotland, has conjectured that it must resemble Caledonia in its general features and characteristics. The Bruges Catechism has, with equal precision, set down the exact distance (to a centimètre) of the gates of Hell from the school-doors of Bruges. This leads us from Mr. Gould's very agreeable olume, the shortcomings of which require but brief notice at our hands, to the second work named above, a work which shows that the

medieval myth-manufacturing is in as full activity now as when in bygone days it supplied the appetite which it could hardly satisfy.

Mr. Furniss's book is one of a series expressly intended "for children and young people"; an extract from Father Faber, on the fly-leaf, gives us to understand that we are much too qualmish about mentioning "the scaring images of Hell," and that children are lost for want of being early smitten by terror! Our readers will remember that M. Octave Delepierre recently edited for the Philobiblion Society a series of "Visions of Hell," all belonging to a medieval period. The editor, and the public generally who studied that stirring collection of myths, fancied, no doubt, that they all belonged to a medieval period. The authorship of the stories did, but there are existing writers who continue to labour in the same vocation, and Mr. Furniss, "by permission of his superiors," is as ardent as any of them in this agreeable line.

His book is but a pamphlet, but it is stuffed with as many horrors as if an Encyclopædia had been devoted to the subject; and it is after this fashion that children belonging to the Church of which Mr. Furniss is a zealous teacher, are encouraged to have their trust in a God who is, before all things, a God of Love. Children are informed that Hell is four thousand miles from the surface of the earth, that the fair saint, St. Frances, has been taken over the interior of that place of torment by the angel Gabriel; and from her account and that of other witnesses, living children have an opportunity of knowing whether they are sure to go, and what they are certain to suffer, for ever and ever, for the smallest mortal crime committed in the flesh. Let us here remark, parenthetically, that we have no opinion to offer touching the theological character of the book. We take it as a literary and social illustration of what is now being written, and of the influences it is expected to have on a rising generation. We commit all besides to the fair judgment of our readers.

Mr. Furniss then informs the young that Hell is boundless, its plain is of red-hot iron, its atmosphere a fog of fire, its rivers fathomless streams of seething pitch and sulphur. Take the least spark from Hell (he says); throw it into the ocean, and in a moment it will dry up all the waters and set the whole world in a blaze. The music of Hell is not that of the spheres, but made up of shrieks that never subside, and unnatural sounds from the condemned, who roar like lions, hiss like serpents, howl like dogs, and wail like dragons. There is a rushing thunder as of cataracts of water, but little children are reminded that there is no water in Satan's fiery kingdom. What sounds like the fall thereof are the torrents of scalding tears falling without any cessation from millions of millions of eyes! The young, too, are further sickened by the assurance that if a body could be snatched for a moment from Hell and laid upon the earth, the stench would be so overwhelming that everything would wither and die. Then the little ones are further scared by the information that millions of fiends are daily despatched from the Bottomless Pit especially to tempt children to sin, and that the fiends are well beaten when they return home at night if they have been unsuccessful in destroying the souls of children throughout the day. As for the awful subject of judgment, these little ones again are told that their offending souls will be dragged in chains before Satan's judgment-seat, that he is their judge,—and a judge without mercy!

If the pulses of the young heart of innocent girl or boy reading, or listening to, these lessons furnished to them with a diabolical sort of

alacrity by the author, still beat unappalled, Mr. Furniss crushes them with fresh horrors. "How will your body be," he asks, "after the Devil has been striking it a hundred million of years without stopping?" Every naughty child has a special devil at its side to smite it (amid countless other outrages) for ever and ever; and Mr. Furniss asks his dear young friends "if they go to Hell," what their bodies will be like after their attendant fiends have been pounding at them during a poor instalment of the time, a hundred million years? Fancy a group of children fresh as flowers, confiding as innocents, with young life and a divine love within them, being asked such a question as this! The mortal fault of a moment deserves endless torture beyond the heart of man to conceive; about that, Mr. Furniss tells the scared innocents, there can be no doubt. He seems to lift his voice shoutingly, as if his tender and terrified flock should not hear the more loving words from the Fountain of love and mercy,—*"Suffer little children to come unto me."* No! teaches the author, they cannot and they shall not, if they bear about them the responsibility of the least of mortal sins.

The imagination grows more horrified with that which is supplied for its food and stimulant. The little ones are told that devils will be continually frightening them, Death staring at them; the vain will have to wear bonnets and dresses of the hottest fire of Hell, which burns everything for ever, and never burns anything away. A poor girl who loved dancing in the world implores Satan to let her little brothers and sisters know what has come of it; but, of course, Satan will not help her. The children of earth are even bidden to look into the horrible gulf to behold their fathers tossing in it helplessly; others are shown whole families, the members of which are tearing each other to pieces; which are renewed, to be again torn, each accusing the other of the calamity which has overwhelmed all. In short, within a few pages are enumerated horrors which defy all description. Almost universal empire is ascribed to Satan; all power over men is ascribed to him; the might, majesty, the love, the very will of God are burnt out by the all-devouring flames of Eternal Hell; and Christ is depicted as rather querulously stating that he had done his utmost to save mankind, but that the Devil, after all, had by far the best of it!

We add no word to this illustration. Judgment is free. We will only say that in all the myths of the Middle Ages, described by Mr. Gould, there is not one so utterly astounding, so horrible, so repulsive, and so mendacious as the myths of the present time depicted by Mr. Furniss, *permissu superiorum*.

Our Sermons: an Attempt to consider familiarly, but reverently, the Preacher's Work in the Present Day. By the Rev. R. Gee, M.A. (Longmans & Co.)

THERE is much in this little book that is entertaining, and much more that bears witness to the sincerity of the writer; but we do not think he grapples fairly with his subject, or draws the right moral either from our sermons or our criticisms upon them. While in some places he admits the faults of modern preaching, in others he rejects the only remedy. On one page he rightly censures pomposities, platitudes, conventionalities, and extols the simplicity of early preachers. Yet on another page he allows the moderns to disclaim straightforwardness, and to use those roundabout phrases which are the truest friends of absurdity. Mr. Gee seems to us somewhat in error as

to the nature and objects of a sermon. He looks upon it rather as the preacher's duty than as the means of working on the congregation. For this reason he objects to the preaching of other men's sermons, as offering of that which costs the preacher nothing. But he forgets that very often the preaching of a man's own sermon costs the congregation much more than it costs the preacher, and not only this, it brings religion itself into disrepute from the dullness of its minister. He says that "while a neighbour is toiling by his study-lamp to compose that which may not be altogether unworthy of the House of the Lord, we are copying off the thoughts and the views of others," and asks if "a blessing is as likely to attend our reading of these standard compositions as his earnest delivery of that to which, as the genuine offspring of his own mind, his own feelings are likely to give forcible utterance." But he never thinks that this toil by the study-lamp often produces heavy and empty discourses, not the genuine offspring of any mind, or the work to stimulate any feelings; while the "standard compositions" may be just fitted to inspire the reader and animate the hearers. Which would a man read best, Hamlet or his own inevitable tragedy?—and which would have most effect on his audience?

We confess to being much surprised at the premiss from which Mr. Gee seems to start, that all sermons are good till the reverse is proved of them. A man writing on this subject at the present day must take an exactly opposite ground. Mr. Gee assumes that everything connected with sermons is right until it is shown that the balance of argument is against it. If he is told that sermons are wearisome, he first denies that they are wearisome; he then tells us that sermons always have been wearisome; that it is our own fault if they are wearisome to us; and that they ought to be wearisome. Of course we do not mean that he says this directly; he is probably not aware of having said it. He really wishes to encourage animation, but he is checked by the unfortunate words "familiarly, but reverently," on his title-page. When he compares the preacher and the barrister, the languor with which the first delivers his message, and the fire with which the latter "tears a verdict" from twelve adverse jurymen, he pauses to deprecate Old Bailey arts, as if he had been recommending them, and not the earnestness with which they were employed. The moral most clergymen would draw would be that the barrister's warmth ought to be avoided, and this is a moral which does not need enforcing. Again, Mr. Gee tells the story of Garrick comparing the stage and the pulpit, and saying to Bishop Berkeley, "My lord, we speak warmly on the stage of unreal things as if they were real, and you in the pulpit speak coldly of real things as if they were unreal." Yet his inference is that because the present generation is not indifferent, the preacher must be earnest. Does not he know that one of the complaints of the present generation is the listlessness of preachers? Because certain among the clergy have recognized the necessity of warmth, and of choosing subjects which their hearers can understand, it does not follow that many are not still droning out long sentences on justification, and pounding away at the parables. It is not so very long since we heard, and in a London church, a sermon on the physical peculiarities of leprosy. Mr. Gee himself mentions a Scotch minister who prided himself on setting before his hearers "every Sabbath a hail system of divinity." But it is no answer to such instances as these to say that Barrow emptied churches by his long sermons, that St. Chrysostom complained of the inattention

of his hearers, that St. Augustine called himself troublesome unto men. Mr. Gee reminds us at the same time that Burke was called the dinner-bell of the House of Commons; but we are not tolerant of bad speakers because our grandfathers would not listen to so great an orator.

On other points Mr. Gee's advice is sounder, and we particularly relish his attacks on verbose platitudes, his praise of short, simple words. But even here his reverence sometimes overpowers his familiarity. He very properly smiles at a late bishop who talked of the calamitous obscuration of his visual organs. Yet he does not exercise sufficient rigour against complicated periphrases. Keble, he says, is in pulpit language "that poet who has contributed a sweet and a holy thought to every marked anniversary in the Church's calendar, and whose verses are now household words in many a Christian home." Dr. Vaughan, wishing to allude to Scott's novel of 'Kenilworth,' talked of "one of those classical works of fiction of which Englishmen are so justly proud." Speaking of King Alfred, he said, "a favourite royal hero, a disguised sovereign occupied with graver cares." Mr. Gee is half-inclined to blame these circumlocutions, but he is "somewhat afraid of an opposite turn, which makes everything too realistic, and even affirms that there is nothing which is admissible in conversation in the private house which is not to be tolerated in the church on the Lord's Day. Some delicacy must be allowed in bringing the men of the day, and the things of the day, into the House of the Lord and the Assembly of the Faithful." But do not the men of the day form a part of the Assembly of the Faithful? All that is gained by sedulously keeping out all but religious names and things, is the erection of a barrier between Sunday and work-day life. What Mr. Gee wants is probably to have secular matters discussed in the tone adopted by Church dignitaries when they compose a prayer against the cholera. We must talk of the pestilence that has reached our shores, as "this great mortality"; we must call the cattle-plague a "grievous murrain." In like manner, we are not to give a modern colouring to Old Testament histories. Mr. Gee does not like to hear Abraham described as a Bedouin, or Jeremiah distinguished as the most Dantesque of the prophets. We think him in the right when he objects to Saul's present to Samuel being called "Baksheesh," because that word cannot fail to have a comic association. There is still more force in his protest against Abishag being called the Madame de Maintenon to the Louis Quatorze of King David, as it must be fatal to all reverence for the founder of that great line to have him compared with the most monstrous sham of history. But surely most men have taste enough to draw the proper line between a degradation of David and an appreciation of Jeremiah.

Mr. Gee enters into many other questions into which we cannot follow him. His book will be read with interest by all who hear sermons, if not with sufficient profit by all who write them. Yet the latter will learn much from him if they choose to attend to his criticisms instead of accepting his excuses; and the former will read him for his matter, without always approving of his style. He should not quote a familiar line from Juvenal as "the Horatian precept," or say that the Archangel in Eden had the "fit audience, though few," which Milton asked for his Urania. But, as a rule, his mistakes are few and his knowledge is wide, which is much to say of a work written "amid the continual claims of a large country parish."

NEW POETRY.

How long, O Mediocrity, wilt thou abuse our patience? Attempts that boldly outrage all rules of composition may justify us in a laugh at their absurdity or in a protest against their bad taste; but what compensation for its wrongs can we obtain from that dreary respectability of verse which, without warranting either our mirth or our indignation, exhausts us by feeble propriety of diction and truistic amiability of sentiment? The dictum that every wrong has its remedy is one which, for critics, has no place in the Court of the Muses? What are we to say, for instance, to *Sighs, Smiles, and Sketches*, Second Series, by J. G. Maxwell, M.A. (Barnstaple, Wood)? In perusing this book we have sighed often, but in a sense that would hardly flatter the writer, and we have not once smiled, in spite of a piece or two in a provincial dialect, and lines like the following ingeniously contrived, we presume, to exhibit the effects of a cold in the head upon the pronunciation of the English tongue.

Oh! shud the door, please, for I'b ready to freeze,
And I'd much rather sid by the fire, lub.

Do we, therefore, bring any bitter accusation against Mr. Maxwell? The essence of our complaint is, that we have not sufficient grounds to do so. In his efforts at fun a painstaking mechanism of drollery is apparent; and if his puppets neither laugh nor articulate, they answer to the strings. There is little chance that his serious pieces will dwell upon the memory, but their execution does him no discredit. Here is an example—serious in itself, though included in the comic division of the work—which has absolute merit of description, and which, though it does not rise into fancy, scarcely falls short of poetic feeling:—

The thin grey mist along the hill-side crept,
And slowly spread its curtain o'er their way;
The speckled trout in every deep pool leapt,
Sprinkling its dark'ning face with silvery spray.
The sun's last rays were glancing on the scene—
Yes, torch and hazel glittered in their light;
Old Cawsand's rugged side warmed in their sheen,
And glowed with purple deep and gold beight.
The sparkling Taw was rushing on its course,
Gurgling hoarse music to its granite bed;
The green rush waving marked each streamlet's source,
And o'er its breast its downy snow-flakes shed.
The water ouzel skimmed along the stream,
The raven sought his mate on Haytor's height;
The heron left the shallows with a scream,
And noisy rooks winged home their straggling flight;
The shadows lengthened on the fern-clad hill,
As Jan and Girzie left their love tryst there,
But somehow in the lanes they lingered still,
For Girzie never got to Morton fair.

Our extract is a rare and very favourable sample of Mr. Maxwell's verse. But his rank in the realm of Mediocrity is lofty when compared with that of some whose trifling is narrowly separated from the limits of Absurdity. Thus when we peruse *Lasting Happiness, Poems*, by Ann Amelia Searle (Macintosh), with a mild sense of the misnomer in the title, our ready assent to the lady's doctrines is equalled by an unpleasant sense that they were already universally acquiesced in, and that arguments in favour of truisms are really a needless waste of the reader's time. Who disputes, for instance, that

Some seek for happiness from pleasure gay,
And walk in Dissipation's thorny way;
Folly's wild pleasures they pursue in vain,
Instead of true content they sorrow gain;
And oft through life they deeply mourn, I ween,
The misspent hours which no one can redeem?

The writer's intentions here are, doubtless, good; but if she had included in "mis-spent hours" those sacrificed to the commonplace iteration of admitted truths, her book would never have been written. The direct achievements of Mediocrity, however, pale before its feats in dimming the lustre of original genius.—In *Goethe's Minor Poems*, translated by Edward Chawner (Pitman), the splendour of the sun is reflected through a glass smoked to some pur-

pose. Capt. Chawner is not, we think, wanting in conscientiousness for the task which he has attempted, but, when extracting for us the sense of his original, he cannot disguise his own painful labour; he gives the dry residuum of the poet's meaning and loses his glamour. Where, for instance, in the following song is that *je ne sais quoi* of taste and fancy which is the very aroma of such compositions?—

THE YOUTHFUL AMADIS.

When I was a little chit,
Kept was I at home;
And thus many a year did sit
By myself alone,
As in embryo.

Yet thou wast my pastime, O
Golden phantasm!
And I was a hero bold,
Like the Prince Pipi,
And roved through the world.

Many a crystal palace built,
And destroyed them too;
Drave my javelin to the hilt
Back of dragon through,—
Yes, I was a man!

As knight-errant did I then
Free the Princess Fisch;
She did me too much enchant,
Shared with me her dish,
And I was gallant.

And her kiss was heavenly bread,
Burning like to wine.
Ah! with love I nigh was dead!
Round her bright sunshine
Like enamel spread.

Ah! where from me hath she fled?
Can no magic wand
Her too hasty flight delay?
Say, where is her land?
And where is the way?

Literally speaking, this may be Goethe, but it is Goethe divested of that exquisite finish which is even less the result of care than of delicate and exacting imagination.

Turning with disappointment from the graver works on our table, we looked wistfully at *Saint Crispin, and other Quaint Conceits and Merry Rhapsodies*, by W. J. Evelyn Ingram (Freeman). Perhaps we had a right to be sanguine of good entertainment since Mr. Ingram cites in his favour depositions from "George Glenny, Esq., Author of 'The Properties of Flowers,'" from "Dr. Ferdinand Rahles, Reviewer of Foreign Literature" (*sic*), and from "A Literary Critic of Eminence." Still, it seemed to us that the resemblance of these rhapsodies to 'The Ingoldsby Legends'—obviously the present writer's model—was rather that of form than of essence. Mr. Ingram's complaint of the undue gravity of readers now-a-days may be just (though we doubt it), but it is still problematical whether such verse as the following is likely to beguile them into mirth:—

I know not if the world has grown sedate,
And entered into a more serious state;
But sadly, solemnly do I relate,
That risibility is out of date.

Unless by chance we meet a giggling maid,
The elder ones appear demure and staid;
And some don't laugh because their teeth are said
To be imperfect when they are displayed.

But "laughter" certainly did once abound;
However slight the thought on which 'twas ground,
Its merry, happy peals, would oft resound,
Whene'er some sterling wit or jest was found.

In these hard days of thought and enterprise,
Each one upon his energy relies,
And half the pleasures of the world denies—
With some from need, others to aggrandize.

But in the present day and present tense,
Hilarity is not thought common sense;
To laugh aloud is reckoned an offence,
And savours much of verdant innocence.

On the whole, *Dame Perkins and her Grey Mare; or, the Mount for Market*, by Lindon Meadows, with Coloured Illustrations by Phiz (Low & Co.), is the liveliest attempt on our list. Dame Perkins is a female Gilpin, whose steed, an old hunter, encounters the noise of the chase on her road to market. Fired by the recollections of her youth thus evoked, the mare sweeps after the hounds with the helpless dame,

who is in at the death, and receives the brush in acknowledgment. The incidents are humorous in themselves, and clearly related, though with no great richness of description. Here is a picture of the dame's transit through a river:

"Thou ill-starred brute," Dame Perkins cried,
And on the stream did stare,
"I know thee full too well of old
To think thou'dst venture there!"

She scarcely could believe her eyes,
But 'twas no idle dream,
One moment she was on the bank,
The next she stemmed the Teme!

A famous swimmer was the mare,
How well she plied her legs—
Ah, woe betide the curds and cheese,
And woe betide the eggs!

The straggling hounds have struck the shore,
The fox again 's in view;
On dashed the eager huntmen all,
And shrill the blast they blew.

Strange too to sing, the first to land
Was still the old grey hack,
And there, the flower of farmers' wives,
Sat Perkins on her back!

The coloured illustrations by Phiz, however, form the chief attraction of the book. It is impossible to refuse laughter to his droll and spirited delineations of Dame Perkins on her involuntary ride. Such illustrations, coming in aid of the text, may render the book a welcome gift at Christmas.

Notes on Poems and Reviews. By Algernon Charles Swinburne. (Hotten.)

Mr. Swinburne, with a reluctance which may be easily understood, heralds the new issue of his 'Poems and Ballads' by these Notes on his work and on what was said of it by his reviewers. He stoops, however, to the commonplace and vulgar affectation of scorning his critics. He cares as little for their praise as for their censure. He repudiates the idea of making any apology, vindication, answer, or appeal, and then proceeds to make what he repudiates. He might never have heard, he says, in a certain lofty way, of his adverse critics "but for their attacks." This is exactly what is felt, if not said, by every offender, with respect to the unbiassed officials who calmly state their case against him, before the as calmly listening judge.

Could Mr. Swinburne have imitated this calmness, he and his apology, vindication, answer and appeal would have been certainly not the less successful for it. But he forgets the dignity of the poet by indulging in the poor argument of calling foul names. With the alliterative trick which mars some of his best poetry, he speaks of the "prurient prudery and the virulent virtue of pressmen and prostitutes." Anaxarchus was within the limits of propriety when he cried to the men who were braying him in a mortar, "Pound away! You bruise my body; you cannot hurt my soul." But when the philosopher bit his tongue in two, and spat the fragment in the face of one of the pounders, he lost his temper and hurt his reputation.

Part of Mr. Swinburne's apology consists in his protest against the sentiments expressed by his personages being attributed to him as his own. This is to be respected; but when he adds that Byron and Shelley mocked and reviled all that the England of their day held sacred, that they did this "with sublime effect," and that "I do not say that, if I chose, I would not do so to the best of my power," we see something of the value of the protest. Further, Mr. Swinburne, while warning us that the personages of his poems are alone to be saddled with the responsibility of their worst utterances, he makes those utterances his own by asserting that the impurity with which they are charged is really born in the mind of the reader. It is

a way of repeating, with a difference, Swift's saying that a nice man is a man of nasty ideas; but Swift furnished the ideas, as Mr. Swinburne does, before honest men expressed their disgust at them.

As the author has, according to his own showing, seen only "a few" of the remarks made on his book, but has been told "there are many," he is not fairly in a condition to reply. He takes one of his adversaries, however, whom he allows to be "a gentleman," on very sufficient grounds as it seems to us, since this critic pronounces two of Mr. Swinburne's poems to be "especially horrible." The author, of course, does not see the reasons for such a verdict; he tells us that he is "proud and glad of the distinction." We are told that some of the poet's friends defend him, on the ground that, steeped to the lips as he is in classical lore, and with an ardent love for all that belongs to the gods and goddesses, nymphs, and heroes of remote antiquity, in him is to be seen the natural result of a devotion to classical learning, combined with the rare power of painting in words the subjects which he chooses to illustrate. But Mr. Swinburne has so abused this power that, if the possession of it were the sole result of classical study, we should be induced to call it an accursed thing. Too often a similar excuse is made for men whose vicious tastes are put under the protection of the classic and antique shield. A learned curiosity as to the mysteries of Sun-worship has been the excuse for some men who gather into the upper closets of their libraries every illustration of that worship, whether the obscenity be ancient or modern, and who, dying, leave to their children the saddest of bequests—the knowledge of what swine they had for their sires!

Mr. Swinburne condescends to inform us that he "never worked for praise or pay, but simply by impulse, and to please myself." He may rest assured that some of his impulses have been wrong. The eulogy of his admirers has doubtless been as honest as the censure of his opponents, but difference of opinion makes no difference in facts. Every critic awards to the author of 'Atalanta' the full measure of praise that is his due. If Mr. Swinburne scorns alike their laudation or their reproof, they are equally indifferent as to his estimation of the value of their judgment. He almost admits the full weight of what has been alleged against him by admitting that he does not write for children or girls. But it is not, therefore, true, as he asserts (of course alliteratively), that he deals neither "in poison nor in pap." There is too much of the former in his ware, though he affects to deny it. Something may be allowed, perhaps, to "high Art," when it has for its subject a story of ancient gods or men; but Mr. Swinburne does not seem satisfied with this licence. To our thinking, nothing can be more horribly impure, more utterly loathsome, than the story of the unclean priest and his leprous mistress,—few things less holy than the legend of St. Dorothy when the saint and her lover meet in Heaven, apparently with all the dross of earth about them,—nor anything much more revolting than when the graves of poor mortality are torn open to exhibit the tenants influenced by feelings which have the fierce passions of earth about them. Finally, no writer but one like Mr. Swinburne, to whom the verdict of "judges with or without a name" is a "matter of infinite indifference"—and who says "it is of equally small moment to me whether in such eyes as theirs I appear moral or immoral, Christian or pagan,"—only to such writers could it be possible to take a story of the Noyades, and strike from it, as our defiant author has

done, all that could attach such story to human sympathy and human respect. Mr. Swinburne's truculent pamphlet, however, will not prevent us from hoping to see the author in a better frame of mind, and winning that public testimony of universal esteem which is always ready to be awarded as the crown of the pure, the sincere, and the inspired poet.

A Critical Exposition of the Third Chapter of Paul's Epistle to the Romans: a Monograph. By James Morison, D.D. (Hamilton, Adams & Co.)

Four hundred and twenty-two pages octavo on a single chapter of the Epistle to the Romans, and that neither the longest nor the most difficult one! At this rate we should be favoured with sixteen goodly volumes on the whole Epistle. The exposition, too, is critical; and lengthened critical interpretation is apt to become dry. The reader unaccustomed to large doses of criticism begins to yawn, and loses all relish for them. But Dr. Morison's book must be judged by what it is, not by what it might or ought to have been.

The work is marked by much ability. The author's erudition is uncommonly extensive. He has abundance of Greek and Hebrew learning, and is familiar with technical theology in its minutest details. Nor have his accumulated stores of knowledge weighed down his brains so that they are incapable of thinking. On the contrary, the author is metaphysical and acute. He can criticize the great masters of exegesis that have preceded him, bringing a clear intellect to bear upon their expositions, and subjecting their opinions to a minute analysis. As an example of exhaustive exposition, the volume is unique in these days. The books read by the author—Greek, Hebrew, French, Latin, German, Dutch, English—are almost innumerable. Every word and every verse are canvassed; while the opinions of many writers upon these words and verses are fairly given. Hence the book will become a sort of index to the expositor—a kind of dictionary to which he will go when he wishes to see what has been written on a phrase, verse, or paragraph of this chapter in the Epistle to the Romans. The vast learning, multifarious reading, and intellectual vigour of the author show that he is peculiarly gifted. In the great majority of instances in which he enters into elaborate investigations of special words or phrases, we agree with his conclusions; admiring, all the while, his patient consideration and calm judgment. A scholar must produce cogent reasons for dissenting from the views at which the author has arrived through inductive processes indicative of much labour, reading, and thought.

The work contains a revised Greek text of the chapter, a revised English version, a specification of its relation to the Epistle in general, and an analysis. There is also a very useful table of references to a few of the more salient topics critically and exegetically elucidated in the volume. The most elaborate discussion is that of *justification*, occupying nearly seventy pages. Important and lengthened examinations of the Greek words translated *redemption*, *propitiation*, *pretermision* (remission), are also given.

The mind of the writer is evidently saturated with a system of dogmatic theology—an abstract technical system: a fact which has had an unfavourable influence on the character of his book, depriving it of freshness and life, giving it a hardness and occasional harshness, as well as a narrowness of idiosyncrasy and expression. It is as if a giant had come to the performance of a great work encumbered with heavy irons.

The apostle Paul must not be looked at through the grating of Calvinism or Arminianism. Too much importance is attached to mere words, as if the apostle used prepositions, adverbs, conjunctions, and even more important terms, discriminatingly in all cases. The sacred writer was more intent on ideas than mere phraseology. Here and there the volume shows the special pleading of an abstract theology that loses itself in the mysticism of subtle distinctions devised by human ingenuity. If the apostle thought of all that is put into his language in various places, he must have transported himself into the schools of Augustine, Jonathan Edwards, Arminius, Turretin, and others; or studied theology in Scotland.

Of what possible use is it to quote the opinions of all kinds of writers, good, bad and indifferent? Thus, by the side of Fritzsche and Tholuck we have the names and opinions of Howard Hinton, Haldane, Basil Cooper, Turnbull, Cox, Knight, Heinfetter, Brown of Wamphray, &c. Why not allow these and others to sleep in oblivion? Our idea of a good exegetical commentary on the Epistle is very different from the writer's. We should refer to no more than the four best expositors, Tholuck, De Wette, Fritzsche, and Jowett; to Lachmann and Tischendorf for the Greek text; to Wilke and Robinson as Greek lexicographers to the New Testament; and to Winer's grammar. The sense of the passage 9—19, as a whole and in its separate parts, is imperfectly brought out. Here, especially, philosophy should be associated with interpretation. The meaning of the last clause of the 23rd verse is wrongly given. So is that of the verb *προεχόμεθα* in verse 9, where the English version is right. The difference between *ἐκ πίστεως* and *διὰ τῆς πίστεως*, as used by the apostle, is nothing. The critic's "rationale" of the prepositions is nugatory. But he explains the conjunction in the 20th verse rightly; and gives the true version of the verb in the 4th verse, "when thou enterest into judgment."

The author would have made his volume more acceptable had he divested himself of a technical phraseology which savours of pedantry, and contented himself with speaking of the Divine Mind and Divine Government in general terms, without unfolding their peculiar purposes and acts, of which he knows nothing. Thus when he talks of "God not yielding in his action to the impulse of indignation, but bearing and forbearing"; of "the immanent sphere of that divine attribute in which the transient acts of the divine pretermision took place"; and of a "dualism of feeling" in God; we marvel at the irreverent insight he has reached. "The apostle looks about inquisitively on the platform of thought on which he was standing. But he does not discern the object of which he was in quest. Then a jubilant flash shoots from his eye; and he exclaims, *Where is the glorying?*" The critic is thus most familiar with the apostle's mental processes. We prefer to remain in respectful ignorance of his states of mind where he has not condescended to describe them.

Training, in Theory and Practice. By Archibald Maclaren. (Macmillan & Co.)

In an able and thoroughly scientific treatise, which we cordially commend for careful perusal to rowing-men and all followers of gymnastic sports, Mr. Archibald Maclaren examines the system of training carried out at our public schools and universities, and shows in what particulars it is merely vexatious, and in what respects actively injurious. On several matters pertaining to drink and food, physic and

exercise, he is an utterer of doctrine which will certainly provoke discussion and inquiry at Oxford and Cambridge, and will no less certainly result in the explosion of some hurtful misconceptions, and in the modification of several long-established theories and rules. Of rowing, Mr. Maclaren observes,—“The part of the body which receives the smallest share of the exercise in rowing is the chest: it has little or no employment in the muscular effort required for the propulsion of the boat; and this is impressively evident in the results. Not only does it make no advance in development in this exercise, but, if it be exclusively practised, an absolutely depressing effect is experienced. . . . I could at this moment point to men who have had rowing for exclusive exercise since they came to the University, men endowed with an organization capable of the finest development, whose chests have been almost stationary for years, the years during which they should have made the greatest advance, who have now, in fact, the same developments in this region which they brought from school, lingering at 36 or 37 inches, when 40 or 41 were fairly within their reach.” The dietetics of athletic trainers are sometimes strangely fanciful, and at other times widely at variance with physiological indications. Whilst pedestrians limit their daily allowance of stimulant to two glasses of sherry, boxers are required to content themselves with the same quantity of port; and rowing men restrain themselves from proper indulgence in fluids, and deny themselves many articles of food that would indubitably contribute to their well-being, under the erroneous impression that asceticism checks the development of internal fat, and endows them with “soundness of wind.” In his remarks on diet, Mr. Maclaren observes,—“The everlasting beef-steak of former years has now a divided sway with the mutton-chop, and in some colleges it is more varied still. This is a great advantage, and the range may very safely be made wider yet. Eggs, unless poached, are still excluded (why?), and even when eaten the white is rejected. A man in training, with his dread of fat, would be shocked to find that in eating the yolk he has swallowed what is little more than a ball of oil, and in rejecting the white he has rejected an article of almost pure albumen, the special pabulum of the muscular tissues. . . . The importance of an abundant supply of vegetables is often lost sight of. The mere drinking of water or other liquid will not entirely supply the want in the blood for moisture, at times when it is often and largely eliminated from it; it is desirable that a certain amount of fluid, proportionate to the amount and nature of the solids, should be slowly extracted in the ordinary processes of digestion from the solids themselves, and of this vegetables contain a large proportion; moreover the inorganic substances which they contain, and which we know to be essential to the health of the body, are not attainable in the same form from any other source. A fair proportion of vegetables is therefore absolutely necessary to the healthy condition of the body: not rice and sago, but actual roots and leaves and green seed-pods; of these let men freely partake, avoiding all fanciful selection.” Of the physicking, which is a feature of the systems of training carried out at the universities and elsewhere for rowing and other sports, the writer expresses his decided disapprobation, and he concludes his essay with the needful reminder that, for the purpose of filling vacancies in college-boats, “men should not be selected by skill alone, nor from willingness alone, for the spirit of a man to enter upon

such efforts is often in an inverse ratio to his power to pursue them; but also by their general bodily power and state of development." In the appendices to his essay Mr. Maclaren gives a table showing the digestibility of certain articles of food, but he omits to explain the means by which he arrived at the conclusions therein recorded.

Superstition and Force. Essays on The Wager of Law—The Wager of Battle—The Ordeal—Torture. By Henry C. Lea. (Philadelphia, Lea; London, Trübner & Co.)

THIS is a book of extraordinary research, and it goes, indeed, so far into recondite sources that we doubt whether even erudite readers will understand a tenth part of the abbreviated titles attached to the innumerable references. Every corner of Europe is represented in these pages, and we find ourselves transported from England to Arragon, from Arragon to Lombardy, from Lombardy to Béarn, from Béarn to Iceland, with the most rapid and bewildering locomotion. Mr. Lea has entered into his subject *con amore*; and a more striking record of the cruel superstitions of our unhappy Middle Ages could not possibly have been compiled. The most ancient barbarian code that has reached us appears to be that of the Feini (*hodie* Fenians) in Ireland; but we have in this book excerpts from the Salique Law, the Welsh, Norwegian, Frisian, Russian, Wisigoth, Anglo-Saxon, Arragonese, and many other systems of jurisprudence in Europe; while even Asia comes in for a share, in the case of the Christian kingdom of Jerusalem, founded by the "gentle" Godefroi de Bouillon, and continued by his relative, Almeric, of bloodthirsty memory. So frequently is the scene shifted, both as to locality and date, that it is difficult to assign a place or time to the most startling fact after we have proceeded a dozen pages beyond it. We do not blame Mr. Lea for this; for the nature of the subject almost precludes the possibility of treating it in a systematic way. At least the book would have been less readable, and perhaps less instructive, than it is, if the author had digested the matter under the heads of the several codes or national systems, instead of classifying these obsolete customs according to their own idiosyncrasies. The particulars comprised in the author's last two divisions are probably better known to the ordinary reader than those in the earlier chapters; but each of the four heads abounds in curiosities of the most marvellous and astounding kind. It is well that such a book has been written, for it reminds us, in the pride of our civilization, of the depths of horror to which man—even after an age of high cultivation, and with the light of Christianity to guide him—may from his own inherent weakness and perversity descend. It reminds us also how great is the blessing of governmental and judicial strength, which relieves us from the necessity of deciding disputes by haphazard experiments, in which the guilty may triumph and the innocent may perish.

The "Wager of Law" is perhaps the least known of the subjects treated of in this volume. It was a common circumstance over a large portion of Europe, including England, that a defendant, when rebutting by his own oath the charges against him, was obliged to produce a number of conjurators, or compurgators, who, testifying to his credibility, strengthened his oath of denial by partaking in it. This system lasted for some centuries, in different forms and under fluctuating regulations, which varied according to the particular country. We are

assured by Mr. Lea (on the authority of the London *Jurist* for March, 1827) that it was not formally abolished in England till the nineteenth century, while in Germany it lasted till the sixteenth, and in Béarn and Poland till the eighteenth. Many very singular anecdotes have been preserved as to artifices by which our ancestors sometimes managed to get the benefit of an oath and evade its responsibility. It was a curious compromise with conscience; somewhat similar to that of a truthful school-boy, who, on being accused of having a tobacco-pipe in his possession, declares boldly that he has not got one, having, in fact, just passed it under the desk to a juvenile confederate. In 680, when Ebroin, Mayor of the Palace of Burgundy, was at war with Martin, Duke of Austrasia, he sent to the beleaguered chief two bishops bearing the royal reliquaries, and the reverend prelates exhorted the Duke to surrender, assuring him on oath that his life should be spared. The unhappy Martin trusted to appearances, and gave himself up to a certain death; for the reliques had been previously removed from their cases, and a mere oath on the empty caskets could be broken without serious consequences. How futile a simple oath might be, is shown by the Penitential of Theodore, Archbishop of Canterbury, where we find that a false oath on an unconsecrated cross was to be visited with only half the penance exacted for perjury on a consecrated one; and that in both cases the oath was void, and therefore, it would seem, unpunishable, unless a priest was employed. But the most elaborate trick in this way was that of King Robert the Pious, who knew that his magnates were faithful, but that the lower orders hated him to a man. Accordingly, when all classes came to take the oath of allegiance, he gave the nobles the case really containing the reliques, while he good-naturedly contrived a duplicate for the common people, with nothing but a bird's egg in it, in order to save them from being forsworn. Yet in spite of all this trifling (which seems to have been generated by a casuistical refining of the question, what was and what was not an oath), a real oath on genuine reliques was an important thing. In fact, the Church derived large revenues for administering oaths, and it is no wonder that it discredited irregular practices! It is related that at Cardigan an image of the Virgin was cast ashore, bearing a taper burning in her hand. Let no one laugh at this as an exploded superstition, when a half-English watering-place, within two hours' sail of our own coast, has recently welcomed thousands of pious votaries at the shrine of "Notre Dame de Boulogne." The Cardigan Notre Dame soon distinguished herself in a remarkable way; for the good people built a church for her to dwell in, and there, safe from wind and weather, the taper "contynued styll burnynge the space of nyne yeres, without wastynge, untill the tyme that one forswore himselfe thereon, so then it extincted, and never burned after." This would strike one at first sight as having been a shamefully illogical taper, for its conduct seemed calculated to deprive the monks of their dues, and to punish a pious community for the fault of a perjured stranger. But we find that the taper retained its value, and gained increased respect, for at the suppression of the house, *temp.* Henry the Eighth, the Prior, Thomas Hore, bore witness as follows: "Item, that since the ceasyng of burnynge of the sayd taper, it was enclosed and taken for a greate relyque, and so worshipped and kyssed of pylgrymes, and used of men to sweare by in difficill and harde matters, whereof the advauntage admounted to greate sommes of money in tymes passed, payenge yerely to the same

XXti nobles for a pencion unto thabbott of Chersey." Is it uncharitable to suppose that in that distant corner of Wales the lighted taper did not make enough sensation, and that the marvellous fact of its going out in virtuous indignation (probably quite an original "dodge"—simple enough, no doubt, but still a novelty) was judiciously arranged for the purpose of giving it a new lease of life? Anyhow, it was a very useful taper, and earned much solid gold for the monastery of Cardigan as well as for "thabbott of Chersey" (the Abbot of Chertsey), who was the superior landlord of that establishment.

The "Wager of Battle," from its furnishing exciting scenes for modern novelists, is much more familiar to us of the present day than the Wager of Law. To a certain extent these two customs must have had a common origin, that of finding some way of settling contested points when undeniable evidence could not be had. To decide as we now do in England, on circumstantial evidence, seems to have been abhorrent to the feelings of most mediæval nations, who sought for a spurious kind of certainty, either by balancing the number of oaths, or by appealing to the God of Battles. For it must be distinctly remembered (and Mr. Lea points this out very carefully) that the Wager of Battle was not a mere duel to satisfy offended honour, but a reference of a legal point to the solemn arbitrament of arms. Consequently great cruelties were frequently enacted on the unhappy warrior who, from bad luck or inferior prowess, happened to be defeated. Thus, in the kingdom of Jerusalem, the defeated party in an appeal of murder was hanged in his spurs; while in Beaumanoir's 'Coutumier' we find that in capital cases, where champions were employed, the principals were kept in prison, with the cord round them with which the defeated party was to be hanged. Worse than all this, if one of the parties happened to be a female, she was shut up in a cell with the spade with which she was to be buried alive. Burning seems also to have been practised on women, for in an old French miracle play we find a king threatening both his wife and daughter with this horrible fate in case the champion of the daughter should be defeated. The punishment of hired champions seems to have been very severe, and at first sight this would appear rather unreasonable, for as they only fought for pay, so they were guiltless of any crime imputed to the principals. But there was a reason for this, and a pretty sound one, too, for as old Beaumanoir quaintly says: "A conquered champion has his fist cut off, for if it were not for losing the hand, one might make believe for hire and declare himself conquered, whereby his employer would carry away the loss and villany, and he himself would carry away the money; and for that reason the judgment of the hand is good." In most districts, however, the punishment seems to have been more severe, the champion having frequently had to suffer death, while his principal escaped with fine or imprisonment. In England, before the reign of Edward the First, a very singular custom prevailed as to the hired champion in civil disputes relating to landed property. It was necessary that he should swear that he had been personally present, and had seen seisin given of the land, or that his father when dying had enjoined him to maintain the defendant's title. So in Normandy a plaintiff's champion had to swear that he had heard and seen matters alleged in support of the claim, while the opposing champion swore that those matters were false. All these allegations were untrue, but it seems that by a legal fiction the champion was supposed to be justified in making them, if he

could but justify his main contention by success in the field. In some countries, men who followed the profession of hired champions were treated with deep contempt, and visited with severe disabilities. Thus, in Germany there was a graduated list of fines for insults offered to nobles, merchants, &c., as a salve for their wounded honour. Even serfs had some genuine compensation; but below them came the mountebank and juggler, who might only cuff his enemy's shadow on a wall; and last of all came the professional champion and his children, whose only redress was a reflected ray of sunshine cast upon them, by the offending party, from a polished shield!

The horrible iniquities of the "Ordeal" and Torture are scarcely fit to be alluded to, except in a book devoted especially to the subject. What is most singular is that we find few protests against them, and many men, apparently of sober judgment, acquiescing without hesitation in their use. The meek Jesuit, Del Rio, in his instructions to inquisitors, lays down that the flesh should not be wounded nor the bones broken, but that torture can scarcely be properly administered without more or less dislocation of the joints. A German writer enumerates 600 different instruments of torture. Farinacci, an Italian authority, commended highly the system of Marsiglio (that of keeping the victim from sleep for forty hours), remarking playfully that a hundred martyrs exposed to it would become confessors almost to a man. A philosophical jurist of Milan, desirous of testing the real efficacy of torture, killed a favourite mule, and allowed the accusation to fall on a servant. The unhappy man was tortured, and avowed himself the author of a deed of which he was perfectly innocent. Cruel as was the experiment, the judge was honest in intention, and he resigned his judicial post rather than persist in a system which obviously confounded the innocent with the guilty. Most jurists, however, seem to have feared the failure of the system in an opposite direction, especially in cases of witchcraft. We read that Rickius, fearing that the Evil One would fortify the accused against the pain of torture, directed that the "sink or swim" process should always be applied, not, however, as a sufficient test, for the miserable witch was to go through the regular course of torture afterwards. The power of the Devil to assist a person under torture was much dreaded; and, as a striking instance, we find in the 'Histoire des Diables de Loudon' that a tortured person could not be made to shed tears by the torture, or even (for this appears to have been considered the severer test) by hearing, fifty times repeated, the words "Præcipio ut si sis innocens effundas lachrymas"!

As a work of curious inquiry on certain outlying points of obsolete law, 'Superstition and Force' is one of the most remarkable books that we have met with. Apart, however, from its antiquarian merit, it may be useful in opening the eyes of romantic enthusiasts who have looked only upon the glittering side of mediæval history, and whose mental picture of the age of chivalry is made up of burnished armour and picturesque ruins, and who are rash and fanciful enough to yearn for a speedy return of the blessings of the Dark Ages.

Travels in South America—[*Reisen durch Süd-Amerika*, von J. J. von Tschudi. Erster Band]. (Leipzig, Brockhaus.)

If there are no striking bits of word-painting in this new account of a land which excels in coast scenery, neither are there those errors nor that partisanship displayed by many former

travellers. M. von Tschudi does not enter into the vexed questions of the English treatment of Brazil, save cursorily; he is careful and accurate, giving copious details whenever he condescends to treat a subject, and not shrinking from a great many subjects which would have been passed over by writers of a less painstaking nation. He has, moreover, enjoyed unusual opportunities of seeing much and judging fairly. For two years he held the post of envoy extraordinary from the Swiss Confederation to the Court of the Emperor of Brazil, and while his feelings leave him impartial, his judgment enables him to be correct. In his Preface he tells us that he knew the dangers to which travellers are exposed, both when they rely exclusively on their own observation, and when they obtain information from natives or settlers. Very often a traveller sees half, and that the wrong half. His memory may be fallacious, his eyes blinded by the ways of his own country. He may take note of some exceptional circumstance, and hold it up to blame or ridicule as significant of the national manners and customs. How can you persuade a quick-eyed traveller that he did not see something which could not have happened? And what is the value of that man's judgment who will be persuaded against the evidence of his senses?

There is, however, as M. von Tschudi tells us, another danger of an opposite kind, but one which is even more fatal. You get information from a native, and, even if you understand him perfectly, you have no guarantee of his truthfulness. Some informants lead you wilfully astray; others give you their own valueless opinions as facts, from their own inability to discriminate. Some who do not know how to answer your questions, and do not wish to display their ignorance, invent to keep up their own credit; others invent or falsify because you do not deal at their shops, or do not pay them their prices. Several men of this stamp boasted to M. von Tschudi that they had led his forerunners astray for these motives, and it was well that they should give him their own measure, and warn him thus against honouring them with his confidence. He very rightly pillories a German settler at Puebla, who took in De Saussure by showing him a ruined oven as a relic of the Aztecs.

Much of the literature about Brazil is inspired by yet more mischievous motives. Mr. Christie's 'Notes on Brazil' showed the existence of many wilfully false statements in professed authorities, and we are sorry to see that M. von Tschudi has for a single moment been led into error as to the conduct of Brazil with regard to the slave-trade. He talks in one page of the brutal acts of naval violence committed by England against Brazil, and says that the slave-trade has been suppressed by the resolution of the Emperor and the watchfulness of the Brazilian fleet. But he forgets that it was not till after the brutal acts and the Aberdeen Bill of which he complains that the Emperor made up his mind to suppress the slave-trade, and that the watchfulness of the Brazilian fleet was stimulated by the example of our own. It was not till after 1850 that the coast authorities were enlisted against the landing of slaves; till then they were content to wink at it, and they sometimes encouraged it. When the coast authorities shared in the profits of the slave-dealers, and when the forts even fired on the English man-of-war which chased a slaver into their waters, the Brazilian fleet was not watchful, nor the Imperial will sufficiently resolute; and as far more depended on the authorities of the long line of coast than on the few ships of the navy or the distant central

Government, the ships might well be evaded, and the Government set at defiance.

Now, however, it is different; but the difference is owing to England's pressure. M. von Tschudi admits in the next page that the history of Brazil's treatment of the negroes must make every honourable Brazilian blush, and that it was owing at last to Mr. Southern's efforts that the Africans who were called free were allowed their freedom. Yet other writers, who are not so fair, still argue that the Act which brought about these effects ought to have been repealed before the effects were certain; that Brazil, which neglected these things till it was forced to do them, deserves great credit for doing them; and that England, which forced her to do them, was at once unjust, ineffective, and needlessly severe.

If we think that M. von Tschudi is a little unfair to the efforts of our navy, we have no cause to complain of him as depreciating the merits of our mercantile marine. He speaks very highly of the English steamers to Brazil, praising their security and order, and their superiority to their French competitors in all points save one. This one point is, that the French steamers give their passengers a light red wine, which is included in the passage-money. In other respects the English packets are far better. The food leaves nothing to be desired, and the stewards get up musical entertainments in the mornings and evenings. "But for the rattle of the screw," says M. von Tschudi, "or the regular beat of the paddles, one would forget one was on the immeasurable ocean, and think one was in one of the first-class hotels on the Continent." Yet even these advantages, we think, would not console the English invalids on their way to Madeira, who were not allowed to land because the ship was in quarantine, and had to make the whole voyage to Brazil. Good food, and plenty of it, musical stewards, and all the rest, could hardly reconcile consumptive patients to a compulsory voyage of so many more days than they had expected. To judge from M. von Tschudi's sketch of the passengers in other steamers, we should think that he cared little if this or a worse fate befell them. The French steamers, he tells us, bring out crowds of settlers to Brazil; but these settlers are by no means pioneers of civilization, unless that term is applicable to milliners, *coiffeurs*, and Alsatian Jews. The scenes with these passengers are often disgraceful, and would be unbearable in a smaller vessel. Yet the French are not half so bad as the Portuguese, who come to Brazil in a state of beggary, and grow up to be millionnaires and viscounts. Most of these emigrants cross the ocean without being able to pay their passage-money; when the ship arrives at Rio, their countrymen, who have gone through the same experience, board the ship, advance them the money, and take them off to their shops or *fazendas*, to work out the debt. "I know many such Portuguese," says M. von Tschudi, "who have begun life as shopboys, and are now in possession of titles, landed estates, and slaves by hundreds or even thousands; yet the man always retains the stamp of a *parvenu* in spite of all his orders and riches; and while Germans would not own him as an aristocrat, nor Englishmen as a gentleman, nor Frenchmen as an *homme comme il faut*, nor Spaniards as a *caballero*, perhaps Portuguese would acknowledge him to be an *excellencia*. Even the cultivated classes of the Brazilians look on these men askance. I remember a Brazilian refusing his daughter to the son of a Portuguese millionaire, who had amassed his enormous wealth almost exclusively by speculating in slaves, on the ground that 'his father's

gold was clammy with blood and tears.' However, the Portuguese themselves care for none of these censures. "The Lusian slave, the lowest of the low," may become the highest of the high by standing on a pedestal of money. The trade in titles and orders is carried on openly, and price currents of them are even sent to foreign consuls in Rio. M. von Tschudi vouches for the truth of the following story, which, not from any improbability, but from its close connexion with commerce, may well need a voucher. A dealer in jerked beef, who had already earned the title of Baron, was advanced by the same process to the rank of Viscount. Having to sign some paper a day or two afterwards, he wrote himself down "Bisconde de ——" "Excuse me, your Excellency," said his clerk, "Visconde is spelt with a V."—"What do you mean?" exclaimed the noble; "I always spelt Baron with a B, and I shall spell Viscount also with a B." But, as the clerk assured him that it had lately become the fashion to spell Viscount with a V, the nobleman consented to follow the fashion. It is true that the Portuguese as well as the Spaniards pronounce *v* like *b*, and an analogy may be found among the Germans. There is a story of a Spanish ambassador at some court being asked if he was married, and replying, "Non, je suis bœuf." His conversion of a widower into an ox caused some laughter, and the next time the question was put to him—the questioner being the Queen herself—he answered, with some embarrassment, "Non, madame, je ne suis pas marié, mais j'ai des enfants." Yet we question if either of these facts would have been proclaimed in writing.

When such persons as these Portuguese attain to wealth and nobility, it is not to be wondered at if the country is rife with abuses. The frauds in the custom-house, whence the chief revenues of Brazil are derived, have been so numerous, that in the course of one inquiry 111 officials were dismissed. M. von Tschudi praises the extreme beauty of the Botanical Gardens at Rio, especially "the marvellous avenue of palms, a row of marble columns with living capitals." Yet the management of the gardens is most defective, and in some points they are excelled by the botanical collections of small university towns in Germany. There is even a talk of giving up part of the ground to the production of food for the negroes and mules employed there—a plan which M. von Tschudi justly condemns. He has not a good word to say for the hotels in Rio,—those which are good in one respect are faulty in another, and are dear in all. Perhaps there is nothing more significant of the Brazilians than the system pursued in the fish-market. A few dealers have an absolute monopoly; they buy up all the fish at a cheap rate, and sell it again most exorbitantly. To make it appear that the supply is small, they keep the bulk of their stock out of sight, and expose only one or two fish at a time. They have been known, when the supply was very plentiful, to throw back half the fish into the sea, so as to keep up the price of the rest.

Both in Rio Janeiro and Bahia M. von Tschudi found reason to complain of the state of the streets. Those of Bahia are necessarily steep, but they might be better paved. Their steepness, however, leads to the employment of a curious kind of sedan-chair, of which M. von Tschudi has omitted the most characteristic feature. The streets in Rio have no such excuse; yet they are the worse of the two; they are too narrow, and their paving slopes in towards the middle so as to form a gutter. Being generally made at right angles to each other, there is most

where these gutters intersect, and in these holes carriage-wheels are apt to come to grief. The Rua Direita is better than the rest; but the reason is that it was paved with stones brought from the Isle of Wight. In like manner a church at Bahia was built of stones brought from Lisbon, each stone being numbered before it was shipped, so that the Brazilians had nothing to do but to put up each one in rotation.

Other national peculiarities are noted down by M. von Tschudi. He was by no means edified with the cowardice of the Bahian watchmen, who were well armed, but shrank back when any one approached them. He was much amused at the questions put to him by a Brazilian captain, who could not understand why a German ship hoisted the Hamburg flag, and asked if Germany was the capital of Hamburg. He comments on the mania for taking off hats displayed in the Custom House at Rio, although he need not have gone so far as Rio in search of examples. He defends the Brazilians against the ridicule sometimes cast upon them for their aversion to shade, which, indeed, they share with the Italians, and which, as he shows us, is amply justified. We quote his words:—

I have often met in books of travel with sarcastic remarks on the shadeless gardens which surround the country houses of the Brazilians. It is true that shady trees, slender palms, thick alleys, gigantic groups of bamboos, and luxuriant creepers are splendid ornaments to a park. But experience has taught the natives that rich vegetation is very unhealthy when in close proximity to houses, and, further, that it encourages to an immense extent the intolerable plague of winged insects, which are man's greatest enemies. When the Brazilian wants a cool refuge from the overpowering heat, he does not resort to a shady bower in his garden, but shuts himself up in his room, with the windows carefully closed by *jalousies*. If he wants to enjoy the soft evening air, he does not sit under a tree in his park drinking port or ale, but leaves the doors of the house open, and sips luxuriously his lemonade or tea under shelter. The European, on the other hand, chooses a country place with wooded ground, in order to enjoy the shade as he does at home, and he very often purchases this pleasure with a deadly fever.

There is a slight exaggeration in the "port or ale" which M. von Tschudi mentions as the favourite drink of Europeans. No doubt Bass, Alsopp, and Salt slay their hundreds in India, but we question if either tawny, crusted, or fruity is in any demand within the Tropics.

Memoirs of the Life and Reign of King George the Third. By J. Heneage Jesse. 3 vols. (Tinsley Brothers.)

KINGS belong to the order of persons to whom no one cares to apply the merciful rule which protects the dead from harsh judgments. For the power, splendour and privileges of their royal state they pay a heavy price, and endure many special vexations, of which no trivial part consists in the depressing foreknowledge that flattery will die with them, and that, as soon as the grave has closed over their bones, lynx-eyed, prying, inquisitorial, merciless history will begin to tell the truth about their least creditable actions. Upon the whole, George the Third has fared better at the hands of posthumous criticism than many a monarch of greater intellect and brighter achievements. The controversy respecting his kingly merits and deficiencies is neither finished nor likely to come altogether to an end in our time; but the disagreements between his assailants and his apologists are so far changing shape and tone, that it is not difficult to foresee a time when both parties in the dispute will have arrived at something like unanimity. Anyhow, the proceedings against the fair fame of the Farmer King

will not hang on hand, like the indictments of Henry the Eighth and Mary of Scotland, which, after numberless hearings and re-hearings, are still waiting for final decision. After a few more years, half-a-century will have passed over the grave of the sovereign who committed grievous blunders with the best possible intentions, but whose calamitous mistakes were insufficient to alienate from him the affections of the more numerous, and, let us add, the better, portion of his subjects. Even in his lifetime, whilst the evils of his policy were most felt, and its humiliating results were of recent occurrence, our grandfathers could not concur in denouncing a king whose domestic sorrows and personal affliction gave him peculiar claims to the sympathy of generous spectators, and whose nature was recommended to their love by its failings scarcely less than by its virtues. As loyal subjects are wont to do, the King's friends were guilty of many extravagancies, extolling for its wisdom and native strength a mind that laboured under the disadvantages of defective education, and exhibited alarming signs of disturbance whenever any unusual stress was laid upon it; but if his friends ran wide of the truth in one direction, his political adversaries went as far astray in another. In their eyes no element of human goodness could be found in the tyrant, who did his utmost to crush liberty at home whilst he goaded his subjects into successful rebellion on the other side of the Atlantic. According to them, he was a coarse, brutal, half-witted despot, resolutely bent on carrying out the mischievous *crôchets* of his malignant temper and crazy brain. Fifty years have wrought as much modification of opinion in the party for the prosecution, as in the party for the defence. From the former have disappeared those loyal and courteous gentlemen of the old school who found their ideal of human perfection in their beloved monarch, and who flushed with indignation at the faintest whisper of disrespect for his character or powers. In the latter there is a growing willingness to admit that in passing judgment on the sovereign, historians should give him credit for conscientious purpose, considerable amiability, and several manly qualities; and that his narrow and unenlightened policy should be attributed to the badness of his early education rather than to badness of heart. Whilst his defenders admit that he committed grave errors, and temper their arguments with appeals to generosity as well as justice, his censors are disposed to palliate his shortcomings with charitable suggestions. Nothing in the late Mr. John George Phillimore's nervous volume of 'History of England during the Reign of George the Third' jarred more rudely upon the sensitiveness of his readers than its severity to the memory of a king who has titles to merciful treatment from every man blessed with liberal culture and a sound mind.

Approaching the public whilst it is in this relenting mood towards one of the best-abused kings of modern times, Mr. Heneage Jesse publishes a story of the monarch's life that will find its strongest admirers amongst those who would fain continue to be the "King's friends" so far as truth and knowledge will permit them. Not that the book is a vindication, or an attempt to gloss the errors which brought upon us other humiliations besides the loss of the United States. Upon the whole, Mr. Jesse takes a fair view of events, though he is, in places, too eager to cover the King's personal misdeeds with the doctrine of ministerial responsibility—a doctrine which may be pressed to the utmost against statesmen who make themselves mere tools in the hands of constitutional sovereigns, but cannot

be fairly pleaded in behalf of those monarchs when they are brought to the bar of history to receive judgment for unwarrantable interferences with constitutional provisions. The book is something more than biography, as, indeed, the "Life" of a King must be; on the other hand, it is quite as much less than history as its title indicates. Here and there, indeed, the writer expends too much time and labour on the general history of the reign; for instance, his narrative of the American War is too long for the purpose, and some of his accounts of political intrigues are more extended than we could wish; but, for the most part, he confines himself to the story of the king's personal career and interests, in which, of course, are included the domestic affairs of his nearest relatives, and those excitements of the town which must necessarily have been amongst his affairs of especial concern. Estimated by the nature of his present operations, Mr. Jesse is, perhaps, to be regarded as a compiler rather than as an original writer, for he has drawn into his three bulky volumes all the royal and many of the other anecdotes that brighten the pages of the numerous "memoirs" and "correspondences" which form so important a part of the literature published in these later years. In fact, his book is a well-stored, though by no means complete, repertory of the presentably scandalous stories that have crept into print about the royal family during the present century. It successively brings upon the stage Hannah Lightfoot; the Lady Grosvenor, for whose seduction the Duke of Cumberland was compelled to pay 10,000*l.*, and costs; the Mrs. Horton, for whose hand, honourably given and taken in marriage, that same duke deserted his high-born mistress; Lady Waldegrave, whose union with the Duke of Gloucester caused the young king poignant sorrow; the Duke of York's Countess of Tyrconnel; Lady Almeria Carpenter, and other fair ladies who used to dance at Mrs. Cornelly's masquerades in Soho Square. Of course, it tells once again the stories of Caroline Matilda of Denmark, Chatham's death, the Gordon riots, the prosecutions of John Wilkes, Margaret Nicholson's attempt on the King's life, Hatfield's similar attempt, the King's marriage and illnesses, and Sellis's murderous assault on the Duke of Cumberland. So, also, it brings together many good though familiar *ana* about such men as the Pitts, the Grenvilles, the Earl of Bute, and that chattering old zany, the Duke of Newcastle. And in combining his multifarious materials, the author displays an equal amount of art and honesty; the skill with which he contrives to give harmony to the colours and smoothness to the seams of his patchwork being no less commendable than the care which he takes to render full acknowledgment to every author that he uses. Moreover, in fairness to Mr. Jesse, we must add that he is not merely a reproducer of old materials. Though his new and hitherto unpublished papers are of no great value, he must be thanked for having laboriously gleaned a considerable number of original letters. Like other writers since Twiss, he has examined the Eldon Papers, which Twiss used to good effect—and thoroughly used—for his life of the Chancellor. He has also come upon epistles written by Horace Walpole, Chatham and George the Third, which are now for the first time submitted to the public in type. Moreover, here and there the reader meets with an anecdote which the author tells upon his own authority.

The first of the three volumes opens excellently well with the death of that easy-tempered old, Frederick Prince of Wales, in eulogy of whose virtues the scholars of Oxford and Cam-

bridge poured forth poems, "composed in different metres, and written in no fewer than the English, Latin, Greek, Hebrew, Phœnician, Etruscan, Arabic, Syriac and Welsh languages." Whilst academic royalty mourned for a dull creature, whose chief powers were devoted to debauchery, the flippant but more truthful world sang:—

Here lies Fred,
Who was alive and is dead.
Had it been his father,
I had much rather.
Had it been his brother,
Still better than another.
Had it been his sister,
No one would have missed her.
Had it been the whole generation,
Still better for the nation.
But since 'tis only Fred,
Who was alive and is dead,
There's no more to be said.

—And in thus singing, the flippant world uttered a better song than any of those sets of wretched verses which the deceased prince had indited in his moments of liveliest intellectual activity, and of which John Earl Poulett, on being asked for a critical opinion about them by the author, observed, "Sir,—they are worthy of your Royal Highness." Both before and after his death, the children of this unworthy father were wretchedly trained by a mother whose mind was as narrow as her heart was selfish; and on reaching years of discretion several of them were not slow in displaying the fruits of bad parentage and worse nurture. They had, of course, governors and tutors, governesses and teachers of accomplishments; but several of the instructors, catching the tone of their employers, gave their pupils no conscientious care. At eleven years of age George the Third could not read English; and from that time till manhood he was managed as though ignorance was the most desirable characteristic in a sovereign. His best teacher was James Quin the actor, who used to train the royal children in elocution, and act as stage-master at their private theatricals in Leicester House. The furious violence with which the boy was on one occasion treated by George the Second caused him to entertain a permanent dislike for his grandfather; but, though he may never have experienced similar treatment from his mother, there is a story recorded by Walpole which indicates that she was by no means a gentle mother. The Duke of Gloucester, her third son, was a dull child, "and she used to cause him great distress at times, by jeering him on account of his dullness, in the presence of his brothers and sisters; on one particular occasion telling them 'to laugh at the fool.' The sensitive child held down his head and said nothing; on which the Princess changed her tone, and accused him of sulkiness. 'No,' he said, 'he was not sulky, he was only thinking.'—'And pray what are you thinking of?' inquired the Princess, with increasing scorn in her manner. 'I was thinking,' said the poor child, 'what I should feel if I had a son as unhappy as you make me.' This story is characteristic of the mother who reared the heir to the English throne with a view to keeping him under her personal influence, and illustrates the spirit of the home from which several of the boys went forth to careers of licentious indulgence, and at least one of the girls to as gloomy and hideous a lot as ever crushed the heart and life out of an innocent woman. It is a home from which the reader hastens with alacrity to accompany the young Prince of Wales on a secret excursion to Hannah Lightfoot, whose story is thus told by the author:—

"The family of Hannah Lightfoot originally came to London from Yorkshire. Her father, a respectable tradesman, resided at Execution Dock, Wapping in the East, a district sufficiently obscure

and remote, one would have thought, to have preserved his daughter from the temptations and perils of a court. Unfortunately, however, she had an uncle, a prosperous linendraper of the name of Wheeler, who resided in the more fashionable vicinities of Leicester House and St. James's Palace; and as his children were nearly of the same age as herself, it was only natural that she should occasionally become a guest in his house. The house in question—interesting perhaps as having been the last in which she was destined to press the pillow of innocence—stood at the south-east corner of Carlton Street, and of what is now called St. Alban's Place; but which was then a continuation of Market Street, which ran, and still runs, southward out of Jermyn Street, St. James's. It seems to have been early in the year 1754, that the heir to the throne first accidentally encountered, and became enamoured of Hannah Lightfoot. His confidante and agent on the occasion is said to have been his mother's maid of honour, Miss Chudleigh, afterwards the too celebrated Duchess of Kingston, a lady whose intimate experience in the intrigues and gallantries of a court enabled her to obtain the ear, and dazzle the imagination, of her intended victim. Unhappily, the fair girl listened to her, and was persuaded to forsake the home of her youth. Her parents advertised for her in the newspapers, but to no purpose. According to the account of one of her relations, her mother died of grief, the result of her daughter's disappearance. It has been asserted—and in fairness to Hannah Lightfoot the assertion deserves to be repeated—that when she quitted her uncle's roof in Market Street, it was for the purpose of becoming, not the mistress, but the wife of the Prince of Wales. As the Royal Marriage Act was not at this time in existence, the consequences of such a marriage, had it really taken place, might have proved most momentous to the royal family. If, for instance, as has been confidently stated, Hannah Lightfoot became more than once a mother, her children by the Prince of Wales, and not those which Charlotte of Mecklenburgh-Strelitz subsequently bore him, would have been the rightful and legitimate heirs to the Crown. Nay, even had she remained childless, the fact of her having been alive at the time of the marriage of George the Third and Queen Charlotte would have rendered that marriage null and void, and have bastardized its issue. The first occasion, we believe, on which this very improbable marriage was positively asserted to have taken place, was in a scandalous work—afterwards suppressed—entitled, 'Authentic Records of the Court of England.' It is there confidently asserted that the Prince was legally married to Hannah Lightfoot in Curzon Street Chapel, May Fair, in the presence of his brother, the Duke of York; that, after the death of George the Second, the discovery of the young King's secret spread great consternation amongst his ministers; that subsequently they found means of 'disposing' of the fair Quakeress by inducing her to marry a person of the name of Axford; and that from this time her royal lover, notwithstanding his diligent and anxious inquiries, was never able to discover the place of her retreat. Lastly, it is stated that in 1765, at the time when Queen Charlotte was in the family-way with the late King William the Fourth, so alarmed was she, on the secret of her consort's former engagement being revealed to her, that she insisted upon the nuptial ceremony being performed anew between them, which was accordingly done at Kew. Most of these statements, it may be mentioned, are repeated in another scandalous and suppressed work, published in 1832, entitled, 'A Secret History of the Court of England, from the Accession of George the Third to the death of George the Fourth;' this latter work being professedly from the pen of Lady Anne Hamilton, lady of the bedchamber to Caroline, Princess of Wales. These two unworthy literary productions, though evidently composed by persons not ill-informed in the secret history of the Court, are nevertheless so unmistakably distorted, either by invention or exaggeration, that at first our impulse is to dismiss them as utterly worthless. Singularly enough, however, we find more than one of the statements, which are contained in the

'Authentic Records' and in the 'Secret History,' endorsed by the respectable authority of a no less well-informed person than William Beckford, the author of 'Vathek.' His account, it is true, differs in its details from the others; but, on the other hand, the discrepancies are thereby rendered confirmatory rather than otherwise, as apparently showing that the several statements were derived from persons who had no communication with each other. For instance, instead of Curzon Street Chapel being specified as the scene of the marriage between the Prince and Hannah Lightfoot, the ceremony, according to Beckford, was performed at Kew, in the presence of Mr. Pitt and of one Ann Taylor. Here, curiously enough, we have Mr. Pitt brought forward as an actor in the drama, while in the 'Authentic Records' he is introduced as playing an equally prominent part in assisting the young King to discover the retreat of his mistress. Again, according to the 'Secret History,' the clergyman who married Hannah Lightfoot to the Prince of Wales was Dr. Wilmot, while, according to Beckford's version, this was the person who solemnized the second marriage between the King and Queen. Lastly, both by Beckford and in the 'Secret History,' Dr. Wilmot is spoken of as a likely person to have written the letters of Junius. Of the amount of credit which ought to be placed in these different statements the reader must be left to judge for himself. For our own part, we are inclined to attach some slight importance to another irregular version of the story—the version, by-the-bye, which the nearest relatives of Hannah Lightfoot regarded as the truth—namely, that when she quitted her uncle's roof it was for the purpose of being married, not to the heir to the throne, but to one who had been bribed to lend her his name, and to give her his hand at the altar on the condition that he was never to claim her as his wife. Presuming, for the sake of argument, that this unholy marriage really took place, the projectors of it had doubtless in view the double object of preventing the infatuated young Prince from marrying Hannah Lightfoot himself, and also of precluding the possibility of their issue hereafter preferring any inconvenient claims to legitimacy. The name of the individual who is presumed to have led Hannah Lightfoot to the altar is, we believe, correctly stated in the 'Authentic Memoirs.' It was Axford. According to the account of a distant connexion of Hannah Lightfoot who was living in the year 1821,—'The general belief of her friends was, that she was taken into keeping by Prince George directly after her marriage to Axford, but never lived with him.' At Knowle Park in Kent is an interesting portrait of Hannah Lightfoot, painted by Sir Joshua Reynolds. The catalogue describes it as the portrait of *Mrs. Axford*. One other trifling incident may be recorded as tending to corroborate the presumption that Hannah Lightfoot was the wedded wife of Axford. As soon, it is stated, as the ceremony was performed she was conducted to the house of 'one Perryn of Knightsbridge,' where she received the visits of her royal lover; the important feature of the anecdote being that, within the present century, a family of this uncommon name was discovered to be still residing in the district. Its members carried on the business of dressmaking in Exeter Street. Not only has it been asserted that Hannah Lightfoot bore children to her royal lover, but one or two respectable families have been named as having sprung from their intercourse. Instead, however, of these surmises, as far as we are aware, having been satisfactorily substantiated, the real fact would seem to be, that from the time of Hannah Lightfoot quitting her uncle's roof in Market Street to the hour of her death, little or nothing authentic is known concerning her. She lived, it is said, in the most secluded manner in a villa in the neighbourhood of the Hackney Road, then a sequestered suburb of the metropolis. There, too, in all probability, she died."

Of Hannah Lightfoot's successor in George the Third's affections, Lady Sarah Lennox, the story is, of course, told in full; and of Queen Charlotte, about . . . snuffiness and want

of beauty far too much has been written, Mr. Jesse gives us a very pleasant and truthful picture.

On July 27, 1777, the King attended the election speeches at Eton, on which occasion he is said to have been moved to tears by the pathetic force with which Lord Wellesley delivered the speech made by Lord Strafford at his trial. Concerning this occurrence, Mr. Jesse tells the following story from "private information":—

"Lord Wellesley, as has been already related (vol. ii. p. 288), delivered Lord Strafford's speech at his trial, and this with such pathos as to draw tears from the eyes of the King. Lord Wellesley used to mention that after the speeches he was taken by the Archbishop of Canterbury, Dr. Cornwallis, to Lambeth Palace, where he was to pass his holidays. On their way to London they called upon David Garrick, at his villa at Hampton. 'Your Lordship,' said the great actor to Lord Wellesley, 'has done what I could never accomplish—made the King weep.' 'That,' replied Lord Wellesley, with admirable quickness, 'is because you never spoke before him in the character of a fallen favourite.'"

If Mr. Jesse has a stock of private stories as good as this one, we wish he would be kind enough to publish them.

OUR LIBRARY TABLE.

Publications of the Palæontographical Society.
Vol. XVIII. (1864.)

UNDER the able editorial management of the present Secretary of this useful Society, its publications continue to maintain the high scientific character which we have on more than one occasion attributed to them. The present volume is equal in scientific value to any of its predecessors. It consists of portions of four important works: 1st, the continuation of Dr. Wright's elaborate monograph of the Oolitic Echinodermata, containing the "Ophiuridea," being the second part of the second volume of that work; 2nd, the third part of Mr. W. Salter's monographs of the Trilobites; 3rd, the second portion of the British Belemnitidæ of Prof. Phillips; and 4th, the commencement of a work on the British Pleistocene Mammalia, by Mr. W. Boyd Dawkins and Mr. W. Aysford Sanford. The plates in Mr. Salter's work, both in the present and previous portions of it, are greatly deficient in delicacy, appearing as if they had been drawn on a too coarsely grained stone. The surface of the animals themselves is generally so delicate and smooth that this dark roughness is quite unnatural. There is sufficient relief, too, in the subjects not to require the help of a black ground, on which the dark, coarse drawings have a most unpleasant effect. We have also to notice, with regret, a whole closely-printed page of *addenda et corrigenda*, many of which are obviously the result of carelessness. We point out these defects because they sadly mar what is otherwise an important and admirably-composed work, supplying in itself what had been a great desideratum. Prof. Phillips's work on the Belemnitidæ, like everything which emanates from him, will, doubtless, prove of the highest value, and will take rank with the most elaborate and complete works hitherto published by the Society. The introduction, which appeared in the former volume of these publications, exhibits a rare combination of fullness of information and deep research, with lucidity of style and expression. The account of the structure of the animal of which these curious fossils are the remains is highly interesting. The species described in the present portion of the work are from the liassic beds. The figures are drawn with a degree of delicacy which perhaps involves a sacrifice of force and effect, and the details in many of the sections are too obscure to show the structure with sufficient definition. Of the work on the British Pleistocene Mammalia, by Mr. Dawkins and Mr. Sanford, the present portion is devoted to a general introduction and an elaborate description of a single species, *Felis spelæa*. The introduction contains

much interesting matter on the relation between the Pleistocene and the existing Fauna, and that of the intervening, or, as the authors term it, the prehistoric period. The existence of remains of animals of the Pleistocene mixed with those of the later period in caverns will be read with great interest, and any quotations, or extracts, for which we could find space would do injustice to what is, as a whole, an admirable essay. There is issued with this volume "the title-pages, index, &c., to the monograph of the Reptilia of the London Clay and of the Bracklesham and other Tertiary Beds, and of those of the Cretacean and Wealden Formations," with some supplemental additions to the latter two portions.

Doctor Johns: a Narrative of Certain Events in the Life of an Orthodox Minister of Connecticut. By the Author of 'Reveries of a Bachelor.' 2 vols. (Low & Co.)

THE author has clearly been at great pains to produce the story here submitted to courteous readers; but something besides honest endeavour is required for the task which he has undertaken. In 'Doctor Johns,' plot, humour, dialogue, portraiture, incident, are all conspicuous by their absence. What more, then, can we say in behalf of the writer than that he has done his best? What less can we do for the reader than urge him not to waste time and lose temper over a book from which neither amusement nor profit of any kind can be derived?

History of Geography, from the Earliest Times to the Present Day—[Geschichte der Geographie, &c., von J. Löwenberg.] (Berlin, Weidling.)

ALTHOUGH this book met with great favour on its first appearance, and was even translated into French, twenty years have elapsed before the first issue has been followed by this second and revised edition. The publishers attribute this to the frequent change of the component parts of their firm; the author, to the great amount of new research, which has added, during this period, to our geographical knowledge. Whatever be the cause of the delay, Herr Löwenberg has made use of all this fresh matter, and his book will be found readable in the extreme by those who are masters of his language and interested in his subject.

We have to mention the following pamphlets:—*Some Strictures on Dr. Brady's Pamphlet, in which he denies the Descent of the Hierarchy of the Present Church of Ireland from the Ancient Irish Church.* A Letter to His Grace the Archbishop of Dublin, by William Lee, M.D. (Dublin, Hodges & Smith).—*The Mustard Seed and the Leaven.* A Sermon preached on Tuesday, Sept. 18, at St. Paul's Church, Bedford, on behalf of the Society for the Propagation of the Gospel in Foreign Parts, by J. B. Lightfoot, D.D. (Macmillan).—*The Continuity of the Schemes of Nature and of Revelation.* A Sermon preached, by request, on the occasion of the Meeting of the British Association at Nottingham, with Remarks on some Relations of Modern Knowledge to Theology, by the Rev. C. Pritchard, M.A. (Bell & Daldy).—*Congregationalism in relation to the Spirit and Wants of the Age;* being the Chairman's Inaugural Address at the Annual Assembly of the Congregational Union of England and Wales, May 18, 1866 (Snow).—*The Thankfulness of the Just.* A Sermon preached at the Harvest Thanksgiving Service, Clifton, by the Rev. Stephen H. Saxby, M.A. (Saunders & Otley).—*Tricentenary Memorial read at Horningsham, Wilts, on Tuesday, July 31, 1866,* by the Rev. H. Mayo Gunn (Jackson & Walford).—*Suggestions in reference to the Present Cholera Epidemic, for the Purification of Water Supply, and the Reclamation of East London, with Remarks on the Origin of Cholera Poison, &c.,* by William Sanderson, E.C. (Macintosh).—*Thirteenth Annual Report of St. Mark's Hospital* (Cox).—*Universal Penny Postage. One Penny per half-ounce sufficient for Collection, Transport (irrespective of distance), and Distribution,* by William Hastings, (Simpkin).—*The Annual Report of the Manchester School of Art,* (Manchester, Cave & Sever).—*The Political Situation in the United States: a Letter to the Union League Club of New York,* by John Jay (Rivingtons).—*The Currency Question from a Mercantile Point of View,* by a Member of the Edinburgh

Chamber of Commerce.—*The Panic, a Second Sketch from Nature*, by A. Fitzadam, (Ridgway).—*The Cause of Monetary Panics in England, and the Remedy*, by Richard Dover (King).—*Does the Bank Charter Act of 1844 need Modification*, by James Aytoun (Hardwicke).—*Managers and Marionettes*, addressed to Directors, Mis-directors and Dupes, by a Victim (Effingham Wilson).

LIST OF NEW BOOKS.

Adams's Tales for Sunday Reading, 1/ Packet.
Autobiography of a French Protestant, cr. 8vo. 2/6 cl.
Bethell's Helen in Switzerland, sq. 2/6 cl.
Bright Thoughts for the Little Ones, illust. sq. 8vo. 7/6 cl.
Cassell's Christmas Annual, My Pale Companion, 8vo. 1/6 swd.
Cressall's Meditations on Scriptural Subjects, 18mo. 1/6 cl.
Daniel's (Mrs. Mackenzie) Grasping at Shadows, 3 vols. 31/6 cl.
Davenport's The Holiday Abroad, 2c. 8vo. 2/6 cl.
Denbar's Social Life in Former Days, 2nd Series, 8vo. 7/6 cl.
Edwards's Half-a-Million of Money, cr. 8vo. 6/ cl.
Edward's Lessons on the Latin Accidence, 12mo. 1/8 cl.
Ewing's Anny! a Tale of the Unnatural Rebellion, 12mo. 1/6 swd.
Flack's Hunter's Experiences in Southern States of America, 10/6
Garbet's God's Word Written, cr. 8vo. 4/6 cl.
Gausson's Jonah the Prophet, 12mo. 1/6 cl.
Gladstone's Speeches in Parliament, 1866, 5/ cl.
Goethe's Letters to Leipzig Friends, trans. by Slater, post 8vo. 7/6 cl.
Griest's Reques: Rhymes by Tom Hood, 4to. 7/6 cl.
Grover's Estimates and Diagrams of Railway Bridges, 34 plates, 31/6
Hanna's The Passion Week, 8vo. 5/ cl.
Hannay's Three Hundred Years of a Norman House, post 8vo. 12/6
Howson's Scenes in the Life of St. Paul, royal 8vo. 6/ cl.
Jesse's Memoirs of Life and Reign of George the Third, 3 vols. 42/6
Kennaway's On Sherman's Track, cr. 8vo. 6/ cl.
Lee's Animal Magnetism, post 8vo. 7/6 cl.
Lights and Shadows of London Life, 2 vols. post 8vo. 21/ cl.
Louisa Featherington, 12mo. 1/8 cl.
Minnie's Ernest the Pilgrim Post, 12mo. 5/ cl.
Minnie's Lappet, 12mo. 1/ cl.
New's Israel's Hymn Book, 1/ cl. swd.
Old Memories of the Stickleys, post 8vo. 7/6 cl.
Old Merry's Annual, 1866, sq. 5/ cl. gilt.
Oliphant's Madonnas Mary, 3 vols. post 8vo. 31/6 cl.
Only George, a Story, 3 vols. post 8vo. 21/ cl.
Parker's Casimir the Great, 8vo. 12mo. 4/6 cl.
Peter Parley's Annual, 1867, 8/ cl.
Philip the Dreamer, 3 vols. post 8vo. 31/6 cl.
Plate's German Studies, 12mo. 3/6 cl.
Toddridge's Christmas Annual, 1867, illust. 8vo. 1/ swd.
argent's These Forty Years, 12mo. 8/6 cl.
Sketches of the Poor, by a Retired Guardian, post 8vo. 2/6 cl.
Smith's Outlines of Political Economy, 8vo. 1/6 cl. swd.
Smith's The British Association in Jeopardy, 8vo. 4/ cl. swd.
Sweet Seventeen, by Arthur Locker, 3 vols. post 8vo. 31/6 cl.
Two Centuries of Song, ed. by Walter Thornbury, illust. 21/ cl.
Universal Church (The), its Faith, Doctrine, and Constitution, 6/6
Wat's Divine and Moral Songs, illust. by Holman Hunt, 4to. 7/6
Wilson's Photos. of Eng. and Scotch Scenery (Edinb. 12 Views), 10/6
Wilson's The Thames from Richmond to Cliffe, Photos., 10/6 cl.
Forbise's Violet Vaughan, sm. cr. 8vo. 5/ cl.

CAMBRIDGE UNION SOCIETY.

A fortnight ago we announced that Lord Houghton would deliver the inaugural address to the opening of the new rooms of the Cambridge Union Society. This was done—and brilliantly done—on Tuesday last, Earl Powis, Lord High Steward, presiding. The speeches of both Lords were full of graceful memories and admirable counsel. Lord Powis went through the roll-call of the eloquent debaters of his day, men who in a few winged words could speed a world's meaning.—Christie and George Smyth (Lord Langford), Hope, William Stirling, Maxwell, Milcott, Vaughan, and others,—voices happily not silenced yet by the inevitable angel. Lord Powis illustrated the uses of saying much in little, referring to Mr. Disraeli's "brilliant sarcasm" uttered at Sir Robert Peel to the effect that "he loved the order of the day to take in a nation"; and Lord Powis showed his own felicity of expression by saying of Lord Lyndhurst that "his statement was worth another man's argument; from his speeches they could no more eliminate a sentence than they could condense Tacitus."—Lord Houghton's memory called up places as well as men, and he cleverly contrasted the noble hall in which he was addressing some of the most intellectual men in England with the low, ill-ventilated, lighted, tavernous apartment at the back of the old Lion, which was the Cambridge Union of his days. But even there tongues that moved readily under the impulse of well-stored minds stirred the arts (and perhaps the tempers) of many of the members. Lord Houghton's roll-call of his contemporaries in the debating society was even fuller than that of Lord Powis. It included Macaulay, Addis, Charles Buller, John Stirling, Tennyson, younger Hallam, Alfred, Spedding, Merivale, Langlake, Venables, Blakesley, Frederick Maule, and Trench, now Archbishop of Dublin. It would be difficult to name any similar number of more highly or more diversely gifted than these,—poets, statesmen, philosophers, historians, and divines; Lord Houghton counselled the young members of to-day not to be absorbed by exclusive

discussion of political questions, but to address their intellect to the consideration of other subjects in turn. We think he erred in saying that in French debates a Frenchman seemed always able to say exactly what he pleased, for French legislators, with rare exceptions, always read their speeches. But the most interesting part of Lord Houghton's address referred to a personal matter, which we give in his own words.—

"There was one, the greatest speaker he thought he had ever heard, a man of the most brilliant oratorical genius—his name was Sunderland; but he only lived in the memory of his own generation; indeed, he was only known to the Union at Cambridge. Perhaps the sole record of him was the prize declamation which he delivered in Trinity Chapel. He well remembered this, having had the honour to perform a similar duty on that occasion, and he could recollect the kind of hope he felt that the first prize, which was undoubtedly due to such rare oratorical powers, might have been lost on account of the extreme violence of the politics and curious heretical nature of the essay. But, somehow or other, the College forgot all the moral demerits in the intellectual excellence of the production, and he (Lord Houghton) came off only second-best. It was in company with that Mr. Sunderland and Mr. Arthur Hallam that he formed part of a deputation sent by the Union of Cambridge to the Union of Oxford; and what, did they think, had they gone about? Why, to assert the right and character of Mr. Shelley to be a greater poet than Lord Byron. At that time they were all very full of Mr. Shelley. They had printed his 'Athanas' for the first time in England, and a friend of theirs had suggested, as Mr. Shelley had been expelled from Oxford, it would be a grand thing that a deputation should go to Oxford on the subject. Accordingly, with full permission of the authorities, away they went to Oxford,—a long dreary post-chaise journey at that time of ten hours. They were hospitably entertained by a young student of the name of Gladstone, who, by-the-by, had himself since been expelled. They had a very interesting debate, one of the principal speakers in which, he was reminded the other day, now enjoyed a very different position; namely, that of Archbishop of the Roman Catholic Church. Well, they were much shocked to find that nobody knew anything about Mr. Shelley at Oxford. In fact, a considerable portion of his ideas they believed were Shakespeare's. However, they hoped their expostulation did some good."

With this addition to personal and literary history, we may fittingly close this reference to the "Houghton Meeting" which came off so satisfactorily on Tuesday.

THE NEW ROYAL ACADEMY.

THE plans for the new Royal Academy building will, it is understood, soon be laid before the members; so that the entire future of the institution itself will be, in effect, determined by what is done in the course of a few weeks. Few who know anything about the Academy will hesitate to receive as of the highest importance the arrangements of the edifice in which the artists are to be housed. It is not too much to say that at least half the policy of the Academy was apologized for, if not dictated, by lack of proper accommodation for branches of Art which have grown to importance since the fanatically-classical architect designed the structure in Trafalgar Square, with more regard for Vitruvius than for the wants of his employers. Mr. Wilkins, in designing the Royal Academy, neglected ventilation to an extent almost as great as that which appears in his other public work, the London University building in Gower Street. The lighting of the interior of the former is most unfortunate; while the planning of the rooms was singularly infelicitous. These defects led to endless trouble and the exaggeration of much bitter feeling; they put power in the hands of obstructive members to keep from the Exhibition those newer branches of Art to the relationship of which with the Academy we have on particular occasions referred, to wit, that of the water-colour painters, who are now so nume-

rous that, besides two close societies, they supply another large and free exhibition, to say nothing of what appears at the British Artists' Gallery, and is often the most valuable part of its contents. What has befallen Sculpture from the hands of the Royal Academy is known to every one. Even worse is the lot of Architecture, the practitioners of which, although eagerly seeking academical honours, generally decline to have their works hidden in corners of Trafalgar Square. Engraving—an art which not long since flourished in this country, where some of its developments, as in mezzotint and line, were unrivalled in Europe—is now quite in the dark. To the treatment of etchers by the hangers, we have more than once called attention as being preposterously unjust. These defects are serious enough to provoke the gravest consideration for the new plans; they must be remedied, so far as forethought can be effectual. Finally, with regard to the Exhibition, provision should be made for the display of pictures by foreign artists, so that utter ignorance shall be in future the sole apology for such monstrous follies as occurred at the last Exhibition, where the noble 'Moonrise' of M. Daubigny, and M. Legros's grave and dignified scripture-piece, found a shameful level near the ceiling, and a light that was equally bad for both. It is said that the perpetrators of these cruel follies had never heard of M. Daubigny, and did not understand the art of M. Legros any more than they appreciated the ability of Mr. Whistler and Dr. Haden as etchers! These assertions may be correct; but we believe that an explanation of such acts of injustice is to be found only in the carelessness of the Academical officials. At any rate it is of the greatest importance to the Academy that scandals of this sort should never be placed in the hands of its enemies. The best security will be a well-lighted and extensive suite of exhibition-rooms, so adapted that nothing less than deliberate malice shall be able to hang good pictures over doors, as was the case this year with regard to Mr. Robinson's 'Quirang, Isle of Skye,' Mr. A. Moore's 'The Shulamite,' Mr. H. More's 'Pilot Cutter.' The schools must be accommodated simultaneously with the Exhibition. We do not consider the Lectures which are delivered at the Royal Academy are of sufficient importance to compel the erection of special apartments where space is so valuable. The Library should be heedfully cared for, and cannot be allowed to remain at its present small value; it should be made accessible to all artists. Practically, it is now generally available, but this is due to the courtesy of the present Librarian, not to the arrangements of the Council.

MR. PAYNE COLLIER'S REPRINTS.

Maidenhead, Oct. 29, 1866.

I have just sent round to my pre-paying subscribers No. 24 of my green series of Reprints. It consists of some highly-curious papers, formerly the property of Lord Chancellor Hatton, relating to the condition and management of the City of London in the middle of the reign of Elizabeth, and of title-pages and "Contents" to the three volumes into which I have, for convenience, divided my green series. The first 23 numbers exhausted the money with which I had been entrusted, and 1s. 6d. to boot—of which trifle I make no account, only requesting (as noted in the usual place in each copy) that those who receive No. 24 will transmit to me thirty pence in postage-stamps in return for it. I shall thus only be about 30s. loser by the whole undertaking,—a loss to which I shall willingly submit, compensated, as it is, by a few copies of irregular numbers more than the fifty for which I have been duly paid. These few extra copies I have always had struck off by the printer, that I might make good accidental miscarriages by post or railway. These extra copies are only fifteen in the whole, all of different and irregular numbers, excepting in two instances; but as each tract is complete in itself, I have no doubt that I shall be able to dispose of them so as, in the end, to bring myself home. This, in fact, is all I care about, for I do not wish to be either a loser or a gainer.

Whether I shall, or shall not, commence a new series, I have not yet determined; and it must depend much upon the support I am likely to receive; but if only five-and-twenty gentlemen are willing to aid me, I will persevere in the reproduction of the most interesting, rare, and valuable scattered pieces in our language, dividing the cost of print and paper into twenty-five portions, instead of fifty, as hitherto. It will, of course, give me less trouble to circulate twenty-five copies than fifty; but the expense will necessarily be the same. From such as may be willing to continue their support, I shall, no doubt, hear; but they must, as heretofore, put me in funds to commence a new undertaking, and to secure me against loss. I shall most readily bear my proportion of the burden, and value my own services at nothing. My reward is the agreeable employment of my leisure, and the consciousness that I am preserving from the possibility of destruction, works, either unique in our language, or of the utmost rarity. There surely must be five-and-twenty gentlemen among the Queen's thirty millions of subjects in the three kingdoms (to say nothing of her colonies, and of America), who will not think a few pounds mis-spent on such an enterprise, when they will also thereby obtain *unpurchasable* books which shall be luxuries as well as acquisitions.

I may be allowed here to mention another but a kindred proposal. Besides my *red* and *green* series, now both complete, my friends and correspondents are aware that, within a comparatively few months, I have issued, in blue covers, a succession of our early poetical miscellanies. They have come out in the following order: 1, 'Tottell's Miscellany,' 4to. 1557; 2, 'The Paradise of Dainty Devices,' 4to. 1578; 3, 'The Gorgeous Gallery of Gallant Inventions,' 4to. 1578; 4, 'The Phoenix Nest,' 4to. 1593; 5, 'England's Helicon,' 4to. 1600.

'Davison's Poetical Rhapsody,' 1602, is also so far advanced in the press that I hope in about a week to send round the first of the *three parts* of which it will consist. Now, the series will be manifestly incomplete without the addition of 'England's Parnassus'; it came out in 1600 and consists, as I need hardly say, of not less than 2,000 extracts, longer or shorter, from the productions of the most celebrated poets of the reign of Queen Elizabeth—Shakespeare, Jonson, Sydney, Spenser, Daniel, Drayton, Gascoigne, Greene, Marlowe, Nash, Lodge, &c. The great and acknowledged fault of the book is, that the editor has in no instance named the performance from which he was quoting; and another great mistake was that he never collated his extracts, so that the most glaring blunders are committed upon every page, even as to pieces then in circulation and every day accessible. During, I may say, the last fifty years, as any of the works cited in 'England's Helicon' went through my hands, I have not only noted the names of the authors in 'England's Parnassus,' but I have carefully compared the extracts with the originals. Some of the works quoted seem to have perished entirely, and others are of the utmost rarity; but my verifications have extended over many hundreds of extracts, and I have duly registered the name and date of the book and its author in all places that have come under my observation. In some cases, as to popular authors, the task was comparatively easy, and these, I may add, I have more frequently neglected than poets of less celebrity; most readers would know from what particular work by Shakespeare or Spenser a passage was derived; but as to others, I have sometimes been unavoidably at fault; several works, I am certain, have never been examined by any eyes excepting my own, because they are not only unique, but have only been accidentally discovered by myself.

It is this work, so corrected, and with the names of authors and books in at least a thousand instances supplied, that I am anxious to reprint; it could be completed in about four parts of perhaps 120 pages each, and the expense of print and paper I would take care should not much exceed twice the cost of 'England's Helicon,' recently issued. What I want is merely this—that fifty gentlemen should come forward and, in the first instance, put £1. each into my hands to be devoted to the

reproduction of 'England's Parnassus,' with the improvements I have noted; they may depend, as hitherto, upon my industry, punctuality, and, I hope, accuracy. In 1815, Park abundantly multiplied the original blunders of the work, and in no single instance appended the name of the poet, or the title of his production. J. PAYNE COLLIER.

NEW LITERARY INSTITUTION IN PARIS.

OUR friends across the water exhibit in some matters an amount of perseverance which is admirable. Three or more years since, there was a determined attempt, by well-known men, to give the public some occupation and entertainment, that should hold a place somewhere between the Collège de France and the theatre or the *petite presse*, which cannot be said to be very creditable at the present moment, regard it from whatever point of view you will. *Conférences* were opened in the Rue de la Paix, but the difficulties raised by the authorities were so great, that the new institution was shut up in a few months. It was opened again, but with small success, and other *conférences* were held in places not generally honoured by the presence of any one who cares for the arts and sciences, except those which Euterpe and Terpsichore are said to have invented. The Salle Valentino, and Wauxhall, which our good friends the Parisians persist in spelling with a W, in order, perhaps, to atone for writing Westminster with a V, each opened their doors with a good deal of *éclat* to the literary world, and well-known names appeared in the lists of lecturers; but we believe the same doors were shut again, not exactly with *éclat*, but with some force and hubbub.

The coming month is, however, to see the inauguration of a new attempt, nay, of a magnificent institution, a new *Athénée*, in the Rue Scribe, behind the new Opera-house, the total cost of which is reported to be one million of francs. The establishment is to be devoted to literary and scientific conferences, like its predecessors, but with the addition of *auditions de musique savante*, and is to open its doors regularly three times a week. Two lists of scientific and literary men who are to take part in the conferences of the new Athenæum are published, and it is said that the longer one has been authorized without a single erasure by the Minister of Public Instruction. The lists contain many good names, and a large proportion of safe ones, Émile Augier, Babinet, Théophile Gautier, Jules Janin, Janet, Legouvé, Taine, Wurtz, Maury, and many more. There can be no objection on the part of the powers that be to allow M. Babinet to give, as he proposes, Oral Reviews of the Sciences, in the course of which we hope he will make a public recantation of his sins against Transatlantic telegraphy, in the apologetic white sheet, with pieces of the old and new cables in his hands in place of candles. Nor can there be much to apprehend from the promised conferences on Archaeology, the Moon, the Fossil Man, Agricultural and other Chemistry, and the Diamond. In the archipelago through which the new Athenæum will have to steer its course, these matters will not form the rocks and quicksands that may render navigation difficult; the dangers to be feared are from the eddies formed around the various Scyllas, called *sujets littéraires*, *sujets philosophiques*, and *histoire et littérature*, and it is to be hoped that the pilots of the new bark will not come to grief amongst them. It is a sad fact that no venture of the kind has during the last few years been successfully managed, and it is not for us to say where the blame attaches; but until an educated and clever people like the French can maintain public institutions for the discussion of those questions which form the very body and soul of civilization, there is surely something wrong somewhere, and all the world is eager to know where the difficulty lies, and what is the remedy.

The popular journals of Paris are not up to the mark. They are, unfortunately, more remarkable for flippancy than for talent, and for disregard of morality and decency rather than the contrary; and while their conductors have shown great ability in the business portion of their undertaking, they have not exhibited that careful regard for accuracy

and that deference to the growing spirit of the age which are amongst the first duties of caterers for the popular taste. "Let who will make the laws so that I may make the ballads of a people," is an old saying; and if the conductors of literary journals and of the *petite presse* are not aware of their power for good as well as for evil, especially when commanding a circulation of many thousands of copies a day, there is something which is wanting in their philosophy. And if, on the one hand, they commit sins of omission, they do not escape sins of commission on the other. Non-political journals are nominally untrammelled, and so long as they keep within their programme, as understood by the Government, they enjoy full, and, as regards individuals, somewhat dangerous immunity, concerning what they publish in their columns; yet they do not manage the helm so well as to escape shocks, and even shipwrecks. It is only the other day that a facetious illustrated work of the new school was near coming to grief for caricaturing a public institution which enjoys the favour of the Court; and still more recently, a day or two since only, the *Événement*, conducted by M. Villermont, of *Figaro* renown, was suppressed by a Paris tribunal, and its editor and printer condemned to a month's imprisonment and a fine of a hundred francs each, with the costs of the prosecution, because an article which had appeared in that journal was construed by officials as having a political signification. The *Événement* will, doubtless, rise again from its ashes—only the Phoenix will be called by another name. But these executions and resuscitations are inconvenient, and very costly; and if it be not meet to give freedom in political matters, it is a pity that wit, fancy and fun should place themselves under ban.

Perhaps the Paris Athenæum may be the harbinger of a brighter day, and in this hope we welcome it, and wish it long life and prosperity.

G. W. Y.

OUR WEEKLY GOSSIP.

AN entirely new work by Mr. Swinburne, 'Essays upon the Life and Character of William Blake,' the artist and poet, will shortly be published by Mr. Hotten.—From the same publisher we are to have a volume of criticism on Mr. Swinburne's 'Poems and Ballads,' by Mr. W. M. Rossetti.

The Rev. A. R. Bonar, of Canongate Church, Edinburgh, is about to publish an enlarged edition of the 'Poets and Poetry of Scotland, from James the First to the Present Time, with Biographical Sketches of the Authors.' A selection of some of the best Scottish songs will be added to this edition.

We find in the new edition of 'The World before the Deluge,' published by Messrs. Chapman & Hall, a book worth a thousand gilt Christmas volumes, and one most suitable as a gift to intellectual and earnestly-inquiring students. Some inaccuracies in the first edition have been corrected, and much new matter added, under the able editing of Mr. Bristow.

A translation of Auerbach's last novel, 'Auf der Höhe,' by Miss Bunnett, the translator of Gervinus's 'Commentaries on Shakespeare,' with the author's sanction, is in the press, and will appear in the course of November.

Messrs. Routledge are about to issue a Shilling Christmas Annual, which will contain original Christmas stories by Mrs. H. Wood, Miss A. B. Edwards, A. Halliday, T. Miller, G. M. Fenn, Arthur Sketchley, C. H. Ross, an original Christmas play by Stirling Coyne, and a new burlesque by F. C. Burnand. But the most important book in the last issue by Messrs. Routledge is the Memoir of Musgrave L. Watson, the sculptor, by Dr. Lonsdale. This is an 'édition de luxe,' and illustrated with photographs of the sculptor's chief works.

Mrs. H. Wood is writing a story of school-life, entitled 'The Orville College Boys.'

A new volume by Gustav Freytag may be expected before Christmas; it is entitled 'Aus dem Mittelalter' ('In the Middle Ages'). It will form a companion volume to the author's 'Pictures of German Life in the Past.'

Dr. Davidson's translation of Fuerst's Hebrew Lexicon to the Old Testament is completed, and the whole work is now published in a handsome octavo volume of about 1600 pages for 21s.

Tennyson's 'Elaine,' with Doré's full-page drawings, will be published in New York early in December, by Messrs. Cassell, Petter & Galpin.

"Capt. Crawley," the author of 'The Billiard Book,' is preparing a Monogram of Cricket, to be published early in the next spring, and will be thankful to receive memoranda of games, &c. from gentlemen, players and others, which may be addressed to him at his publishers, Messrs. Longman & Co., Paternoster Row.

We have much pleasure in stating, on the very best authority, that the Rev. Morley Punshon, by resting from his labours, is in good hope of recovering health and strength.

It is said that Mr. Sothorn will re-appear at the Haymarket in another illustration of the Dundreary character, in which his Lordship will exhibit himself as an amateur tragedian. "Something too much of this."

Mr. Falconer has undertaken the management of Her Majesty's Theatre, and announces a new play of his own, to be produced on Monday, the 19th of November. We likewise notice an advertisement from the assignee of his bankruptcy, requesting all the creditors of the late partnership between him and Mr. Chatterton to send in their accounts for immediate payment.—"Mr. F. B. Chatterton having placed funds at his disposal for the said purpose."

The cost of rebuilding the Standard Theatre is estimated at not less than 25,000l.; Mr. Douglass's insurances amount only to 9,500l. The enterprising manager is already busy with preparations for rebuilding, and intends making his new theatre larger, handsomer and more convenient than the old. A subscription has been opened for the company and others thrown out of employment, amounting to upwards of 200 persons, and already a considerable sum has been raised. The trustees of the Surrey Fund have consented to give 50l. from their surplus.

Such of the old monks of Abingdon whose spirits have been uneasy since the ugliest church in England, that of Kensington, was erected in place of the older edifice in connexion with their monastery, may now be appeased. The hideous construction of William the Third's reign, having been ailing for years, has been proclaimed incurable, and a new parish church is to rise near the site on which the old one still totters. The court suburb of Kensington has had many royal, noble, gentle, common and worthless personages residing in it. There is no royal dust indeed in the churchyard, but there is some of note. Elphinstone lies there, the translator of *Martial*. If the latter catch the old Kensington schoolmaster in the Shades he will mar the Elysium of his traducer. Elphinstone was the projector of a phonetic system of spelling, and later projectors only follow his plan. Bianchi, the skilled Italian composer, also lies here; his disease was a broken heart at the death of a little daughter. An artist of another sort is preserved in the grave of the rich confectioner, Mr. Gunter. Some of the epitaphs have a touch of quaintness in them. A Mr. John Bellamy is spoken of as "a patriotic citizen whose virtues are recommended by the Society of Whigs in England of whom he was the founder." Of a Mr. Lionel Duckett it is gravely recorded that he was "born in this parish," in 1651, and that "he happened to depart this life in this parish," in 1693; but how he came to do such a strange thing is not explained. We must not omit the royal physician, Dr. Warren, courtly, skilful and witty, whose body is also within the shadow of the old church. It was to him that Lady Spencer remarked how bitter must be the reflection of medical men when they thought of a patient who would not have died but for the medical treatment. "Nay, my lady," said Warren gaily, "there is a great balance of satisfaction. I hope to save you forty times before I kill you once!" Among the famous rectors may be mentioned the ecclesiastical writer, Jortin, son of the Breton Protestant

refugee who went down in the ship with Sir Cloudeley Shovel. It was one of Jortin's successors who, having one Midsummer Sunday to preach a sermon in behalf of the poor, took into the pulpit, by mistake, a discourse adapted to the time of the Great Frost in 1814. With the thermometer at 84° in the shade, the preacher expatiated on the miseries of the lack of fire, clothing and warm nourishment among the poor; and prosing on unconsciously to the end, he besought the charity of his hearers for the frozen-out wretches in whose behalf he pleaded!

At a cost of 100,000l. a new Infirmary of great beauty and extent has been built in Leeds. Before, however, it is devoted to the charitable purpose for which it was designed, a resolution has been agreed upon by influential and wealthy men in Leeds to hold in this building an exhibition of treasures of art, products of industry, and processes of manufacture, on a scale not hitherto attempted in this country. To accomplish this end, a guarantee fund of 50,000l. was asked for, and Leeds answered by raising 85,000l. in a fortnight (more than Manchester raised in a month). It is expected that the fund will reach 100,000l.

A Correspondent (M.) quoting Dante—

Del bel paese là dove li si suona.

Inf. xxxiii. 80— asks, "Have any Dantophilists remarked that the population of Venice were the other day shouting 'Si!'"

The obituary this week states the death, at Leghorn, on the 28th ult., of Mr. B. E. Spence, of Rome, sculptor of 'The Finding of Moses,' 'Jeannie Deans,' 'The Shepherd Boy,' statues which will be remembered at the International Exhibition, and many other popular works.

Some observation has been excited by Archdeacon Denison's approval of cricket as a game to be played on Sundays. This, however, is no modern liberality of spirit. It has been, for more years than any of us can probably call to mind, the law of the land that cricket may be played on Sundays, provided only that the players be all of the parish in which the game is played. This allowed recreation, but prohibited the excitement of matches.

Mr. Payne Collier has added two more volumes to his collection of Old English Literature. 'The Royal Arbor of Loyal Poesie' is a collection of poems composed by Jordan, an actor, chiefly during the time the theatres were closed, and collected and printed after the Restoration. They are of various degrees of quality, grave and gay, with metrical renderings of the story of some of Shakespeare's plays sung in the streets. 'The Instructions to the Lord Mayor of London, 1574-5,' were drawn up by Norton, the Remembrancer, for the governance of the City and the Mayor himself. Norton was part author of our first tragedy in blank verse, 'Ferrex and Porrex.' Among the instructions are such as are still given for keeping the city clean, and which are about as much observed now as they were then. A word is given against allowing the crowding to plays; we find that even aldermen's children were then stolen, for the sake of the reward offered, and that the modesty of London was troubled by the tumbling of Italian women, an exhibition which is still to be seen abroad, without any one being horrified.

The British Archaeological Association will meet at Ludlow next year.

Her Majesty has conferred a pension of 75l. a year on the widow of the late Mr. Godfrey Sykes, formerly a pupil and teacher of the Sheffield School of Art, and the architectural decorator of the South Kensington Museum.

'A Prodigy' was stated to be by the author of 'History of German Music,' it should have been, of 'Modern German Music.'

By means of a letter to a daily contemporary we were glad to learn that those who have generously taken upon themselves to protect Bunhill Fields Cemetery from desecration are not sleeping, so that the graves of Defoe, Watts, Blake, Bunyan, George Owen, Ritson, and Stothard, will not be "let on building leases," however "eligible" they

may be for the purpose. With regard to the grave of Stothard, a Correspondent inquires if it is really ascertainable; he believes that no mark exists on the spot, and is certain that the number is diminishing of those who can identify its precise situation. Following this hint, we shall be glad to learn that this grave can be ascertained with certainty, and, if they are sent to us, shall be equally glad to publish its landmarks.

Mr. W. Cave Thomas (the artist) appears to have been the first person who proposed the institution of a "National Society for the Encouragement of Rifle Practice." Mr. Thomas likewise suggested the formation of cadet companies of volunteers.

We trust some of our friends in Norwich will endeavour to save from that destruction which threatens them, the old city wall on Chapelfield, and one of its towers. These remnants of the fortifications of the city ought not lightly to be destroyed; their service was good so long as they were needed: Norwich ought not to be ungrateful. A recent meeting of civic authorities decided—but, as it seems, by a very small majority—to proceed with the removal of these antiquities. It is very improbable that they could not be made secure.

Dramatists, dramatic critics and journalists are looking forward in Paris with some impatience to the decision of a jury who have been appointed to try whether M. Victorien Sardou's new piece, 'La Maison Neuve,' written for the Vaudeville, is or is not to be brought out this winter. The piece had nearly reached its final rehearsals when M. Sardou declared he would not allow it to be played, alleging, as a reason, the unfair revelations which had been made of its plot and incidents in the *Gazette des Etrangers*, and in the *Liberté*, by writers who had been allowed to see the piece *en déshabille*. The manager, however, of the Vaudeville insists on its being brought out, according to contract; and we imagine M. Sardou will have to give way.

The seconds, and M. Clément Duvernois, of the *Liberté*, the principal, in the duel between the latter and M. de Sarcay, of the *Opinion Nationale*, have been brought up before the *Police Correctionnelle*, and sentenced to periods of imprisonment varying from one to two months, according to the degree of implacability displayed by each in getting up the duel.—It is proposed, since men of the pen are so ready to settle their quarrels with the sword in Paris, that the men of the sword shall, by way of variety, settle theirs with the pen.

Mr. Kopp has communicated to the Academy of Sciences the result of some practical experiments on the nitro-glycerine used in quarries in France for blasting purposes. 1,500 grammes will detach about seventy cubic metres of hard rock. The nitro-glycerine employed is heavier than water; it may be handled with comparative safety, but a violent shock will cause it to explode.

The new chemical laboratories for the Prussian Universities of Bonn and Berlin, now in process of organization, are in a far more advanced state than the Report recently issued would lead one to suppose. The foundation-stone of the Bonn Laboratory was laid in the spring of last year, and the building is now being roofed in, so that in the summer of 1867 it will be given over to the University. It is situated in the village of Poppelsdorf, near Bonn, where, in fact, most of the University buildings devoted to scientific purposes lie. Ground being plentiful, the structure is, for the most part, but one story in height, and encloses four large courts, which, together with the site of the building itself, cover 45,000 square feet, Rhenish. The detailed contract of the architect amounted to 18,450l. The ground-floor contains forty-four rooms, exclusive of vestibules, &c.; they are lighted from both sides. The building includes three large laboratories, each accommodating about twenty students, and suites of rooms for special forms of work, "operation rooms," furnace rooms, rooms for fusions and ignitions, balance room, and laboratories for gas and volumetric analysis and physiological chemistry. There are likewise a large lecture-theatre, a smaller hall for special courses, a library and museums for mineralogical and chemical collections.

Lastly, this noble building contains suites of apartments for the professor and three assistants, as well as rooms for porter and castellan. The Berlin Laboratory is not so far advanced as the Bonn Chemical School, it having been commenced in the early summer of last year. In the Prussian capital many difficulties presented themselves as regards choice of site, &c.; but eventually a plot of ground was chosen in close proximity to the University. To purchase the site, lying as it does in one of the busiest quarters of the city, it was requisite to make a great outlay, and the entire cost of the institution amounted to 47,715*l*. In general arrangement it accords with the Bonn Laboratory, differing therefrom, however, by reason of the smaller area of its site, in having two stories throughout, instead of one. An exhaustive Report on these splendid institutions, illustrated by plans, has been supplied by Prof. Hofmann to the Department of Science and Art, and will be found in their Thirteenth Report, recently issued.

INSTITUTE OF PAINTERS IN WATER COLOURS.—The WINTER EXHIBITION OF SKETCHES AND STUDIES WILL BE OPENED, at their Gallery, 53, Pall Mall (opposite Marlborough House), on MONDAY, November 5.—Admission, 1*s*.; Catalogue, 6*d*. JAMES FAHEY, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS. WILL BE OPENED to the Public, on MONDAY NEXT, November 5, at T. McLean's New Gallery, No. 7, Haymarket, next the Theatre. R. CLOTHIER, Hon. Sec.

WINTER EXHIBITION.—The FOURTEENTH ANNUAL WINTER EXHIBITION OF PICTURES, the Contributions of British Artists, WILL OPEN on MONDAY, November 5, at the French Gallery, 130, Pall Mall.—Admission, 1*s*.; Catalogue, 6*d*.

MR. MORRIS'S COLLECTION OF MODERN HIGH-CLASS PICTURES IS ON VIEW at the Royal Exchange Fine Arts Gallery, 24, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Frith, R.A.—Rosa Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Parker, R.A.—Calderson, A.R.A.—Sant A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Innells, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Ford—Frère—Ruizpérez—Lidderdale—George Smith—Duvergier—Peter Graham, &c.—Admission on presentation of address card.

ARTEMUS WARD.—EGYPTIAN HALL.—MONDAY, November 12.—Mr. Artemus Ward will make his first public appearance in England, at the Egyptian Hall, on the above date. His illustrated narrative will be entitled ARTEMUS WARD AMONG THE MORMONS, or, a Trip from New York to Salt Lake City. The Pictures by Mormon Artists.—Admission 3*d*, 2*s*, 1*s*. Reserved Stalls at Mitchell's Royal Library, 23, Old Bond Street; Austin's Ticket Office, 24, James's Hall; and at the Egyptian Hall.

ROYAL POLYTECHNIC.—Meat cooked at a distance of 100 feet from the fire by visible rays. A cigar lighted; and other combustibles set on fire in a darkened room by invisible rays. These and other remarkable experiments will be exhibited in Professor Pepper's New Lecture on "Combustion by Invisible Rays," which will be given on Tuesday, November 6, at 8 o'clock; also on Friday and Saturday at 3 and 8.

SCIENCE

Memoirs of the Geological Survey of Great Britain and of the Museum of Practical Geology. Vol. III.—*The Geology of North Wales.* By A. C. Ramsay. With Maps and Sections; and an Appendix on the Fossils, with Plates, by J. W. Salter. (Longmans & Co.)

ANY geological work on North Wales by Prof. Ramsay must at once command the attention of geologists. Few men have examined Wales more carefully, and no man is more competent to describe its physical geology correctly. The present is a practical book, and offers no scope for curious speculative theory; if it did, we should not speak so confidently of Prof. Ramsay, whose theories may be questioned, while his statement of observed and actual conditions may be fully relied upon. For instance, his well-known theory, though not exclusively his own, of the origin of many Swiss and other lakes, viz., that their beds were scooped out by the action of glaciers, was present in our own mind as we recently examined at leisure the three principal lakes of Northern Italy, and the Swiss lakes of Lucerne, Wallenstadt and Geneva; nor could we avoid marvelling how such a man could maintain such a theory. The greatest stretch of geological fancy would fail to account by this theory, as we thought, *in situ*, for the deep, sinuous and rock-walled lakes on whose borders we wandered.

The exposition, however, of such theories,

erroneous as many might regard them, would be far more entertaining to the public than the records and descriptions of the Silurian rocks and fossils of North Wales contained in the present volume. Here we have plain prosaic statements of the observed courses and conditions of various strata which do not admit of a moment's play of imagination, or a moment's retrospection into the restored past, irradiated by the hues of theoretic fancy. The whole is arranged in stern and stately pages, which seem to the unscientific reader as unpromising and uniformly repellent as the vast tracts of unfossiliferous shales, grits and slates spreading over a large part of North Wales itself. Many a long summer's day have we plodded over those unproductive, black and bare rocks, without a single fossil for our reward, or a ray of hope for our hammer. If, however, the reader be interested in pure lithology, and in distinguishing the relative ages and positions of the several rocks of North Wales, no man will guide him more ably than Prof. Ramsay, and no published volume more accurately than the present. Indeed, Sir Roderick himself prefaces the volume with these observations:—"The Memoir upon the Geological Structure of North Wales, which is now published, is, I consider, the most important work which has been issued by the Geological Survey during the ten years that have elapsed since I became Director. I have no doubt that this publication will give satisfaction to foreign as well as native geologists."

Yet to become interested in Cambrian and metamorphic rocks, in synclinal curves and unconformable beds, a man must first be otherwise interested in the country itself. Like Prof. Ramsay, he must have a map in view, or a volume, or a lecture, or the establishment of a reputation; or he must have perambulated the country as a tourist, and scaled its mountains, and scanned its river banks, and threaded its valleys: otherwise he will be insensible to the wayside charms of quartz, felspathic pebbles, porphyry and Lingula flags. Therefore we should never expect an amateur to sit down and peruse this volume throughout, nor should we appeal to any but well-informed geologists on behalf of Prof. Ramsay. Experts in the Lower Palaeozoic rocks will at once discover in the present volume the results of many years of diligent study, and perhaps foreign geologists may think as highly of this publication as we ourselves do. Always, of course, giving due honour and precedence to Sir Roderick Murchison's 'Siluria,' it may be said that nothing on the geology of North Wales so complete and so trustworthy as the volume before us has hitherto been published.

When we come to the fossils, the aspect of the case somewhat changes, as well as the authorship of the text. We have life, or the remnants of it, at once in view, from the little simple Lingula up to the more complex Orthoceras and Trilobite. We have the remarkable range and persistence of that seemingly insignificant little shell, the Lingula, in considerable numbers throughout the Tremadoc country and the vale of Festiniog, and far east through wild moory ground. We have the faint and almost undistinguishable tracks made by worms, and the stronger and rougher Anne-lide-Burrows of the Lingula beds. In the Lingula flags, again, we discover shells and trilobites, and in the Lower Tremadoc rocks we find remarkable crustacean, which Mr. Salter, late Palaeontologist to the Survey, has most carefully described. Finally, we arrive at the rich assemblage of fossils derived from the Caradoc or Bala beds, all well figured and annotated. Silurian palaeontologists will be

interested in Mr. Salter's notes on the Graptolites, those curious little Bryozoa which stud certain shales, line fragments of feathers or pens, as well as in his description of the Brachiopoda and other fossils.

The present volume might, by special care and management, be rendered available and useful even to the Londoner. If he could take it in hand and study it at the Museum of Practical Geology, comparing the whole with the specimens of rocks and fossils there assembled, he would have even a completer comprehension of details than if he wandered with it over some parts of North Wales in a few excursions. The advanced student, moreover, could refresh his memory and recruit his stock of knowledge in like manner. But no mere novice or stranger to the Museum could do this. The visitor must know the arrangement, the plan, the places, the obscure corners, and, in fact, must be familiar with the complex mysteries of this great public collection, to put our suggestion into practice.

Two good indexes are notable advantages in this volume. Would that all scientific books had the like!

MEETINGS FOR THE ENSUING WEEK.

- | | |
|--------|---|
| Mon. | Royal Institution, 8.—General Monthly Meeting.—Entomological, 7. |
| Tues. | Architects, 8.—'Skull of a Patagonian,' Prof. Huxley: 'Cultivated Fruits and Ethnology,' Mr. Crawford. |
| Wed. | Literature, 41.—Meeting of Council. |
| Thurs. | Geological, 8.—'Specific Gravities of Heterogeneous Liquids,' Dr. Sprengel; 'Gradual Variation of Organic Bodies,' Messrs. Chapman and Thorp. |
| Sat. | Mathematical, 8.—Annual General Meeting. Horticultural, 3.—General Meeting, and Lecture. Botanic, 31. |

FINE ARTS

THE NATIONAL GALLERY.

THE National Gallery will re-open to the public on Monday next, and contains five new pictures. Two of them are of the school of Melozzo da Forlì, if not by that master himself. They have peculiar interest on account of their realism and precision in the treatment of subjects which, for lack of a better name, must be called allegorical. They are styled 'Music' and 'Rhetoric' respectively. The former, which was recently the property of Mr. Spence, had once belonged to Signor Conti, and was believed to have been originally placed in the sacristy of the cathedral at Urbino. It represents what may be a Muse, or sixteenth-century notion of one, seated on a grand architectural throne, before the steps of which kneels a student, to whom she presents a book, while pointing to a pair of regals or hand-organs which stand on the ground at her feet. 'Rhetoric' is similar in composition to its companion; the Muse and kneeling Student are different in character and apt to the title. The thrones and accessories do not differ materially. These pictures, notwithstanding a hard manner of execution, show extraordinary firmness of painting and drawing; they are well lighted, their colouring is cold in parts, as in the dress of the kneeler in 'Rhetoric,' and, as might be expected from the school to which they are ascribed, remarkable in foreshortening. The third new acquisition is the bust-portrait of a lady, by Piero della Francesca, one of those finely-drawn profiles, which delight artists. The fourth work of this year is the last purchase by Sir C. Eastlake (the others here mentioned were procured by Mr. Boxall). It is by Lippo Dalmasio, bought from Signor Gualandi, of Bologna, for 400*l*. The subject is a Virgin and Child, who are represented with a gilt circular aureole and attended by six angels. The most important acquisition is a large picture by Rembrandt, alluded to by us at the date of the purchase. 'Christ Blessing Little Children' came from the Schönbein Gallery, at Vienna, and is remarkable not only for the life-size of the figures, but—even with Rembrandt's works in general—for the extraordinary freedom, boldness and solidity of its handling, its nearly perfect chiaroscuro, solidity

and relief. Notwithstanding the "dirtiness" of the colouring, which is noteworthy in itself, this picture must be accepted as singularly vivid and attractive in that quality. Christ stoops before some women, who are accompanied by a little child, and, placing one of his hands on the head of the latter, draws the reluctant infant towards him with the other; the child turns from the caress and blessing with an action that is perfectly true, and with an expression that tells its own tale. The character in the women's heads is worthy of the most careful study; their execution, from an artistic point of view, is not less worthy of note. This picture has been placed in the apartment on the right of the entrance-room, which serves as an ante-chamber to the new Italian Room. It is hung in the centre of the north wall, facing the entrance, and, having all the other Rembrandts of the gallery grouped about it, makes, with them, a splendid show. It cost 7,000*l*.

FINE-ART GOSSIP.

THE private view of the Fourteenth Annual Winter Exhibition of Cabinet Pictures by British Artists will occur to-day (Saturday), at the French Gallery, Pall Mall. Mr. Wallis's Twelfth Exhibition of Pictures in the Gallery of the Society of British Artists will also be on private view to-day; and both Exhibitions will open to the public on Monday next.

An Art event of the season will be the publication, by Messrs. Chapman & Hall, of Mr. Wornum's 'Some Account of the Life of Holbein,' which contains, besides illustrative matter of a different sort, two photographs from drawings by the master, woodcuts, head-lines and initials, all the work of Holbein, and reproduced with unusual felicity. Also, which will have great interest with archaeologists and students in the history of Art and pictures in England, an original reprint of the 'Inventory of Stuff and Implements' (i.e. furniture of the higher class and pictures) that were in the charge of Sir Antony Denny, in 1547. Sir A. Denny was a favourite servant of Henry the Eighth, and had charge of valuables of this order. This 'Inventory' has been often referred to, but never yet printed; it comprises 178 items, with brief descriptions, some of which are very curious, and serve to identify many pictures. Also, 'A Catalogue of Portraits of English Lords and Ladies in Her Majesty's Collection at Windsor,' 89 items.

It is understood that the hangers of the next Exhibition of the Royal Academy will be Messrs. J. F. Lewis, S. Hart, and G. Richmond.

It appears that Mr. J. P. Frith is not the sole English artistic recipient of the Order of Leopold from the hands of the King of the Belgians. For the sake of all concerned, our readers will be glad to learn that the Order was bestowed upon Mr. Stanfield in the first instance. Mr. E. M. Ward, whose 'Ante-chamber of Whitehall at the Death of Charles the Second' attracted very great attention in Brussels, was warmly recommended for the honour in question, in addition to, or instead of the first-named highly popular artist. It was, we understand, urged in reply to these recommendations that, apart from all considerations of the relative merits of the pictures by Messrs. Ward and Frith, the 'Ramsgate Sands' of the latter being in royal ownership gave a primary claim to its producer; also, that, should Mr. Frith be chosen, it would be impossible to extend the number of honours to Englishmen, and include another painter. Mr. Stanfield's acceptance of the distinction has gratified many of his friends, and not been without effect on the character of that distribution of honours to which we refer.

Mr. W. M. Rossetti sends us the following note:—

"106, Albany-street, Oct. 29, 1866.

"A paragraph in your number on Saturday, relative to an article of mine in the *Fine Arts Quarterly Review* upon Mr. Palgrave's 'Essays on Art,' could not fail to gratify me. May I, however, be allowed to call your attention to one passage in your paragraph which must, I conceive, be based upon some misapprehension. You say, 'We . . . are disposed to question their [i.e. my conclusions]

aptitude to Mr. Palgrave's case, especially when recent sculpture is in question.' This you afterwards qualify by agreeing in my opinion as to Mr. Palgrave's views of Greek and modern 'modes of sculptural expression' (though, by the way, I did not intend, in that section of my article, to refer to modern sculpture more than painting, but to modern practice in both forms of art). Now the fact is that, except this quasi-reference, in my article, to Mr. Palgrave's views of modern sculpture, the one solitary other reference to those views is contained in this sentence. 'The instance of one not obscure sculptor against whom he butts with peculiar *acharnement* whenever the chance offers does not appear to us explicable on the assumption that that sculptor and his admirers are invariably wrong and Mr. Palgrave invariably right.' Do you consider 'that that sculptor and his admirers are invariably wrong, and Mr. Palgrave invariably right'? I should infer the contrary from your own pages. Yet, if you do not so consider, I know of no passage in my article to which your first-quoted observation applies—that you question the aptitude of my conclusions to Mr. Palgrave's case, 'especially when recent sculpture is in question.'

"W. M. ROSSETTI."

Mr. J. P. Knight, B.A., for many years Secretary to the Royal Academy, has, owing to ill health, and, it is said, the fatigue attendant on his duties, resigned his office. Probably this resignation will be but temporary in effect, and terminate on the gentleman's hoped-for recovery of health.

The first premium in the competition for designing the proposed Manchester Royal Exchange has been awarded to Messrs. Mills & Murgatroyd, of Manchester; the prize is 500*l*. The second premium of 200*l*. is awarded to the same firm; the third premium of 100*l*. has been given to Mr. J. Lowe, of Manchester. The first of these awards seems to have provoked not less than the common amount of dissatisfaction. The fortunate design is composite of styles, in some respects derived from the school, some say also from the practice, of Wren.

Mr. Macdowell's statue of Lord Eglinton has been placed on the north side of St. Stephen's Green, Dublin; this work is of bronze.

We venture to suggest to the managers of the various Art-exhibitions,—who open their galleries to the private view of those interested in painting on certain chosen Saturdays, and to the general public on the Mondays following,—that it is clearly inconvenient when more than one of these events take effect on a single day. We fear that, like ourselves, most persons find one private view sufficient for a day's pleasure or work; and that the object of a private view, as we understand it, is, to a certain extent, defeated by the opposed attractions of two or more such occurrences; and that the fatigues of a double or larger pleasure are injurious to the observer, who does not like to deny himself a share in either event. To journalists, we may be allowed to hint that this multiplication of tasks is no joke; as journalists, also, we may say that no class of readers can be expected to study more than a moderate amount of criticism, such as one Exhibition may fairly demand. Accordingly, the extent of space appropriated in a single week to Exhibitions is, of necessity, when private views are simultaneous, divided between them; whereas, if these events were consecutive, a greater space would be available for either. Our remarks are prompted by to-day's (Saturday's) simultaneous private views of the Winter Exhibition, at the French Gallery, the Institute of Painters in Water-Colours, and of Mr. Wallis's Exhibition, in Suffolk Street. Surely a little pre-arrangement of matters would obviate this inconvenience; if priority is of consequence, that advantage might be secured for each attraction in alternate years. Such apparently-inconvenient openings generally occur twice or thrice in the course of a year.

By way of commemorating the recent victories of the needle-gun, statues of the princes of the Hohenzollern family of Prussia, from Frederic the First to the present monarch, are to be erected in the Lustgarten, Berlin.

MUSIC AND THE DRAMA

HER MAJESTY'S THEATRE.—The WINTER DRAMATIC SEASON.—MR. EDMUND FALCONER.—(MONDAY, November 19, will be presented, by a numerous and efficient company of Artists, of metropolitan and provincial repute, a NEW DRAMA, constructed from some of the classical and most popular prose Idylls of the Irish, by Edmund Falconer.

THE NORWICH FESTIVAL.—That the Norwich Festival has, since its establishment, been the second leading music-meeting of England (the Birmingham one being the first) is matter of musical history. Its direction has always been liberal and energetic in the production of novelty. Think what we may of Prof. Taylor's empiricism in amateurship, there can be no question that he deserves to be commemorated with thanks as having earnestly brought forward Spohr's composition. Then, of later years, we have seen costly experiments made on behalf of that strange writer, Mr. Pierson,—of the east-country composer, Dr. Beethoven, of our admirable and regretted inmate, Herr Molique,—and (lastly) Mynheer Silas, a man who has had many good chances. If the result of such experiment has not always borne proportion to the good will embarked in it, the blame rests not with those who have presided over the Council.

Thus, notes on any given Norwich Festival can hardly be brief. Those of the present year can, without further preamble, begin with Monday evening's performance—that of 'Israel,' under its new conditions.

As sequel to our remarks lately put forward on the subject of the Norwich performances of this sublime work, it is proper that Mr. Macfarren should be heard on the subject of his additional accompaniments:—"The task of adding parts for modern instruments to the score of 'Israel in Egypt,'" he explains in a published note, "was refused by Mendelssohn, when I, as Secretary of the Handel Society, in 1843, had the duty of proposing it to this great musician. He did so on the ground that, with such an organ part as the composer is well known to have played at all public performances of his works, the effect Handel designed would be complete without the aid of any additional instruments. As, however, the composer never wrote more than vague indications of such a part—leaving it always for his own improvisation—Mendelssohn consented to put on paper what himself might have played had he been engaged to accompany the oratorio upon the organ. It may therefore seem temerity now to have undertaken to supply parts for extra instruments; but there arise occasions for the performance of this masterpiece, when there may be no organ, and it is for these occasions that the present instrumentation has been written, in order to fill up the blank left by the absence of the organ part of Handel. In those pieces where the effect of the printed score seems to me satisfactory (the italics are ours, *Ed.*), nothing has been added. In the recitatives, as an alternative for the modern practice—quite peculiar to this country—of accompanying the voice with chords in *arpeggio* upon the violoncello, the harmony has been assigned to the whole of the string instruments, making thus, I think, a nearer approach to the effect Handel intended than does that which is usually substituted for it. The parts for the string instruments have been altered in no other case save only one, 'The Lord is a man of war.' In a passage of frequent occurrence throughout this duet, the original notation differs from the tradition of the manner of performance; and this is owing to the sign of the dotted rest not having been in use in Handel's time, and it having been therefore understood that in the present passage, and in many that are analogous in the music of the period, the unaccented initial note was to be played short, as if a dotted rest preceded it. The tradition of the original manner of performing Handel's music is dying out, and it must therefore be desirable to take advantage of modern improvements in notation to perpetuate his meaning, which is accordingly done here upon the authority of many of the oldest orchestra players and other experienced musicians, who have received the tradition direct from the time of the author. The parts for the trumpets have been frequently

changed on account of their practical difficulty, where the addition of other instruments would compensate for such alterations. The parts for the oboes have also sometimes been altered, in order the better to balance them against those for the added flutes and clarionets; as too have occasionally been those for the bassoons, where the insertion of a part for a fuller-toned wood wind instrument rendered the bassoons available in their tenor register. The marks of expression—most sparing and often apparently capricious in Handel's MS.—have been somewhat amplified, so as to make them uniform in all the instruments, and to bring out those points of relief which are obvious to a reader of the score, but unapparent in any separate part."

We fail from the above to gather justification of Mr. Macfarren's accompaniments being needed on the recent occasion, seeing that St. Andrew's Hall has its organ. Neither can we recall a single oratorio performance in England, at least since the days when sacred music was travestied on the London stage in Lent, without that instrument. Again, is Mr. Macfarren sure that the accompaniment of recitative which he has undertaken to set to rights, namely, that of chords in *arpeggi* on the violoncello, is "a modern practice"? May it not be one of the traditions "of the original manner of performing Handel's music"? The test of all such changes, however, lies in the effect, since, so long as the original text exists, they can be laid aside without the slightest damage to the work embellished, or the reverse. We have become used to Mozart's additional accompaniments to the 'Messiah.' We do not faint at the interpolated chorus in the masquerade scene of 'Don Giovanni'; but there is no earthly reason why either alteration should be perpetuated for an instant, if it be felt as a nuisance. It is, after its kind, praise that Mr. Macfarren's additions might have hardly drawn any attention save for the explanation of his meanings set forth as above. The performance, as a whole, was good. The Norwich chorus, so far as we can compare its present with its former plight, is at its best. The band is less efficient, perhaps because it is too heterogeneously made up. Mr. Cummings sang for Mr. Sims Reeves; the principal *soprano* parts were divided between Mdlle. Tietjens and Madame Rudersdorff. The *contralto* music was allotted to Mdlle. Drasil, whose fine, genuine voice was generally and justly admired. But she has many of the refinements of her profession to learn; and if she intends to shine in oratorio, she will do well especially to devote herself to the study of English pronunciation.

The programme of the first miscellaneous Concert, given on Tuesday evening, included an important work, which marks another step in a career to which we have already called attention. Frequently, yet not too frequently, since rising musicians, original and versatile in conception and accomplished in working out the same, are, indeed, rare. Thoroughly fulfilling both conditions is Mr. Sullivan's newest (and in some respects greatest) orchestral work—an Overture bearing the title, 'In Memoriam.' We know of many Festival preludes—of scores of Dead, otherwise Funeral Marches,—witness those of Handel, Beethoven, Chopin; but we recollect no commemorative symphonic prelude exclusively devoted to such obsequies as affection, pride, and gratitude adorn the graves of the beloved, the honoured, and the mighty withal. This new overture, in right of its conception, might as justly be performed at a royal funeral as the Coronation Anthem of Handel when a new king comes to reign over Israel. The purpose, the mood of lofty hope tempering resigned grief, are indicated in the very first notes as clearly as music can indicate emotion. The solemnity is enhanced by the work opening in a major key, with a leading phrase of choral melody, which holds the ear fast, and which is reproduced at the peroration, with a force not exceeded in modern orchestral music. The *Allegro* is built on a decided impassioned phrase, in the relative minor. The second subject is at once pathetic and pompous; the whole movement is well knit together, with too great a tendency, however, towards the middle portions to droop and

to expatiate, or rather to reproduce suspenses. We dwell on this peculiarity more emphatically than even on the excellent qualities with which it is surrounded, because we are satisfied that it is the last step to the hill-top which the composer has to make. Short though it be, it will not be one easily made after popularity shall have confirmed certain habits of fancy and modes of procedure. Think how Beethoven went from strength to strength in the last movement of his *c minor* Symphony. The example is well worth Mr. Sullivan's while to ponder, because he shows throughout this overture no common amount of recovering power and resource after the movement may be said in some small degree to have languished, and because its close, at which the organ joins the orchestra at its fullest power, is, without stress of epithet, unmistakably sublime. There could be no doubt of the effect produced on a not very enthusiastic audience. Long as the work is, serious as is its theme, late in the evening as it was produced, the Overture was followed with earnest and discriminating attention, and liberally applauded, and recalled, by an audience wound up to excitement by the close which we have described above.

Of other more unimportant, yet still not uninteresting evening performances at Norwich, we may speak seven days hence, as also of the execution of Mr. Costa's 'Naaman' on Wednesday morning, and on Thursday of the fragments of Handel's "Passions Music," and Mr. Benedict's new Cecilian *Cantata*.

OLYMPIC.—Mr. Wilkie Collins's drama, 'The Frozen Deep,' was produced at this theatre on Saturday. *Clara* was played by Miss Lydia Foote, with grace, intelligence and effect. Little opportunity is given for fine acting until the second act. The story, perhaps, is over-melancholy, and a happy ending might have made it more popular; but the incidents are dramatic, and the language often poetic. The weight of the tragic interest is relieved somewhat by a half-comic character, named *John Want*, acted by Mr. Dominick Murray, which is not without influence on the situations. If he does not provoke a loud laugh at his eccentricity, we are tempted to smile at his contradictions, and, on the whole, we recognize him for a veritable individual, and think that he may have been copied from the life. The success of the piece was decided.

ASTLEY'S.—This theatre re-opened on Saturday, under the conduct of Mr. W. H. C. Nation, who produced the drama of 'The Golden Dustman,' a version of Mr. C. Dickens's novel of 'Our Mutual Friend.' It was followed by the burlesque of 'Atalanta,' one of the best pieces of the late Mr. Frank Talfourd.

SADLER'S WELLS.—A new drama, by Mr. C. H. Stephenson, in three acts, was produced on Saturday. It is entitled 'Patience; or, the Purpose of a Life.' It bears manifest marks, both in its faults and merits, of being a drama composed by an actor. The technical business of the play in most such productions is carefully attended to, but the dialogue superabounds. There is also much talk of the profession, and of the art of acting, subjects on which the heroine seeks to enlighten the audience; for in the course of the action she becomes an actress, and is therefore supposed to know something about them. The writing is, in many places, elegant, and the story to a certain extent interesting. The piece has been carefully got up, and some of the new scenery, painted by Mr. Gowrie, is very pretty.

NEW ROYALTY.—A new drama, by Mr. H. T. Craven, entitled 'Meg's Diversion,' has been produced at this theatre, with deserved success. All the pieces by this author are especially distinguished by a natural vein of feeling and pathos. They deal in general with pastoral manners, but these are of the real English type. Mr. Craven performs the part of *Jasper*, and while he invests him with a rustic simplicity, is careful to show the inherent nobility of his nature. Mr. Cuthbert has illustrated the drama with two excellent scenes,

the second being copied from Calderon's picture of 'Broken Vows.'

THE DRAMA IN FRANCE.

Victorien Sardou—whom, by the way, critics propose to call *Victorien le victorieux*—has commenced his career of winter triumph at the Gymnase with a piece called 'Nos Bons Villageois,' which bids fair to have as long a run as the 'Famille Benoiton.' Crowds daily flock in vain to obtain places at the *bureau de location*, and the *stalles d'orchestre* are mostly taken a week in advance. The fortunate dramatist has made the best use of his experiences at Marly-le-Roi, where he has a country-house; for the inhabitants of Bouzy-le-Têt, the scene of the play, are generally supposed to be simple denizens of Bougival, in his immediate neighbourhood. 'Nos Bons Villageois' are represented by Grinchu, a market gardener, Tétillard, the village grocer, and Floupin, the village apothecary, who is the exact counterpart of the *pharmacien* in Madame Bovary. These worthies nourish a most inveterate hatred, after the manner of most French rustics, of the Parisian; and their action in the play consists of the malicious plottings and contrivances by which they endeavour to drive two proprietors, recently arrived from Paris and settled among them, from the neighbourhood. Grinchu, the *maratcher*, who sends all his vegetables to the *halles* in Paris *en gros*, has no need of any home purchasers of his products; and, moreover, he has an especial cause of quarrel with M. Morisson, one of the proprietors, for usurping his favourite seat for rod-and-line fishing in the river—a spot he has occupied for the last twenty years. Tétillard, the grocer, has a spite against them for bringing all their groceries from Paris. Floupin, the *pharmacien*, feels his local importance overshadowed by the pretensions of M. le Baron, who has been named *maire* of Bouzy-le-Têt. This was evidently the leading motive of the author in the conception of the drama, and some of the scenes of village life are very humorously put upon the stage, although his peasants are very far from being as true to life as the peasants of Molière, who knew his peasants much better than M. Sardou.

Upon such a ground-plan, M. Sardou might have worked out a much better play, had he not yielded to the temptation of introducing a very improbable situation, taken from one of the novels of Charles de Bernard. The three rustics above named suspect the son of one of their enemies of improper attentions to the wife of the other. They lie in wait, and surprise the young culprit at midnight, in a room adjoining that of the lady. The young man, to save the lady's character, assumes the part of a thief, and is taken with the lady's diamonds in his possession. This is an inexplicable proceeding on his part, since he is really in love with the sister of the compromised lady, who is unmarried, and with whom he has already had an interview at the time he is taken prisoner, and he had but to say that he had come to visit the younger sister, and all would have been well. However, in spite of this glaring improbability in the construction of the piece, it is full of life and movement, and the attention of the audience is never allowed to flag for a moment, by a most ingenious use of every kind of stage artifice, degenerating, however, too often into that of a *melo-dramatic* sort. The scheming of M. Grinchu, Tétillard, and Floupin fails of effecting its purpose, and the character of the lady is cleared just at the moment when affairs had a very homicidal appearance, and the two families are rendered more happy than before by the union of their two younger members. The play has undoubtedly very considerable merits, and M. Sardou, after an apprenticeship of the most severe character, has become a master in the art of entertainment. Nevertheless, the actors can justly claim a very considerable portion of his triumph. No piece could, indeed, be better played than this. Leueur, who can at times be a *grand seigneur jusqu'au bout des ongles*, is as perfect a rustic as can be imagined, and Mdlle. Delaporte transports the whole audience night after night by the delicious manner in which she plays

the unmarried sister, a young *ingénue* who is the chief support of the piece.

MUSICAL AND DRAMATIC GOSSIP.

Mr. Ransford's Ballad Concert took place on Monday last, not on Monday week, as a slip of the pen made it appear a week ago.

Mr. Mapleson commences a short opera-season this evening, with 'Faust.' Signor Morini (the original *Faust* of the *Théâtre Lyrique*) is advertised to appear in it. A dramatic season at the same theatre is in contemplation; it may be presumed to include the inevitable Christmas Pantomime. The theatre, we perceive, is to be extensively altered.

Madame Lemmens-Sherrington was the principal singer at the *Crystal Palace* Concert of Saturday last.—*Mr. A. Mellon*, a few nights ago, gave the capital Overture to 'The Sapphire Necklace,' a work sure to come into universal request. Encouragement for all attempting "the best and honourablest things" in Music, especially in vocal composition (a matter which we have greatly at heart), is to be found in the well-merited success and circulation of the composer's "*Orpheus*" song. Never was there one written less *ad captandam*; but beautiful things in Art are always true, and, as such, must make their way, and *will* last, which is more than can be said of the ephemeral *Claribelware*, for the moment so tiresomely thrust on the public. Of a more remarkable and ambitious evidence of *Mr. Sullivan's* versatility we have spoken in merited detail elsewhere.—*Herr Wilhelmj* (another young artist, regarding whose career no doubt can be entertained) played at *Mr. Halle's* concert on Thursday.

The following letter claims attention:—

"Manchester, Oct. 22, 1866.

"Will you, courteously, allow me to refer to your notice of my Oratorio, 'The Patriarchs,' not to cavil with the opinion there expressed as to the merits or demerits of the work, but simply to explain a matter which has, I think, been misunderstood. Very reluctantly indeed did I precede the oratorio by the part entitled 'The Vision.' My objection was twofold. I was quite aware of the present fashion of ascribing all departure from the usual form in musical composition, as well as all leaning towards certain styles of harmony and progression, to the undue influence of Mendelssohn. But, chiefly, I felt that an introductory movement, whether actually a portion of the drama, as in the 'Elijah,' or taking the form of a lengthened prologue, as in 'The Patriarchs,' is, however necessary to the clearness of the plot, *musically* a defect. On the other hand, to have incorporated into the body of a dramatic work matter for which none of the characters could have been made responsible, or to have followed a descriptive instrumental movement by the command which led to and explains the action there described, would not, I think, have been very artistic. I venture to ask your insertion of this, not simply from any personal motive, but because I believe that many young writers are, now-a-days, deterred from following plans which their judgment justifies by the fear of this charge of copying Mendelssohn.

"HENRY HILES."

—The tone and taste of the above communication set it apart from the majority of similar protests. Its writer is obviously worth reasoning with—in the form of some development of our former notice of his 'Patriarchs' (*ante*, p. 504). We need not dwell on such an obvious matter as the wisdom or otherwise of arranging a drama the action of which is to be interrupted or carried out by instrumental music. To the latter, not merely descriptive powers of expression, but of suggestion, have been frequently assigned, totally distinct from its legitimate uses and influence. We can have "earthquake," as in Haydn's 'Terra-motto,'—"storm," as in Beethoven's 'Pastorale,'—and (to stretch a point) "drought," as suggested in the gasping prelude to 'Elijah.' Fairies have sharp little notes and flutes; angels, of course, harps; devils (*ecce signum*, Meyerbeer), their bass trombones and double drums. But to what do these known examples and receipts amount?—whither tend?—to the recon-

struction of the Overture? This may be a preface—may be a table of contents. To the former form (in spite of such magnificent specimens of the latter as Weber furnished), we cannot but, on every principle of Art, give preference. The Overture should be a preparation, not an index. It cannot tell any story which the voices or action of those engaged in the story could not tell better. When following such a commencement as a recitative, with a heavy chorus, as it comes in 'The Patriarchs,' it cannot fail to stop the action, even supposing the action which follows were such as to suggest indicative preliminary music. This not being the case in the work lately considered, *Mr. Hiles's* Overture appeared, and appears, to us a measure without motive, or incitement to attention already arrested. To refer to the other point here to be noticed, *Mr. Hiles* may recollect that Mendelssohn is neither the first, as little the greatest, of the composers whose strongly-marked manner has seduced a school of admirers into unconscious subservience of imitation. Before he came, Mozart spoiled a generation of German composers, some one or two of whom might else have made out a way for himself. What Signor Rossini has to answer for, on the part of foolish Italian *Maestri* who have caught his tricks, not his genius, will have to be counted up when the story of the life of that greatest Italian genius of any time will be told. Let every man who aspires to create, think for himself. The generality are too apt to think what has been done, rather than what is left to be done. The latter discovery Mendelssohn made for German music, appearing as he did at a period when every furlong, foot, inch of ground seemed to have been pre-occupied; and himself without any theory that invention implied destruction of recognized models.

There would seem to be no end, in this unhappily rich country of ours, where, among quarrellings and patchings, magnificent fortunes are spent on public works to no purpose,—fortunes which in any other land would be made to suffice for great lasting achievements—of the "perils" (as *Hudibras* says) "which environ" the new organs of England. At Birmingham, at Leeds, at York, we have had and have always and afresh the same story of plans wrangled over, of money wasted,—and for what?—at best, an instrument about which doctors disagree, and in which it would be folly to expect to find such evenness as distinguishes the noble old structures by Silberman and Müller and Gabelaar, and certain excellent modern continental organs,—as, for instance, the one at St. Eustache, Paris, by *M. Ducroquet*, and the other at Ste. Sulpice, by *MM. Cavallé-Coll*. The taste in tone of our neighbours is not ours; but that theirs can be once for all satisfied without perpetual discord and controversy is a fact capable of mathematical proof. The converse is England's plight, as the following note respecting the organ in Christ Church, Newgate Street, referring to a paragraph, a fortnight ago here quoted from the *Orchestra*, emphatically illustrates:—

"October 23, 1866.

"I fear you have been misled by the information you have quoted relating to the Christ Church, Newgate Street, organ. The instrument, it appears, is not to be completed after the original design; but what is proposed is its reconstruction and complete alteration. See the Vestry Report in the *Musical Standard* of October the 6th, and letter from the builder of the Christ Church organ himself, in that paper of October 13th, which are authoritative, of course, and were earlier than the paragraph quoted. A few words from the *Athenæum* against the proposed cutting down of the organ might aid in stopping the destruction of that noble instrument.

AN ORGANIST."

—It is manifestly impossible to offer any such "few words" as are requested, and it may be here said (not without recollection of past belligerent controversies) that we cannot return to the subject, till (at least) the Christ Church organ shall be completed, for better, for worse.

Mr. Boucicault, who seemingly has time to be in a dozen places at once, is, we are told, engaged in the wise task of altering his "Derby" drama, at the Holborn Theatre, by condensing the two last acts into one.

One well known to every frequenter of the Italian Opera, Signor Monterasi, the prompter, died suddenly the other day in Paris.

One of the worst of this year's sea-disasters has been the wreck of the American steam-ship, *The Evening Star*, on her voyage from New York to New Orleans. The loss of life is terrible, the number of passengers having been very great. A complete opera-company was on board, and most, if not all, its members, it may be feared, have perished.

MISCELLANEA

Geological Miracle Assumers.—In his last line (p. 540), *Mr. Rickman* has forgotten that his 574 million years, if obtained, would not quite double the modicum of time Darwin demands for the small yesterday's job of "denuding the Weald," an episode which (if ever performed, for, by the way, for aught we know, the central Weald, all but a margin of a mile or two, may have been an island or shoal never yet covered except with water) has cut about as large a figure in England's geo-chronology as that of denuding the rotten boroughs in her whole historical chronology. So, supposing my estimate as wrong as he says, and that, instead of a comet every few hundred centuries, we only received one in 574,000,000 years, his conclusion would be a strange *non sequitur*. Instead of the chances being that "we may not have been hit yet," they would be that, on the Lyell-Darwin scale, since the hardening of our roofing-slate, we *must* (without miracle) have been hit lots of times. But the whole suggested alteration rests on mere dogmatic denial of my statistics. It may be true, for aught I know, that at each crossing of the earth's orbit, it is, on an average, 2,294 to 1 that the earth will be out of the way; but if so, then *Mr. Rickman* will find, on continuing his calculation, that in 2,308 centuries we are dealing not with one, but with just 2,295 such crossings. In fact, the present century, I believe, has seen more than Biela's famous crossing in 1832. But without inquiring into the frequency of these, I show, by the far simpler and more averaging method of comparing areas on the sphere, that, on the minimized data taken, it would only require 2308 × 1186 penetrations (on the average) to hit, not, as he assumes, the earth's orbit once, but a given point thereof, and consequently the earth once. This, I maintain, will apply as long as she keeps her proximity to the sun, or is in the spherical film, whether she stand still, or describe a great circle, or dance any meander over it, with any velocity. In fact, my figures apply strictly to the first case, that of her standing still, or else if she moved but the comets moved infinitely faster, so as to make their transits through the film instantaneous. But with the velocities of earth and comets not incomparably different, the chances of encounter are raised *above* my estimate, and more so the nearer the velocities approach equality. Now the mean velocity where-with comets penetrate the film only exceeds the earth's as 7 to 5. Hence a seventh reason is added to the six I gave on page 437, why my estimate was largely deficient. But the main question is not, as *Mr. Rickman* supposes, the astronomical one, the chance that we may not, or how few times we may, have been hit, but how our tangible underfoot geology is to be squared with the assumption of no hit, or none since a definite era, say that of the flint-folk. I undertake, if you grant me about the same space as before, to show that it is unsquareable; that, taking only such geologic facts as Lyell and Darwin have themselves recorded, they have to add to the continuant miracle or providence (for these words are undistinguishable) of the earth's hypothetic freedom from comet-falls, an immensely more complex or less conceivable system of miracle (or irreducible agency) by which, notwithstanding this assumed suspension of the natural comet-falls, all the conceivable physical effects of such falls have been produced, or exactly and indelibly imitated over the face of our globe.

EDWARD L. GARBETT.

Bonfire.—Allow me to suggest the following derivation of "bonfire," viz., *Bonne*, a village, Belgic. See Jamieson's Dictionary, where "Bon-

spel" is derived from *bonne*, a village, and *apel*, a game. This word is still in use in Scotland, and is applied to designate a match at the national game of Curling.
J. DUNDAS.

Vivisection.—I have waited until now to see if any one would reply to the letter of a "Physiologist" in your impression for September the 29th, and which had reference to the subject of Vivisection. As the letter has not been noticed in any way, however, I shall be much obliged by your favouring me with space for the following remarks, written in a fair and truthful spirit. Speaking of the judges who decided in favour of Dr. Markham's essay, the one to which the second prize was awarded, that Correspondent observes:—"These three men of science, I happen to know, not only selected this essay of Dr. Markham's out of some thirty competing essays (and, of course, without any knowledge at the time of who was the author), but recommended it," &c. It is the sentence inclosed in brackets, and which first attracted my notice, that I now wish to allude to, as it was evidently penned in suspicion or apprehension that what *might* have escaped attention in that essay would really attract it, and with an evident desire to lull that suspicion. I am the more disposed to do this, inasmuch as I think it verifies what you said in your review of the essays in the previous week's number, though not in the way you intended—the matter of partiality in deciding as to the best production. Those of your readers who care to refer to Essay No. 2, will find at page 98 that Dr. Markham clearly—though I will not say intentionally—betrays his individuality in the following words: "Lecturing on the subject before the College of Physicians, the writer made the following unprejudiced remarks as to the cause which effected the change in question. Buckle, a well-known writer, has said words to this effect." Here follow Buckle's own words. Now let me ask what object could the Doctor have in revealing himself in this unnecessary way, all the more marked because there was not the slightest occasion for it, as Buckle could have been quoted without any allusion to lecturing? We all know that, in general, lectures delivered before the College of Physicians are published, and are tolerably well known to the members of the medical profession; and this *fact*, added to the lecturer's introducing himself to the notice of the judges, was sufficient to lead to the discovery of not only the writer's professional status, but also of his name. Not much need in this instance, one would think, to entrust the secret to the keeping of a sealed envelope, until the judges had decided as to the merits of the essay; and without in the least attempting to insinuate that this knowledge of who the writer was, influenced to any large extent the prejudices of the three physiologists who declared themselves in his favour, it may with truth be said that the public, the Royal Society for the Prevention of Cruelty to Animals, not less than the interests of real Science, may be thankful that the majority of the Committee (four out of seven) who decided in favour of by far the best essay were not "scientific" men, but were in a much better position to judge between facts which cannot be disproved, and those which, from limited reading, or imperfect knowledge of the subject, were unluckily borrowed to bolster up vivisection. I allude to the discovery of chloroform, and the discarding of bleeding in the treatment of disease in this country, with which living dissections or experiments on the lower animals had no more to do than Homer had in the construction of the first steamboat.

FAIR PLAY.

* * "Fair Play" seems to have misread some portion of our article, which contained no insinuation that any of the judges of the Vivisection Essays had been influenced by *partiality* to the winner of the First Prize. Though we questioned the intellectual fitness and competence of some of the judges to decide on the scientific question, we were confident that all of them acted in good faith and to the best of their abilities.

TO CORRESPONDENTS.—G. R. E.—E. C.—J. M.—F. B.—T. B. W.—

MILTON HOUSE, LUDGATE-HILL, Nov. 1, 1866. SAMPSON LOW & CO.'S LIST OF NEW BOOKS.

READY NOVEMBER 1st.

An ILLUSTRATED EDITION OF BISHOP HEBER'S HYMNS, with upwards of One Hundred Designs. Engraved in the first style of Art, under the superintendence of J. D. Cooper. Small 4to. handsomely bound, price Half-a-Guinea.

MILTON'S PARADISE LOST, with the Original Steel Engravings of John Martin. Printed on large paper, royal 4to. handsomely bound, price Two Guineas and a Half; or in morocco extra, Three Guineas and a Half.

The WAR with AMERICA.—The New Volume of Mr. BANCROFT'S HISTORY OF THE AMERICAN REVOLUTION, comprising the Period from the Declaration of the Independence of the Thirteen United States to the End of the Campaign of 1778. 8vo. cloth, price 12s.

Contents:—The Effects of the Declaration of Independence in Europe—The Evacuation of New York—The Embarrassments of America—The Course of Opinion in England—Border War North and South—Retreat through the Jerseys—Europe and America for the Campaign of 1777—Evacuation of New Jersey by the British—Philadelphia Captured—Surrender of Burgoyne—The Confederation.

VARIA: Rare Readings from Scarce Books. By the Author of 'The Gentle Life,' reprinted by permission from the 'Saturday Review,' &c. Crown 8vo. price 6s.

Also, now ready, in the same Series, &c. each Volume; or in calf extra, 10s. 6d.

THE GENTLE LIFE. Two Series.

ABOUT IN THE WORLD.

LIKE UNTO CHRIST.

ESSAYS BY MONTAIGNE.

WASHINGTON IRVING'S SPANISH PAPERS and other MISCELLANIES, hitherto Unpublished or Uncollected, now Edited and Edited by PIERRE M. IRVING. With a Portrait of the Author, by Sir D. Wilkie. 2 vols. 8vo. cloth, 24s.

RICHMOND and ITS INHABITANTS, from the Olden Time. With Memoirs and Notes by RICHARD CRISP. With Illustrations. Post 8vo. price 10s. 6d.

The CONSPIRACY OF GIANLUIGI FIESCHI: an Episode in Italian History. By M. DE CELESIA. Translated by D. H. WHEELER, United States Consul at Genoa. With a Frontispiece Portrait. Demy 8vo. cloth.

A PRACTICAL GUIDE TO THE MANUFACTURE OF PAPER AND BOARDS. By A. PROTEAUX. With Additions by L. S. DE NOIRMAND. Translated from the French. With Illustrations. 8vo. 12s.

The MASQUE at LUDLOW, and other Romanesques. By the Author of 'Mary Powell.' Crown 8vo. cloth, price 2s.

DOCTOR JOHNS: a Narrative of Certain Events in the Life of an Orthodox Minister. By IK. MARVELL, Author of 'Reveries of a Bachelor.' 2 vols. post 8vo. 16s.

The TRUE HISTORY OF DAME PERKINS and HER GREY MARE. Told for the Countrywide and the Fireside. By LINDON MEADOWS. With Eight Coloured Illustrations by Philz. Small 4to. cloth, price 6s.

GREAT FUN. Stories told by THOMAS ARCHER and THOMAS HOOD to Edward Wehnert's Pictures. Printed in Colours. 4to. cloth, gilt edges, price 10s. 6d. coloured; or 6s. plain.

READY DURING NOVEMBER.

TWO CENTURIES OF SONG, comprising Lyrics, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the last 200 Years. With Critical and Biographical Notes. By WALTER THORNBURY. Illustrated by Original Pictures of Eminent Artists, drawn and engraved especially for this work. Printed on toned paper, with coloured Borders, designed by J. T. Shaw, F.S.A. Very handsomely bound with clasp, price One Guinea.

ELEGANT SONNETS; being Selections, with an Essay on Sonnets and Sonnetters, by the late LEIGH HUNT. Edited from the Original MS., with Additions, by R. ADAMS LEE. 2 vols.

CELEBRATED LETTERS, based on W. Holcombe's 'Literature in Letters.' Selected and arranged, with Critical and Biographical Notes, by WILLIAM MOY THOMAS. Crown 8vo.

The COUNTESS OF PEMBROKE'S ARCADIA. By SIR PHILIP SIDNEY. Edited, with Notes, by the Author of 'The Gentle Life.' Crown 8vo.

The SECOND VOYAGE of the ROB ROY CANOE, on Lakes and Rivers of Sweden, Denmark, Norway, and on the Baltic and North Seas. By JOHN MACGREGOR, Trin. Coll. Cambridge. With Numerous Illustrations.

The MISSION of GREAT SUFFERINGS. By ELIHU BURRITT. Crown 8vo.

FAITH'S WORK PERFECTED. The Rise and Progress of the Orphan House at Halle. From the German of FRANCKE. By WILLIAM L. GAGE. Fcap.

LOW'S HANDBOOK to the CHARITIES of LONDON. A New Edition. Fcap.

A SUMMER in LESLIE GOLDTHWAITE'S LIFE. By the Author of 'The Gayworthys.' With Illustrations. Fcap. 8vo.

TOILERS of the SEA. By VICTOR HUGO. With Two Engravings from Original Paintings, made by Gustave Doré for this Edition. I. The Last Breakwater. II. Gilliat's Struggle with the Devil-Fish. Crown 8vo.

London: SAMPSON LOW, SON & MARSTON.

S. & T. GILBERT'S SELECT LIST OF VALUABLE BOOKS.

(See also next page.)

A MOST INTERESTING NOVEL.—Christian's Mistake, by the Author of 'John Halifax, Gentleman,' with Engraved Frontispiece, crown 8vo. cloth gilt, 4s. 2d. pub. at 6s.; postage, 6d.

The BRILLIANT HISTORIAN.—The Complete Works of Lord Macaulay, New Library Edition, edited by Lady Trevelyan, comprising History of England, Essays, Miscellaneous Essays, Speeches, Lays and Poems, with Portrait, 8 vols. cloth gilt, 4s. 7s. 6d.; pub. at 6s. 6d. This is really a fine work, and should be in the hands of every practical shipbuilder.

CELEBRATED FRENCH AUTHORS.—Half-Hours with the Best French Authors; being Short Passages from the most Celebrated Prose Writers of the 16th, 17th, 18th, and 19th Centuries, translated into English, with 36 beautiful Wood Engravings from Desvres by Emile Bayard, royal 8vo. cloth gilt edges, 6s. 6d.; pub. at 10s. 6d.; postage, 1s.

DISCOUNT.—Although S. & T. GILBERT'S recognized Discount is 2d. in the shilling, there are many books on which they can make a still more liberal allowance, as may be seen by reference to this List.

CATALOGUES of S. & T. GILBERT'S extensive and varied STOCK, containing Books suitable for all buyers, from 1s. upwards, sent post free on application.

BOOK SHOW-ROOM.—At S. & T. GILBERT'S Show-room may be seen all the principal Works of the day. Each work is marked in plain figures with the price fixed by the Publisher, from which a most liberal discount is allowed.

BOOKBINDING in every style of the Art.—S. & T. GILBERT undertake the Binding of every class of work in the most approved and modern style of finish. Books entrusted to their care for Binding meet with careful attention, as most but best workmen are employed and the best materials used. Estimates given.

MUSIC.—THE FULL-PRICE SHEET MUSIC supplied at half the published price, and sent post free. By applying to S. & T. GILBERT, stating clearly what is wanted, time will be saved, and the trouble and annoyance of writing to various places avoided.

OLD BOOKS.—S. & T. GILBERT have great facility for obtaining OLD BOOKS out of print and scarce, and orders for Books of this kind meet with their particular attention and study. Information as to price and condition supplied free of charge.

FREE TRADE IN BOOKS.—S. & T. GILBERT were among the first to adopt the system of Free Trade in Books, and to offer to Book-buyers the utmost discount. They hope this fact will prompt the public to respond to their endeavours, as it is only by doing a large trade the system can be successfully carried out.

APPLY DIRECT.—It is respectfully requested that applications be made direct to S. & T. GILBERT, who have incurred the expense of advertising this List, so that they may receive whatever benefit arises from the orders, and insure to the applicant the exact goods described.

SCHOOLS.—The Proprietors of Schools will find S. & T. GILBERT'S Remainder and General Catalogues first-rate mediums to select from for Prizes of all descriptions and cost.

FURTHER REDUCTION.—A further Reduction will be made to Buyers of three or more Copies of the SAME WORK, and orders of 5l. and upwards sent carriage free to any part of the United Kingdom, Ireland excepted (carriage paid to Holyhead only).

WARRANTED PERFECT.—NOTICE.—The whole of the Books mentioned in this List are warranted perfect in every respect, and precisely the same as when issued by the various Publishers, and equally as good as if the full published price were paid.

NOTE the ADDRESS.—S. & T. GILBERT, Booksellers, 4, COTHALL-BUILDINGS, back of the Bank of England, London, E.C.

(Continued next page.)

S. & T. GILBERT'S SELECT LIST OF VALUABLE BOOKS,

Chosen from their extensive Stock, and well worth the attention of all Book-buyers in search of really good Works on liberal terms, either for presentation, reference, or general reading.

To insure the exact Books and Bindings described it is respectfully requested that application be made direct to S. & T. GILBERT, who have incurred the expense of placing the List before the Public.

Note the Address—No. 4, Copthall-buildings, back of the Bank of England, London, E.C.

"A work which will be equally acceptable to the student and the general reader, which is brimful of good and suggestive things, and which will introduce many English people for the first time to a delightful region of romantic poetry."—*Athenæum*.

MACMILLAN & Co. London.

JOHN CAMDEN HOTTEN'S NEW BOOKS and ANNOUNCEMENTS.

"* * The Public are respectfully informed that Mr. Swinburne's Works will in future be published by Mr. Hotten."

NEW WORK BY MR. SWINBURNE.

ESSAYS on the LIFE and WORKS

of WILLIAM BLAKE, Poet and Artist. In demy 8vo.

RE-ISSUE OF MR. SWINBURNE'S POEMS

POEMS and BALLADS. By Alger-

NON CHARLES SWINBURNE. Fcap. 8vo. pages 32. price 5s.

Recent Opinions of the Press.

"Wherever there is any kind of true genius, we have no right to drive it mad by ridicule or invective. We must deal with it wisely, justly, fairly. Some of the passages which have been selected as evidence of (the poet's) plain speaking have been wantonly misunderstood.... To us this volume, for the first time, conclusively settles that Mr. Swinburne is authentically a poet."

"The theatre of Mr. Swinburne is co-extensive with his knowledge and experience. It will expand; and there is no fear of his being denied an audience, or crushed by a critique. He is more likely to realize the boast of Nelson, who, finding himself unmentioned in the Gazette, declared a day would come when he should have one for himself.... The poems have been interpreted by designing criticism with a pruriency not their own."—*Leader*.

"There is enough in the volume to have made the fortune of most members of his craft."—*Scotsman*.

"He has been either very blindly or very unfairly dealt with."—*Full of Gaiety*.

"The outcry that has been made over his last published volume of 'Poems and Ballads' is not very creditable to his critics. That the book should be thus denounced says little, indeed, for the thoroughness of current criticism."—*Examiner*.

THE AUTHOR OF 'POEMS and BALLADS' and HIS

CRITICS.

NOTES on POEMS and REVIEWS.

By ALGERNON CHARLES SWINBURNE. Demy 8vo. price 1s. 6d. (This day.)

"Mr. Swinburne here speaks for himself without personality of any kind, but with much general expression of scorn, which the small critics have fairly brought down on themselves. It is to be regretted that a young poet, from whom much is to be hoped, should be thus forced into explanations that can only humiliate those by whom they were required."—*Examiner*.

CHATELARD: a Tragedy. By

ALGERNON CHARLES SWINBURNE. Fcap. 8vo. cloth, price 7s.

THE QUEEN MOTHER and ROSA-

MOND: two Plays. By ALGERNON CHARLES SWINBURNE. Fcap. 8vo. cloth, price 5s.

MR. ROSETTI'S CRITICISM.

SWINBURNE'S 'POEMS and BAL-

LADS': a Criticism. By WILLIAM MICHAEL ROSETTI. This day, price 3s. 6d. cloth.

HISTORY of SIGN-BOARDS. By

JACOB LARWOOD and JOHN CAMDEN HOTTEN. With 100 Curious Illustrations.

From The Times.

"It is not fair on the part of a reviewer to pick the plums out of an author's book, thus flinging away his cream and leaving little but skim milk remaining; but, even if we were ever so maliciously inclined, we could not, in the present instance, pick out all Messrs. Larwood and Hotten's plums, because the good things are so numerous as to defy the most wholesale depredation."—*Times review of three columns*.

ANGLICAN CHURCH ORNAMENTS.

ENGLISH CHURCH FURNITURE,

ORNAMENTS, and DECORATIONS, at the Period of the REFORMATION. A.D. 1500. Edited by E. PEACOCK, F.R.S.

"* * Very curious as showing what articles of Church Furniture were in those days considered to be idolatrous or unnecessary. The work (of which only a limited number has been printed) is of the highest interest to those who take part in the present Ritual discussion. See Reviews in the Religious Journals."

COMPANION to 'THE HATCHET-THROWERS'.

This day, 4to. Illustrations, coloured, 7s. 6d.; plain, 5s.

LEGENDS of SAVAGE LIFE. By

JAMES GREENWOOD, the famous "Amateur Cameraman."

With 30 Imimitably Droll Illustrations, drawn on Wood by Ernest Orlic, "The English Gustave Doré."

"* * Readers who found amusement in 'The Hatchet-Throwers,' will not regret any acquaintance they may form with this comical work. The pictures are among the most surprising which have come from this artist's pencil."

In a few days, 4to. on toned paper, price 7s. 6d.

PUNIANA; or, Thoughts Wise and

Otherwise. An entirely New Collection of Riddles and Puns. Edited by the Hon. HUGH ROWLEY. With nearly 100 exquisitely fanciful Concetti from his Pencil.

"* * It contains nearly 3,000 of the very best Riddles, and about twice that number of 'most outrageous' Puns."

"WILL DO FOR WINCHESTER WHAT TOM BROWN

DID FOR RUGBY."

This day, crown 8vo., handsomely printed, 7s. 6d.

SCHOOL LIFE at WINCHESTER

COLLEGE; or, the Reminiscences of a Winchester Junior. By the Author of 'The Log of the Water-Lily.' With numerous Coloured Illustrations.

London: JOHN CAMDEN HOTTEN, 74 and 75, Piccadilly.

"The Purchasers of this Lexicon in Parts are requested to order the completion at once. 19 Numbers, at 1s. each, complete the Work. Williams & Norgate, 14, Henrietta-street, Covent-garden, London, and 20, South Frederick-street, Edinburgh.

A NEW ENGLISH VERSION OF PINDAR. Fcap. 4to. beautifully printed, 12s.
TRANSLATIONS from PINDAR. By HUGH SEYMOUR TREMENEHERE, M.A., late Fellow of New College, Oxford.

"Translations like the one before us embody and extend what is likely to live through all time. The language employed by Mr. Tremenehere is of great purity and sweetness."
"Many passages—and long passages, too—are full of beauty, sweetness, and originality."—Morning Star.
"The translation is a very well done, the blank verse possessing uncommon power and spirit."—Sunday Times.
"The translations Mr. Tremenehere has made are the best English versions we have of a poet whose strange Doric verse embodies a wealth of admirable ideas, figures, and sentiments."—Field.
"It is very plain that Mr. Tremenehere is a master of harmonious style. We have great pleasure in recommending this very elegant and graceful rendering of so large a portion of Pindar."—Queen.
"The most successful translations in the book seem to be those of the more sustained and philosophic passages."—London Review.
"Mr. Tremenehere must now be added to the honourable list of daring translators. The translations are very readable, and in some instances highly poetical. Mr. Tremenehere has published not only a very handsome, but a very interesting, and, probably, a very useful book; and it is to be hoped that what has evidently been a labour of love with him will meet with the appreciation it deserves."—Illustrated London News.
"Certainly Pindar was never before presented in an English dress that so well suited him."—Spectator.
"Mr. Tremenehere's reasons for adopting blank verse are sufficient to justify his attempt, which attains a fair measure of actual success. He gives the meaning of Pindar with more than usual clearness."—Guardian.
"Mr. Tremenehere's volume is worthy of high praise."—Ecclesiastical.
"To those who have no means of reading Pindar in Greek. . . . Mr. Tremenehere's book will be acceptable."—Sunday Gazette.
Edward Moxon & Co. Dover-street.

ford, Yorkshire.—Gratis and post free on application.

SALOM'S NEW OPERA and FIELD GLASS,
and **THE RECONNOITERER GLASS,** price 10s. 10d., sent
free.—This "Tourist's Favourite," through extraordinary division
of labour, distinctly shows small windows 10 miles off, landscape
at 30 miles, Jupiter's moons, &c.—The **MARQUIS of CARMARTHEN:**
"The Reconnoiterer is very good."—**EARL of BRADALBANE:**
"I find it all you say, and wonderfully powerful for so very small
a glass."—**EARL of CAITHNESS:** "It is a beautiful glass."—**Rev.**
LORD SCARSDALE "approves of it."—**LORD GIFFORD:** "Most use-
ful."—**LORD GARYVAGH:** "Remarkably good."—**SIR DIONOT CAYLEY:**
"It gives me complete satisfaction, and is wonderfully good."—**CAPT.**
BENDEY, Royal Small Arms Factory, Enfield: "I have
found it effective at the 1,000-yard range."—**P. H. HAWES,** of
Farnley, Esq.: "I never before met an article that so completely
answered the recommendation of its maker, nor, although I
have tried many, a glass combining so much power for its size
with so much clearness."—**The Field:** "We have carefully tried
it at an 800-yard rifle range against all the glasses possessed by
members of the Corps, and found it fully equal to any of those
present, although they had cost more than four times its price."
—**Notes and Queries:** "What intending tourist will now start
without such an indispensable companion to a pleasure trip?"
The celebrated "HYTHE" GLASS shows bullet-marks at
1,200 yards, and men at 3½ miles, price 21s. 6d. All the above
Glasses, respectively bearing the registered trade-marks, "Sa-
lom," "Reconnoiterer," and "Hythe," are only to be had direct
from SALOM & CO., 98, Princes-street, EDINBURGH, and 157,
Regent-street, LONDON.

HALF-HOURS WITH THE BEST
LETTER-WRITERS AND AUTOBIOGRAPHERS.

Edited by CHARLES KNIGHT.

GEORGE ROUTLEDGE & SONS, The Broadway, Ludgate-hill.

NEW NOVELS,
TO BE HAD AT ALL LIBRARIES.

GRIFFITH GAUNT; or, JEALOUSY. By
CHARLES READE. 3 vols. post 8vo. [This day.]

ONLY GEORGE: a Story. 2 vols. post 8vo.

"It is written with extreme delicacy and good taste, several of the characters are hit off cleverly, and there are a number of sayings, terse, lively, and sensible, scattered up and down its pages. In a word, it is very pleasant reading. . . . On the whole, then, if the reader wants to be amused with a bright, lively book, which he may get through easily at a couple of sittings, we can safely recommend 'Only George' to his notice."—*Times*, October 25.

SWEET SEVENTEEN: a Novel. By Arthur

LOCKER. 3 vols. post 8vo.

"There is scarcely any variety of the genus novel, which if good of its kind, will fail to command readers, and here must certainly be a great many persons who are weary of meeting people in books from whose society they would shrink in real life—accomplished forgers, beautiful murderers, and 'sic like cattle' and who would rather read a quieter book, provided the characters were people of decent reputation. . . . Now, we think we can promise those readers who are satiated with crime, and who feel that newspapers supply heartrending incidents enough, without having such incidents repeated in the pages of fiction,—we think we can promise such people that they will meet very good company in the novel now before us. . . . Our judgment, then, is that this is a very good novel, with only one fault—it is rather too long; but that, in the eyes of readers interested in the story, will, perhaps, be a merit."—*Times*, October 29.

CRADOCK NOWELL: a TALE of the NEW

FOREST. By R. D. BLACKMORE. In 3 vols.

"'Cradock Nowell' is a clever novel, decidedly original in style and mode of treatment: it is amusing too, and the reader who once fairly enters upon it will hardly fail to read it through."—*Athenæum*.

AUNT MARGARET'S TROUBLE. By a

NEW WRITER. Second Edition. Post 8vo. price 8s.

"After wading through the ordinary novels of the season, after learning to what depth of dullness and folly the human intellect can descend, and wondering at the hideous pictures of vice or inanity which men and women can paint as representations of human life, it is positive mental refreshment to come across such a book as 'Aunt Margaret's Trouble,' which, for pathos and idyllic tenderness, may compete with even the best novel of the day. It has nothing of the grandeur of high art about it; it has nothing of heroic tragedy nor of stately romance, still less of sensationalism; it is absolutely free from all deadly crimes, from all monstrous vices, from all maddening mysteries; being just a quiet story of selfishness on the one hand, and of love betrayed on the other, with the retribution sure to follow upon wrong as the moral justice done at the end. Yet it is a charming book, and worth half a hundred fictions of the more ambitious and elaborate kind. In the first work of a new and young writer we have to consider not only the ability it displays or more remotely indicates, but also the cast of mind shown in the work. Thus, if a new book is all about illicit love and the slangy talk of fast men. . . . we know at once what manner of author we have to deal with. But if he be sweet and modest, as this is, we know then that, whatever may be the strength or weakness of the future, we shall never be revolted by licentiousness or shocked by coarseness. . . . We shall at least have pure work and decent, and sorrow gently touched, and sinfulness dealt with as sinfulness should be dealt with in life—tenderly and yet abhorrently."—*Saturday Review*.

A PRODIGY: a TALE of MUSIC. By Henry

F. CHORLEY. 3 vols. post 8vo.

THE
LAST CHRONICLE OF BARSET,
 A NEW SERIAL STORY

BY

ANTHONY TROLLOPE,

With Illustrations by George H. Thomas,

Will be commenced on December 1st, and continued Weekly.

PRICE SIXPENCE.

SMITH, ELDER & Co. 65, Cornhill.

THE CHRISTMAS GIFT BOOK, 1866.

"This will probably be the most superb volume ever published."—ATHENÆUM, Sept. 22, 1866.

"It has about it all the essential elements for success in precisely this very kind of enterprise—viz., adventurous publishers, skilled engravers, a gifted artist, and a poet whose verses are suggestive of what we doubt not they will receive from Gustave Doré's facile hand, superbly imaginative embellishments."—SUN, Sept. 21.

On December 1st, 1866, will be published, in imperial 4to. with paper and type made expressly for the Work, and in elegant cloth, price 21s.

E L A I N E.

By ALFRED TENNYSON.

ILLUSTRATED BY GUSTAVE DORÉ.

With Nine exquisite full-page Drawings on Steel, in the first style of art, by HOLL, BAKER, JENKS, ROBINSON, and others.

MONSIEUR DORÉ'S OWN OPINION OF THE ENGRAVINGS.—"Paris, October 24, 1866.—Nous aurons fait un très beau livre, un livre unique. Veuillez donc complimenter de ma part les artistes qui m'interprètent si bien."

The designs of this Artist have never yet been engraved on steel, and consequently have never been interpreted in their fullest sense. M. Doré has made these Drawings with special reference to this mode of Engraving, and it was at his earnest request that the Publishers determined to incur the great outlay necessary to produce this book. It is too the first time that M. Doré has illustrated the works of a contemporary author, and, to use his own words, he desires the work

'To be a Monument to Mr. Tennyson and to his own powers.'

"Mon frère a fait cette fois-ci le grand succès qui fera descendre son nom à la postérité."—ERNEST DORÉ.

A few Impressions of the Plates, Proofs before Letters, will be published, price Five Guineas, cloth; and to insure these it is necessary at once to apply to the Publishers or to the local Agent.

The Work may also be had, with Photographs from the Original Drawings in lieu of Engravings, price Two Guineas, cloth. These are printed by a special process by Wm. Jeffrey.

London: EDWARD MOXON & Co. Dover-street. New York: CASSELL, PETER & GALPIN.

In December, in fcap. 4to. bevelled cloth, most exquisitely bound, price One Guinea,

LOGUE,** with Illustrative Sketches of Cabinet Furniture
and Decorative Upholstery, sent free per post, or given on applica-
tion. The Stock, corresponding to the List, is marked in plain
figures, and comprises

DRAWING-ROOM FURNITURE.

In new and elegant designs, covered in Rep, Terry Cloths, French
and Silk Damasks, &c. This Department is also enriched with the
latest Parisian Novelties, Cabinets, Whatnots, Davenport, &c.

Good Solid Dining-room Sets, in Mahogany and Oak.
Iron and Brass Bedsteads in great variety.

The new patent Spring Mattress still stands alone for cheapness
and comfort.

The Bedding is all made on the premises, and under personal
inspection.

Their famous polished Pine Bed-room Suits demand special
attention.

Extract from the *Budler*.

"We were shown a short time since a bed-room fitted up by an
Earl for his own occasional occupation at the sea-side, in which
every piece of furniture, save the iron bedstead, was made of the
white wood in question. Dressing-table, washstand, drawers,
towel-rails, and chairs, were as spotless as the crest of the waves
beating on the shore, and the very height of cleanliness seemed
attained."

THE STOCK OF CARPETS
Is one of the choicest in London, embracing Turkey, Velvet Pile,
Brussels, Kidder, Felts, &c.

Floor-cloth, Kamptulicon, Linoleum, and Cork Carpet, cut, fitted,
and laid down to any size and plan.

Furnishing Drapery of every description.

Damask, Rep, and Pekin Cloths, French and English Chintzes,
&c.

THE STOCK OF HOUSEHOLD LINEN
Is well worthy the attention of Clubs, Hotels, and large Con-
sumers, who will be treated with on most liberal terms.

199, 200, 202, 204, 206, 208 and 210,
WESTMINSTER BRIDGE ROAD, LONDON.

TO CHARITABLE DONORS, the Managers

of Public Institutions, Asylums and Homes.

The peculiar circumstances of this year, the late monetary
crisis, and the consequent depression of the markets, in the midst
of which **ATKINSON & Co.** make large cash purchases, enable
them now to offer unusual advantages in the supply of BEDDING,
BLANKETS, COUNTERPANES, and SHEETINGS, besides
very description of material for warm Winter Clothing.

BREAKFAST—EPPS'S COCOA

(more commonly called Epps's Homeopathic Cocoa, as being

prepared and introduced by James Epps, the Homeopathic Chem-

ist first established in England). The very agreeable character

of this preparation has rendered it a general favourite. For

breakfast no other beverage is equally invigorating and sustain-

ing. This Cocoa is used by thousands who never used Cocoa

before. "Cocoa stands far higher than tea or coffee," Dr. Hassall

says.—Sold in 1 lb., 1 lb., and 1 lb. packets.

"PURITY and EXCELLENCE of QUALITY."

COLMAN'S STARCH.

PRIZE MEDALS WERE AWARDED

AT THE

GREAT EXHIBITIONS OF 1851 AND 1862,

And also THE ONLY BRITISH MEDAL at the

DUBLIN EXHIBITION OF 1865.

Sold by all Grocers and Druggists.

J. & J. COLMAN, LONDON.

WILLIAM SMEE & SONS respectfully

caution intending Purchasers of the "SMEE'S SPRING

MATTRESS, TUCKER'S PATENT," or "SOMMER TUCK-

ER," against various imitations and infringements, preserving

the appearance of the Original, but wanting all its

essential advantages.

Each Genuine Mattress bears the Label "TUCKER'S PATENT,"

and a Number.

The "Smee's Spring Mattress, Tucker's Patent," received the

only PRIZE MEDAL, or Honourable Mention, given to Bedding of

any description, at the INTERNATIONAL EXHIBITION, 1862, and

may be obtained (price from 25s.) of most respectable Bedding

Wholesale and Retail Dealers, and of the Manufacturers, **WILLIAM SMEE & SONS,** Finsbury, Moorgate

Railway Terminus, LONDON, E.C.

HEDGES & BUTLER respectfully solicit

attention to their

NEW OXFORD-STREET, LONDON;

City Office, 4, King-street, Cheapside.

SALOM'S NEW OPERA and FIELD GLASS, and THE RECONNOITERER GLASS, price 10s. 10d., sent free.—This "Tourist's Favourite," through extraordinary division of labour, distinctly shows small windows 10 miles off, landscape at 30 miles, Jupiter's moons, &c.—THE MARQUESS OF CAMARQUE: "The Reconnoiterer is very good."—EARL OF BERKDALMARE: "I find it all you say, and wonderfully powerful for so very small a glass."—EARL OF CARLISLE: "It is a beautiful glass."—Rev. LORD ROBERTS: "approves of it."—LORD GIFFORD: "Most useful."—LORD GARVAGH: "Remarkably good."—SIR DIGNY CAVLEY: "It gives me complete satisfaction, and is wonderfully good."—CAPT. BENDY, Royal Small Arms Factory, Enfield: "I have found it effective at the 1,000-yards range."—F. H. HAWKES, of Farley, Essex: "I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a Glass combining so much power for its size with so much clearness."—THE FIELD: "We have carefully tried it at an 800-yard rifle range against all the Glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price."—Notes and Queries: "What intending tourist will now start without such an indispensable companion to a pleasure trip?"

The celebrated "SIXTH" GLASS shows bullet-marks at 1,200 yards, and men at 34 miles, price 31s. 6d. All the above Glasses, respectively bearing the registered trade-marks, "Salom," "Reconnoiterer," and "Hawkes" are only to be had direct from SALOM & CO., 84, Prince of Wales-street, EDINBURGH, and 127, Regent-street, LONDON.

THE CHADBURN LANTERN, for projecting

enlarged Images upon a Screen similar to the Magic Lantern from opaque objects. This Instrument supplies a great want in scientific and amusing Illustrations; by it Coins, Medals, Moving Mechanisms, interior of watches, Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their colour and detail, thus rendering paintings on glass needless.—To be had direct from C. H. CHADBURN & SON, Opticians and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

THE GALAXY SHOWMAN; or, How to

Make a Galaxy Show, and Act the Broken-Down Billy Button, and the Enraged Cobbler, 150 Engravings, with Dialogues complete, post free for 14 stamps.—H. G. CLARKE & Co., 252, Strand.

THE MAGIC DONKEYS.—Roars of

Laughter.—These wonderful Animals go through their extraordinary Evolutions, daily, at 23, Strand, from Ten till Six. The pair sent post free for 14 stamps.—H. G. CLARKE & Co., 252, Strand.

THE DIGITORIUM, an Instrument

to enable any person to play and become perfect on the PIANOFORTE in an incredibly short time. Dr. Holloway, organist to Lord Arundell, writes, "The Digitorium will do great good (the result of one finger being stronger than another, stiffness of wrist, execution marred by weakness, &c. can be perfectly cured by a few minutes' practice on a Digitorium."—Herr Lehmayr, of the Conservatoire, Vienna, says, "The Digitorium will do great service to the artist or learner whose time is limited for practice."—Frederic Maccafee, the celebrated Pianist and Composer, writes, "I find the Digitorium strengthens the fingers, and gives certainty of touch." Price 11s. 6d. Free to any Railway Station in the Kingdom on receipt of 10s. To be had of M. MARKS, Inventor, 53, Richmond-road, Raywater, London, W.

THE EMANCIPATION OF VENICE.—

Splendid large-sized PHOTOGRAPHS, price 3s. 6d. each, of the following Subjects:—VENICE a large assortment of Views; also, beautifully coloured, to represent a Water colour Drawing, price 7s. 6d. each; VERONA, NAPLES, GENOA, PALERMO, MESSINA, very many other places in Italy; Pompeii, Athenaeum, Rome, the Rhine, &c. &c.—A detailed List on application, and parcels sent for selection.

Sales by Auction

The Service of Plates, Collection of old Wedgwood Ware, and Cabinet of Objects of Art and Virtù, and Choice Library of the late THOMAS DE LA RUE, Esq.

MESSEURS. CHRISTIE, MANSON & WOODS

respectfully give notice that they will SELL by AUCTION, at their Great Rooms, King-street, St. James's-square, on MONDAY, November 12, and seven following days (Saturday and Sunday excepted), at 1 o'clock precisely by order of the Executors, the SERVICE OF PLATE and COLLECTION of OBJECTS of ART and VIRTÙ, formed during the last forty years by THOMAS DE LA RUE, Esq., deceased. The renowned Collection of old Wedgwood Ware, perhaps the most extensive ever formed, comprises the choicest examples, many of which are described in Miss Meteyard's "Life of Wedgwood," including about 40 large Busts of distinguished persons, and a great variety of beautiful Vases, Jardinières, Lamps, and Medallions; also a large number of fine Porcelain, Majolica, and other Works of Art, including fine Enamel Miniatures of Scott, Byron, and Moore, by Essex—Limoges Enamels, antique and cinquecento Camel and Intaglio Gems, Bijouterie, beautiful Carvings in Ivory and Wood, old Sevres, Dresden, and other Porcelain, Bronzes, Canees, &c. The Service of a ancient and Modern Silver and Silver-Gilt Plate comprises Soup and Sauce Tureens, Entrée and Meat Dishes, Salvers, Cups, Tankards, Tea and Coffee Services, Salt-Cellars, Sideboard Dishes, and Ornamental Pieces; a large Service of Queen's Pattern Knives, Forks, and Spoons, a handsome plated Table Service, Ormolu Ornaments, Ornamental and useful Furniture, Carpets, &c. from The Hasells, Beds, the Country Residence of the late T. De La Rue, Esq. Also, the choice LIBRARY, comprising among the Folios, the Dresden Gallery, 3 vols.—Description of Egypt, 15 vols.—Pinney's, "Fables of Æsop," 4 vols.—The Grammar of Ornaments and other Works, by Owen Jones. Among the Quartos, Encyclopedia Britannica, Black's edition, 21 vols.—Edwards's Natural History of Birds, 6 vols.—Art-Journal, 11 vols.—Caylus, Recueil d'Antiquités, 7 vols.—The New Testament, printed in gold, &c.; and among the Octavos, numerous Standard Works—a curious Collection of Ancient Playing Cards, from the Library of M. C. Tutet, &c.

May be viewed Thursday, Friday, and Saturday preceding, and Catalogues had, (price One Shilling each), at Messrs. Christie, Manson & Woods' Offices, King-street, St. James's-square.

Library of the late JAMES F. FERRIER, Esq. LL.D. Professor of Moral Philosophy in the University of St. Andrews.

CROSBY HALL, BISHOPSGATE-STREET.

Important and Unreserved Sale of First-class Wines.

MESSRS. DEBENHAM, TEWSON & CO. FARMER has been instructed by Messrs. H. R. Williams & Co. (who are removing to their more extensive Warehouse and Vaults in Lime-street), to SELL by AUCTION, at Crosby Hall, on THURSDAY, November 22, at 11 for 12, a PORTION of their well-selected Bottled STOCK, consisting of about 1,351 dozen of Ports, among which are some exceedingly fine and rare old Wines, with others of equally choice later Vintages; also, about 525 dozen of Sherries, of selected qualities, and of superior character, and 60 dozen of the first quality Chateau Margaux. The name of the firm is a sufficient guarantee that the character and description of these wines are genuine, and Messrs. Debenham, Tewson & Farmer can, therefore, with confidence recommend the attention of their numerous Clients and the Public to this extensive and important Sale.

Catalogues at the Auctioneers' Offices, 90, Chancery-lane, and Crosby Hall, Bishopsgate-street, where the Wines may be tasted, and Sample Bottles obtained by payment at any time previous to the Sale.

For the convenience of Purchasers, Messrs. H. R. Williams & Co. will, if required, deliver the Wines within five miles of the Bazaar, or to any Railway Station in England, at the rate of 1s. per dozen. If the Wines are to be packed, 1s. per dozen will be charged for packing and cases.

Valuable Books, including the Remaining Portion of the Library of the late THOS. RAW, Esq.—Four Days' Sale.

MR. HODGSON will SELL by AUCTION, at his Rooms, 115, Chancery-lane, W.C., on MONDAY, November 13, and three following days, at 1 o'clock, VALUABLE BOOKS, comprising the Remaining Portion of the Interesting Library of the late THOS. RAW, Esq., of 14, Abchurch-lane, as well as other smaller Collections, including Surtees's History and Antiquities of the County Palatine of Durham, 4 vols.—Whitaker's History of Richmondshire, in the County of York, 2 vols.—Whitaker's History and Topography of Leeds, 3 vols.—Stow's Survey of London, by Strype, with extra plates, 2 vols.—The South-Sea Bubble, 80 curious plates relating to—Chippendale's Designs for Furniture, 200 plates—Bayle's Dictionary, 5 vols.—Grafton's Hardyng's and Arnold's Chronicles—Nichols's Progresses of Queen Elizabeth, and Royal Wills—Dallaway's Heraldry, 23 plates—Whitaker's Deeds of Graves—MacKenzie and Ross's Durham, 2 vols.—Owen and Blackwall's Shropshire, 2 vols.—Allen's County of Lincoln, 2 vols.—Lyonson's Environs of London, 5 vols.—Green's Worcester, 2 vols.—Lord Bacon's Works, by Basil Montagu, 17 vols.—Macaulay's England, 4 vols.—Waverley Novels, 45 vols.—Gentleman's Magazine, 1790, in two vols.—Shelley's Works, 3 vols.—Brunet, Manuel du Libraire, 4 vols.—and many other important Topographical and Antiquarian Books, English Poetry, the usual Standard Historical Works, Classics, and Modern Literature of all Classes, mostly in neat Bindings. Catalogues are preparing.

To Medical and Surgical Schools, Hospitals, Museums, &c.—The Diagrams and Paintings illustrative of Human and Comparative Anatomy of the late PROFESSOR LIZARS.

MR. HODGSON will SELL by AUCTION, at his Rooms, 115, Chancery-lane, W.C., on THURSDAY, November 15, by order of the Executrix of the late Professor Lizars, in One Lot, the Entire Stock of 800 in number of his DIAGRAMS and PAINTINGS illustrative of Human and Comparative Anatomy, comprising the Bones, the Muscles, the Senses, the Digestive Organs, the Organs of Respiration, Dissections of the Head and Neck, and of the Upper and Lower Extremities of the Body, &c. painted in oil by first-class Artists; about 100 framed, the remainder on rollers. The Figures are of colossal size, so as to be distinctly seen at any distance in a large Lecture-hall.

To be viewed, and full particulars had on application.

Important Sale of Reminders, Splendid Galleries and Books of Prints, Chromo-lithographs, Choice Photographs, &c.—Four Days' Sale.

MR. HODGSON will SELL by AUCTION, at his Rooms, 115, Chancery-lane, W.C., on TUESDAY, November 20, and three following days, at 1 o'clock punctually, THE REMAINERS of many important PUBLICATIONS and POPULAR BOOKS of all CLASSES, in cloth and quires, as well as a Large ASSEMBLAGE of SPLENDID PICTORIAL WORKS, in great variety.

Engravings, Chromo-lithographs, Beautiful Photographs, &c. Catalogues of this Extensive Sale are now ready, and will be forwarded on application.

Interesting Library of the late Dr. ANSELL, of Bow—Microscopical Collections.

MESSRS. PUTTICK & SIMPSON will SELL by AUCTION, at their House, 47, Leicester-square, W.C. (west side), on TUESDAY, November 14, the Important MICROSCOPICAL COLLECTIONS of the late Dr. ANSELL of Bow; comprising a Binocular Instrument by A. Ross, with very complete Apparatus, powers 3 in. to 1.6 in.; also the Cabinets of about 1,700 well-selected objects for the same, many of which are of great curiosity and rarity. Catalogues as above.

FOXES' BOOK OF MARTYRS.

Edited by the Rev. W. BRAMLEY-MOORE, M.A. Illustrated with full-page Designs by the best Artists. Complete in One Volume. Plain cloth, 12s.; handsomely bound in cloth gilt, 16s.

THE QUIVER, Volume for 1866.

Illustrated with upwards of ONE HUNDRED ORIGINAL DRAWINGS. Bound in cloth, with plain edges, 7s. 6d.; with gilt edges, 8s. 6d.

CASSELL'S ILLUSTRATED HISTORY OF ENGLAND.

The First Volume of the New Toned Paper Edition.—This volume, extending from the earliest period to the reign of Edward IV., is illustrated with about THREE HUNDRED AND FIFTY ENGRAVINGS. Bound in cloth, price 9s.

THE NORTH-WEST PASSAGE BY LAND.

Being the History of an Expedition from the Atlantic to the Pacific through British Territory, by one of the Northern Passes in the Rocky Mountains. By VISCOUNT MILTON, M.P. F.R.G.S. F.G.S. &c., and W. B. CHEADLE, B.A. M.D. Cantab., F.R.G.S. 8vo. cloth, with numerous Illustrations. Sixth Edition, 21s.

"The title of this very remarkable joint-description of a really notable adventure is not without its significance.... The pluck and energy which characterise the carrying out of this highly-adventurous expedition were as creditable as the practical spirit in which it was conceived, and as the graceful and modest humour with which it is told.... For fuller details of the journey we may safely recommend our readers to consult the letter-press and sketches of Lord Milton and Dr. Chedale."—*Saturday Review*.

DANTE'S INFERNO, with Seventy-six full-page Illustrations by Gustave Dore.

CARY'S Translation and Notes. Crown Folio, price 50s.

"Messrs. Cassell & Co. have published a noble volume of Cary's text and Doré's illustrations.... The publication is a sumptuous one, and reflects the highest credit on the enterprising publishers."—*Saturday Review*.

"It may be said of Gustave Doré that he has raised book-illustrations to the level of that higher art which does not exist to please people, but to move and modify them; and if this new impetus does not die away, book-illustration may, in consequence of it, acquire an influence even more extensive than painting, on account of the ubiquity of the printed art."—*Pine Arts Quarterly*.

ADVENTURES OF BARON MUNCHAUSEN.

A New and Revised Edition, with about 140 Illustrations by GUSTAVE DORÉ; and an Introduction by T. TEIGNMOUTH SHORE, M.A. Complete in One Volume, 4to. cloth, One Guinea.

CASSELL'S ILLUSTRATED GULLIVER'S TRAVELS.

With Explanatory Notes and Life of DEAN SWIFT. By Dr. WALLER, Vice-President of the Royal Irish Academy. With 100 Illustrations by T. MORTEN. Complete in One Volume, cloth gilt, 7s. 6d.; or extra cloth gilt, 10s. 6d.

"This edition of 'Gulliver's Travels' is of marked excellence. Dr. Waller has written a full and critical life of Swift, altogether superior to the memoirs which experience prepares us to expect to find prefixed to a popular edition of a classic author. His annotations, without which the point of many transient allusions would be lost, are judicious and to the purpose. It should also be remarked that Mr. Morten, the artist, has been very successful in catching the humour and meaning of the author, which he has expressed, and sometimes even heightened by his illustrations."—*Daily News*.

SHAKESPEARE'S COMEDIES (Cassell's Illustrated Edition).

Edited, with Notes, by CHARLES and MARY COWDEN CLARKE. Illustrations by H. C. SELOUS. Complete in One Volume, 12s.

"A noble volume nobly illustrated."—*Illustrated London News*.

"A thoroughly handsome and valuable edition of the great dramatist's Comedies."—*Morning Star*.

CASSELL'S ROBINSON CRUSOE.

Illustrated with 100 beautiful Engravings, printed on Toned Paper. 7s. 6d., 10s. 6d., and in morocco antique, 21s.

GOLDSMITH'S WORKS (Illustrated).

The VICAR OF WAKEFIELD and POEMS, beautifully printed on Toned Paper, with 100 Illustrations by ANELAY and MORTEN. In One handsome Volume, cloth 7s. 6d.; full gilt cloth, with gilt edges, 10s. 6d.; full morocco antique, 21s.

CASSELL, PETTER & GALPIN, Ludgate-hill, London, E.C.; and Broadway, New York.

II.
English Children as painted by Sir JOSHUA REYNOLDS: an Essay. By F. G. STEPHENS, Author of 'Flemish Belles.' With Fifteen Photographs, viz.:

Simplicity.
Lady Cockburn and her Children.
The Age of Innocence.
The Infant Johnson.
Lord Morpeth.
The Children in the Wood.
Master Crew.
Boy with Cabbage-Nets.
A Gipsy Boy.
Master Bunbury.
The Strawberry Girl.
Miss Frances Gordon.
Moses in the Bulrushes.
The Sleeping Child.
Pick-a-Back.

In 4to. price 21s. cloth, gilt edges. [In a few days.]

III.
Christianity among the New Zealanders. By the Right Rev. WILLIAM WILLIAMS, D.C.L., Bishop of Waiapu. In post 8vo. with Six Illustrations, price 7s. 6d. cloth. [Just ready.]

IV.
UNIFORM WITH 'SALVATOR MUNDI.'
Apostles and Martyrs: Brief Meditations on the Acts of the Apostles. Selected from Great Divines. With Twelve Photographs after Raffaele, Rembrandt, Rubens, Guido, and Guercino. In fcap. 4to. price 12s. 6d. cloth, gilt edges.

V.
A Sequel to 'Ministering Children.' By MARIA LOUISA CHARLESWORTH. In crown 8vo. with Engraved Title and Frontispiece, price 8s. cloth. [In December.]

VI.
Half-Hours with the Best French AUTHORS: being Short Passages from the most Celebrated Prose Writers, translated into English. With Thirty Engravings, from Designs by Émile Bayard. In super-royal 8vo. price 10s. 6d. cloth, gilt edges.

VII.
My Father's Hand; and other Stories and Allegories for the Young. By Mrs. CAREY BROCK. In square 16mo. Four Engravings, 3s. 6d. cloth.

VIII.
Copsley Annals, preserved in Proverbs. By the Author of 'Village Missionaries.' Crown 8vo. Illustrations, 6s. cloth.

"The five family histories here assembled are commendable in no common degree—full of a sweet and gentle spirit, without sickliness; religious in tone, and the high morals inculcated, without a trace of such sectarianism as would exclude them from the fire-side of church or chapel goer—not without nice touches of humour, clear of exaggeration. It must be a healthy pleasure to write—it is to read—such books for the young as 'Copsley Annals.'"
—*Athenæum*.

IX.
A Memoir of the Rev. Robert T. NOBLE, B.A., of Sidney Sussex College, Cambridge; Missionary to the Telugu People in South India. By the Rev. JOHN NOBLE, M.A., Rector of Nether Broughton. In post 8vo. with Engravings. [Shortly.]

X.
The Knights of the Frozen Sea: a Narrative of Arctic Adventure and Discovery. By the Author of 'Harry Lawton's Adventures.' Crown 8vo. with Map and 44 Illustrations, 7s. 6d. cloth.

XI.
The Cumberstone Contest: a Story for the Young. By the Author of 'A Battle worth Fighting.' Crown 8vo. Frontispiece, 3s. 6d. cloth.

XII.
Parish Work: a Manual for the Younger Clergy. By the Rev. W. W. CHAMPNEYS, M.A., Canon of St. Paul's and Vicar of St. Pancras. In small 8vo. 3s. 6d. cloth.

SEELEY, JACKSON & HALLIDAY, 54, Fleet-street.

WM. H. ALLEN & CO'S
PUBLICATIONS.

The History of the British Empire in INDIA. from the Appointment of Lord Hardinge in 1841 to the Death of Lord Canning in 1852. By LIONEL JAMES TROTTER, late of the 2nd Bengal Fusiliers. 2 vols. 8vo. cloth 1866, 32s.

"Here we have before us the first volume of an eminently readable history. The arrangement of the matter, the style, and, above all, the spirit which pervades his pages, are worthy of great commendation. Mr. Trotter is singularly free from the faults of a partisan writer. The volume concludes with a masterly criticism on Lord Dalhousie's character and services."
—*Calcutta Englishman*, March 17.

Yesterday and To-Day in India. By SIDNEY BLANCHARD, Esq. In 1 vol. post 8vo. [Just ready.]

The Moghul Empire, after the Death of AURUNGER. An Historical Sketch. By H. G. KEENE, Esq., Bengal Civil Service. 1 vol. 8vo. [In December.]

Physical Geography. By Professor D. T. ANSTED, M.A. 1 thick vol. post 8vo. [In November.]

Domestic Life, Character, and Customs of the NATIVES of INDIA. By JAMES KERR, M.A., late Principal of the Hind College, Calcutta. Post 8vo. 10s. 6d.

"A work of considerable interest, abounding in observation and anecdote, and written in a spirit of honesty and fairness."
—*Daily News*, August 5, 1866.

Celebrated Naval and Military Trials. By PETER BURKE, Sergeant-at-Law, Author of 'Celebrated Trials connected with the Aristocracy' and of 'The Romance of the Forum.' Post 8vo. 10s. 6d.

"* This volume contains, in a popular form, a Series of Trials never before collected together—namely, those stirring and most remarkable judicial investigations which have been at various periods connected with the Army and Navy."

The First Age of the Church. By the Rev. H. N. OXENHAM. 2 vols. post 8vo. 21s.

German Life and Manners as seen in SAXONY in the PRESENT DAY. With Illustrations. By HENRY MAYHEW, Esq. Second Edition. 1 thick vol. post 8vo. 7s.

The English Stage, from Betterton to EDMUND KEAN. By Dr. DORAN. Second Edition. Post 8vo. 6s.

London: WM. H. ALLEN & CO. 13, Waterloo-place, S.W.

MR. SKEET

RECENTLY PUBLISHED.

PAST CELEBRITIES WHOM I HAVE KNOWN. By CYRUS REDDING, Author of 'Memoirs of Thomas Campbell,' &c. 2 vols. 21s.

Contents.

George Canning
J. M. W. Turner
William Hazlitt
Taine
Dr. Farr
Rev. Caleb Colton
Dr. Wolcott
Augustus W. Schlegel
William Beckford
Daniel O'Connell

The Rt. Hon. R. L. Sherr
Richard Cobden
Madame De Staël
John Clare
Metcalf
Horace Smith
Currier
B. B. Haydon
Belzoni
Adam Czartoryski.

"The 'Past Celebrities' are introduced to us with their virtues and their imperfections; we see them as they were; and so delightfully is the history detailed, that the characters appear to act before us. The writer calls his pages 'the random records of a few remarkable individuals among the many it has been the author's chance to encounter in society.' This is a modest way of speaking of memoirs which, for the numerous original anecdotes contained in them, will doubtless be often referred to in the future. Cyrus Redding has enjoyed the friendship of some of the most eminent men of the last generation, and not a few of the present; and to those who care to see how such men lived, the present volumes will offer much of deep interest."—*Public Opinion*.

The MYSTERY of the SOUL. A Search into Man's Origin, Nature, and Destiny. By S. W. FULLON, Author of 'The Marvels of Science.' 1 vol. 10s. 6d.

"Mr. Fullon is a firm believer in Revelation; and this book is likely to stimulate further inquiry. It takes up questions of great moment, and presents them in that interesting way which independent thinking is sure to produce."—*Nonconformist*.

10, King William-street, Charing Cross.

By JOHN CONINGTON, M.A.,

Corpus Professor of Latin in the University of Oxford.

"Had the Oxford Professor been minded to follow in the steps of DAVENANT, he would have brought to the task an amount of scholarship to which that poet had no pretension; and, we may add, no contemptible share of that *afflatus* which goes to the making of a true poet. From our remembrance of Prof. CONINGTON's translation of the Odes of HORACE, good as it was, we were scarcely prepared for so happy a venture as his new translation of the Æneid; but perhaps the secret lies in his having laid to heart the doctrine which he enunciates in his preface, that an ode of HORACE is something to dwell upon, to scrutinize minutely, while a poem like the Æneid is something to read rapidly and continuously. Impressed with this conviction, and bent upon working it out in practice, he has paved the way to appreciation and mastery of Virgil's graceful epic by English readers who would otherwise have rested content with a very superficial acquaintance with Dryden's version; and he has produced a poem which, given a smattering of mythology, might be read from end to end with as little sense of fatigue as the narrative poems of SCOTT. Though we might cite hundreds of such memorable lines memorably rendered, this by itself would be doing scant justice to the sound judgment which has discovered in the octosyllabic metre, with its interposition of occasional six syllables, a congenial representative of Virgil's hexameter. Upon this indeed the ordinary reader of the present translation may safely rely—that he traverses his road with a purer and less erring guide than any who have gone before him. In reading with his Commentary, published in

the *Bibliotheca Classica*, ready to our hand, the first six books of Prof. CONINGTON's translation, we have found abundant confirmation of an opinion which we have more than once expressed, that no amount of explication puts a dark passage in so clear a light as the clean-cut decisive lines of a scholarly translation. Were he to leave no other fruit of his Latin Professorship save this translation, many difficulties would have been removed from the path of intelligent students by the bare perusal of it, as effectually as in fact they are by his Commentary. Often a doubtful sense is fixed; often, too, the implied sense of words and phrases comes out clearer in translation than in the most painstaking and lucid note. It is scarcely possible within our present limits to do justice to the critical and poetic qualities displayed in this translation. Take it where we will, the translation comes up to the mark, and will more than satisfy those who hold Virgil among the three or four greatest names of Roman literature. A flaw or two may be discoverable to the microscopic eye of prejudice, but let the objector beware of hasty conclusions. To ourselves a second examination of what seemed at first a doubtful interpretation has invariably resulted in a verdict for the Professor. In a word, we cannot hesitate to record our opinion that, among the many good translations which English literature boasts, there has been none more true to the spirit and the letter of the original author than this version of Virgil's Æneid by the Oxford Latin Professor."

SATURDAY REVIEW.

MR. FROUDE'S HISTORY OF ENGLAND.

Vols. I. to X. in 8vo. may now be had, price 7l. 2s. cloth,

HISTORY OF ENGLAND

FROM THE FALL OF WOLSEY TO THE DEATH OF ELIZABETH.

By JAMES ANTHONY FROUDE, M.A.,

Late Fellow of Exeter College, Oxford.

REIGN of HENRY VIII., Vols. I. to IV., Third Edition, 54s.

Vols. V. and VI., EDWARD VI. and MARY, Second Edition, 28s.

Vols. VII. and VIII., forming Vols. I. and II. of the REIGN of ELIZABETH, Fourth Edition, 28s.

Vols. IX. and X., ELIZABETH, Vols. III. and IV. price 32s.

LIFE OF ARCHBISHOP WHATELY.

Just published, in 2 vols. 8vo. with Two Portraits, price 28s.

LIFE AND CORRESPONDENCE OF RICHARD WHATELY, D.D.,

LATE ARCHBISHOP OF DUBLIN.

By E. JANE WHATELY,

Author of 'English Synonyms.'

"Those who knew the late Archbishop of Dublin only by his published works, will gain a very much higher impression of him in every way than they were likely in that manner to have formed, by this admirable selection from his correspondence and this simple narrative of his laborious life."

SPECTATOR.

"No memoir of Archbishop Whately has yet been published so complete in every respect as that which is now produced by his daughter. She has proved her heritage of talent by the ability displayed in its compilation, and she deserves especial commendation for the impartiality with which she writes."

MORNING POST.

"Miss Whately's memoir of her father, the late Archbishop of Dublin, modestly introduced, is really all that one could wish. Dr. Whately speaks for himself through a well-arranged sequence of letters, with connecting facts simply narrated; and the vigorous honesty with which his healthy and kindly mind worked becomes manifest even by the worst bigots whom his liberality of thought offended."

EXAMINER.

HURST & BLACKETT'S
NEW WORKS.

The LIFE of JOSIAH WEDGWOOD.

From his Private Correspondence and Family Papers in the possession of Joseph Mayer, Esq. F.S.A., Francis Wedgwood, Esq., C. Darwin, Esq. F.R.S., Miss Wedgwood, and other authentic sources. By ELIZA METEYARD. Dedicated to the Right Hon. W. E. GLADSTONE. Complete in 3 vols. 8vo. embellished with Portraits and above 300 beautiful Illustrations. 42s. bound.

"We have to congratulate the authoress on the publication of her Life of Wedgwood. We can award her the praise due to the most painstaking and conscientious application. She has devoted her whole mind and energy to her subject, and has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The two volumes before us are in themselves marvels of decorative and typographical skill. More beautifully printed pages, more creamy paper, and more dainty woodcuts have seldom met our eyes. It is rarely that an author is so well seconded by his contributors as Miss Meteyard has been by her publishers, printer, and the staff of draughtsmen and engravers who have contributed the numerous illustrations which adorn this sumptuous book."—*Saturday Review*.

A BOOK ABOUT LAWYERS. By J. C. JEAFFRESON, Barrister-at-Law, Author of 'A Book about Doctors,' &c. 2 vols. 8vo. 34s. bound.**TRAVELS in FRANCE and GERMANY in 1865 and 1866; including a Steam Voyage down the Danube, and a Ride across the Mountains of European Turkey, from Belgrade to Montenegro. By Capt. SPENCER, Author of 'Travels in Circassia,' &c. 2 vols. 21s.**

"The clearness, good temper, and sound sense with which Capt. Spencer describes every subject that comes under his notice, the picturesque variety of his descriptions, and the minuteness as well as comprehensiveness of his observations, can be appreciated only by reading his volumes."—*Daily News*.

FIELD-MARSHAL VISCOUNT COMMERBERG'S MEMOIRS and CORRESPONDENCE. From his Family Papers. By the RIGHT HON. MARY, VISCOUNTESSE COMMERBERG, and Capt. W. W. KNOLLYS. 2 vols. 8vo. with Portraits, &c. 30s. bound.**A WINTER with the SWALLOWS. By MATILDA BETHAM EDWARDS. 8vo. with Illustrations. 15s. [Nov. 16.]****THE SPORTSMAN and NATURALIST IN CANADA; or, Notes on the Natural History of the Game, Game Birds, and Fish of that Country. By MAJOR W. ROSS KING, F.R.G.S. F.S.A.S. "Good sense, good feeling, and good humour characterize these 'Lights and Shadows' as strongly as shrewdness, observation, drollery, and originality mark them."—*Star*.

CHEAP EDITION of CHRISTIAN'S MISTAKE. By the Author of 'JOHN HALIFAX.' Illustrated by SANDY. 2s. bound, forming the New Volume of 'HURST & BLACKETT'S STANDARD LIBRARY.'**THE NEW NOVELS.****MADONNA MARY. By Mrs. OLIPHANT, Author of 'Agnes,' &c. 3 vols.****ANNALS of a QUIET NEIGHBOURHOOD. By GEORGE MAC DONALD, M.A., Author of 'Alice Forbes,' 'David Elginbrod,' &c. 3 vols.**

"Mr. Mac Donald is a true poet. The 'Annals of a Quiet Neighbourhood' are as full of music as was Prospero's Island; rich in strains that take the ear captive when they are first heard, and afterwards linger long upon it. Many of the scenes Mr. Mac Donald has painted are very beautiful and entralling. The plot is of a very interesting character, and there is powerful ability displayed in the creation of the characters."—*Saturday Review*.

"The charm and value of Mr. Mac Donald's work need not be sought. They present themselves unasked for in the tender beauty of his descriptions, whether of nature or of life and character; in his almost supernatural insight into the workings of the human heart and in his unceasing fertility of thought and happy exactitude of illustration. Whoever reads the book once will read it many times."—*Pall Mall Gazette*.

KINGSFORD. By the Author of 'SON and HEIR.' 2 vols. 21s.

"Kingsford is one of the most interesting stories we have read this season, and we are sure our readers will thank us for recommending to them a work so attractive and entralling. The plot is of a very interesting character, and there is powerful ability displayed in the creation of the characters."—*Sun*.

LORDS and LADIES. By the Author of 'MARGARET and HER BRIDEMAIDS,' &c. 3 vols.

"Lords and Ladies is one of the most charming books with which the literature of fiction has been enriched this season. The truth and the value of the moral of the story will recommend it as highly as the vivacity and humour of its style and the ingenuity of its construction."—*Morning Post*.

RACHEL'S SECRET. By the Author of 'THE MASTER of MARTON.' 3 vols.

"A deeply interesting and affecting story, artistically and powerfully wrought. Whoever takes up the first of these delightful volumes is sure to read them all."—*Morning Post*.

CHRISTIE'S FAITH. By the Author of 'No Church,' 'Owen,' 'Mattie,' &c. 3 vols. [Just ready.]**MY PALE COMPANION.**

LONDON, SATURDAY, NOVEMBER 10, 1866.

LITERATURE

Charles Townshend, Wit and Statesman. By Percy Fitzgerald, M.A. (Bentley.)

THE Townshends may not have come in with the Conqueror, but the fifth century begins with this year since a Norfolk squire of the name left not only broad but numerous acres to his heir, who, something better than a mere squire, became a Chief Justice of the Common Pleas, and was the only man of note among the Townshends for a long course of years, till one turned up of sufficient merit, or wealth, for James the First to make a baronet of. This baronet's son, Horatio, was grateful for the honours conferred on his house by the Stuart, and he was a faithful adherent to the Stuart cause in return. In the eventful year 1660, when the Royalist feathers were again flaunting in Cavalier caps, and Commonwealth men folded their hands and sighed for the good times that seemed going or gone for ever, Norfolk had elected Sir Horatio for one of its representatives, and the Baronet was one of the delegates who were deputed to wait on Charles the Second, at the Hague, to beg of him to "return to his dominions, and take the government thereof into his own hands." The King, when he got his own again, rewarded the friends and servants who had helped him to such pleasant consummation, and among the honours that were flung about, and might be had for the catching at them, two fell into the outstretched hands of Sir Horatio; but not at once. He caught a baron's coronet at the beginning of Charles's reign, and a viscount's towards the close of it. The first honour was not a slight one; it came to the new recipients with increase of the old distinction. Charles was the first king who assigned to barons the right of wearing coronets.

It was a brilliant day when Sir Horatio and his fellows were made peers, of various degrees, in Whitehall. There were a dozen made on the same day, and with great solemnity. Crowds of Cavaliers were there to see, and there were not wanting light-fingered gentlemen among them who profited by the occasion to improve their wardrobe. Lord Sandwich went down in a new beaver, and though he set his page to look after it, some sharp fellow carried it off, and left his own old battered felt hat in its place. The "necessary end" came, when it would come to the first and second viscounts. A third succeeded, in 1738, who was the undistinguished father of two distinguished sons. His family numbered more, but his two eldest boys, George and Charles Townshend, have lived in history. The first was at Quebec with Wolfe, was Lord Lieutenant of Ireland, and a wit. The second was the original of the able sketch here drawn of him by Mr. Fitzgerald. He was a greater wit than his brother, and a statesman to boot. Of the brothers, George was a wonderful "caricaturist" and Charles a mimic of the peculiarities of their fellows; but this raised enemies against them, and, once at least, put Charles Townshend, when a student at Leyden, in peril of his life, a peril from which he escaped by backing, not too gracefully, out of a duel.

The blood of the "wit and statesman" has failed in the main line. He had three sons, who died childless. His two daughters married with a Wilson, of Tyrone, and a Tempest, of Lincolnshire. His elder brother, George, however, took care, as it was said, of the blood. The Rev. Frederic Barlow drolly says of him, as Lord Lieutenant of Ireland, that "the nobility

and gentry of that kingdom were highly pleased with his affability and conviviality; and as they pride themselves greatly upon being professed votaries to Bacchus, his lordship's condescension in this respect obtained their good opinion and esteem. In these social conferences he found means to feel the weak sides of some of the first-rate patriots, and after he had drunk them down, the people of Ireland began to discover that jolly Lord Townshend was their Lord Lieutenant, an officer of the Crown, whose duty it was to obey the orders of his sovereign, and the instructions of the King's ministers, to advance the honour and interests of his master."

Mr. Fitzgerald but slightly sketches in the figure of George near that of his brother Charles. The former, whatever the Irish may have thought of him, undoubtedly preferred them to the Scots, in reference to whom he wrote to George Selwyn, "Our mirth is riot without any meaning, and our acquaintance society without any friendship." When a sudden change of ministry brought over Lord Harecourt to Dublin Castle, the new lord surprised the old one at a carouse, at three o'clock in the morning, "but though thus awkwardly surprised, he was ready with a jest. 'Your Lordship,' he said, 'cannot say you found us napping!'"

Charles Townshend (born in 1725) was emphatically the "son of his mother." His father the Marquis was a dull man of no note but for his dullness; but his mother, who was separated from her husband, once Audrey Harrison, of Balls, was a woman of wit, amusing impudence, of candour that never allowed her to hide a bit of scandal, and of that peculiar sort of licentiousness which made her, in imagination, of the very easiest virtue with everybody's husband. She and Walpole were a rare couple of gossips, particularly when reputations were discussed. On one of these occasions, he asked at the end of a story very damaging to a lady, "Was there proof?"—"Proof!" cried the eager scandal-dealer, "she was proof all over." This reply illustrates the fineness and the confusion of some of Lady Townshend's thousand "good things." The elder son, George, was a wit too, but of less brilliancy than his brother Charles, who, after a gay, perilous, but not altogether profitless, career at Leyden, and a joyous but not altogether idle life at Oxford, entered Parliament, not much to the satisfaction of his own father, and at the age of seven and twenty, and first in a debate on the Marriage Bill, was the delight of a House accustomed to intellectual diversions of the sort, for his wit, his strong sense, his readiness, his certainty to say the right thing in the right place, and the brilliant courage and gay light-heartedness with which he charged whole phalanxes of his adversaries, who cheered the irresistible victor by whom they were so gallantly overcome. He opposed the Bill against clandestine marriages, as depriving noble young fellows of a chance of making their way with young heiresses of more wealth than rank, and then—the Nemesis of Love!—wedded with a dowager of quality.

The ways of social life in those days were rather of advantage to the legislative life of the House of Commons. Everything was in the extreme; few people of mark had common failings, and some of the very wickedest of the foremost men were nothing less than charming fellows in the public eye. There was, perhaps, no more real immorality than now; but it was not so disparaging to a man to be immoral then as now. There was certainly more wit than now, perhaps because the duller victims of it never took offence! When an ex-minister

who had been robbed by ordinary thieves of his star, garter and other adornments, and soon after saw Henry Fox come into the House blazing with diamonds, he pretended to see in the latter the property that had been stolen from him. Fox laughed at the innuendo as heartily as anybody. The wit and the sentiment seem to have been more brilliant and singular. Before the minister Pelham died he was implored "at a dangerous crisis to take to his bosom a few private vices." After his death, when the servility he taught, and was paid with for his teaching, was remembered, Selwyn was at the sale of Pelham's effects; and when the French dinner-service was put up, "Lord," said Selwyn, "how many toads have eaten off those plates!"

After Pelham's death came a struggle for his great political inheritance. In that struggle appeared Pelham's brother, the Duke of Newcastle, against various adversaries, and, it may be said, against many friends. "It is impossible not to admire the ingenuity," says Mr. Fitzgerald, "with which this clever schemer, who has not had justice enough done to his abilities, contrived to baffle them all." Macaulay has designated Newcastle's conduct in this struggle as "childish and base," but Mr. Fitzgerald very well shows that on this occasion it was neither the one nor the other. It was a time when the Minister kept a catalogue of the men who were or who might be bribed. One of the most picturesque incidents of this volume is that which represents Newcastle, Henry Fox, Roberts, and the King, with Pelham's book of the corrupt before them. Each individual would probably have desired to possess it; but the King, knowing the danger which attended such a possession, quietly thrust it between the bars of the grate, and stood over it till it was consumed. He may have thought of that foreign statesman, on the marble above the fireplace of whose library was engraven, "Optimum secretarium."

Although employed in minor ministerial duties, "taking Treasury money and holding Treasury offices," Charles Townshend openly found fault with his employers, and by his audacity scared them from taking posts, the not offering of which to himself had been matter of offence. Indeed, as Mr. Fitzgerald says summarily, "the ministerial Actæon was torn by its own dogs." There was a wonderful mixture of earnestness and carelessness in the parliamentary debates of those days—days when the *ayes* remained in the house, and the *noes* went into the lobby, and brilliant wits belonging to the latter remained to talk and banter with each other till they were shut in and were counted with the party against which it had been their intention to vote. But there was also something more than mere carelessness—conduct which made Charles Townshend at least "intolerable as a servant and dangerous as an ally." Often, we are told, when the latter had made an attack, he would cross the House, and, sitting down beside those he had just assailed, actually turn into ridicule the men of his own party who were defending their common cause. Mr. Fitzgerald calls this "a sort of wantonness," and he too good naturedly ascribes it to "a natural contempt and disgust at the miserable pretences and hollow political shams of the time, which he saw through and could have exposed." It was mere want of stability of character. Change of circumstances may bring change of opinion, but a man can hardly have opposite opinions on the same question in the same debate. We never heard of more than one *no*, and he was an impulsive Irishman (Mr. ...). In the

last Irish Parliament he spoke boldly against the Union; but a bribe was offered him (by letter) during his speech, and he ended what he had to say by voting in a contrary sense to that of his words. It all depends upon circumstances. The hands of a clock for ever change their direction, to our great profit; but what would become of us if the magnet took to the same variations as the hands on the dial! With all this, the parliamentary onslaughts of that day were events of transcendent interest and excitement. The men whose words were glittering falchions, with the flash of which they blinded, and with the stroke of which they mortally smote their adversaries, were born for the fight, and heartily loved that to which they were born. Some were mighty parliamentary captains. Others resembled this Charles Townshend, of whom Mr. Fitzgerald remarks with truth, that he "was a very Malay in his politics, and 'ran amuck' at friends and foes, according to the humour of the moment." Walpole appreciated Townshend at his true, and that a high value. "A grain less of parts," says Walpole, "and a scruple more of modesty, and he had been silenced for ever; but his self-confidence and audacity carried him through." This refers to a particular occasion, when Townshend, by his parts and audacity, extricated himself from the circle of his adversaries, hemming him in; but it may be applied to him generally. We think that he even "lightened" more brilliantly in debate than in private society. Here is a drawing-room group of exactly a hundred and ten years ago; the thing would not do now:—

"All this time he was in a tumult of noisy spirits, and seems to have been full of careless abandon and reckless humour. His wife's noble relations were a little astounded at the free treatment of them. He respected them no more than he did his own. One night, when the Duchess Dowager of Argyll, his mother-in-law, was 'bawling' to Lady Suffolk, who was very deaf, he openly mimicked her before the whole company, and called out in the same voice, 'Large stewing oysters!' And some one was praising Lady Falmouth's jewels, which covered her waist, and was saying what a fine stomach it was, when he said, 'My lord has a finer!'"

This seems to us now in the very worst taste. To judge of Townshend by this we should conclude him to have been a malignant man; yet Walpole asserts that he had "too little ill nature" even to keep going his little political sheet, *The Test*. There was ample scope for the play of his satire. Grand as some of the Commoners were in debate, a discussion on weights and measures, connected, as was said in 1766, with "what is called the budget," brought out a remarkable illustration of the universal ignorance. "It came out that hardly a member knew what was Troy Weight." It further appears that at this time members could speak in reply to each other as often as they chose. The elder Fox spoke five times in one discussion on one question, and listening members used, in audible *asides*, to fling little sarcasms to exasperate the speaker. That there was a good deal of acting on the side of some of the latter, the following sketch of the elder Pitt will amply show. The occasion was an inquiry into the conduct of the preceding ministry, and especially the elder Fox:—

"Pitt, when the inquiry came on, got up from his gouty chair and came down to the house to act, and over-act, that always favourite part of his—the sick man, racked with pain, coming at the call of his unfortunate country. It was a broiling day, but he was wrapped up in an old beaver coat and waistcoat and a scarlet roquelaure lined with fur, with his gouty arm out of the sleeve and hung in a crape sling. Over his legs were drawn huge stockings. But it was noticed that, in his excitement of speaking, he forgot the ostentatious debility of

his helpless arm, and at glowing passages it was withdrawn from the sling and flourished with all the ease of the sound one."

Of Townshend's method of "getting up" his speeches we have this account:—

"A clerk who had been with the family let Mr. Malone into the workshop, where the fireworks were got ready. He said Charles Townshend's habit was to dictate his speeches to him for hours, on one side of the question,—then go out, talk over the matter with people of different views and opposite opinions, and then dictate a fresh speech. In this way he exhausted the subject. When the time for him to speak came, he never spoke what he had so carefully prepared; but passages which had been studied insensibly suggested themselves, and were presented in a new and more spirited setting. He had, therefore, all the security of preparation without its constraint and formality, and this seems to be the best shape of eloquence—far better than the loose carelessness of extempore speaking, and the artificial monotony of what had been got ready beforehand."

As we proceed from this point, however, we confess to a decrease in our admiration for the wit and the statesman. The wit was bright and the statesmanship brilliant; but there was little but selfish or vain impulse to move either; and it has been said of him that he had not even art enough to hide his vanity. In the various ministries of his time he held office at the Admiralty, was Treasurer of the Chamber, and in 1761 he was Secretary-at-War. Subsequently he became Lord of Trade and Plantations. In 1765 he supported Granville's Stamp Act. In the Rockingham administration he appeared as Paymaster of the Forces; and then "the Weathercock," as he was called, supported the repeal of the Stamp Act which he had helped to pass. A newspaper wit who spoke of him as being ill in the country, with a pain in his side, "but it is not said in which side," stole the point of the joke from Townshend's witty mother. A hundred years ago, 1766, Townshend was Chancellor of the Exchequer, and leader in the Commons in the Chatham administration. In that capacity, he who had said he dared to tax the Americans, and would do it, brought in the famous Bill for levying duties on certain articles, *tea*, &c., landed in American ports, which lost us a colony, and laid the foundations of the United States. And yet his nominal chief was Chatham, who was opposed to the tax. He was on the very point of becoming chief of a new ministry himself, in 1767, when a putrid fever closed his brilliant, but not beneficent, career. A want of earnestness and sincerity, seeming or real, marred all he did or attempted. He was equally able and willing to support both sides of a question, to scoff at his own arguments and beat them down by others. He was one of the most intractable of men that ever perplexed his party, his leaders, his followers, his friends and his enemies. In the flashes of his wit there is the same want of *reality*. The joke or sarcasm is real enough, sometimes too real and too rude, and the very brightest samples rather excite sympathy with the victim than with his tormentor. It was at no time so good as his mother's. Sometimes it was neater, as when the Bill for the increase of the judges' salaries was carried by 169 to 39, he said "The Book of Judges has been saved by the Book of Numbers." But we see no wit in his remarking loud enough for the slow-speaking Bute to hear him, and in Bute's voice, "Mi-nute guns! Mi-nute guns!" There was more of true humour in his observation on a dissolved House of Commons, "The roads will be as dangerous as if the army were disbanded," also in his description of Bute's patched-up government, as "a pretty lutestrung administration that would do very

well for summer wear." In a word, too, he hit off the shadowy Duke de Nivernois as "the preliminaries of a man sent over to arrange the preliminaries of a peace." But Townshend's wit was not always of this innocent cast. He could make his own wife blush by the exercise of it as they sat at table before their own servants. In later days the Prince of Wales showed his humour in the same style in presence of his mother, Queen Charlotte, who would put her fan before her eyes and say, "George! George!" Townshend used to affect to look upon Barré as a ruffian to whom you should offer nothing but raw meat; but the ruffian element was in Townshend also, and never more discreditably than when, standing close by Mansfield in the House of Lords, who was delivering some of the constitutional platitudes of which he was so fond, Townshend turned brusquely to a friend, and said, loud enough to be heard by the speaker, "What a damned, crane-necked fellow it is." We see no trace of the wit, the statesman, or the gentleman in this. The sarcasm of his mother was always in better taste, without being less severe. She described the royal family of her day, who were so fond of going out to suppers and public shows, in a few true, severe, yet not ill-mannered words: "This is the cheapest family to see," said Lady Townshend, "and the dearest to keep, that ever was."

Mr. Fitzgerald has more admiration for his hero than the actual merits of the latter warrant. Thence he has some difficulty with him. He is unable to sustain our interest, or keep up for the wit and statesman the respect with which we started. In his sketches of Sterne, Dr. Dodd and Charles Lamb, we think Mr. Fitzgerald was more successful, and those works, however various in degrees of merit, were more attractive than is the volume before us, which treats (necessarily) largely of politics. Nevertheless, the volume addresses itself to a numerous public. The author has done the very best with his subject; but there is the lack of variety and incident which characterizes his former sketches; and we are a little relieved, rather than distressed, when a good honest fever takes off the most gorgeous weathercock of his day.

Mr. Fitzgerald has, however, given us a fair portrait of Charles Townshend. We will add a few words to complete our own outline of the family picture. George was created a marquis for his various services; he belongs to the Noble Authors, and his poems, printed at Rainham, were circulated by his wife among their friends. On his son and successor was accumulated the additional honour of the Earldom of Leicestershire. It was an earldom of the county, and the eldest son of the Marquis had no shadow of right to call himself Earl of Leicester. In the time of the third marquis arose one of the most extraordinary "peerage cases" that ever came before the House of Lords. The third marquis married a Miss Sarah Gardiner, whose sudden and terrible hatred of her husband, for whatever reason, drove her to seek the protection of Mr. Margett, and he extended it so fully that they lived together like married people, with every appearance of decorum,—lacking the marriage ceremony. Their children were "legally" those of herself and husband. The eldest son grew up and sat in Parliament as Earl of Leicester,—a younger boy was Lord — Townshend. The Marquis's next heir sought to establish his own right of inheritance, but the Marquis was so far his enemy, as well as his own, as to offer to acknowledge the legitimacy of the children in question for certain pecuniary considerations! It should be noted that the marriage of the Marquis and his wife was never annulled. The case, however,

stirred the very hearts of the Lords, though different views of it were taken by great law authorities. But ultimately a decision of the House pronounced the children we have named as illegitimate, and so settled the heirship that it fell to the eldest son of the second son of George. Thus the title remains in the line of the roystering Lord Lieutenant, the second in command at Quebec, the lucky duellist, caricaturist, and amateur poet. The Marquis who descended from the second son of George had many of the Townshend characteristics. He was educated at the St. Alban's Grammar School, where he was distinguished by his eccentric habits, the ease with which he surmounted all the difficulties in a scholar's path, his bull-dog courage, and his readiness to put it at the service of young school-fellows oppressed by elder tyrants among the *alumni*. His eldest son is the present Marquis, and how often he is abroad on the highways seeking whom he may defend, succour, prosecute or punish, is it not told in the columns of our daily journals?

The Lake Dwellings of Switzerland, and other Parts of Europe. By Dr. Ferdinand Keller. Translated and arranged by John Edward Lee. (Longmans & Co.)

THE winter of the year 1853-4 was singularly dry and cold, and the lakes of Switzerland were at the lowest level that has ever been known. This circumstance afforded the archaeologist an opportunity of examining tracts of land which had for centuries been withdrawn from the observation of men. The opportunity was not lost, and the discoveries then made at Ober Meilen, on Lake Zurich, disclosed the fact that, at a very early period, large groups of families lived near the borders of the lake on platforms, supported above the shallow water by piles driven into the bed of the lake. This discovery has been followed by others, not only in Switzerland, but in Italy, Bavaria, Ireland, Scotland, and other countries, which prove that this mode of settlement was common to many countries, and it is even supposed that it extended to all parts where the inhabitants were of the Celtic race. It is not surprising that this subject of Lake Dwellings is now one of the most interesting branches of antiquarian research.

The archaeologists of Switzerland, and especially the Antiquarian Society of Zurich, under their able President, Dr. F. Keller, who is the author of this book, have shown a laudable zeal in working the interesting field of inquiry which was thus opened to them. The earth and the water which contain these records of early habits have not only been examined, but may almost be said to have been cross-examined, so searching and minute has been the nature of the inquiry into the evidence they offer.

The results of this examination are now for the first time laid before the British archaeologist. The present volume contains the substance of various Reports made by Dr. Keller to the Society over which he presides, and includes that of a sixth Report made by him, and published within the last few weeks. The contents of these several reports have been consolidated and re-arranged by the translator, and corrected according to the latest inquiries by Dr. Keller himself, so that this book may be considered as giving in a readable form all that is now known in Switzerland concerning these lake dwellings. The author declares his object to be generally to confine himself to the statement of facts, and to leave the field of speculation to others. It must not be supposed from this that where the facts appear to lead directly to

a certain result, he does not state that result; but in all cases where the facts are inconclusive, he abstains from speculation, and waits till the discovery of further facts, which is daily being made, shall decide the question. From these circumstances, it would appear that Dr. Keller, though an antiquary, can admit an error when discovered; and further, that he founds his theories upon his facts, instead of moulding his facts to his theories. These two points we commend to the consideration of archaeologists in general.

We have been somewhat particular in our statement of what this book is, because we feel it is impossible to give even a sketch of the very interesting matter it contains. A few statements concerning one of the more important discoveries will probably give a better notion of the contents of this work than any more general description.

A part of the peat-moor of Robenhause, which lies south of the Lake of Pfäffikon, was formerly covered by the lake, and on it was formed one of these early settlements. The space covered with piles is nearly three acres, and forms an irregular quadrangle about 2,000 paces from what was formerly the western shore of the lake, and about 3,000 from the eastern shore. The communication with the shore was to the eastward, by a bridge or stage, of which the piles are still visible. The piles on which the settlement rested consisted partly of whole and partly of split stems, ten or eleven feet long, sharpened at the end with stone celts, and driven into the mud at from two to three feet apart. On these a platform was formed of cross timbers and boards, fastened to the poles by wooden pins. The outermost piles were bound together with hurdle-work of branches as a defence for the settlement. It is considered that at least 100,000 piles must have been used in this structure.

In and about the remains of the ancient floorings (which were made of gravel and clay) are found wheat, barley, flax, string, woven cloths, &c., in great abundance. Here also are found remains of animals which had served for food, and which would appear to have been thrown into the water through openings in the platform, with berries, cracked nuts, bones, and scales of fish. In some cases, quantities of wheat and barley are found, together with bread; in another, flax is seen, with its different manufactures; and elsewhere these things are met with close to an earthenware cone used for the loom. But in this remarkable district we are enabled not only to obtain a general notion of the formation of the settlement, but we can ascertain the size of the huts, and, to some extent, discover the industrial habits of the people who inhabited them. Observations lead to the conclusion that, in a space of 150 feet long by 40 feet broad, where the Aar canal runs through the settlement, there were six separate huts standing close to each other. At each of six different places, all at equal distances, were found meal-stones, heaps of corn, pieces of woven and platted cloth, and stores of raw flax, together with clay weights belonging to the loom, and great stones which formed the hearths. It cannot be doubted that each of these denotes a hut inhabited by a family, and that we see the family arrangements for producing food and clothing. The length and breadth of the hut correspond precisely with those of the dwellings of another settlement at Nieder Wyl, being 27 by 22 feet.

The stables of the cattle were distributed between the huts, and in the peaty mud there has been discovered a horizontal bed, from two to ten inches thick, composed entirely of the dung of cows, pigs, sheep and goats, together

with the remains of the litter which they used. The litter for the cows was of straw and rushes, that for the smaller animals was of sprigs of fir and twigs of brushwood.

We have spoken of this as a settlement; but, in fact, it is proved that there were no less than three successive settlements upon this spot, the first and second having been destroyed by fire, which would appear to be the natural end of a lake dwelling. The stakes on which the three settlements rested are all distinct and at different levels. From the thickness of the beds of peat formed during their existence, it is thought that the first settlement was not of long duration; and that it was destroyed by fire is proved by the existence of a bed of charcoal. The second settlement would appear to have been of longer duration. The third settlement would seem to have lasted a long time, and not to have been burnt; and it is conjectured that the inhabitants were forced to leave it by the increase of the peat. To the conflagrations which destroyed the first and second settlements we owe the preservation of many of the relics, as all the corn, apples and manufactured flax which were preserved were in a state of carbonization.

The objects found in this and the other settlements which have been discovered are not only minutely described in the present work, but are illustrated by a large number of plates, which are principally lithographic transfers of the plates drawn at Zurich for the several Reports we have referred to. These objects consist of stone celts and tools of various kinds, some of a very rough character, and others worked with much greater dexterity, many of them being formed of stone not found in Switzerland, and some of stone which is not known to exist in any part of Europe. There are also many articles of horn and bone, of bronze and iron. The pottery is of very rude construction, as it appears to have been made by the hand alone, the potter's wheel being unknown.

The time at which these settlements were inhabited is, unfortunately, one of the points on which little information can be obtained. That it was in what are known to antiquaries as the Stone, the Bronze, and the Iron Ages is proved by the different objects made in these several materials which have been discovered. This, however, does not tell us much, as it is by no means clear when those ages were, even supposing them to have been the same in different localities, which, we agree with Dr. Keller, is most improbable. It is curious that no human remains have yet been found.

The translation and arrangement of Dr. Keller's Reports has been well performed by Mr. Lee; and we can only wish that for the future the examination of these interesting remains may be prosecuted with the same energy and intelligence as heretofore, and that the fruit of these researches may be offered to the English public in a form as good as that of the volume before us.

The Fourteenth Londoniad. By J. T. S. Lidstone. (Birmingham, published by the Author.)

THE vitality of some rubbish is wonderful. The lower forms of literary life survive shocks by which higher developments would be utterly crushed, and even seem to thrive on adverse criticisms, as donkeys contrive to extract nourishment from thistles. Here is the fourteenth annual issue of what we may confidently declare to be the greatest nonsense ever put into a metrical form—nonsense which ceases to be ludicrous only when it becomes mischievous, and which always suggests the idea of folly except when it points in the direction of something worse. Mr.

Lidstone annually devotes his energies to the task of celebrating—in plain English, of puffing—the wares of those tradesmen who think it worth their while to subscribe for a sufficient number of copies of his books in return for his eulogiums, and he appears to find a ready market for his poetic wares. As a general rule he praises every one whom he names; but there are exceptional cases in which he attacks individuals with all the ferocity of which his pen is capable. From the report of certain law proceedings which took place not long ago, we learn that he has been made to apologize for one of these lucubrations. The world is indebted to the firm at Birmingham which came forward to punish him, for his book is a disgrace to literature, and the sooner it can be suppressed the better. It is not because it contains nothing but utter rubbish and nonsense that we object to it, but because its author evidently trades upon his reputation as a literary man as a means of obtaining advantages from the commercial world. How any tradesman can conceive for a moment that he can be benefited by Mr. Lidstone's ravings, we cannot imagine; but it is evident that many do hold such a creed, or he would not be able to find subscribers to his book. Here are a few specimens of his style. The first applies to the tinned wares of Mr. Councillor Tonks:—

To Councillor Tonks' establishment we trace
That unique work of art, the "Royal" Vase,
And which I'll in the halls of our new capital place.
Not only in the parlour were Councillor's works bewitching,
But O they charmed our lads and lasses with beauty in the kitchen;
Here we fitted out Clarissa, on her eve of marriage,
Here I got the stomach-warmer, and that to suit the carriage;
Leave Flois and Abelard to sigh 'mongst nuns and monks,
Let's sing the song of science thro' the famous house of Tonks.

The proprietors of Restell's Patent Jack, and successors to John Linwood, of Birmingham, are immortalized in equally glowing strains, concluding—

In French and English o'er the sea I'll track
Their Thomas Restell's Patent Roasting Jack.
The Mice in Heliconian draughts shall toast her
Heroes' domestic self-acting Coffee-Roaster.
They've had one in their employ fifty-four years,
Who in making Jacks constantly appears—
John Linwood's successors! no pretence lacks
Our house, seventy years since he introduced those Jacks.

Of one house we are told—

By Cyclopænean-prosopopœia a Lighthouse
'Midst Time's torrent flood, stands the illustrious firm of
Whitehouse.

And of another—

From this isle of a Northern sea like to some sunlit mons,
Our firm irradiates the world, Richard Timmins and Sons.

While of a third he cries in an ecstasy—

As in the Syrian wilderness stands Tadmor,
So over Time shall exist the name of Padmore.

As it is only fair to give our author every opportunity of writing himself down a Lidstone, we take our final quotation from a poem in memory of the late Prince Albert:—

I heard a voice, "The Blessed Prince has gone!"
All the Arts trembled on their eterne throne,
Science no longer in meridian shone,
An eclipse darkened o'er our mental cope,
And left the world without one beam of hope;
It seemed that myriads on the race of mind
Were thrown in Vandal ages far behind.

The extracts we have given will be sufficient to show the nature of Mr. Lidstone's work. When he is preparing the next edition of it, and goes round to tradesmen to obtain subscriptions, asking to be shown any articles of interest they may wish to have puffed by him, there is one object which we hope they will show him at once,—and that is, the door.

NEW NOVELS.

Griffith Gaunt; or, Jealousy. By Charles Reade. 3 vols. (Chapman & Hall.)

VIEWING it in certain of its aspects, we consider this novel as the best till now given by Mr.

Reade to the public. His manner of narration, however earnest, is not altogether to our taste. Sometimes too theatrical, occasionally too familiarly stooping to what may be called press-tricks, we are disturbed by an impression of self-consciousness, which can only be pardoned on the score of a writer's want of power or want of trust in his own story and characters. We think of the great scenes in the council-chamber and on the terrace, in 'Kenilworth,'—of the terrible vigil at Drumshinnel after the battle of Bothwell Brigg,—of the signing of the contract in 'The Bride of Lammermoor,' of the talk of the hags on the "through stane," as the victim rides past to her ill-omened nuptials,—of Effie's trial, and of the death of Madge Wildfire, in 'The Heart of Midlothian,' and of a hundred besides of what may be called Scott's "sensation" effects,—without for an instant adverting to the manner of their production, or recollecting a single "Fie!" "Alas!" or "In sooth." And yet, as we had occasion to remark the other day, Scott was anything but a correct or pure writer; least of all when he was in "the rapids" of his story and on the verge of the cataract. There is no possibility of thus implicitly surrendering ourselves to Mr. Reade. What are we to make of language such as the following?—"Then that unprincipled woman shed a tear or two with her, half crocodile, half impulse." This is a favourite figure of speech, since it is used again in page 75 of the third volume. We must give an example or two more: "One day she caught him at it,"—"The line he took might be called the *innocent Jesuitical*,"—"With a voice of agony and looks to match." The above, let it be observed, four among a hundred similar specimens, occur in a tale the date of which is the first half of the last century,—a tale in which, though we read of a "*salle à manger*," a "*boudoir*," and "*bourgeois*," the heroine, Mrs. Gaunt, is addressed by every one as "Dame," and when put on her trial for life defends herself in such quaint English as might have befitted a criminal before the Star Chamber, or under suspicion of having had a finger in the Popish Plot. Yet, to give another example of inconsistency in language, this very Dame Gaunt—who in one scene is such an exponent of too-old language, with her "*hath*," and "*not so*," and "*alas!*" and "*Oh, the perversity of the wise!*"—can in another gush into such a flow of Minerva-press melo-dramatic diction as the following: "*Do you accompany my benefactress to her humble home. . . 'T would be such a load off my heart.*" Lastly, the alternation of singular and plural pronouns in the same speech, as "*Prithee*," "*Will you?*"—justly charged against Sir Walter Scott, and to which we adverted when dealing with a late Oxonian charge prefixed to a scrap-book,—is here carried to excess. To read dialogue aloud in which the speakers thus habitually jerk about, as real speakers do but rarely, becomes next to impossible.

Let it not be thought that we are splenetic or prolix in dwelling on laxities and inconsistencies, which—whether under pretext of dramatic ease and freedom, or under pretext of local colour, no less dramatic, it matters not—bid fair to make such havoc of our noble, simple, sufficient mother-tongue. We have been used to be critical on the Americans for their neologisms: shall we not then reckon with our best novel-writers for slipshod, slipslop affectations? Mr. Reade might be, if he is not, one of our best novel-writers. He grasps his story firmly; were we to follow his fashion of writing, we might say, "like a good one." The man cannot be a member of the Novel-Readers' Guild (which includes our best thinkers, our most

imaginative writers, our sturdiest moralists) who could lay by this tale, once having begun it:—no matter though the opening be somewhat prolix,—no matter though the characters excite merely a mixed sympathy,—no matter though probability of incident be stretched to "crack of doom." The steps by which Katherine Peyton is led to prefer Griffith Gaunt to George Neville, his rival suitor, are too long-drawn-out; but after the two are once married the action moves forward directly, forcibly, inexorably, and in inevitable agreement with the incomplete characters of Protestant husband and Catholic wife:—the squire, not so bad a man of his kind, as squires were in England a century ago, though neither over-learned nor over-chastely constant,—the squire's lady, a beautiful, impulsive, haughty, jealous woman; and between them that human wedge which has often put true hearts asunder, the Priest, to whom the woman confided her troubles, and of whom the man (glad to be strong in self-exercise) was easily persuaded by an abandoned woman to be jealous. Add to this, that the Catholic wife, in right of her possessing fortune and estate, may be said to have condescended to the marriage, and the irregularity and infidelity, brutality and flight of the coarse, conscience-stricken Protestant husband, though not excused, are partly explained. That these led him into bigamy with Mercy Vint, the innocent and holy daughter of the publican, in whose house he was harboured, under the feigned name of a natural brother, are so many links in a chain of events, the strength of which we must recognize, think what we may of the pattern.

There is no need to follow these links further in their sequence. It would be unjust, indeed, to prevent the novel-reader from thoroughly enjoying, by aid of surprise and suspense, the scenes which occupy the earlier part of the third volume, including the disappearance of the cowed, bigamist, Protestant husband; and, in consequence, the accusation and committal of the haughty, justly-jealous and justly-irate Catholic wife as his murderess,—her violent threats to him having been overheard by those who thirsted for her ruin. Mrs. Gaunt's trial (allowing for every discrepancy to which attention has been called) is narrated with a force which holds the reader fast. It is strange, yet true, that trial-scenes, with their trials, (and, as some say, human vicissitudes in real life) come out in Fiction by pairs. The last but one (and it was a powerful one) was shown by Mr. C. Collins, in his tale 'At the Bar,' where the lawyer-husband defended his wife accused of murder,—a tale, to our thinking, unaccountably overlooked.

The extrication of Mrs. Gaunt (which every one must have expected) has been naturally devised by Mr. Reade. From this point his story breaks down. The rivals, Mrs. Gaunt and Mercy, forgive and forget. Griffith Gaunt, though his shame has been proclaimed in open court, returns into loving union with his wife, having inherited a great fortune; and, by way of expiation for his wrongs to her, redeems himself by a surgical feat,—the transfusion of blood from his living to her dying body. This, as all readers of Anna Seward's Memoirs will remember, was not an uncommon practice in the last century. The "Lichfield swan" offered her veins to be opened for Lady Northesk, when she lay dying of inanition. But, let forgiveness be ever so celestial, there is no condoning such outrages as Mrs. Gaunt had suffered. As little possible is such a superb marriage as Mr. Reade has made up for the wronged Mercy Vint, the publican's Puritan daughter; and "the County," having been made aware by pro-

ceedings of the Courts of justice of the stories of the rival heroines, would have countenanced neither wedded pair, in place of entertaining them separately. There are some things over which no mortal or (to use a well-worn adjective) conventional sponge can be passed, even by Mrs. Merdle's idol, Society; and among these is a trial for murder, the defence of which implies the commission of bigamy. How long will men and women, so gifted as some of our most popular novelists confessedly are, fish in filthy waters for their subjects and sensations? By this tale, Mr. Reade proves himself capable of far better things.

Kingsford. By the Author of 'Son and Heir.' 2 vols. (Hurst & Blackett.)

THIS is a tale by a writer who has caught more than one trick of the time. We are reminded of Mr. Dickens, of Mr. Wilkie Collins, of Miss Brontë, of Miss Braddon, of Miss Evans; and the salad thus compounded may be partaken of without antipathy, though it cannot be said to enter into the domain of honest cookery. Of late years the disagreeable folk of the earth have replaced as heroines and heroes the gaily-tinted Venuses and Apollos who figured so beautifully in the novels of the Porters, and enthusiastic sentimentalists of their class. We fail to perceive the charm of unkempt rudeness,—the wit of those who are tongue-tied, or else bitter in repartee. A grain or two more of good manners would not have impaired the sincerity of Lucy Snowe, the *villotte* governess; and Felix Holt the Radical might have been allowed a cravat without becoming conventional, and thus unfit to subdue the wayward girl who married him. Here the hero, who is for half the novel through a parish doctor, is superfluously rough and awkward; and this in order that the class vulgarity of the aristocratic young lady who professes herself "grossly insulted" by his advances may stand out in due relief. The tables are turned in the highest style of pantomime. Dr. Lorton by a discovered will is proved to be the rightful lord of the manor, and the insolent Margaret Clive (not, of course, before she discovers that she has every disposition to love, honour and obey him, and that he possesses every quality that raises him above the curled darlings of fashionable life) with her brother are turned adrift to seek their fortunes. To this follows a gush of high-strained agony on the part of the ex-parochial doctor, who thinks it murderous and criminal on his part to assume rights which dispossess his haughty lady-love, and begs, on his humble knees, to be allowed to repair his crime. This, of course, Margaret's pride of sex forbids her to allow. She masks herself in indifference, and obstinately insists on going out as a governess, in place of owing anything to the man for whom she is yearning. This comedy of false sentiment has been played, and played threadbare, in a hundred novels. The passions and emotions it involves have, perhaps, been never more delicately and really touched than in 'Le Roman d'un Jeune Homme pauvre,' but that was a French novel; and from the days of Corneille's Chimène down to those of Mdlle. Villepreux, Madame Sand's heroine of 'Le Compagnon' (who entreates the transcendental carpenter-hero to exalt her to his level by accepting her hand), our neighbours have always in their sublimities approached the ridiculous more closely than we generally venture to do. In 'Kingsford,' however, the exaggeration of real feeling and self-sacrifice equals that of the most approved foreign model. The author, if willing to study probabilities, might do much better than this. The tale is not without good writing, both in dialogue and description, and there are

indications of humour in some of the plebeians who foil the spasmodic heroine and the muscular hero. Then the glimpse of the island of Sark, though taken, we suspect, through a rose-coloured glass, has some freshness and novelty.

The Autographic Album: a Collection of Four Hundred and Seventy Fac-similes of Holograph Writings of Royal, Noble, and Distinguished Men and Women, of various Nations. Designed for the use of Librarians, Autograph Collectors, Literary Men, and as a Work of General Interest. With Biographical Notices and Occasional Translations. By Lawrence B. Phillips. (Hardwicke.)

THE flood of new literary fashions that have diverted our idleness or gratified our taste during these later years has almost carried out of sight a once numerous class of books on which our ancestors expended much labour, and from which it is only reasonable to assume that they derived something like a corresponding amount of satisfaction. When George the Third was young, the sitting-room of any fashionable lady, the parlour of every bookish household, invariably contained one or more of these obsolete volumes, which differ so widely in aspect and contents from the literary toys of the present generation, that when we stumble upon one of their kind in the tea-room of an outlandish country vicarage, or amongst the multifarious relics of a great-aunt, who died somewhere about the date of Queen Victoria's birth, we regard it with mingled feelings of wonder and amusement. The interest roused by the discovery of so characteristic a vestige of extinct manners is usually qualified by commiseration of the kindest sort for the untutored simplicity and prevailing dullness of the honest people whose brightest moments of intellectual and sentimental fervour are reflected in its pages. Unlike the ornate volumes, magnificent with purple and silver, or blazing with gold stamped into the richest leathers of Russia and Morocco, for which the tables of modern drawing-rooms are indebted to the questionable taste of booksellers, these discarded toys were often less highly favoured, so far as external effect is concerned, than a modern washing-list or a manuscript cookery-book. For the most part they were stout, clumsy manuals, different from the ordinary run of books in being too small for any species of quarto known to the trade, and too broad for classification with any recognized subdivision of octavos. In most cases they had gilt edges; their covers were usually of prepared hide, artistically laid upon what the present tribe of literary caterers are pleased to call "bevelled boards"; an air of mystery sometimes pervaded their darksome and unilluminated bindings; and in cases where no expense had been spared in their manufacture, this air of secrecy was heightened by the presence of a lock, which ostentatiously preserved the pages from the curiosity of unprivileged eyes. Nor can their unassuming sheets, even under the most favourable circumstances, endure comparison with the creamy and elaborately embellished leaves of those "books for the drawing-room table" which are a connecting link between upholstery and fine art—between works of literature and articles of domestic furniture. On leaving the bookseller they contained no line that could provoke the most unamiable critic,—the whiteness of the leaves, at that early stage of their existence, being unsullied by type or pencil, and hence justifying the name conferred upon them.

In these "Alba Amicorum,"—or *albums*, as

they are more generally termed,—those of our forefathers whose culture comprised the art of writing and a slight acquaintance with books were wont to inscribe passages from their favourite authors, pieces of original versification, and "moral reflections." Coming into fashion when to write was still an exceptional accomplishment rather than a universal attainment amongst people of condition, these *Alba* were chiefly esteemed as collections of various specimens of calligraphy, the sentiment of each inscription being of small moment to the owner of the register in comparison with the style of its penmanship. At the close of the sixteenth century—the period when these autographic scrap-books first came into fashion—the owner of an album was satisfied if each of his lettered friends enriched its contents with a complimentary sentence, followed by his signature. In process of time, if he had a wide acquaintance amongst educated families, the collector gathered many notable diversities of calligraphic style; and though the entries in his book were for the most part formal and devoid of interest, they illustrated the progress of penmanship in domestic circles, and became a permanent evidence that the schoolmaster had fallen in with the collector and his personal associates. Many years, however, did not pass before autograph-hunters raised their exactions, and the contributor to an album was required to write in it words which, besides affording evidence that he knew how to use a pen, should convey some wholesome lesson or pleasurable emotion to the reader. The next stage in the history of *Alba* was the period during which their original object was almost, if not quite, lost sight of, and collectors, caring far more for the sentiment than the penmanship of the inscriptions, were less desirous of obtaining characteristic specimens of handwriting than eager for such pieces of original composition or transcribed literature as faithfully reflected the prevailing tone or more distinctive powers of their respective writers. How widely dissimilar the contributions often were, in substance as well as form, in sentiment as well as style, there is no need to remind any person who is familiar with the ways of English society towards the close of the last century. By most collectors any donation was thankfully received. The contributor who could not originate might copy; the inscriber who was too proud to copy might write an original piece in verse or prose, according to his inclination and ability. A serious clergyman would indite a hundred lines from 'Paradise Lost,'—the pen of a rollicking fox-hunter was at liberty to transcribe a passage from Somerville's 'Chase' or a stanza from a hunt-song,—elderly ladies might have recourse to 'Rasselas' for an appropriate paragraph,—and young men were held guiltless if, with an object in view, they made love in the verse of Suckling or with the music of Waller. In the days when English gentlemen sitting over their wine used to troll ditties to each other in turn,—a compotator's inability to sing a song being atoned for by the utterance of a toast or sentiment for the benefit of the good company present,—it was quite permissible for a country squire, with no poetry and but little prose at his command, to meet an album-keeper's solicitations with a legible entry of his favourite sentiment. Not long since there came into our possession, together with much other literary rubbish, an old manuscript album, which, after losing its first mistress, had fallen upon evil days, in which the degradation of being offered for sale upon a bookstall for the ridiculously low sum of twopence was not the least humiliating experience. On brushing away the dust of the

book-stall and opening the leaves of this much-abused treasury of sentimental effusions, we found it to contain more than an average proportion of noticeable contributions. Young ladies, working with water colours to the best of their ability, had embellished its leaves with pictures of sickly sweet-peas and stumpy moss-roses,—a central leaf of the volume preserved a lock of hair, which had formerly belonged to a young lady, the brightness of whose golden tresses was commemorated in rather inadequate verse. Of course the book possessed copies of Gray's 'Elegy,' passages from the *Spectator*, lines from Goldsmith, and maxims from Rochefoucauld; but its most remarkable entry was the following sentiment:—"The discreet housewife will promptly check herself in the first tendencies to familiarity with her inferiors, as the hussies will be sure to take advantage of her ill-judged condescension.—This to my dutiful grand-niece, from her aunt, Susan Marra-bles." That this entry was characteristic of the writer there is no room to question,—that it embodies, in rather obscure phraseology, a valuable precept for the guidance of English gentlewomen in their intercourse with "hussies," we do not deny; but its obvious merits scarcely incline us to think that the world has lost much in the disappearance of the class of books to which Mistress Susan Marra-bles was a worthy contributor.

Something less than three centuries after its first appearance, the album, rightly so called, came to its end, and was interred beneath a pile of gaudy, printed volumes, miscalled albums, in which the prose and poetry of amateur writers were periodically laid before fashionable idlers under all the favourable circumstances which good printers, sufficient artists, and complaisant critics can command in behalf of literary ventures. One consideration alone makes these spurious albums worthy of note. Just as the original *Alba Amicorum* marked the period when penmanship became a fashionable amusement, the printed album of the present century may be noticed as significant of the period when authorship had become so general a pastime in good society, that amateur writers, vain of a facility which was still rare enough to be a distinction, were eager to air their wit in print, and ready to support a class of serial publications which afforded them the wished-for field for intellectual display. In like manner, the various serials that immediately sprang from the printed Album,—the numerous and gaudy array of 'Annals,' 'Keepsakes,' 'Caskets,' 'Treasures,' 'Books of Beauty,' and 'Books of Fashion,'—illustrate the literary taste of frivolous circles, at a period when court beauties won *clat* as writers of *vers de société*, and fops were ambitious of shining as men of wit. Save, however, as indications of passing humour, nothing can be more valueless than the printed album, and the swarms of literary ephemera to which it gave birth.

The keepers of the earliest *Alba Amicorum* were the immediate precursors of the autograph-hunters who in the seventeenth and eighteenth centuries brought together great numbers of original letters, the interest of which depended partly upon the celebrity of their writers and partly upon the light thrown by their contents upon matters of historical inquiry. Ralph Thoresby, the topographer of Leeds, may be taken as a favourable specimen of these collectors in the seventeenth century, since the days of which distinguished antiquary the harmless pursuit of the autograph-hunter has become the amusement of a very numerous class of busy idlers. Mr. Phillips makes special mention of six persons who, at the commencement of the present century, had amassed notably

voluminous collections of original letters; and at this day, when the taste for collecting such papers has for fifty years been increasing in proportion to the greater numbers in which they are produced, it would be easy to name scores of assiduous collectors who have brought together prodigious masses of manuscript from the pens of more or less eminent writers. Indeed, for some time, the fashion for collecting autographs has been so general, and collectors have grown so systematic and industrious in their operations, that men of mark have reason to grumble at the frequency with which they are politely solicited by entire strangers for specimens of their handwriting. Many of these petitions are preferred by young ladies, who have outgrown a taste for collecting crests, and schoolboys who, having perfected their museums of postage-stamps, are ambitious of adding to their treasures a series of letters from distinguished characters. Of course, in a large number of cases, the collector's pleasure consists in the delights of acquisition and possession; but in a perhaps equal number of cases, where the collector is inspired by a simple wish to see the ordinary handwriting of persons in whom he is interested, a survey of Mr. Phillips's volume would satisfy his curiosity, and spare him a large amount of comparatively unprofitable labour. Of course, to an enthusiastic collector, a volume of fac-similes differs widely from a volume of genuine autographs; and he is in a position to argue with much effect that the student of a collection of fac-similes is working outside the circle of those subtle associations from which a reader of original autographs derives the higher part of his gratification. Whereas the original writing of a great man's pen—read from the same paper on which the writer's hand rested—is an aid to the imagination, whereby the beholder is enabled to call before his mind's eye the countenance of the illustrious scribe, the fac-simile is at best only the semblance of the reality, and lacks the charm for which the collector expends his patient toil. Of course, from the collector's point of view, there is much in this argument. But, to persons in whom the antiquary's zeal is a kind of intellectual curiosity rather than a poetic sentiment, we can recommend Mr. Phillips's 'Autographic Album' as an entertaining scrap-book. The four hundred and seventy brief passages are judiciously selected, so that the words heighten the interest of the caligraphy. If we were disposed to be hypercritical, we should object that the collector has, in several cases, taken exceptionally legible specimens of penmanship, whereas he would have done better to choose examples of the ordinary handwriting of his distinguished penmen. Again, the Album would have been more satisfactory had it contained a smaller proportion of autographs of mere fourth-rate notoriety, and in lieu of these comparatively uninteresting fac-similes, had given us several specimens of the more important writers' various styles of penmanship. But, upon the whole, we are well pleased with the editor's treatment of his subject, and can bear testimony to the fidelity of Mr. Nethercliff's work.

The Iliad of Homer, translated into English Accentuated Hexameters, by Sir John F. W. Herschel, Bart. K.H. (Macmillan & Co.)

Homer and the Iliad. By John Stuart Blackie. 4 vols. (Edinburgh, Edmonston & Douglas.)

Two more translations of the *Iliad*! Some may think we have already more than enough, without any addition to our store, which has lately been increased so largely and so rapidly. And yet the distinguished names which these

bear, to say nothing of the coadjutors mentioned in the Preface to each, can hardly fail to secure them attention. It appears that Sir John Herschel commenced his work five years ago, without, however, intending to complete it, in consequence of reading an article on translations. He describes it as "one more attempt to show that readable English hexameters can be written, and are not ill adapted to the expression of the highest order of poetry." Hence his object would seem to have been not exactly the same as that of the translator, who simply seeks to produce a copy as true both to the letter and the spirit of the original as he can make it. The fact is, Sir John has undertaken to be champion for English hexameters, which he defends by argument, and endeavours to recommend by practice, in spite of Mr. Tennyson's warning that he is attempting "a most burlesque, barbarous experiment,"—which we think rather a bold thing to do for a man of his years and unpoetic pursuits. He does not appear to us successful in meeting even those objections to the use of this metre which he himself puts into the mouth of an opponent, and there are others of which he takes no notice. The fact that it has scarcely ever been employed by any of our great masters is in itself a strong presumption against its availability. As Prof. Blackie remarks, we may safely take it for granted that they avoided it, "not certainly because it did not give a certain gratification to their classically trained ears, but because they felt it could not be handled largely without doing violence to the genius of the English language." Even Prof. Arnold, though he recommends its adoption in the translation of Homer, admits that it is "unfamiliar in England," and "many people have a great dislike to it." We must confess we were a little surprised to find Sir John Herschel coolly assuming that it is generally acknowledged "to be in itself pleasing and harmonious in its cadence." Longfellow's 'Evangeline' is about the only poem in this metre that can be called a popular favourite.

There might be some reason for trying to naturalize the modern hexameter among us, if it were really a fair representative of the ancient; but, as everybody knows, it is a very different thing,—different in structure, and different in its general character and effect. Prof. Arnold admits that it only imperfectly represents the movement of the ancient measure; and Sir John Herschel goes so far as to compare its insufficiency with that of the flute for performing airs of Haydn or Mozart, written for the pianoforte, or a full orchestral accompaniment. The substitution of accent for quantity, as the ruling principle of the verse, involves radical changes. Modern versifiers, as Prof. Blackie observes, have been driven to put a modern trochee or even tribrach in the place of an ancient spondee, thus completely altering the rhythmical character of the verse. "Whoever," he adds, "translates a Latin or Greek hexameter after the model which alone is intelligible to a modern ear, is transferring march time into triple time, is rendering a measure which, according to the testimony of the ancients, was characterized by weight and dignity, into a measure of which the characteristic is either a light, undulating, careless ease, or the hurried march of highly-excited passion." This objection is not satisfactorily answered by saying, as Sir John Herschel does, that, whether the English hexameter represents the ancient metre or not, it does correspond to our modern mode of reading Homer and Virgil. There is great force in Prof. Blackie's concluding objection:—

"Lastly, the modern hexameter, however skillfully executed, comes on the English ear without

any associations, and this is certainly a very grave objection. It is utterly destitute of any character which the English reader can understand; it conveys nothing, suggests nothing. It neither represents the epic element in Homer, like our blank verse, nor the minstrel element, as the ballad measure does; and if it is not altogether unmeaning, it is certainly undignified."

Turning from Sir John Herschel's argument in favour of the English hexameter, to his practical exemplification of its fitness as a medium for translating Homer, we feel bound to acknowledge that he has been so far successful as to show that "readable English hexameters can be written." His verses generally have the merit of "reading themselves," to use Prof. Arnold's expressive phrase, though there are not a few limping lines among them. Still the metre is so foreign to the genius of our language, and, we fear we must add, Sir John's manner so un-Homeric and prosaic, that few English readers, we imagine, will get through the whole work, and those few will not escape a sense of flatness and weariness. For classical scholars it may have some interest as a curious feat by such a hand, the metre being more familiar to their ear, and the translation a pretty close copy of the original, to which it not unfrequently corresponds in sense, line for line. In one respect Sir John Herschel is more conscientious than most translators. He puts many of his expletory interpolations in italics, after the manner of the English Bible. The following is a creditable rendering of a stirring scene:—

As when some forest vast on the lofty crest of a mountain
Burns with devouring fire, and lightens the regions around it;
So, as the troops advanced, from the beaming brass of their armour
Flashed to the sky through the air an all-illuminating splendour.
Countless they came as when flocks of fowl in the marshes of Asia
Geese, or cranes, or long-necked swans, by the streams of the Caister
Wheel in uncertain flight, now here, now there, and disporting
Winnow the air with their wings, and with loud cries sweep o'er the waters
Till they at once alight, and the mead resounds with their clangour:
So from their ships and tents poured forth the gathering nations
On the Scamandrian plain. Loud groaned the earth as it trembled
Under the feet of men and of horses mustering for battle.
So too by myriads they stood on the flowery mead of Scamander
Thick as the blossoms and leaves which spring pours forth in her bounty.
And as the buzzing swarms of flies that clustering hover chasing each other around some shepherd's pen, in the spring-tide
(What time the milk is sweet and rich, and the pails overflowing),
Not less numberless stood the long-haired sons of Achæa
Eager to close in fight, and break through the ranks of the Trojans.
These, as some skilful herdsman his goats selects and assembles
When in a mingled crowd they spread confused o'er the pasture,
Not with less ease their leaders collect and array for the combat,
Each in his rank and place; Agamemnon towering among them
Like unto thundering Zeus in his beaming eyes and his forehead;
Ares in waist; and Poseidon in breadth of chest and of shoulders.
And as a bull stalks forth in advance of his herd in the meadows,
Proud in his might, and in lordly strength all others excelling:
So by the hand of Zeus with surpassing glory invested
Stepped forth Atreides on that great day, supreme among heroes.

Sir John Herschel is not so successful where delicate touches are required, such as none but a poet can give. He scarcely does justice to the exquisite incident in the parting of Hector and Andromache, which he renders as follows:

Thus having said, for the beautiful boy his arms he extended:
Back however the babe with a scream recoiled, and in terror
Clung round the nurse's neck; for he feared the looks of his father,

Scared by the glance of his brazen casque, and the wave of the horse-tail
Dreadfully nodding aloft in the crest of the towering helmet.

Smiling, his terror beheld his father dear and his mother.
Then from his head the mighty Hector, unfast'ning his helmet,

Laid it, all gleaming, aside on the ground. Then taking the infant,

Fondly kissed, and danced him awhile in his hands: and, devoutly
Praying to Zeus and the immortal Gods, preferred his petition:

"Grant, O Zeus, and ye powers supreme, that, even as I am

So distinguish'd among them in warlike feats and in valour,
This my son with a mighty hand may rule o'er the Trojans!

Grant that, returning from war, having slain his foemen in battle,
Laden with blood-stained spoils and the heart of his mother rejoicing,
All may exclaim 'This chief is greater by far than his father.'

Prof. Blackie appears to us to have caught more of the tender simplicity of the original, though he adheres less rigidly to the letter. His version is this:—

Thus he: and stretched his arm, to clasp his infant son so dear,
But on the breast of his well-zoned nurse the babe shrunk back with fear,

Scared at the gleam of the burnished brass, which cased that warrior's head,
And screamed to see the horse-hair crest high nodding o'er his head.

The father laughed, the mother smiled; then Hector brave unbound
The helmet from his head, and laid it glittering on the ground,

And kissed his son, and dandled him aloft with fondest joy:
Then to great Jove, and all the gods, thus prayed to bless the boy:

Jove, and ye mighty gods, grant this my son, one day, may be,
As I am now to Trojan men—the bulwark of the free,

Ruling o'er Troy by valourous might; then from the hostile fray
Shall some one see him home return, and thus shall proudly say:

From a good sire a better son hath rescued Troy to-day!
And when he bears proud trophies, through the sounding streets of Troy,

His mother shall behold her son, and her heart shall leap for joy!

That our readers may have another opportunity of comparing the two translators, we append the Professor's version of the former passage:—

As when destroying fire hath caught a stretch of dry old pines,
High on a hill-top, and afar the blazing forest shines;

So shone the copper-coated host, as rank on rank advances,
While flash quick brands in a thousand hands, and gleam the eager lances.

And as the uncounted tribes, that scour the sky with mighty vans,
Of geese, or vagrant-banded cranes, or the long-necked race of swans,

Where far the Asian lowland spreads, and by Clyster's flow,
Freely on joyful pinions sail, and wander to and fro,

And with their clanging wings loud rings the mead, where they alight;
Thus swarmed the Greeks from ship and tent, to find the fateful fight

Far o'er Scamander's plain: and earth rebelled to the sound,
As the mail-clad men, and the four-hoofed horse tramped o'er the hollow ground,

Till on the broad grass mead they stood, a marshalled multitude,
Countless as flowers in flowery spring, or leaves in a leafy wood.

And even as swarms of busy flies on buzzing wing are spread,
Drifting in clusters through the air, close by some shepherd's shed,

In the spring-time, when in the pail the creaming milk doth flow;
Not fewer then the Argive men in many a glittering row

Stood; while each long-haired warrior pants to pierce some Trojan foe.
And as goatherds with swift sure glance their shaggy troops survey,

And sort them lightly, as across the pasture-ground they stray,
So for the fray the chiefs that day did range the multitude,

With wise-disposing ken; 'mongst whom King Agamemnon stood,
With eyes and head like mighty Jove's, the thunder-loving God,

With Joins of Mars, and Neptune's breast, who wields the trident-rod.
And as among the horned herd, above the rest the bull

Stands high, and his huge bulk declares that he must bear the rule,
So high amid the host that day did Agamemnon show,

Such kingly grace on Atreus' son did mighty Jove bestow.

Here we are inclined to think Sir John Herschel has rather the advantage, in spite of his un-English and monotonous metre. Prof. Blackie is so strongly possessed with the notion that Homer was a singing minstrel, and that the materials from which the Iliad was composed were ballads, that he has chosen a ballad measure, and endeavoured by the simplicity of that style "to bring out," as he says, "every trait and touch of old Hellenic life and feeling." In his anxiety to do this effectually, he seems to have sometimes lost sight of that nobleness which he acknowledges to be a characteristic of Homer. Hence the quaint and somewhat archaic simplicity of his translation is not always in keeping with "the large plan and lofty tone of the epic poem." It is apt to be too rugged either to please the English reader or adequately to represent the original. At the same time we cannot help feeling that his version, whatever its occasional imperfections, has far more of the living force and genuine ring of true poetry, and is a far truer picture of the characteristic features of the Iliad, than Sir John Herschel's, which, though bearing a closer resemblance to the mechanical structure of Homer's verse, has much less of its inner life and soul. This is strikingly evident in such a passage as the account of Hector's death, and the consequent distress of his wife and parents, which it is scarcely possible for any one to read, as Prof. Blackie has rendered it, without deep interest and emotion. The following also is good:—

And when the rosy-fingered morn came forth and led the day,
To sea they hove, and backwards steered and lightly dashed the spray;

For Phoebus blew a favouring breeze, to speed their watery way.
The mast they reared, and fixed it well; the broad white sails they spread;

Full blew the gale in the sounding sail, like a blast in the furnace red.
To right, to left, the strong keel cleft the wave with rushing sound,

And the swift ship ran like a courier man, through the purple deep profound.
But when they reached the wide-spread tents, they leapt upon the strand,

And with strong pull the dark-hulled ships upon the firm dry land,
High on the sand they drew; beneath, strong-holding shores they placed:

And each man to his separate tent his diverse way retraced.

But Prof. Blackie's translation forms only half of his entire work, the other half consisting of preliminary dissertations and expository notes, which, with the text, may serve to "place the English gentleman of culture and intelligence—in regard at least to the great distinctive points of Homeric poetry—on an equal platform with the professional scholar."

In the first volume, which contains the dissertations, the learned Professor discourses at large, with great learning, ability and eloquence, upon a variety of subjects connected with Homer and the Iliad. He writes with a full head; a warm heart, and a ready hand. Though rather discursive he is never tedious. He does not talk without having something to say, and he has a happy way of saying it.

Prof. Blackie stands up stoutly for the historical character of the materials which compose the human and narrative element of the Iliad and Odyssey:—

"If any one denies that the Homeric poems contain trustworthy historic materials, he not only robs these works of their principal value in the eyes of many modern readers, but he proceeds on a principle which, if consistently applied, will deprive the world of great treasures of inherited belief, which the wisest of men, age after age, have been willing to accept for knowledge. Of course, if truth demand this sacrifice, there is no harm. To be robbed wholesale of huge bales of windy lies, to a philosophical mind may justly wear the aspect of a kindness. But in such cases it is

always necessary to inquire carefully whether what we possess as long-valued treasure be really wind or weighty bullion. To me it appears that in the present age there is a tendency to fling away honest old traditions in the slump as utterly worthless, and to substitute ingenious speculations in their stead. But before we allow ourselves to be carried away by such a fashion of sweeping negation, we were wise to make a large and cautious survey of the character of the ground on which we stand. It may be after all that there is more solidity at the root of venerable old popular belief, than in the ingenious theory of our recent speculator. The thinking of the multitude is not always wrong. If the mass of the people are liable to be deceived by what feeds their patriotism and glorifies their virtues, the individual scholar or thinker is no less open to an opposite class of delusions which flatter his vanity, and increase his sense of intellectual power. When a man with a large display of reading rejects as a figment what all other men for centuries had received as a fact, there is an air of knowledge about this, before which the man of less reading or of no reading is often willing to surrender without inquiry. But such a surrender of the inherited riches of the past at the command of imperious scepticism would in many cases be most unreasonable. No learning, however extensive, no ingenuity, however subtle, no imagination, however brilliant, will help a man to the apprehension of real fact, whether in historical tradition or in any other domain, unless the virtue of a supreme love of truth be present with an invariable polarity in his breast."

He mentions the acknowledged accuracy of the geographical and topographical details in the *Iliad* as one among other proofs of its general trustworthiness, and adds—

"Without question, there is an air of moderation, sobriety, and verisimilitude about Homer which distinctly marks him out as belonging to a different class from those mediæval story-tellers who gave to the word *romance* that peculiar meaning which in popular English it now universally bears. The general impression of the unprejudiced reader is decidedly in favour of the old faith, that the author of the *Iliad* is an honest bard, and the tale of Troy a true tale."

He is a no less resolute defender of the personality of Homer, which, he says, "rests directly and naturally on the double fact that there exists a great poem which demands the existence of a great author, and that this authorship has been constantly recognized by the consciousness of the Greek people in the person of Homer."

In the dissertation on the poetical translation of Homer, he has some good observations, one of which we cannot refrain from quoting:—

"The principle, therefore, which ought to regulate a good translation, so as to hit the just mean between licence and literalness, may be expressed thus: All liberties which either deface the characteristic truth of the original, or imprint a foreign, that is, in translating from the classics, a modern character on the work, are wrong; all minute adherence to the letter of the original, which either enfeebles the vocal power, impedes the graceful movement, or cools the fervid inspiration of the original, are equally wrong. And here we see plainly the extreme delicacy of the work which a translator has to perform—a work where neither extreme fineness of touch, nor bold dash of fancy, will always suffice to produce a satisfactory result. So that the utmost a man can aim at on occasions is to present the reader with a skilful compromise between two incompatible demands."

In the notes, which constitute the last volume, is accumulated a rich store of learning, the fruit of a life of study and a wide range of reading. Nor are they less remarkable for the good sense and painstaking consideration with which the various topics are handled. They throw a flood of light upon all dark and disputed points, and call the reader's attention to what he might otherwise be in danger of overlooking. There is also an abundance of illustrative

allusions and references, which may serve to guide him in case he wishes for further information, and an Index carefully prepared by the author, who concludes his work with this striking sentence:—"Whether or not I shall be judged to have made any thankworthy contribution to the translated literature of my country, the man who has spent twelve years of honest toil in the study of such an author as Homer has already received the better half of his reward." We think he may safely reckon upon a favourable verdict from all competent judges, and we trust he will reap the other half of the reward he so well deserves.

The Book of Quinte Essence, or the Fifth Being, that is to say, Man's Heaven. Edited by F. J. Furnivall.

Holi Meidenhad, an Alliterative Homily of the Thirteenth Century. Edited by Oswald Cockayne.

Political, Religious, and Love Poems. Edited by F. J. Furnivall.

The Monarche, and other Poems. By Sir David Lyndesay. Edited by Fitzedward Hall.

Parallel Extracts from twenty-nine Manuscripts of Piers Plowman. By the Rev. W. W. Skeat.

King Horn, with Fragments of Floris and Blanchefur, and of the Assumption of Our Lady. Edited by J. Rawson Lumley. (Trübner & Co.)

La Clef d'Amour: Poème publié d'après un Manuscrit du XIV^e Siècle. Par Edwin Tross. (Paris, Tross.)

THE first half-dozen volumes are additions to the series published by the Early English Text Society. They are edited from manuscripts in the Sloane and Cottonian collections, and from the Archbishop of Canterbury's Lambeth Manuscripts; the sixth ('King Horn') from a manuscript in the Cambridge University Library. 'The Book of Quinte Essence' is described as "a treatise in English, briefly drawn out of the book of quintessence, in Latin, that Hermes the prophet and King of Egypt, after the Flood of Noah, father of philosophers, had by revelations of an angel of God, to him sent." Mr. Furnivall himself says, "This tract appears to be a great fuss about Spirits of Wine, how to make it, and get more or less tipsy on it, and what wonders it will work, from making old men young, and dying men well, to killing lice." The compounder states that his mixture is the burning water, *aqua vite*, or, according to the name by which philosophers keep its character secret, quintessence. It is recommended as a panacea that will overcome Death himself, always excepting that the patient has reached "the term that is set of God that no man may escape,"—a saving clause of an early quack character. It is also to be observed that this spirit, for those who lack jollity or medicine, for those who prefer to take it under the plea of lack of health, is intended by the inventor only for "evangelic men." This inventor, horrified at the idea of the secret getting into the possession of sick tyrants, who, by its use, may regain their lost vigour, recommends it to the keeping of Christ. Thus, the tipplers who quaffed their walnut-shell or their egg-shell full, might measure their righteousness by the amount of their exhilaration.

The author of 'The Book of Quinte Essence' shows how life may be rendered physically joyful; its date is of the fifteenth century, and men learned therein how they might be cured of every disease except hereditary leprosy. Two hundred years earlier, a bishop, conjectured to be one of the Poores of Sarum, addressed the tract on Holy Maidenhood, "we need not doubt, to ladies at Tarente, in Dorset." Which

ever of them it was, Herbert or Richard, he was a man of nasty ideas. Ladies are taught that with married life goes loss of freedom and dignity, even of virtue, and comes much tribulation, filthily detailed, in maternal duties, perils and anxieties. Mary is said to have enabled Christ, by her maidenhood, to redeem all mankind! They alone who enter heaven endowed with maidenhood are privileged to dance and sing there! Girls are affrighted from wedlock by warnings that wooing is a sort of deadly sin, or leading to it; marriage a life of endless troubles, disgusts, and social warfare, not worth such transient joy as it may exceptionally afford. Things are talked of, in extreme fullness, which may not have astonished the Saxon ladies of Tarente, 600 years ago, coming from the pen of their bishop (who apparently loves to dwell longest on that which least became him to touch at all), but which would certainly ruffle them now if Dr. Hamilton were to issue such a philippic against marriage, and paint so minutely every circumstance belonging to it. After all, Bishop Poore is compelled to allow that marriage is not dishonourable; for he gives the married a back seat, if nothing else, in the court of Heaven:—"For wedlock," says the author in Mr. Cockayne's modernized version, "has its fruit thirty-fold in Heaven; widowhood, sixty-fold; maidenhood, with a hundred-fold, overpasses both." The ladies of Tarente probably thought that to be rewarded thirty-fold in Paradise was quite good enough for humble wives and mothers like themselves, who had fulfilled the law to which they were subjected.

A comparison of this tract with that by Sulpicius Severus, addressed to Sister Claudia, on the same subject, will show how differently two earnest men may treat a single theme, and both mistakenly. There is dignity, gravity, decency, and much error in the epistle of Severus; but the tract addressed by Bishop Poore to those ladies in Dorsetshire who seemed to him to be most in want of it, is crapulous, mocking, repulsive, and utterly unsustainable in its argument. There is quite as much difference in the editors of the two tracts. Leclerc remarks on the errors in the counsel of Sulpicius in a calm spirit of remonstrance; whereas Mr. Cockayne, when he comes upon some assertion that human nature will not accept, is so eager, and so little disposed to be courteous, even to a bishop who is apparently not so cleanly minded as becomes a prelate, that he dashes in at the margin of the text (not having patience to slide down the page with a foot-note) with a "*Thou liest, bishop!*" or some similar amenity, which may be justifiable in quaint Anglo-Saxon editors, but which is not to be indulged in by sober men who deal with books of date subsequent to the Conquest!

Mr. Furnivall hardly recommends his edition of the early Political, Religious, and Love Poems, by saying that "of most, perhaps better texts exist." His views of the duty of an editor are thus explained: "I find the shortest way for a man much engaged in other work, but wishing to give some time to the Society, is to make himself a foolometer and a book-posserometer, for the majority of his fellow-members, and print whatever he either does not know, or cannot get at easily, leaving others with more leisure to print the best texts." This is candid, on one side, and we must be thankful for what is vouchsafed on the other. We find here, in a tale of witchcraft, more evil allotted to the Devil than can fairly be laid to his charge. Young witches were wooed and won by a dark lover in black, who took the name of Satan, and promised his vio-

times supernatural power; and in this collection there is a ballad treating of a high and noble dame who gave manifest token of having fallen away from the rules of virtue, and who ascribed her coming to grief and shame to the personal acquaintance she had contracted with the Devil!

On the other hand, there is no lack of honest sentiment in the metrical wooers who figure in the love-poems. However excellent a thing Holy Maidenhood may have been accounted by the bishops, it is very clear from the earnestness of the suitors and the becomingness of the maidens, that the acquaintance will properly end in Holy Matrimony, or Motherhood. The religious poems are also marked by seriousness of thought and expression, while the political show wit with quaint utterance, and therefore with a few statistics in which matters of interest are explained in language too uncouth to the general reader to quote. This uncouthness, also, is characteristic of the romance of 'King Horn'; but the song, no doubt, fell musically enough on the ears of those who listened to the reciter, when the language and accent were those of the time in which the song was sung or said. With a more malicious pleasure, probably, did listeners heed the reading aloud of Sir David Lyndesay's 'Monarch.' The sarcasms against the women-haunting, cruel, careless clergy and rapacious landlords, were the more welcome for their being thoroughly justifiable, and it may be that few laughed louder at the rattle of Sir David's verse than those against whose crimes or shortcomings it was so vigorously pointed.

The Parallel Extracts from twenty-nine Manuscripts of 'Piers Plowman,' "the most valuable work in early English literature before Chaucer wrote," will serve to illustrate the carefulness with which the Early English Text Society are preparing their future edition of the poem. It is to be observed that the rhymes in the old poems offend as seldom against the ear as is the rule in modern writers. Mr. Swinburne makes *love* rhyme to *thereof* in his 'Anactoria,' and there is not a worse example in any of these early productions. There can be little doubt that the true, or rather the prevailing pronunciation of words, in ancient times, and differing from that now in use, may be gathered from the rhymes. This is the case even in later periods. When we find *thought* rhyming to *fault* in Pope, we conclude that the latter word had then what would only now be called a *vulgar* expression. These Early English Texts should restore to the language many good but long-disused words. We are constantly letting them slip from us. Nobody now would think of speaking of a nobleman's "*preventing* generosity," as Thomson does in his dedication of 'Liberty' to the Prince of Wales; and yet how appropriate is the word!—no misprint, as the early Methodist preacher suggested was the case in the Collect beginning "*Prevent* us, O Lord!" Again, we fetch up a lost word from the bright depths of the *Tatler*, when speaking of jewels set to show upon black velvet. He says: "These jewels appear in their true and genuine lustre, while there is no colour that can *insect* their brightness, or give a false cast to the water." If the words italicized are not English words, they were worthy of being so, and they have undeservedly fallen out of use. Again, some English words have only fallen from upper into lower places. "Will these men, I pray you, think nothing at all of themselves *whiles* they accuse us so maliciously?" Thus wrote the learned Lady Bacon; but *whiles* belongs now to the uneducated, and Lady Bacon's *sithence* has been permanently curtailed into "*since*." Over the Atlantic, a few words obsolete here are in lively use.

Howard, in his 'Committee,' said that "if Mr. Day should hear that his wife rode in a stage-coach, he would make the house too hot for *some*." In a Richmond (U.S.) despatch in 1864, it was said, "The 11-inch hurt us *some*." If a person were now to express inability to *abide* another, a flavour of vulgarity would be detected in the expression; but the word was a court word in Elizabeth's days. It is often the fine-gentleman writers who give us worse words than those they affect to drop out of use. This was the case with Walpole, who roughly seized a noun, and by a little addition made it do duty as a participle. "I do not wonder," he writes to Mann, "that you are *impertinenced* by Richécourt." This, however, is not so censurable as summarily compelling foreign words to pass as pure English. There are many examples of this in Dryden's plays, and many examples of his ridiculing the fashion,—for it was a fashion. But the merely fashionable people had great authority for the evil practice. When (at the end of his fifth book) Clarendon speaks of a royal force withdrawing from before a body of Parliamentarians, without giving them one charge, he adds, that this spiritless course "was imputed to the *lashty* of Wilmot, who commanded, and had a cooler courage than many who were under him." "*Lashty*," perhaps, would puzzle ordinary readers even now, who would have no difficulty with the word and its meaning if they saw it in a French book, under its proper form of "*lâcheté*,"—base cowardice.

The 'Clef d'Amour,' named above, is a reproduction, printed at Lyons with equal care and taste, of a French poem some five hundred years old. To those interested in French literature of the ancient times and "gallant" quality, this edition will be acceptable. It is prefaced by an introduction from the pen of M. Michalaut, which forms a very pleasant and a very useful paper.

OUR LIBRARY TABLE.

Guide for Travellers in the Plain and on the Mountain. By Charles Boner. (Hardwicke.)

It is the fault of this little book that it meets us on our return from the plains and mountains over which it should have assisted us, when our experience is too fresh to let us write otherwise than regretfully, and when we are settling down to winter work as our only chance of driving away the too pleasant memories of summer. As we turn over the pages we wish that we had been guided by so pleasant a companion. We ask ourselves, with some pang of conscience, if his advice was not needed. Did we always travel third class in order to mix with the natives? Did we always take short steps, and make long greetings, and shun high mountains if they were unfamiliar to us, and inns where the charges were still higher? How about that peasant who wanted to shake hands with us? What was that rude shock given to our German when we found we could not understand a word of his dialect? Had we taken Mr. Boner in our knapsack, we might have avoided all this. But, on second thoughts, we should not have had a knapsack at all, for Mr. Boner is most energetic in his disapprobation of it, and insists on its being discarded for the lighter "Rucksack" of Bavaria. One of the most curious features of Mr. Boner's little book is that it is written more from a German than an English point of view; that it applies rather to the mountains of Bavaria and the Tyrol than to those of Switzerland. In many passages you can see, in spite of all their generalization, that the author has some particular plan in view, that he alludes to some local custom. Yet his advice is none the less valuable that it is the fruit, not of mere climbing, but of climbing with an object. His experience has been gained in the pursuit of the chamois; and the natives with whom he has mixed have been bound to him by the fellow-feeling of sportsmen. Perhaps travellers will hardly find them so affable, or persevere with them long

enough to melt their upper crust of reserve and strangeness. But, even without this, Mr. Boner's hints are worth taking. We do not agree with some of his suggestions, which we think almost more likely to turn out ill than well; and others are almost too obvious to have needed pressing. These, indeed, are wholly confined to the first part of the book. There is not much advice to be given about "the Plain," be it that of Salisbury or Lombardy. The expediency of keeping your eyes open has been shown by Miss Edgeworth and echoed by Archbishop Whately; and there is no time to which the rule applies so forcibly as the time of travel. But on "the mountain" Mr. Boner is more at home. He does not in the least compete with any of the works of the Alpine Club; there is nothing about roping or glissading, taking running leaps at a crevasse, or coming majestically down on an avalanche. Yet there are points in the book which Alpine Clubmen will not be slow to take into account, and which may add to the safety of future explorers by diminishing their recklessness. Not a summer passes without reminding us that if English mountaineers fail in anything, it is not owing to excess of caution.

Poems. By Jean Ingelow. (Longmans & Co.)

THIS new edition, with excellent illustrations from designs by various artists, executed on wood by the Brothers Dalziel, will be a favourite with the public. The poems of Miss Ingelow cannot be read without profit as well as pleasure. They touch and refine the heart; they are thoroughly intelligible in the beautiful simplicity of their diction; unerringly true to nature, and invariably healthy in sentiment. Such works need no illustration, yet it is agreeable to see, as we do here, how readily one artist interprets the meaning of another.

Heber's Hymns. Illustrated. (Low & Co.)

THIS is a new edition of the well-known hymns of Bishop Heber, profusely enriched with illustrative and decorative woodcuts, by various artists and of varied qualities, and luxuriously printed. The best designs are those by Mr. W. Small, representing oriental incidents and scenery; especially to be noted among which are 'The Star of Bethlehem' (p. 16), and 'The Return to Jerusalem' (p. 18): both of them are well drawn, and spirited in conception. We cannot say so much in honour of "S. J. C.'s" 'Healing the Sick' (p. 5).—'Glorie in Excelsis' (p. 10), 'Why stand ye idle here?' (p. 31), and 'With trumpet sound,' a vignette (p. 42), by the same, are better than the average by this artist, and superior to the ordinary in their class. Mr. W. J. Allen's illustrations are unequal in merit. Thus 'Nativity' (p. 9) is not good for much; 'Our Saviour and St. John the Evangelist' (p. 13) is even less valuable; also 'Healing the Leper' (p. 25), 'Healing the Blind' (p. 34) is better. This, in turn, is surpassed by 'Go out' (p. 56). Mr. H. C. Selous's 'Lazarus' (p. 52) is satisfactory. On the other hand, 'Our Saviour disputing with the Doctors' (p. 17) is out of keeping with the subject: the figure of Christ is absurdly conceived and badly drawn. Badly drawn, also, is the angel on the right of 'He is not here' (p. 45). These characterize the book, with the exception of some cleverly-wrought landscapes by Mr. E. M. Wimperis (pp. 59, 86) and Mr. F. Skelton (p. 90); also figure-subjects by Mr. T. D. Scott. Broadly to write, there is an excess of sentimental design in this little book.

The Management of Steel. By G. Ede. (Tweedie.) A book written by a practical man for the use of practical men, and necessarily dealing with the technicalities of the manufacture to which it relates, is almost removed from our notice. There is in Mr. Ede's book, however, so earnest a desire to convey information, and it is so evident that the information given is drawn from the actual experience of the author, who fills an important position in the gun-factories department, Woolwich Arsenal, that we feel it our duty to call attention to the work, and recommend it as a type upon which might be written, with great advantage, many similar works connected with our more important handicrafts.

Messrs. Seeley, Jackson & Halliday publish some well-written and fairly-illustrated children's

books. Of the "Children's Friend Series," *How Paul's Penny became a Pound* is by no means a bad story. Its woodcuts are much above the average of the class. In spite of an indifferent frontispiece, *Short Steps for Little Feet* will be acceptable.—Messrs. Routledge & Son publish two highly-coloured and illustrated children's books—*The History of Moses*, and *The History of Joseph*. The pictures in this pair of books are generally very good indeed: a few are very bad. The spirited character of the greater number will please young folks.

We have on our table *The Works of William Shakespeare*, edited by William George Clark, M.A., and William Aldis Wright, M.A. (Macmillan),—*The Scientific and Literary Treasury*, by Samuel Maunders, new edition by James Yate Johnson (Longmans),—*The Victoria Magazine*, Vol. VII. (Faithful),—*Memoir and Correspondence of Mrs. Coutts*, by the late Rev. W. M. Hetherington, M.A., with a Preface by the Rev. Solay Burn, D.D. (Nisbet & Co.),—*Sermons, Doctrinal and Didactic, bearing on the Religious Topics of the Day*, by Thomas Williamson Peile, D.D. (Rivingtons),—*The Law, the Prophets, and the Psalms: their Divine Inspiration Ascertained upon the Authority of Our Lord and Vindicated from Objections. With Animadversions in Disproof of the Testimony of Josephus in Reference to the Canon*, by John Collyer Knight (Longmans),—*Reading without Tears; or, a Pleasant Mode of Learning to Read*, by the Author of 'Peep of Day' (Hatchard),—*The Headless Horseman: a Strange Tale of Texas*, by Capt. Mayne Reid (Chapman & Hall),—*Luttrell of Arran*, by Charles Lever (Chapman & Hall),—*Heiress of the Blackburnfoot: a Tale of Rural Scottish Life* (Smith & Elder),—and *A Tramp's Wallet stored by an English Goldsmith during his Wanderings in Germany and France*, by William Duthie (Hardwicke).

LIST OF NEW BOOKS.

Annie Price, or Grandmamma's Sunshine, 18mo. 1/6 cl.
Aunt Judy's Christmas Volume, ed. by Mrs. Gatty, sm. 4to. 5/6 cl.
Barlow's Essays on Symbolism, cr. 8vo. 4/6 cl.
Blunt's Christian View of Christian History, cr. 8vo. 7/6 cl.
Bonar's Hymns of Faith and Hope, Third Series, 18mo. 8/6 cl.
Bradley's Sermon in Memory of the Bishop of Calcutta, 8vo. 1/6 swd.
Cattull's Veronensis Liber, recognovit Ellis, 18mo. 3/6 cl.
Chambers's Essays, Familiar and Humorous, 1st and 2nd series, 2/6 cl.
Chave's The English Pastor Abroad, post 8vo. 6/6 cl.
Dacia Singleton, or Altogether Wrong, 3 vols. cr. 8vo. 3/6 cl.
De Ponte's Social Reform in England, cr. 8vo. 5/6 cl.
Foster's (Birket) Summer Scenes, illus. 4to. 3/6 cl.
Gerty and May, author of 'Granny's Story Box', illus. Vining, 2/6 cl.
Greenwell's (Dora) Essays, 12mo. 6/6 cl.
Hamilton's Parochial Sermons, 12mo. 3/6 cl.
Hareley's Albumenaria with and without Droopy, cr. 8vo. 2/6 swd.
King's Handbook of Engraved Gems, 8vo. 10/6 cl.
Law's Earthwork Tables, 18mo. 3/6 cl.
Law's The Alps of Hannibal, 2 vols. 8vo. 5/6 cl.
Lea's Sermons on Prayer, 12mo. 2/6 cl.
Lever's Sir Brook Fombrooke, 2 vols. post 8vo. 24/6 cl.
Light in the Liturgy, author of 'Glimpses of Heaven', 32mo. 1/6 cl.
Longfellow's The Flower de Luze, 12mo. 1/6 swd.
Mackerness's The Village Idol, illus. 12mo. 3/6 cl.
Masque (The) at Ludlow, by Author of 'Mary Powell', cr. 8vo. 8/6 cl.
Mulready (Masterpieces of), 14 Photos., by Stephens, 4to. 22/6 cl.
O'Brien's Cottage Stories, 12mo. 2/6 cl.
Parrott's Charley Layton, 12mo. 2/6 cl.
Pearce and Hargre's Analysis of English History, 12mo. 1/6 cl.
Rose's Adventures of Clumsey Boy Crusoe, col. illus. 4to. 2/6 cl.
Rossetti's Criticism on Swinburne's Ballads and Poems, 12mo. 3/6 cl.
Routledge's Scripture Gift-Book, 24 col. illus. 4to. 5/6 cl.
Swinburne's Notes on Poems and Reviews, 8vo. 1/6 swd.
Tales of the Chimney Corner, by A.T.B., 12mo. 1/6 swd.
Timbs's Nooks and Corners of English Life, cr. 8vo. 6/6 cl.
Twemlow's Firm Belief in the Deluge, Part 2, 8vo. 1/6 swd.
Warne's Christmas Annual (Five Alls), royal 8vo. 1/6 swd.
Will's Practice of the Referee's Courts in Parliament, 8vo. 21/6 cl.
Wilson's Inorganic Chemistry, 12mo. 3/6 cl.

GENUS IRRITABLE.

November 6, 1866.

A provincial newspaper contains the following paragraph, which I find copied into the *Bookeller* of October the 31st:—

"Mr. Robert Buchanan.—Authors seem to have forgotten that their best weapons are those which they are most accustomed to wield, and that the public appreciate literary warfare far better than legal. If the reports which are current in certain circles be well founded, the law courts will have plenty to do before long in settling the disputes between various literary gentlemen of more or less reputation. First of all, Mr. Robert Buchanan—a poet of whose genius there can be no doubt—chose, from motives of personal friendship and gratitude, to dedicate his last volume to Mr. Hepworth Dixon, of the *Athenæum*. The critic of the *Westminster*, who, being a poet himself, has, perhaps, a right to do so himself to 'the choking

of singing birds,' chose to fall foul of this dedication, and to attribute 'sycophancy' to the poet, whereas are great wrath and a threatened lawsuit. The same plaintiff will appear in another action against Mr. Bentley, the proprietor of *Temple Bar*, for publishing his name as that of the author of a poem called 'Hugo the Bastard.' Mr. Buchanan does not deny his paternity; but as the piece is not a favourable specimen of his style, he thinks that he has a right to maintain his anonymity if he chose."

Now, who may have favoured the writer of this paragraph with his information, I am at a loss to guess; for I am quite unconscious of having expressed to anybody (save one rather intimate friend) my opinion concerning the two affairs in question; and since some readers whom I respect may be led to believe me rasher than I ought to be, I feel bound to volunteer a little explanation.

The objectionable passage in the *Westminster Review* was as follows:—"Mr. Buchanan's 'London Poems' are disfigured by one of the most sycophantic prefaces we ever read,"—meaning, of course, the dedication to Mr. Hepworth Dixon. I will not deny that these words of the anonymous writer gave me a certain pain; for when one is bitten, it matters little whether the attack come from a pure breed or a mongrel. Let one who has undergone a sore struggle in the pursuit alike of bread and fame examine his feelings towards the first man who whispered confidence and afforded help, and he will know what my feelings were and are towards Mr. Dixon. With me at least, gratitude towards those who brought the cup of water, while priest and Pharisee passed by, is a passion deep as tears,—as pure as the elements drunk down in that refreshing draught, and as eternal. These things are trifles to all the rest of the world, but they are immortal memories to the recipients; and whosoever forgot them or feared to utter his gratitude for them, would assuredly be doomed to a dog's paradise—the comfortable, painless region where there is yelping and wagging of tails, but no shining of souls. The word "sycophantic," as written in the *Westminster Review*, expressed every imputation which to a pure mind is horrible and loathsome,—reflected hideously on my private character as a man,—tamped foully with my holiest private feelings,—and, in a word, was distinctly of that complexion which the law terms libellous. Yet a very little reflection convinced me that to seek redress from the cowardly author of the assault would be to demean a stainless reputation to the brutal level where such base things are conceived and perpetrated,—to pass into the foul region whither no man, however earnest his indignation may be, can venture with clean feet. So I left the assaulter to his dog's paradise, content that he should howl and rot there, and faintly hoping that the consciousness of public contempt might prevent him from ever again venturing on the highways of literature.

The affair in which Mr. Bentley is concerned is of infinitely less consequence, yet was, in fact, more likely to result in a lawsuit. Some years ago, a London publisher requested me to hand over to him some of my juvenile writings, for use in a magazine; and I complied, on the express understanding that, as they were early and immature work, they should be printed anonymously. Shortly afterwards, that publisher ceased business, and the writings, by some extraordinary means, fell into the hands of the publisher of *Temple Bar*. On one of the pieces appearing some months ago, under my signature, in *Temple Bar*, I wrote to Mr. Bentley and protested—against the signature; and that gentleman responded by a distinct promise that nothing of the kind should occur again. But another poem appeared shortly afterwards, with my signature, and I protested still more strongly, and Mr. George Bentley, in a letter, just received, replies: "Until your letter drew our attention to it, we were ignorant that your name had been appended to the poem in question." That is how the matter stands, and I am puzzled to guess how the wind should have carried it so far. I have now reason to believe that Mr. Bentley intended no discourtesy, and that the whole difficulty has arisen through the awkward and peculiar way in

which my manuscripts were transferred to the hands of his editors.

I cannot conclude this letter without calling attention to a careless statement in the *Examiner*, that the 'London Poems' consist of my contributions to magazines. This is as injurious as it is untrue. Only three of the seventeen poems were previously printed—one in the *Argosy*, and two in the *Fortnightly Review*. I have found it necessary to write variously for bread; and although, in so doing, I attempt to write well and responsibly, I should only under very extraordinary circumstances reprint what was so written. What is produced to serve one purpose, and serves it, is quite unlikely to serve another and a higher purpose; and although it is at all times a misfortune to the man and a disgrace to the country that an original writer should be compelled to drudge with his pen for subsistence, the public has been too generous to judge me by any productions save those which, in the intervals of labour, I have carefully nurtured, and which I am able boldly and candidly to avow.

ROBERT BUCHANAN.

MYTHS, MÆDÆVAL AND MODERN.

Bottesford Manor, Brigg, Nov. 3, 1866.

IN the first article in this day's *Athenæum* you mention the fact that a person who was supposed to be the Wandering Jew was frequently seen in London between the years 1818 and 1830. Did this singular person limit his walks to the streets of the metropolis? I have very often heard my father say that, at a period included between the dates you have given,—I think, but am not sure, that it was in the year 1824,—a tall, middle-aged man, dressed as an Asiatic, with a long, flowing, silk-like beard, was to be seen wandering about the streets of Hull. He always had a small volume of Hebrew or some other Eastern language in his hand, on the contents of which his attention was, as it seemed, ever fixed. The prevalent story was that this was the person to whom Our Saviour addressed the awful words, "Tarry thou till I come." I understood that many persons, whose education should have taught them better, were fully convinced of the truth of the popular opinion. I believe my father saw the man more than once. He certainly never spoke to him, nor could he hear that any one else had been admitted to that honour. It was said that the wanderer arrived in Hull direct from Germany. It would be interesting to know whether this person was the same as the one you have mentioned, or another who was led by the fame of the Londoner to emulate his manner and deportment.

The Rev. J. Furniss's work on 'The Sight of Hell' is unhappily but a specimen of a large class of books which are very widely circulated among the Catholic populations of this country and the Continent. From what you have said, I gather that it does not surpass, scarcely equals indeed, another very popular book of this kind, which professes to give a description of the city of the lost. I had often heard of the book, and had once in childhood been heartily frightened by the loathsome plates in a copy which, by accident, fell in my way; but I had never read it till recently, when I purchased the volume now before me, which, from the character of its binding and paper, seems to be one of a new edition. I bought it at the publisher's shop in Paternoster Row, and was informed at the time that it had a very wide circulation. The title is, 'Hell opened to Christians to caution them from entering it..... Written in Italian by F. Pinamonti, S. J.' It is published, "with lawful authority," by Richardson & Son, for the Catholic Book Society. I will not give you any quotations from its pages. The blasphemies are of the same utterly dull and unimaginative nature as those you have reprobated; they are, perhaps, a little more revolting.

The strange delusion which impels some persons to think they honour God by inventing, or reproducing for religious use, details of this kind, is not confined to those persons who have especially devoted themselves to writing descriptions of the under-world. The late Rev. F. W. Faber, in one of the most popular of his devotional works, made

some frightful statements on this subject. He told us that there are mere boys and girls in Hell who have perhaps sinned but once, that none save the blessed in Heaven lead a life of such thrilling consciousness as the millions of ruined souls whose countless forms of agony shall continue for ever; and he has reproduced from some foreign source a story of a Carmelite nun, which, for revolting blasphemy alike against the divine and the human nature of the Saviour of Man, is surely without its equal among the fables of hagiology. The author tells us, with the evident conviction that he is narrating a real event, that Sister Francesca, of the Blessed Sacrament, was showed by our Lord Himself the loss of a human soul, and was compelled by Him several times to study each minute particular of its tortures. When the saint shed tears at the contemplation of such unutterable agony, Our Lord upbraided her for weeping, saying, the soul "hath chosen to damn itself; I have given it many helps of grace that it might be saved, but it would not profit by them. I am pleased with your compassion, but I would rather have you love my justice."—*'All for Jesus,'* 4th edit., page 350.

It was quite right for your Reviewer to treat this subject as he would any other literary offence. I may, however, be excused if I remark that I consider the bad taste shown by such writers as the least of their errors. EDWARD PEACOCK.

THE "WAGER OF BATTLE."

A Correspondent, referring to the review of Mr. Henry C. Lea's work, *'Superstition and Force,'* which appeared in the *Athenæum* for November 3, sends us an abridgment of a mediæval deed of gift, from the archives of Coldingham Priory, discovered some time since in the records of Durham Cathedral. It will be seen that this fragment bears upon the portions of Mr. Lea's work which treat of hired champions. It may be doubted whether hired champions were always rewarded with so much as "three acres and a half of land and a toft and croft"; though, probably, they were sometimes even more liberally paid. Our Correspondent fixes the date at about 1260, as two of the subscribing witnesses, Alan de Swynton and Thomas de Nesbit, were living at that time. We subjoin the extract in the original monkish Latin:—

"Omnibus, &c., Johannes, quondam porcarius de Coldingham, salutem. Noverit universis vestra me dedisse, &c., deo et beato Cuthberto et sanctæ Ebbe, &c., in liberam, &c., elemosinam, tres acres terre et dimidium, cum uno tofto et crofto in magna Ristona, &c., quos mihi Rogerius, filius Ade de Riston, dedit pro duello quod pro eo manucepi et vici. (Here follow the boundaries.) Testibus, Will^o de Mordington, Dno Alano de Swynton, Thoma de Nesbit, Ada de Prendergest, &c."

Which may be thus translated:—

"To all to whom these presents may come, John, formerly swine-herd of Coldingham, sends greeting. Be it known to your community that I have given to God and Saint Cuthbert and Saint Ebb in frank alms three acres and a half of land, with one toft and croft, in Great Riston, which Roger, son of Ada de Riston, gave to me for a combat which I took in hand and won for him. Witnesses, William de Mordington, &c."

The above extract is further interesting as being a specimen of the mode of conveyance then used in the ancient tenure of frank alms or free alms, which was afterwards expressly excepted from the statute 12 Car. II. c. 24, by which knights' service and sundry other feudal tenures were destroyed or turned into free and common socage, and homage, wardships, values and forfeitures of marriage, aids for marriage and knight-hood, and other mediæval oppressions, were abolished.

THE RIGHT HAND.

November 1, 1866.

ALTHOUGH at first sight apes might appear to have a superior organization to man, being in possession of four hands, yet because locomotion and prehension have both to be accomplished by the

hands of the former, while in man there is a division of labour with his limbs, the upper limbs being almost entirely prehensile, the result is, that man's two hands are worth more than the ape's four. But this division of labour is carried out still further in the adult and in the skilled artificer as compared with the infant, and with many savages and peasants. Art, for almost all its purposes, seizes hold of the right hand alone, and educates it to such an extent that the difference, both in the amount and kind of work done by the right hand of an artificer, clerk, or pianist, is very great indeed compared to that which the left achieves, and the tendency by multiplication of tools in civilized society is always in favour of increased special use of the right hand. Physiologically, the two hands are not exactly the same, as will be at once evident by comparing the veins; indeed, every tailor and glover knows that the two upper limbs are not quite symmetrical. It would be interesting if some light could be thrown on this curious specialization of an organ, from language or any other monuments, and to notice the ebbing and flowing of right hand dexterity. The Latin, Greek, and Hebrew lexicons and literature all bear witness to right hand superiority, though I am not so sure that it is recognized in the vocabularies of much ruder races. The phenomenon of certain individuals being left-handed may be looked upon as a slight monstrosity; indeed, the painstaking selection of the right hand by man for special purposes, has been told in favour of hereditary transmission of its aptitude. In these days, when the doctrine of "Continuity" is cropping more than ever on the surface, I imagine that this subject is worth a little consideration. J. SHAW.

EVVIVA!

Venice, Oct. 30, 1866.

VENICE is now truly Italian! On Saturday the number of votes were read aloud from a balcony in the Doge's Palace by Signor Tecchio, President of the Chamber of Deputies, and late President of the Court of Appeal. We went into the palace and saw the magnificent Sala del Scrutinio prepared for the ceremony. Signor Tecchio with several other notables of Venice stood on a dais, covered with red velvet, in front of a throne and under the portrait of Victor Emanuel, not a good painting, and contrasting painfully with the splendid Palmas, Tintorets, and Bassanos which cover the walls and ceiling of this noble room. Half of the space had been railed off, and filled with rows of chairs for the ladies; and the sun, streaming in and lighting up the old pictures, and then falling on the gay toilettes, gave a bright look befitting the occasion. The telegrams announcing the results of the voting throughout Venetia were read aloud, and received with cheers and waving of handkerchiefs. Before the ceremony inside was over, we hurried down stairs and across the Piazzetta into the regal palace opposite, where an officer on General Revel's staff had kindly procured us admission. Everything there is in grand disorder, carpets being stretched and laid down, and furniture of all kinds standing in heaps about the rooms, which are to be ready to receive the King and his suite on the 7th prox. The palace contains 350 rooms, and all will have to be ready by that date. We went to a window of the audience-chamber, opposite the Doge's Palace; and soon Signor Tecchio appeared on the balcony opposite, which was decorated with flags and red velvet embroidered with the white cross of Savoy. The National Guard was drawn up just under the balcony in a square, with their band in the centre. The President's tall figure and flowing white beard, with a broad blue ribbon across his breast, looked very picturesque, as he shouted the number of St's. The moment he had ceased, or rather was supposed to have ceased,—for the wind was so high no one could distinguish a word,—the band struck up, and the cannon boomed from the various men-of-war, now lying a stone's throw from the quays, and all dressed with flags. Among the squadron are three iron-clads, the Varese, Terribile and Formidabile, —of which the first mentioned is a ram and looks like work, but the other two seem mere barges of guns, and are pierced for a more numerous armament than they yet carry. The guns on board appear to be of light calibre compared to our own

tremendous ordnance. The Formidabile was the ship that steamed out of the battle of Lissa just as the engagement began, owing, they say, to mistaking the signals.

We walked through the suite of rooms preparing for the Prince de Carignan, all very small and not well distributed, the rooms opening one into the other, as is so frequently the case abroad. Apropos to the missing pictures, a rather amusing incident occurred before General Leboeuf left. He went over the palace with General Allemann, pointing out the spaces on the walls where pictures had been, and were no longer. At one large bare space in a prominent position, General Leboeuf paused and said, that one really ought to be sent back immediately. General Allemann smiled, and replied that it was quite out of his power to promise that, as the picture was in the Louvre at Paris, and had been for many years.

We went to the Arsenal some days ago, expecting to find bare walls, after all we had heard of Austrian depredations. All the armour, flags and trophies are intact, and the guardians (Italians) laughed at the idea of the Austrians having cleared the place. They told us that what was taken consisted of a model of the Bucentaur, and a few other smaller models, which some years ago the municipality refused to buy, and the Emperor had paid for out of his private purse. In justice it must be acknowledged that no troops could have gone through the trying ordeal with the gentleness and temper the Austrians have shown; and all praise is due to the military chiefs who have inaugurated the conciliatory policy, which will, we hope, be persevered in. On Sunday, General Mezzacapo reviewed the garrison of Venice, about 8,000 men, in the Piazza San Marco. The marching past was very well done, although some slipping about was noticeable, owing to the excessive polish of the pavement. One poor bersagliere, the leader of the buglers at the head of the battalion, came flat down on his back at the General's feet, his hat flying one way, his bugle another. I pitied the poor fellow, whose *amour propre* evidently suffered severely. In the evening the town was partially illuminated, and a band played on the Piazza, where "Italia, Vittorio Emanuele, 64 St" was written in big letters over the Procuratie. I hope the Gendarmes will soon enter on their functions, and stop the roughs and boys from tramping up and down outside the cafés on the Piazza, upsetting chairs and tables, pushing headlong through the crowd, and howling Viva Italia, Viva Garibaldi, Viva il Rè, &c., till one is sick of them, and also of Garibaldi's Hymn, which is dinned into one's unhappy ears all day and all night long. The Captain of one of the Austrian men-of-war, still lying out between the city and the Lido, has just paid us a visit, and had stones thrown into his boat as he passed the public garden.

General Möring, the Austrian Commissioner, is still here, and will be when the King comes. Doubts are raised about his being invited to Court; but I can hardly believe that a general officer of a friendly power could be left out.

The weather has changed and become rather warmer, and we hope for Scirocco when Victor Emanuel does come, or he will think Venice is situated near the North Pole. R.

NEWS FROM NAPLES.

Naples, Oct. 27, 1866.

VESUVIUS, which has for several months thrown up jets of fire, and filled curious foreigners with the hopes of witnessing an eruption, has for the last fortnight made no sign. Some are inclined to regard this quiescence as an indication of an approaching demonstration, and, truth to say, when all Italy is on fire for the affairs of Venice, the time would not be ill chosen. There is, however, reason for believing that the present tranquillity of our mountain may be attributed in some degree to the convulsion which recently took place in Foggia, that is to say, on the night of the 13th inst. It was about half-past 11 P.M. that the city was terrified by a fearful shock of earthquake, pursuing the direction of S.E. to N.W. "It was neither horizontal nor perpendicular," says Prof. Bruni, who was on the spot, "but resembled very much the movement occa-

sioned by the bursting of a subterranean mine. Its direction would seem to show that some conflagration had taken place under Monte Vulture, in the Basilicata. Some of the inhabitants assure me that, a short time since, they felt another but much lighter shock, whilst that of the 13th was very sudden and fearful, and subsided gradually. The only other place in the province where it was felt was Canosa. In Foggia, the terrified population rushed into the streets, and attempted to break into the churches. There was a great tumult in the prisons, when those who were confined made desperate efforts to burst open the doors; but the troops and the National Guards, who were summoned to the spot, prevented such a disaster. No great injury was inflicted on the houses, which are generally of one floor, and of a very strong construction. What degree of relationship may exist between Vesuvius and Monte Vulture I cannot say; but, should there be any, it is probable that its friend and coadjutor has spoken for our now quiet neighbour, and that no eruption can be reasonably expected from the silence of Vesuvius. Of the excavations intended to be recommenced in the ruined city which lies at its feet, I have already spoken; and I can now inform you that they will be entered on as soon as the expropriation of the land is completed, which, it is "hoped," will be about January: of course I speak of Herculaneum, where, as is well known, the richer treasures of Art have been found. Preparations are being made here for the Exhibition which takes place in Paris next year, and amongst other works destined to be sent off by Neapolitan artists, are an 'Emeralda' in bronze, and two other studies in marble, by Solari; 'A Religious Discussion,' the property of M. Wouville, by Altamura; Palizzi, too, will send some precious creations of his pencil. In architecture has been selected an interesting work representing the interior of the Forum of Pompeii, by Signori Catalani, Veneri, and Travaglieri, as also the façade of the Cathedral of Florence, by Signor Alvino. Vertunni exhibits two landscapes, the property of Signor Lattante, whilst our well-known sculptor, Cav. Angelini, as member of the National Institute of France, will send two others of his works, which will be placed in the room destined to French artists. This is but a small instalment of what will represent Naples Art, and I shall have to report progress as time advances. This country has not as yet enjoyed repose enough to admit of literary leisure or creation; but I see the following notice in one of our local journals. "We have read with pleasure an historical romance, by the Signorina Vincenza Vittoria Colonna, under the title of 'Count Ruffo.' We cannot but congratulate the young authoress on the manner in which she has completed her work, as also the fidelity with which she has preserved the history of Naples in the thirteenth century." To this it may be added, that it is of good augury that "woman" begins to emerge from the mire of ignorance and voluptuousness to which she has long been condemned in the South, the mere plaything of man, and the victim of priestly government.

San Carlo will be opened for the season on the 1st of November, and it is announced that there will be eighty-eight performances. Judging, however, from the names of the artists, the prospect is very poor, though the best selection that circumstances admitted of has been made. As regards the music, the arrangements are better. Great regret, however, is expressed that 'La Forza del Destino' of Verdi has not as yet been brought forward. H. W.

OUR WEEKLY GOSSIP.

Lord Brougham, at the earnest desire of many friends, has consented to sit for his bust, to Mr. Adams, of Rome. This artist is engaged on the statue of Mr. Gladstone, for Liverpool. By the way, all eminent Englishmen are supposed to be "Milors," and the Italian papers accordingly speak of an interview which Lord Gladstone has had with the Pope!

Lord Derby has conferred a pension of 100*l.* a year on Mrs. Carpenter, widow of the late Keeper of Prints and Drawings,—herself an artist of re-

markable ability. Mr. Carpenter was in office more than twenty-one years.

The author of the 'History of Dublin,' and the 'History of the Viceroy of Ireland,' Mr. J. T. Gilbert, has been elected by the Royal Hibernian Academy of Arts to succeed the late Dr. Petrie in the chair of History and Archaeology. This election has been confirmed, of course, by the Lord Lieutenant.

Eleven years ago we had to record the appearance of the favourite daughter of the late Sydney Smith as an authoress. The biography of her father was published with the good aid of Mrs. Austin as editor. That daughter has now passed to her rest. Saba was the second wife of Dr., afterwards Sir Henry, Holland, Bart., whom she married in 1834. Sir Henry was subsequently Physician in Ordinary to the Prince Consort and, later, to the Queen. Besides medical works, he is the author of *Travels in Albania and Thessaly*. Of this marriage there are two daughters, who have to lament the loss of a tender and intellectual mother.

"Guy Faux Day" was observed by children and idle men in the streets, as usual, on Monday. The event reminds us of what occurred to Gresham (one of those concerned in the Overbury murder). He was an almanac-maker, and, like his colleagues, indulged in prophesying. Unfortunately, he "wrote so near" what afterwards happened in the Faux affair, that he was suspected of having had a hand in it. The danger into which he fell did not put a check on the prophetic literature in almanacs. The last anniversary induced the managers of the Victoria and Britannia Theatres to reproduce the effective old Coburg drama of 'Guy Fawkes,' in which O. Smith used to show what an artist he was,—in his way. The Britannia management cannot be said to have improved history by ending the drama with "the burning of Guy Faux."

A barbarous observance of Guy Faux Day was made by some miscreant at the cost of the old church at Walsingham, Norfolk. The sacrilegious villain had deposited a charge of gunpowder under the organ, which charge must have been lighted by a fuse. The consequent explosion not only nearly destroyed the organ, but it utterly destroyed the beautiful and ancient chancel windows. It is scarcely four years since the venerable fabric was repaired at a cost of nearly 2,000*l.*

One of the clever, unobtrusive "ministering angels" has recently departed in the person of Miss Matilda Wrench, the companion of Mrs. Fry in her prison visitations, and that good woman's successor in that and similar beneficent work. Miss Wrench was known in literature for her translations from the German, and for her 'Visits to Female Prisons at Home and Abroad,' published in 1852.

Dr. Conquest, who has recently died, at the age of seventy-seven, was an early worker. He was a Member of the College of Surgeons at the age of eighteen, and was an assistant military surgeon in his nineteenth year. The manual which he wrote for students in obstetric medicine was translated into many languages, including Hindustani and Chinese.

The Life of David Roberts, R.A. will be published on the 17th inst.

Messrs. Moxon will shortly publish a thoroughly revised edition of Lady Calcott's 'Histoire de France,' and a series of 'Standard Penny Readings,' selected from the rich store of copyrights belonging to their house.

Dr. Davidson's Preface to the English edition of Fürst's Hebrew Lexicon will appear immediately, as a pamphlet.

Messrs. Routledge will shortly publish an illustrated work, entitled 'Ballad Poems of the Affections, from the Scandinavian,' translated by Mr. Robert Buchanan. Two of the poems, Oehlenschläger's 'Agnes,' and Claudius Rosenhoff's 'Lead-Melting,' appear in this month's *Argosy*; but the volume will consist mainly of the antique post-Christian ballads.

Two of the vacancies at the British Museum have been filled up by the appointment of Mr.

Edward Bond, to be Keeper of the Department of MSS., and of Mr. George Bullen, to be Assistant-Keeper of the Printed Book Department. Mr. Bond has for many years filled the posts of Assistant-Keeper of the MSS. Department and Egerton Librarian, and is well known as one of the first authorities in the country with respect to manuscripts; and Mr. Bullen, who has long been the Senior Assistant in the Department of Printed Books, is well qualified for his present position by his knowledge of bibliography, especially in all that relates to early-printed books.

A new play, by Messrs. Dubourg and Tom Taylor, the chief part in which is to be played by Miss Kate Terry, is in rehearsal at the Adelphi.

Mr. Falconer will inaugurate his dramatic season at Her Majesty's Theatre with an Irish drama, entitled 'Oonagh.' The house has undergone an important alteration in the removal of the stage boxes, the proscenium frame being brought ten feet forward in the house. This was effected by Messrs. Green & King, the decorators of the house, within the space of a week, during which relays of men relieved each other night and day.

'Hunted Down,' Mr. Boucicault's new drama, now acting at the St. James's, was originally played in Manchester, during the last summer. Miss Kate Terry's performance of the heroine excited the utmost sensation in that play-going town.

We print the following as we receive it:—

"Oct. 31, 1866.

"In 1857 Sir Alexander Grant brought out, through Messrs. John W. Parker & Son, the first volume of his edition of Aristotle's *Nicomachean Ethics*. It consisted of Prolegomena, and an advertisement prefixed to it stated that 'The second volume, containing a text of the *Nicomachean Ethics*, with notes critical and explanatory, is now nearly half through the press, and will, it is hoped, follow shortly.' In 1858 the second volume appeared, but contained the text and notes of only the first six books. An advertisement, however, which was prefixed, announced that 'the contents of the third volume (to be published shortly) will be as follows:—The *Nicomachean Ethics*, Books VII.-X., with notes, critical and explanatory. A complete translation of the *Ethics* of Aristotle. Index I. The Greek words, with classified meanings. Index II. The matter in the Aristotelian text. Index III. Subjects treated of in the essays and notes.' In 1866 Sir A. Grant brings out, through Messrs. Longmans (who are known to have become proprietors of Messrs. Parker's stock), his edition of Aristotle's *Ethics complete*. But the promised 'third volume' cannot be had separately, and the purchaser of the first two is compelled to forfeit their value, and buy the whole work, as if he were a new comer with whom no engagement had been contracted. There are conditions which excuse the non-fulfilment of a literary design. When the author, or some essential editor, is overtaken by incapacity or death. When a costly serial fails of the requisite circulation, no purchaser complains of having a fragment left upon his shelves. But when the editor actually completes his work, yet, in direct violation of his public promise, refuses it to his early readers, unless they will buy two-thirds of it twice over, it is difficult to imagine an adequate vindication. Yours, &c. A SUFFERER."

Similes and figures of speech are things not to be ventured on rashly by writers or speakers. At the disorderly meeting at the Mechanics' Institute, Dublin, at which Mr. Bright was present, a gentleman, described as "Mr. M'Corry, the poet," said of the chairman, Mr. Haughton, a teetotaler, that "his pathway had been strewn with broken bottles."

There has been a month's digging among the round British barrows in the chalk districts of the Yorkshire Wolds, which has produced great results. Only one specimen of metal was found, a bronze spear-head in a chief's hand, the point nearly touching the chin. Trunkless skulls, dismembered bodies, others orderly laid at rest, remains of some that had been subjected to burning, and traces of grave-feasts, corroborating the charge of cannibalism

gainst our pre-historic people, are among the results come at during these diggings.

Researches in the neighbourhood of the Camp t Chalons have led to the discovery of Gaulish and Gallo-Roman burials to the extent of 1,500 bodies, with all the objects of Art usually accompanying those corpses. The purely Gaulish bodies are buried on heights near a watercourse; the Gallo-Roman in the plain, without any particular arrangement. Further researches are being made, which are expected to lead to even more interesting results.

The scientific meetings of the Zoological Society, commencing on the 22nd inst., will be held in the rooms of the Linnean Society at Burlington House.

The *Publishers' Circular* says that "the plan of publishing a novel in a serial form was originated by Mr. Dickens," with 'Pickwick.' What then is the foundation of the well-known story about Richardson's 'Pamela'? According to this, 'Pamela' was published in detached parts. A reading-club at Slough (among others) took in the numbers, which were read aloud to the members by an influential and philosophic inhabitant of that village. Towards the conclusion, the club got so excited on the question of Pamela's marriage that when the last number came down, which decided it affirmatively, the members arose, opened the church, and rang a merry peal of bells in honour of the event.

Mr. Payne Collier has requested us to correct an error at the very close of his letter printed in our last number. He there states that the late Mr. Park, when reprinting 'England's Parnassus,' "in no instance appended the name of the poet, or the title of his production." The sentence ought to have run, "in no instance appended the name of the poet with the title of his production"—that is to say, Park never enabled the reader of his reprint, at the time that he saw the name of the author on the page, to ascertain also the title of the work quoted. The original editor of 1600 often committed the grossest blunders by assigning to one poet the property of another; and Mr. Park not only suffered these defects to remain, but multiplied them. Thus many lines written by Shakespeare are attributed to Drayton; and Drayton, in his turn, is deprived of several celebrated passages. Such errors Mr. Payne Collier means, as far as possible, to correct, and to enable the reader to refer to the original work, wherever it can be ascertained. The editor of 1600 made hundreds of misquotations, which were not set right by Park, but increased. We may add, that Mr. Payne Collier's green series of Reprints just concluded is divided into three volumes, and not into two, as stated in our paragraph on page 578 of our last publication.

Three new pieces have been put on the Paris stage—'Le Fils,' by M. Vacquerie, at the Théâtre Français; 'La Vie Parisienne,' with music by M. Offenbach, at the Palais Royal; and the 'Conjuration St.-Amboise,' by M. Bouilhet, at the Odéon. It has been decided by the referees to whom the dispute between Messrs. Varmand, the Director of the Vaudeville, and M. Sardou was submitted, that the latter had no right to withdraw his piece, and he was adjudged to pay 500 francs daily to the former until he resumed the superintendence of the rehearsals. In consequence of this decision, 'Monsieur Neuve' will shortly appear, as M. Sardou has recommended attendance at the Vaudeville.

Duelling seems making way in Paris. M. Sequin and an officer of the Zouaves had a fatal encounter a night or two ago, the account of which is suggestive of the days of Louis the Thirteenth. They quarrelled at a café, late at night, a blow was struck, a challenge given, seconds were found on the instant, and from a scarcity of cabs, owing to the lateness of the hour, the two adversaries and their seconds went out at midnight to the Bois de Boulogne, and fought the quarrel out with rapiers under a road-lamp. M. Sequin, who was the offender, was run through the body and died soon afterwards.

Cavaliere Milanesi, who was joint-editor with

Signor Pini of 'Vasari,' is engaged on a history of Italian miniature-painting.

'The Parisians in London,' the immoral drama which shocked even Paris, has reconciled itself with that prudish city by introducing into the piece a "Masked ball at Cremorne." *Allez, donc!*

The literature of the advertising columns of the American papers has its curiosities, as our own has. In the *Omaha Daily Republican* we find it announced that "Mr. River, fashionable barber," &c., has "three gentlemanly assistants to attend to your wants." A patent-medicine vender assures us that "Greenbacks are good, but Barker's Bitters are better." A defeated local candidate is said to have "shot the pit," "vamosed the ranche." Dr. W. Spooner certifies that his anti-fever and ague pills will preserve gentlemen in health and enable them "to meet their obligations." But as curious an advertisement as any is the following, headed "Wonderful, but true":—"Madame Remington, the world-renowned astrologist and somnambulist clairvoyant, while in a clairvoyant state, delineates the very features of the person you are to marry, and, by the aid of an instrument of intense power, known as the Psychometre, guarantees to produce a perfect and life-like picture of the future husband or wife of the applicant, with date of marriage, occupation, leading traits of character, &c. This is no imposition, as testimonials without number can assert. By stating place of birth, age, disposition, colour of eyes and hair, and inclosing fifty cents, and a stamped envelope addressed to yourself, you will receive the picture by return mail, together with desired information. Address, in confidence, Madame Gertrude Remington, P. O. Box 297, West Troy, N. Y."—These are samples from afar off; but we have our curiosities of advertising literature and social life at home. A few days ago a governess expressed her desire, in a *Times* advertisement, to obtain an engagement in "a small carriage family."

INSTITUTE OF PAINTERS IN WATER COLOURS.—The WINTER EXHIBITION OF SKETCHES AND STUDIES IS NOW OPEN, at their Gallery, 53, Pall Mall opposite Marlborough House.—Admission, 1s.; Catalogue, 6d.
JAMES FAHEY, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS IS NOW OPEN to the Public, at T. McLean's New Gallery, 7, Haymarket, next the Theatre.
R. CLOTHIER, Hon. Sec.

WINTER EXHIBITION.—THE FOURTEENTH ANNUAL WINTER EXHIBITION OF PICTURES, the Contributions of British Artists, is now OPEN, at the French Gallery, 120, Pall Mall.—Admission, 1s.; Catalogue, 6d.
L. ON LEFÈVRE, Secretary.

MR. MORRIS'S COLLECTION OF MODERN HIGH-CLASS PICTURES IS NOW ON VIEW at the Royal Exchange Fine Arts Gallery, 24, Cornhill. This Collection contains examples of Leslie, R.A.—P. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Fusi, R.A.—Eggs, R.A.—Frith, R.A.—Rosa Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersgill, R.A.—Calderson, A.R.A.—Sant, A.R.A.—Lejeune, A.R.A.—Auld, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, sen.—Dolson, A.R.A.—Cooper, A.R.A.—Gale—Mark—F. Hardy—John Fied—Frère—Ruizperez—Liddell—George Smith—Dwyer—Peter Graham, &c.—Admission on presentation of address card.

ARTEMUS WARD.—EGYPTIAN HALL.—TUESDAY, November 13.—Mr. Artemus Ward will make his first public appearance in England, at the Egyptian Hall, on the above date. His illustrated narrative will be entitled ARTEMUS WARD AMONG THE MORMONS; or, a Trip from New York to Salt Lake City. The Pictures by Mormon Artists.—Admission 3s., 2s., and 1s. Reserved seats at Mitchell's Royal Library, 33, Old Bond Street; Austin's Ticket Office, St. James's Hall; and at the Egyptian Hall.

SCIENCE

SOCIETIES.

ROYAL SOCIETY OF LITERATURE.—Nov. 7.—T. Greenwood, Esq., in the chair.—The dispute between the Ethnological and Anthropological Societies having been referred by them for arbitration to the Council of the Royal Society of Literature, the Council this day resolved, upon the data furnished to them by the respective Societies, that the cards printed and already issued by the Anthropological Society, for the present session 1866-7, should stand.

LINNEAN.—Nov. 1.—G. Bentham, Esq., President, in the chair.—Dr. C. Fryer, Mr. G. Krefst, Mr. G. Manners, and Dr. H. Powell, were elected Fellows.—The following papers were read: 'Account of the *Sclerotium stipitatum* of Southern India,' by Dr. J. Shortt.—'Synopsis of Diatomaceæ

collected by Dr. D. Lyall, R.N., on the N.W. Coast of British North America,' by Mr. F. Kitten.—'List of Cladoniceæ collected in Iceland, Faro, and Norway,' by Dr. Lindsay.—'Experimental Investigations with Cestoid Entozoa,' by Dr. T. S. Cobbold. In conjunction with Prof. Simonds, the author had succeeded in rearing four different species of *Tænia* (*T. medioanellata*, *T. caninus*, *T. marginata*, and *T. serrata*). One of the most instructive experiments was that in which they had reared numerous cestode larvae in a heifer. This animal, whilst under experiment, resisted the rinderpest, but all the other cattle in the same building were attacked. In about ten months the entozoa reared in the muscles had undergone a process of natural cure; so that beef might become infested with parasites, and yet remain perfectly fit for food, in consequence of the "measles" having undergone calcareous degeneration. Dr. Cobbold proposed to give the results obtained by a series of trichina experiments at a future meeting.—'Enumeration of the Species of Acanthaceæ of India, Ceylon, Burmah, &c.,' by Dr. T. Anderson.

ENTOMOLOGICAL.—Nov. 5.—Sir J. Lubbock, Bart., President, in the chair.—The Society met for the first time in Burlington House: a resolution in the following terms was proposed, seconded, and carried by general consent:—"That the Society desires to record its sense of the liberality and kindly feeling of the Linnean Society, evinced by the permission given to assemble in these rooms; and that the thanks of the Society be offered to the Linnean Society accordingly."—Col. H. Scott, R.E., was elected a Member.—The President urged upon members the desirability of giving notice beforehand of papers intended to be read, or subjects introduced for discussion. If notice were given a few days previously to the Secretary, he would take such steps as might be feasible for making the subject generally known; members specially conversant therewith would make a point of being present, invitations to attend might be issued to scientific persons who were known to be interested in the particular subject, and thus the discussions might lead to definite practical results.—Mr. W. W. Saunders exhibited two larvae of Cicadæ from Mexico, each of which had a clavaria growing from between the eyes; and said that, acting upon the suggestion of the President, he would, at a future meeting, of which notice should be given, bring forward for consideration the subject of 'Fungoid Growths on Insects.' Mr. Saunders also exhibited two singularly sculptured larva-cases, probably coleopterous, sent from Brazil by Mr. Reed.—Mr. Janson exhibited various new or rare Coleoptera recently received by Mr. Bakewell from Dr. Howitt, of Melbourne.—Mr. Stainton exhibited *Stathmopoda Guerini*, and a drawing of the larva, and of the gall on *Pistacia terebinthus*, within which the larva lives; and a drawing of a larva found in the berries of the alder, believed to be that of *Stathmopoda pedula*. Mr. Stainton also exhibited a collection of *Tineina* formed by Herr Lederer in Syria and Asia Minor.—Mr. F. Smith exhibited some large galls on the elm, formed by Aphides, and which when fresh presented a fruit-like appearance, being apple-green in colour, with the side exposed to the sun of a roseate hue; it was believed by Mr. Armistead to be an undescribed gall.—Mr. Pascoe exhibited two specimens of the female of a Coccus, the case or covering of which resembled a patella; they were from Port Lincoln, and were found on *Eucalyptus*.—The President exhibited specimens and magnified drawings of a new Centipede, about $\frac{1}{3}$ th of an inch in length, and remarkable not only for its small size, but for the small number and the distribution of its legs, of which there were nine pairs only; he proposed to give a history of its transformations, and to describe it under the generic name of *Pauropus*, in allusion to the paucity of feet.—Mr. W. Rogers sent for exhibition a remarkably pale variety of the female of *Hipparchia Janira*, and a specimen of *Rumia crataegata*, in which the left fore-wing and the right hind-wing were pure white, whilst the rest of the insect was as deeply coloured as usual.—The Secretary exhibited some Egyptian beans which had been sent

to him anonymously, and which were found to be infested with a species of *Bruchus*; and read a letter from Mr. H. Reeks, giving an account of his entomological experiences in Newfoundland.—The Rev. Douglas Timins communicated a 'Note on the Appearance of *Argynnis Lathonia* in the North of France.'—Mr. M'Lachlan read a paper entitled 'New Genera and Species of Psocids.'—Mr. E. Saunders read a paper entitled 'Descriptions of Six new Species of Buprestids, belonging to the Tribe Chalcophorides of Lacordaire.'

CHEMICAL.—Nov. 1.—Prof. W. A. Miller, M.D., President, in the chair.—Mr. E. Purser, jun., was admitted and Messrs. W. C. Roberts and E. P. H. Vaughan were elected Fellows.—Dr. H. Sprengel gave a description of apparatus for taking the sample and determining the specific gravity of heterogeneous liquids, which was particularly adapted to the examination of acids contained in vitriol chambers.—Mr. E. T. Chapman then read a paper 'On the Gradual Oxidation of Organic Bodies,' of which Mr. W. Thorp and himself were joint authors. Several representatives of the vinic series were acted upon by sulphuric acid and bichromate of potash, when they became converted into acetic acid; whilst compounds of higher series were changed into propionic and valerianic acids.

MEETINGS FOR THE ENSUING WEEK.

- Mon. Royal Academy, 8.—'Anatomy,' Mr. Partridge.
— Geographical, 8.—'Mr. Johnson's Recent Journey to Khotan, Chinese Turkestan,' Sir H. C. Rawlinson.
Tues. Engineers, 8.—'Steam-power on Gloucester and Berkeley Canal,' Mr. Clegum. 'Steam-power on Grand Canal, Ireland,' Mr. Healey.
Wed. Microscopical, 8.
THURS. Numismatic, 7.
— Syro-Egyptian, 7½.—'Bilingual Tablet of Tanis,' Dr. Birch.
— Linnæan, 8.
— Chemical, 8.—'Ozone,' Dr. Daubeny; 'A Chloro-sulphide of Carbon,' Mr. Hartley.
— Royal, 8½.—'A Crystalline Fatty Acid from Human Urine,' Mr. Schunck; 'Structure of Optic Lobes of Cuttle-Fish,' Mr. Lockhart Clarke.
— Antiquaries, 8½.

FINE ARTS

WINTER EXHIBITION OF PICTURES BY BRITISH ARTISTS.

THE French Gallery now contains the fourteenth annual gathering of Pictures by British Artists. The collection is rather above the average in quality, and, we think, fewer in the number of works than usual. The latter fact is rather an advantage than otherwise, the truth being that, so far from our public exhibitions being, as is often alleged, too small to contain all the pictures that are worthy of display, they are much too large; their defects are really caused by the standard for admission being irregularly and sometimes unjustly applied, and the zero-point being, in a considerable number of cases, placed by far too low. We believe that the Arts would be benefited, and the public much better pleased—certainly better taught and less fatigued—if half the pictures which now find exhibition-room were returned to their makers and never seen at all. The noteworthy contributors to the gathering which we have now to examine are Messrs. F. M. Brown, P. H. Calderon, G. R. Chapman, T. Faed, A. Hughes, A. Legros, J. T. Linnell, H. S. Marks, A. Moore, J. W. Oakes, V. Prinsep, F. Sandys, W. B. Scott, Stanfield, F. Walker, E. M. Ward, J. D. Watson, and G. F. Watts. This alphabetical order will serve here as well as any other method; the better that it permits the immediate introduction of that which is the most original, one of the best painted and certainly the most paradoxical of pictures in the whole collection.

The work which we consider to be thus describable is, *The Coat of Many Colours* (No. 30), by Mr. F. M. Brown, the subject being the presentation of Joseph's blood-stained garment to Jacob, the father of the twelve. The landscape background to this picture is not essentially oriental in its character, although the costumes of the figures it contains are evidently so far true to the East as careful study can make them. We do not write this by way of carping at Mr. Brown's treatment of the subject in this respect, but rather in order to state our belief that he has done well in being truthful so far as circumstances permitted; to go further in

this direction would involve residence in the East. In this respect, unless we deceive ourselves, is to be found the key to Mr. Brown's recognition of his subject and of his mode of treating the picture which is before us. Jacob, in extreme old age, is seated at the foot of a fig-tree, shaded by many boughs from the heat of the sun; he has a long white beard, in the treatment of which, as everywhere in this painting, this artist's characteristic taste may be seen; he is wrapped in a full robe, which is in itself a most careful study, and he regards intently the coat which is displayed before him by three stalwart brothers of his favourite son. The actions and expressions of the three are replete with power in Art, and amply rich enough in variety of design to testify that the artist who produced them is one of the most thoughtful and original men of his class in our times. The student who is familiar with the subject of this picture in all its bearings will not fail to see where Mr. Brown has been before him in knowledge and thinking, and where, by the brightness of his genius, he has given lustre to his picture, enriching it with the fruits of his very rare inventive faculties, and by the exercise of that dramatic feeling for the subjects he chooses, wherein none of this country surpasses and very few approach him. As to Mr. Brown's executive ability, there can be no question about his merits; the rarity of his power in painting, drawing, and chiaroscuro is to be lamented,—the more honour should fall to him on this account. As to the colouring of this picture, it may be said that, as a whole, its treatment lacks breadth and repose; also that the subject, not being restful in its nature, but rather the contrary of that, may have indisposed the painter to let our eyes rest where no repose should be. If this is not part of the painter's policy, we are wrong. A certain horny yellowness offends us throughout the work. We have written thus much in honour of Mr. Brown's singular ability, because our readers will recognize in this painting some of the most valuable qualities of Art, and see through its obvious defects—or, more truly, its quaintnesses and strangenesses—enough pictorial and mental power to furnish at least a fourth of an ordinary exhibition-room with mental and technical wealth.

Among those of our day, Mr. Brown is really a great artist; but he is so with a twist in his judgment, and one of the most extraordinary "kinks" in his taste that ever fell to the lot of man. He is a poet in such ways as those who care to see may see, and surely will see. There are not seven men in England who can *paint* so well as he; he is emphatically a painter, and is not surpassed in technical felicity and facility by any artist we have. Although this is evidently a thoroughly careful work, it is comparatively an unimportant one among Mr. Brown's productions; nevertheless, it displays at once those extraordinary merits we have enumerated and the equally remarkable defects which we believe to be his. It is true that our sense of these defects is blunted after a while, and almost fails when the picture is studied with due care and candour; yet, we confess, we did feel something like disgust, when for the first time we noted the ultra-grotesque action of the dog, who sniffs the blood-fouled coat of Joseph, and we laugh now at the uncouthness of the idea which introduces an old pair of feet and ankles in sandals, resting on a high rung of a ladder which stands at the fig-tree of Jacob, the proprietor of which extremities is otherwise out of the picture. The meaning of these incidents is obvious; that of the dog has a Gothic roughness and strength which, apart from the nauseousness of the idea, are to be admired; yet we regret, for Mr. Brown's own sake, that he did not seek other and less challengeable modes of expressing the very simple matters in question.

Except that there is nothing over-sweet in Mr. P. H. Calderon's large and effective sketches of ancient interiors (33, 34), they contrast in all respects with the above-described work.—Mr. G. R. Chapman sends several works, among which we care for one only, *Portrait of the Hon. Mrs. Leighton* (44), a very finely-painted and otherwise admirable picture, so excellent, that to see it among portraits is a "treat."—Mr. T. Faed has

imparted novelty to his ordinary range of "Farewell" subjects, wherein some one always goes away, by that of *Music hath Charms* (87),—a cottage-door scene, where a boy is seated, and plays on a tin pipe; a dog watches him; a girl looks forth, it may be for some one who is coming. The lighting of this picture is purer and brighter than has been the case in Mr. Faed's practice of late; a certain very agreeable silveriness is present in larger degree than common, and is not to be the less prized because it is rather cheaply obtained. The background is a little "splashy" of paint. The expressions are apt, as those of the painter generally are; we cannot say we have not before seen the boy or the girl in Mr. Faed's company; in truth, we have known the former for some years, and, if our memories do not deceive us, ever since he was a baby. He is a capital boy in a picture; the girl is admirably treated. Altogether, this is one of the artist's most valuable productions. It lights the side of the room with its brilliancy and effective painting.—Mr. A. Hughes sends *The Singer* (119), who is also a lute-player, and *The Dove* (120). The latter is a very charming picture. The former shows a very beautiful lady with a lute, whose face is artificially posed with the flowers of a lilac-bush. The sentiment of the face here is exquisite, full of musical thought and tenderness.

Mr. Legros's *Tribunal of the Inquisition* (138) shows nearly nude men kneeling before priests. Although the heads of the latter are absurdly small, the expressions of their faces are given with great power in design. There is much mastery of form in the kneeling figures. Their drawing is generally good, yet their modelling is cruelly hard and crude. With all these fine qualities, the picture is repulsive, and not the less so because it hangs above the smooth production of Mr. F. Goodall—*Hagar and Ishmael* (100), which may be considered a sort of sequel to the picture by the same artist at the Royal Academy, and is not worthy of his promises of a few years back. This is the case, notwithstanding that the boy's figure is better drawn than before. The design here is but commonplace, void of incident, and with very little dramatic power. Mr. Goodall has put nothing into his subject, consequently his picture suffers in having exactly so much of Art in it.—Mr. J. T. Linnell sends a fine, although rather hard landscape, *Shepherd Boys* (142), a careful and learned study of sunlight.—Mr. Marks sends three pictures, of which the most interesting is, *Cowper in the Garden at Olney* (158), a very pleasant painting of a tree-shaded, swarded garden.—Mr. A. Moore's *Lilies* (162)—a study of white and rose-colour—has a certain exuberance of sensuousness which must not mar our admiration for his very remarkable artistic feeling.—Mr. J. W. Oakes sends a capital landscape, *Cwm-Bigiaw* (166), wherein some admirably painted bright detail and singular breadth are felicitously given with truth.

Mr. Prinsep shows himself an artist of high merit and singular power in his studies of colour and chiaroscuro—*A Venetian Handmaid* (178), a girl in a green robe, walking with a plate of apples in her hand; also, in *Going to Mass* (179), a woman with beads in her hand. Here is wonderful power of relieving flesh without contrast of tones.—Mr. F. Sandys's *Portrait of Mrs. Rose* (189) has a face that is beautifully painted and modelled, notwithstanding that it has some of the qualities of ivory in the flesh; the body of the lady and her hands are drawn in a very questionable manner: see the foreshortening of the latter. We hope these parts are not finished; some rose-blossoms are admirably executed.—Mr. W. B. Scott's *Water Babies* (191) should be valued apart from its exceedingly rough surface and rather garish colour. It is otherwise a charming little idyl: water-imps tumbling in a breaking sea; the sky is very crude in its blueness.—Mr. S. Solomon's *During the Gloria* (196)—some priests installed—is a capital, but rather slovenly study in black and yellow.—Mr. Stanfield's *New-haven* (197) has all his recent merits, withal softness and warmth.—Mr. F. Walker's *The Wayfarers* (215),—a blind man led by a boy,—has some affectations and imperfections, which, to our taste, are singularly offensive, but not enough so to destroy our pleasure in a very subtle and careful

study of Nature: this will repay examination.—Mr. E. M. Ward's *Oliver Goldsmith, M.D.*, (217) shows the artist's usually fortunate choice of subject and his power of dealing with humour. Goldsmith was called in to attend a lady, behaved himself as one might expect,—failed signally; finally, was dismissed, in preference for the family apothecary. The lighting of this picture is unusually effective, even for Mr. Ward; the figure of the apothecary is one of his happiest creations. See the vigorous painting of the carpet and its clever introduction.

—Mr. J. D. Watson's *The Barber's Shop* (218) shows the interior of such a place,—a gentleman seated after shaving, holding a hand-mirror and receiving the advice of the "artist" about the disposition of his moustaches and beard. Another customer waits his turn, and solaces himself with a guitar. The expression of these figures is admirable, their attitudes characteristic, the painting excellent. No. 219, *The Tailor*, is very inferior in painting to the above, and not so well drawn: see the hands of the man who submits himself to the measuring tape of another kind of "artist." The Isabel-colour of this man's dress and its red trimmings tell charmingly in the picture. The same artist's *Robinson Crusoe* teaching his parrot (220) is capital. —Mr. G. F. Watts's portraits of Messrs. *Robert Browning* (222) and *Alfred Tennyson* (223) are in noble companionship, and are noble works. The former delights us as one of the painter's most nearly perfect pictures. A real work of art, there is in this painting all the higher qualities of portraiture.

Among other commendable pictures here are Mrs. Anderson's *At the Opera* (2),—Mr. Anthony's *The Little Waterfall* (4) and *The Mill in the Wood* (5), both excellent landscapes,—Mr. H. W. B. Davis's very fine *Study of a Landscape* (64),—Mr. E. Edwards's "*Haunted*" (84),—Mr. Fisk's *Two Hundred Years Ago* (94), where with some defective execution—as in the running figure—there is much character and greatly improved painting,—Mr. Hargitt's *Moonlight in Midsummer* (104), a very interesting picture, a little hard and cold,—Mr. J. E. Hicks's *The Mother's Love* (111) for some qualities of the showy sort,—Mr. Legros's noble *Interior of a Spanish Church* (137),—Mr. H. W. Phillips's *The Carpet Bazaar, Cairo*, (175),—Mr. Stanhope's *Poachers* (201), a roughly painted but very original landscape, which we prefer to his dirty *Angelina* (202),—and Miss A. Wells's *An Italian Girl with Grapes* (226).

WINTER EXHIBITION OF THE INSTITUTE OF PAINTERS IN WATER COLOURS.

THIS association imitates its senior, the Society of Painters in Water Colours, by filling its Gallery with sketches and studies. It now appears that the Institute, like the Society, does not exclude pictures as important as those which supply the summer gatherings. For this we are sorry, feeling sure that such a course is mischievous to the last degree, and tends to urge the production of numbers of paintings rather than of high quality in Art. Our earnest counsel to both bodies is, that nothing but such as are truly "sketches and studies" should be admitted to the less important displays; otherwise, not only will the result just stated be produced, but the raciness and distinct character will be lost, which were originally proposed for such gatherings as that which is now in question. We think it would be well, also, if the important distinction which exists between "sketches" and "studies" should be pointed out. As we understand these terms, studies are made to a pre-determined end, and are to be looked at from the point of view which is proper to that object. If an artist is not a man of great original power, and possessed of mental stamina enough to elaborate to the end his own conceptions,—it is wonderful how large is the proportion of men so deficient,—even his pictures halt as sketches, and, although they may be laboured to any extent, are never truly works of Art. A sketch, on the other hand, is also a memorandum of something that has a passing interest, or is not detainable for complete transcription. A sketch may be a picture, complete so far as it goes; a study is, however beautiful, only part of a picture: the one commonly enough shows the painter's facility of hand; the other, his force or felicity of thought. The collection now before us

comprises a very large number of sketches and but few real studies. On the whole, the Galleries of the elder and junior water-colour societies respectively exemplify the two terms, sketches and studies: the senior association shows more studies; this, more sketches. In both there are too many finished pictures.

We will take the works before us in numerical order, selecting those which are most worthy of notice. Primarily, we should say that the Institute has been fortunate in selecting for new members young men of higher calibre and greater skill than was its former practice. A low order of taste, and excessive love for *cliquanterie*, still obtains among the elder members. As these gentlemen, however "fashionable" they may be, are not acceptable as artists, we shall pass their works in silence here. Miss Setchel's *Villeneuve* (No. 5) is a charming study: notice the smooth fullness of the river, and the atmospheric effect.—Mr. T. Rowbotham produces better sketches than pictures. No. 9 here, *On the Beach, Broadstairs*, is rather elaborate; a very cleverly-wrought sketch of the chalk cliffs and beach.—No. 10, *Saltwick Nab, Whitby*, by Mr. J. Mogford, will, with others here, secure that reputation which he rather suddenly enhanced by the productions of last year. This is a study of rotting cliffs, mixed earth and rock, with admirably painted atmosphere.—Mr. T. Sutcliffe is one of the few, the very few, painters who put more than the result of handicraft into their pictures. No. 12, *Winter Sunshine and Summer Sunshine*, shows exquisite feeling for the differing subjects.—Although a charming picture, Mr. W. W. Deane's *On the Llugwy* (25) lacks solidity in the foreground, and is a little black.—Mr. G. Campion's *Cloisters, Norwich Cathedral*, (30) is flimsy and false in execution; the size of the place is ridiculously exaggerated.—No. 43, Mr. C. Werner's *Temple of Carnac, at Night*, rendering the contrasted effects of moonlight and firelight, a tall, single pillar in the middle of a square of ruined buildings, is among the best, because less artificial, of his pictures. *Tailor's Shop at Cairo* (79) is, despite its obvious cleverness in execution, painty, cold and heavy. Compare the lack of artistic dignity and feeling in this work with Mr. R. K. Penson's *St. Briavel's Castle* (80), which hangs below it; a most solemn, sober, and effective study, in every way the work of an artist.—Mr. C. Werner's *View of Cairo* (213)—the canal and its ruddy banks—is much more valuable than the painter's architectural pictures: see others here of the same class with the former.

Mr. E. G. Warren's *Bringing Home the Yule Log* (48)—beech-woods in snow—is capital, but, like many of his productions, it lacks a good deal to make it a work of intellectual art; it is obviously natural, and very cleverly wrought to a certain extent, but not with great subtlety; a sort of picture which may indicate the confirmation of mannerism in this painter's practice. A *Sketch, Coast Scene*, (205) is really a study of great value; the red cliffs, the rippling sea, and its silver edge.—Mr. J. G. Philp advances in skill: see *A Fishing Cove near the Lizard* (58)—the rugged cliff and sea: a good study. *Morning on the North Coast of Cornwall* (175) shows one of those islanded rocks which are so common on that shore, and the wild cliffs its neighbours; the effect dawn; all very truly painted.—No. 74, by Mr. E. H. Corbould, *Joseph making himself known to his Brethren*, exhibits exactly the same amount of theatricality which we generally find in this painter's works. Essentially vulgar, and thoroughly "flashy," this "design" (?) is rather more flimsy than usual with Mr. Corbould.—Another picture of this class is Mr. J. Absolon's "study," as he calls it, for a drawing of *Prince Charles Edward in the Isle of Skye* (382),—a piece of utter foolishness in conception, weakness in execution. Most young ladies at boarding-schools can draw better than Mr. Absolon. Does he call this a work of Art? Let the observant student compare the productions of Messrs. Corbould and Absolon—with whom Mr. Jopling may be classed—with the real Art-working of Mr. G. G. Kilburne's *Waiting* (243),—a mere sketch of a girl expecting her lover, and standing in moonlight, near a fence: the simplest drawing here, but at the same time one of the few

which has feeling in it, and shows skill enough to express that feeling; the face is exquisitely treated and tender in comparison with the showy and pretending sentimentalities of the better-known artists. Mr. Kilburne's name is new to us.

Mr. H. G. Hine's *Sunset, Hastings*, (76) shows much of his taste and delicate skill; a sober grey sky, a low sun gilding the vapours of the horizon. See *At Eastbourne* (186), *Old Parsonage, Eastbourne*, (326), *Twilight, Littlehampton*, (4) and *Coast, near Littlehampton*, (225) all by the same. —A second picture by Miss S. Setchel, *Jungfrau, Unterseen*, (87) gives very charmingly a view looking into a gorge, with fine atmospheric effect, and great feeling for breadth and colour.—The *Interior of an Artist's Studio* (83), by Mr. L. Haghe, is another of those representations of interiors with "picturesque" furniture in them, which seem to be painted solely with a view of, and from love for, "old furniture and curiosities." This can hardly be called a picture proper, still less a work of Art. The treatment is hard, the colouring deficient in breadth, atmosphere is lacking; chiaroscuro, of a common, unoriginal sort, is the principal achievement of this work; dexterity in execution supplies the rest. No. 100 (same title) is more like a true picture; it may be warmly commended to the lovers of "curiosity" shops.—Mr. W. L. Leitch's *Mill near West Drayton* (101) is rather painty, but otherwise beautiful, and very tender in feeling for air and colour; fringes of rain depend from low-lying clouds; altogether a little jewel of a picture.—*Skirts of a Wood, Wiley, Surrey*, (112) by Mr. J. W. Whympere, notwithstanding its chalkiness and opacity, is very truthful, though rather short of the freshness and wealth of natural colouring.—*Sunset after Rain* (116), by Mr. J. Mogford, sunset over a shore, is rich in colouring, solid and delicately handled. *Pilot Boat, &c., Falmouth*, (249) boats on a beach, is rather too sharply defined, and even hard, but very clear and sound.—*Dorsetshire Boatmen* (147), by Mr. C. Green, shows better appreciation for character in the figures and faces of two such men, than for the landscape which forms a background to their bodies; their faces are very humorous.—Mr. Harrison Weir's *Pigeons* (230) is cleverly sketched, but the birds have nothing of study in them.

Mr. A. Penley's *Buttermere Lake, Cumberland*, (255) must have been "painted on the spot," as the author says it was; but it clearly shows that he does not understand the true use of that proceeding; he has, with much pretence of manner, made a ridiculously feeble picture. The same may be said for *Llyn y Cwm-Fynnon, near Pen y Gwryd, North Wales*, (342) by the same, which also is described as "painted on the spot." If this is all Mr. Penley sees in Nature, we are sorry for him; both are, nevertheless, very "nice" productions, in the "drawing-master" style, such as Mr. J. D. Harding introduced.—They may be compared with a work by Mr. J. Mogford, which hangs in their neighbourhood, *From Pardenick Head, Land's End*, (335)—a rude coast with sheen on the sea, admirably painted with at least fine perception of Nature and scorn of "picture-making." We do not understand how, if the nearer water is so much broken, the bright silvery sheen of the distance can be so smooth. *Bysnus-covered Rocks, Sennen*, (346) is another work from the same locality and of the same character, but, probably from having a simpler subject, more thoroughly successful; the colour of the hoary green byssus on the granite blocks is perfectly true; the sea is good.—Mr. H. Warren's *Bridge over the Mole, Norbury Park*, (488) is a capital, though rather thin, rendering of sunlight.—*Boys Bathing* (528), by Mr. W. Luson Thomas, deserves a better place than it has, being a highly-successful attempt to paint flesh in sunlight; it should be "carried further," as artists say, and the bodies of the boys made to look a little more solid than is now the case.

FINE-ART GOSSIP.

Mr. A. W. Bennett is about to publish two new gift-books, illustrated by photography, 'The Golden Ripple,' by R. St. John Corbet, and a reprint of Whittier's last poem, 'Snow-Bound.'

The edition of 'Elaine,' illustrated by M. Doré, will be published by the Messrs. Moxon on the 1st of December. The designer of the illustrations has expressed his satisfaction at the perfect way in which his designs have been executed by the English artists.

Mdlle. Rosa Bonheur has nearly completed a large picture of cattle and drovers in the Highlands. The men are vigorously belabouring some of the animals in order to make them move on a rough road. One of the most important of the latter is, in Mdlle. Bonheur's composition, intended to be a dun bull of skittish habits and irascible temper. In order to paint this creature after her usual careful fashion, the artist procured in Scotland a noble animal. The bull was despatched from Britain, but, on arriving in a French port, he was stopped, being liable to suspicion as coming from a country infected with "cattle disease." The lady waits to complete her picture until, by means of a special order from the Minister of the Interior, the brute is permitted to enter France.

The architectural drawings intended for the preliminary exhibition of selection at the South Kensington Museum must be sent to the Museum between the 10th and 20th inst. The exhibition will be opened to the public on the 12th prox. From its contents the committee of selection will choose such works as they recommend for the Paris Exhibition.

Works of restoration are to be commenced immediately on the Chapter-House, Westminster.

The Art-Department has issued the following circular to the Art-Masters:—"Sir, I am directed to inform you that, having had under their consideration the payments made on the last examination of students' works in the Schools of Art, their Lordships have determined to increase such payments. In future, the payments on account of satisfactory elementary works executed during the year will be 15s. instead of 10s., and on account of satisfactory advanced works 20s. instead of 15s.—2. I am further to inform you that, after the annual examination for Art-certificates in February next there will be from four to six vacancies in the list of Masters in Training, for which an allowance of 11. a week is made, and for which students of local schools who hold the first certificate may compete.—3. I take this opportunity of expressing their Lordships' hope that the number of works to be sent up for the next examination will be largely increased, and to point out that any hesitation of students to have their works in the hands of the local committee might, perhaps, be modified by some reduction of fees to those who submit works.

"HENRY COLE, Secretary."

The Architectural Museum has secured a site for its new buildings, which the Council believe will be more convenient to professional and general students than that of the "Boilers" at South Kensington, where the collection of casts has been so long housed. When we say that this spot is in Westminster, opening from Bowling Street, close to Great Smith Street, and within ten minutes walk of Charing Cross, it will be understood that the Council of the Museum have done wisely, and that students will appreciate their efforts. The ground appears to be amply large for the wants of the Museum. Two architects, Messrs. J. Clarke and E. Christian, have undertaken to design a plain building for the society. Aid is sought from the profession and the public to carry out these plans. About 2,000l. is required. Mr. G. G. Scott is Treasurer.

Loyal people who are not touched by the ridiculous figure of George the Second, in Leicester Square, are shocked by the condition into which that creditable work of Art, the Queen's statue in the Royal Exchange, is falling. Dirt, damp, and inefficient cleaning are converting the expression into mere caricature. It is hoped that the Lord Mayor Gabriel will take this distressing figure under his guardianship, and induce the merchants who do not now "congregate" in the Exchange, as of yore, to maintain the statue in a decent condition of cleanliness.

With regard to the thirty photographs recently reviewed by us, Mr. Frith, the photographer, writes thus in a letter which is only long

but irrelevant:—"The copies upon which your reviewer grounds his remarks as to the practice of 'touching' were entirely untouched. . . Now that the outline of a picture (photograph?) must be printed upon its natural sky-tint, it is not possible to tamper to any serious extent with the truthfulness of a photographic negative, and they must be very skilful hands indeed that can improve the beauty of a sun-print."—We did not suppose that the "copies" themselves sent to us were "touched"; there are other and cheaper ways of sophistication in photography than that of employing an artist to work on every positive which is sold. Neither did we fancy that the negatives which directly supplied these "copies" had been "touched." The main point is our solicited opinion of the photographs in question. It is impossible for us to join with their producer in admiring the examples upon which our remarks were founded; they are opaque in the shadows and half-tones, flat, badly lighted, and woefully monotonous. "Touched," or "untouched," in the sense of our Correspondent, the specimens immediately in question are displeasing to the eye and unnaturally dull.

A beautifully-designed monument, by Mr. Street, to the late Mr. Hargrave, has been placed in Lyndhurst Church, where, it will be remembered, are Mr. Leighton's mural pictures.

A "Subscriber" suggests that it would be an act of grace on the part of the Royal Academy to erect a grave-stone to the memory of the late T. Stothard, one of their most distinguished members, as well as an official of their establishment.

MUSIC AND THE DRAMA

HER MAJESTY'S THEATRE.—THE WINTER DRAMATIC SEASON. Manager, Mr. EDMUND FALCONER, at the usual Prices of West-End Theatres, will commence on MONDAY, November 19, when will be produced a New Drama, illustrative of Peasant Life in Ireland Fifty Years since, by Edmund Falconer, and entitled "OONAGHT; OR, THE LOVERS OF LISAMONA," Principal Characters by Messrs. Ryder, E. Price, B. Potter, Holston, M. Elmore, Edmund Falconer, Miss M. Hudson, and other Ladies of high professional repute, supported by a numerous Company. The new and characteristic Scenery by Messrs. Hanson & Sons. The Incidental Dances and Movements of Crowds arranged and directed by Mr. Oscar Byrne. The Songs and Musical Accompaniments composed, selected, and arranged by Mr. W. C. Levy.

THE NORWICH FESTIVAL.—There can be no question that Mr. Costa's 'Naaman' suffered from the State visit to St. Andrew's Hall. The performance, however, was a fine one, and by those who were not distracted by staring at Royalty was cordially relished. Mdlle. Tietjens, who replaced Mdlle. Patti as *Adah*, is hardly well fitted for a part the very soul of which is its delicacy; but her voice told brilliantly in the final quartett. Mdlle. Drasil did not make us forget Madame Sainton-Dolby, who has never been heard to greater advantage than in the song in the second part. Mr. Sims Reeves—who was unhappily disabled from appearing at any of the evening concerts—had to watch every note. He got through, however, on the whole well. What would have become of the tenor music of the Festival had not Mr. Cummings been there, we cannot imagine. It should be put on record that he undertook everything that his distinguished comrade was unable to perform; some of the pieces at an instant's notice, and many without any possible preparation. Let us add, that no one could have discovered this by the slightest wavering or incorrectness on his part. His kindness and skill were thoroughly appreciated. We can recall few things like his readiness;—not forgetting that memorable feat at a former Norwich Festival, where Mr. Santley sang the ungracious bass part in Spohr's 'Last Judgment' literally at sight. And with facts like these notorious, there are yet foreigners who will compassionate our country as possessing no singers!

A very important novelty, produced on Thursday morning, was a large portion of Handel's "Passion Music,"—an early work, which, we imagine, has never before been performed in this country. Nothing could be more instructive and interesting than to compare this with the better-known "Passion" of Bach. Though the styles of the two mighty men are as far asunder as those of Shakespeare and Ben Jonson, though to Handel be awarded the palm for sweetness in melody and grandeur in the masses of choral tone, while Bach

must be credited with superior intricacy, thoughtful ingenuity, and enterprise in orchestral experiment, the plans of the Services bear a close resemblance one to the other. The lovers of the great Leipzig Cantor will be shocked at our judgment, that in one point, where he has been till now considered as pre-eminent, the treatment of the *corale*, we think him surpassed by his rival. To our ear, there is a superior roundness and richness in Handel's harmonies. Some of the airs are very pathetic, though in this portion of the work (as in Bach's) effect is inevitably lost by the evasions which our reverence for the Redeemer, and consequent avoidance of presenting him as a performer in the awful scenes of the Cross and Passion, give rise. We may, possibly, have an opportunity of speaking of this work more in detail. Suffice it, for the moment, to commemorate the performance as full of interest and suggestion, though the serious nature of its subject will probably preclude frequent repetitions of it. It was attentively rather than enthusiastically received. The singers who took part in it were Madame Radersdorff, Miss Edith Wynne, Messrs. Cummings and Weiss.

We are spared the necessity of dwelling at length on Mr. Benedict's Cantata, 'St. Cecilia,' not merely by circumstances which there is no need to specify, but because our contemporaries have given sufficient publicity to the intentions of the writer of the words, as set forth in his introductory advertisement, and have dwelt at liberal length on the brilliant, enthusiastic, and (we venture to prophesy) permanent success which greeted the music. There is but one opinion, that the Cantata is by much Mr. Benedict's best work. The entire part of the Saint of Music is treated with a sweetness, spirituality, and a lofty yet impassioned beauty, hardly to be over-praised. The final scene of her martyrdom is more moving, more true, nobler, and more picturesque in musical conception, than anything we have heard for many a day. It should be remarked, that it was no easy task to wind up a work of such importance with a group of merely female voices. The anthem, too, belonging to the Christian rite, is excellent in style. The Cantata (allowing for the reserve rendered necessary to Mr. Sims Reeves by the state of his voice) was thoroughly well executed. The other singers were Mr. Santley, Mdlle. Drasil, and Mdlle. Tietjens, the *St. Cecilia*. Her noble voice told to its utmost; and her last scene was delivered with a stately and animated expression, prompted by the remarkable felicity of the music to the situation. The reception of 'St. Cecilia,' we repeat, was a genuine triumph. We have rarely seen an audience more rapt—more completely and unanimously kindled to admiration.

A few remarks will suffice with regard to the concerts of the Norwich Festival. A vocal quartett by Signor Randegger was the only new piece of pretension besides Mr. Sullivan's overture already mentioned. This contains some pleasing writing,—if not very new, nowhere inelegant. The work is divided into two portions; the first in triple, the second in common time. The instrumentation is too noisy, betraying want of experience. The *finale* from Cherubini's 'Les Deux Journées' produced little effect, in spite of the many traces it contains of a master-hand. The *finale*, 'O Sommo Carlo,' from 'Ernani,' was far more popular. The singers who produced an effect at the evening concerts were Mdlle. Tietjens, Miss Edith Wynne (whose reputation has been deservedly increased by her charming performances throughout the week, and who might have been safely entrusted with much more important occupation than that allotted to her), Mr. Cummings (to whom due tribute has been already paid) and Mr. Santley. The selection of foreign artists from Mr. Mapleson's cage of singing-birds added no attraction to the evening performances of the Festival. There was no instrumental *solo*, and much of the music (M. Gounod's especially) suffered from its being performed with a meagre pianoforte accompaniment as replacing the full orchestra.

Thus much concerning the leading features of the Norwich Festival just over. The behaviour of most of the persons in office (how different from the gentlemen of former times!) must be adverted to as

something peculiar to the occasion—happily unique in our experience. Too many of the functionaries had apparently only one fixed notion, that of *Boots and Brewer* in 'Our Mutual Friend,' namely, of "rushing about." Their subordinates seemed tormented with the idea that every invited guest belonged to the swell mob. Such invited guests, whether belonging to our (the fourth) estate, or to the body of artists, creative or executive, who contributed their quota to the Festival, were alike treated with a parsimony, rudeness and indifference, fortunately rare in our days. It is matter of Norwich history that one composer was refused a ticket when his own work was performed, the hall being in no respect full; that another who had furnished a main attraction to the Festival had to pay for his quiet seat to hear 'St. Cecilia'; that the artists who sang had to provide themselves with *books of the words*. As counterbalance, a *magnum* of hair-wash, and a huge assortment of soaps, essences, brushes and combs, loaded the toilette-table of our gracious Princess, who paid a passing visit to Mr. Costa's 'Naaman.' But vulgar discourtesy and tastelessness are fruits of the same tree. At all events, this time, in vexatious contrast with former better days, in spite of the strong musical interest of certain portions of the Norwich Festival, attendance there was a matter of fatigue, discomfort and irritation, in every respect discreditably to the managers, and as such not to be passed over without the plainest reprehension.

In the haste of last week's report, a few words were omitted. Speaking of the overture 'In Memoriam,' p. 576, col. 2, line 4; the passage should stand as under:—It indicates the last step; and again, line 23, the composer was applauded and recalled.

ST. JAMES'S.—Mr. Dion Boucicault's new drama was performed here last Monday. It is entitled 'Hunted Down; or, the Two Lives of Mary Leigh,' and is comprised in three acts. The notion of the heroine living two lives—the outer apparently guilty, and the inner really innocent—is one very available for dramatic purposes, and likely to increase the interest of the action. We are not disposed, however, to commend the taste, which has placed another story of bigamy on the boards; more particularly as the present story involves a double transgression of the kind. We have but four persons, and of these one lady has two husbands, and one husband two wives. Of this perplexity the plot is woven, and it rises to an obvious state of distress and emotion, in which the two wives share in equal proportions, thus dividing the interest between them. To compensate, however, for any such oversight, the piece is so delicately written, and otherwise so elegantly constructed, that for finish and effect it must take rank with the best of Mr. Boucicault's dramas. The four persons who bear the weight of the action are *John Leigh*, a Royal Academician (Mr. Walter Lacy), *Mary Leigh*, his wife (Miss Herbert), *Rawdon Scudamore*, a gambler (Mr. Henry Irving), and *Clara*, his lawful wife (Miss Ada Dyas). Scudamore, it seems, about ten years before the action of the play, had committed forgery, and married *Mary Leigh*, for the purpose of getting possession of 3,000*l.*, and had then left her in the church, and found refuge on the Continent. *Mary*, thinking him dead, married again; but, thanks to a busy friend of the family, *Mrs. Bolton Jones* (Mrs. Frank Matthews), she now learns that he is alive, and requires a sum of money for the return of her letters. It is not long before he seeks her presence, with the intention of driving a bargain with her. The scene that ensues is skillfully managed, and remarkably well acted. It ends with the hunted woman giving the callous scoundrel 200*l.*, with which he prospers so well at the gaming-table, that we next see him living in handsome lodgings with his wife, *Clara*, who, notwithstanding his villainies, adores him. Here, again, the over-busy *Mrs. Jones* appears, and renders *Clara* jealous by hinting at his supposed liaison with *Mrs. Leigh*. *Clara* breaks open her husband's desk, in order to secure a letter written by *Mary* to him, and *Mrs. Jones* takes advantage of the opportunity to secure

the rest of the correspondence between them. These ultimately get into the hands of Mr. Leigh, who has perfect faith in his wife, and will not believe in the evidence of his senses. His sister, *Lady Glencarrig* (Miss Guillon Le Thière), begins to doubt, though very favourably disposed towards *Mary*; and her doubt becomes to her a horrible certainty when she sees Scudamore actually kneeling and kissing the hand of his victim, while she is in a half-fainting state at his unwelcome intrusion. *Clara*, however, is nigh, and soon dispels all suspicions and perils by declaring that Scudamore had married herself twelve years ago. Scudamore threatens her with his vengeance, but quits the contest. Fears are naturally entertained for *Clara*, but her love surmounts all these, and she follows the desperate adventurer, even though to death, induced by an infatuation she cannot resist. The characters are well drawn, and each, even the criminal himself, is more influenced by the moral feelings than by evil motives. Accordingly, a human element pervades the action, and by turns a vein of pathos reveals itself in the psychological development of all the persons who are thrown into conflict by the guilt of one. Both Miss Herbert and Miss Dyas exerted their powers with the utmost effect, and much of the acting of the former was really splendid. Mr. Boucicault was summoned, and personally acknowledged the favour with which his new drama had been received.

HAYMARKET.—A new drama in three acts, by Mr. John Oxenford, has been produced with success at this theatre. It is entitled 'A Dangerous Friend,' and is a version of M. Feuillet's drama, entitled 'La Tentation.' Mr. Oxenford's version differs much from Mr. Tom Taylor's, which, it will be recollected, was called 'The House or the Home,' and was produced at the Adelphi some eight years ago. The action of the present drama is grounded on the different tastes of *Sir Lancelot Livingston* (Mr. Howe) and his wife *Marian* (Mrs. Charles Matthews). The former is a matter-of-fact English baronet, and the latter a romantic lady, fond of poetry and sentiment. Mr. Charles Matthews has a character which serves as a sort of chorus, and explains the relations, moral and otherwise, between the parties. Mr. Samuel Handman affords this actor opportunities for his peculiar vein, in which the gentleman and the satirist so unite as to form a telling part. The piece altogether was well received.

CITY OF LONDON.—This theatre was re-opened on Saturday, under the direction of Mr. John Douglass. The company that had been employed at the Standard are now performing here. Miss Sarah Thorne appeared as *Iolanthe*, in 'King René's Daughter'; and the burlesque 'Der Freischütz,' produced at the Standard on the night of the fire, was represented with new scenery. The performances terminated with the comedieta of 'Wild Ducks.' The house was crowded.

MUSICAL AND DRAMATIC GOSSIP.

Miss Jervis, a pianist (we happen to know) of considerable accomplishments, played the other evening at one of Mr. Mellon's Concerts.—The pianoforte pieces selected for the first *Popular Concerts* were Beethoven's 'Moonlight Sonata,' and variations with violoncello on Mozart's duett from 'Zauberflöte,' 'La dove prende,' and Mendelssohn's first Trio. The Director, Mr. Arthur Chapell, has done wisely in printing a catalogue of the compositions which have been produced at these concerts. The list is satisfactory. The names of *Ries* and *Onslow* might have been added to the list.—The *Crystal Palace* might take the hint, in justifiable display of the remarkable services rendered to music in England by the research of Herr Manns. This day week the programme included a *Cantata* by Haydn, 'La Tempesta,' till now unknown to us; Schumann's chorus, 'Gipsy Life' (encored); and Schubert's overture to 'Alfonso and Estrella.' To-day, some of the last-named composer's music to 'Rosemonde' will be produced at Sydenham.

There is no announcement out as yet to prepare the subscribers to the Philharmonic Society for

their new conductor. Rumour mentions Mr. Cusins or Herr Manns as possible to be elected.—Signor Bottesini has, we are told, contradicted the report which named him as Signor Ardit's successor at Her Majesty's Theatre.—For Mr. Halle's concert at Manchester, on Thursday last, Haydn's 'Seasons' was announced.

The first volume of Mr. Thayer's 'Life of Beethoven' has appeared.

What nonsense next? Not long ago we were favoured with the information that Mendelssohn's "Vision" chorus in 'Elijah' was bitter in its weakness. Now the same sagacious contemporary writer turns up his nose at the incomparable letters (spontaneous, if ever letters were) as "evidently prepared and penned with priating ink." The provocation to this diverting piece of spite seems to be the "maudlin" rapture expressed by Mendelssohn regarding the lovely air for *Roland* in *Armida's* garden by that "Teutonic pigmy," Gluck. The moon is not brought down, neither made less bright, because she is bayed at.

We may here acknowledge numerous letters from the country calling attention to the fact that the Village Concert, so pleasantly paraded in the *Times* not long ago, as a humanizing experiment, is anything but a novelty, such meetings having been cheerfully, unobtrusively and profitably held in many parts of the kingdom for the past half century!

Mlle. Tietjens is about to sing her best part, *Medea*, at Hamburg.—The *Gewandhaus* Concerts at Leipzig have re-commenced for the season. At the first, Cherubini's Overture to 'Les Abencerages' was performed. Madame Rudersdorff will sing there.—The *Euterpe* Society of Leipzig, long devoted to experiment, shows signs tending towards conservatism, since it announces in its programme for the season—besides Beethoven's Choral Symphony, and Schumann's music to 'Manfred'—Handel's 'Belshazzar,' the first act of Cherubini's 'Anacreon,' Mendelssohn's 'Walpurgis Night,' and Gluck's 'Orfeo' (another sign, by the way, of the mighty master's wane).—Les Deux Journées, by Cherubini, has been revived at Berlin; an opera well worth the attention of our managers.

M. Fétis—not inexpert, as the historians of 'La Marseillaise' know, in finding out "mares' nests"—has discovered, so he assures the *Gazette Musicale*, the entire plan and programme of Beethoven's 'Pastoral Symphony,' in an orchestral work by Knecht, an obscure musician, belonging to the Palatinate, who wrote in defence of his master, the Abbé Vogler, and wholived a quiet life, and produced heaps of those compositions, carefully made, yet without a spark of imagination, which seem so sad to bystanders as the result of a diligent life. Knecht's 'Musical Portrait of Nature, or Grand Symphony,' published A.D. 1784, and prefaced by a programme, is in five divisions, which may be shortly described as under: "A beautiful smiling landscape, with birds, brooks and shepherds,"—"The darkening of the sky and the rising of the wind,"—"The storm,"—"The clearing off of the storm,"—"The joy of Nature, and its grateful praise of the Almighty."—What is more curious still, another of Knecht's compositions bears the title of 'Peasants' Dance interrupted by a Storm.'

Il *Trovatore* writes in a florid strain of the vast and increasing success in public and private of Mr. Tom Höhler! Surely neither artist nor public are served by such a mis-statement of facts as this, which is hereby corrected for the information of readers in Italy.—Two more composers, till now unknown to fame, are about to have operas presented at La Pergola Theatre, Florence. Their names are Signori Taddeaci and Gialdini.

Here is something very droll in the *Gazette Musicale*. "Apropos," says the writer, "of the coming performance of 'Der Freischütz' at the Théâtre Lyrique, the journals announce that the score of Weber's *chef-d'œuvre* will be performed, for the first time, as written by the famous composer. This is a mistake, 'Der Freischütz' was represented at the Opera in 1841, just as Weber composed it. Not one note of the music was changed, and M. Berlioz imposed this condition on M. Léon Pillet, as a "sine qua non" before undertaking the recitatives, which were to replace the

spoken dialogue." Then Weber composed M. Berlioz's recitatives! Need it be said that by such substitution an opera is essentially, if not vitally, transformed, and this particular opera especially. We have never relished 'Der Freischütz' with sung recitatives, least of all, with the uncouth and unvoiced ones of M. Berlioz, which, be it recollected, were, in London, found so unmanageable that when the work was produced at our Royal Italian Opera others had to be written.

MISCELLANEA

Geological Miracle Assumers.—I have to thank Mr. Garbett for his explanation. I must leave to better mathematicians the settlement of the question whether the earth is more or less likely to be hit if it moves, as I assume, or if it stands still, which is one of his assumptions. Meantime I shall look forward with interest to the information we are to receive of Mr. Garbett's experience of cometary impact. THOS. M. RICKMAN.

Willenhall Locks.—Mr. Tildesley, referring to what we lately stated with regard to the cheapness and inferior quality of the Willenhall locks, writes: "It is quite true that at Willenhall—and indeed at all the lock-making towns in this district—cheap and worthless locks are made, to satisfy the demand for such articles; but it is also true that Willenhall produces some of the best warded locks that can be made—perfect alike in construction and in finish; and the superior skill of many of its artisans has long since passed into a proverb."

"J. C. TILDESLEY."

Shakspeare Readings.—'The Tempest,' act iii. scene 2,—

FERD.

I forget:
But these sweet thoughts do even refresh my labours;
Most busy least when I do it.

This passage has been variously altered both by emendators and editors, all of whom, however, agree in rejecting the original as unmanageable. The reading that is most in favour is that of Theobald. He contracted "busy least" into busyless, "Most busyless when I do it," thus coining a new word; and Johnson was so satisfied with the coinage that he tried to give it currency by admitting the word into his Dictionary, giving, upon the strength of this emendation, Shakspeare as his authority! Now, I think there is no obscurity in the passage at all, or not more than the slightest reflection can clear up. "Most busy least" has reference to "these sweet thoughts," and bears, in my opinion, the same meaning as "least most busy." This placing the sign of the superlative degree after the adjective is not uncommon with Shakspeare. In 'Hamlet' we have an example of this. Hamlet, when speaking of the children, who were then attracting notice on the stage, says, If they should grow themselves to common players (as it is like most, if their means be no better), &c. Here we have "is like most" for is most like, or as we should now say, is most likely. "It" has reference to labour. These admitted, the sense of the passage appears to me clear enough—

These sweet thoughts do even refresh my labour,
Most busy least when I do it;

i.e., these sweet thoughts do even refresh my labour, thoughts that are always most busy, but least so,—least "most busy,"—when I do it: when I am employed about that labour. Most busy is the normal condition of the lover's thoughts. They are incessantly reverting to the object of his affection; but manual labour makes them less so. Ferdinand, finding that to be the case, finding that "these sweet thoughts" were interrupted by occupation, suspends that occupation in order to indulge the more freely in them, observing, that they refreshed his labour, i.e., made him fitter and fresher for the toil. A similar passage, indeed so similar, that I think it must settle all future difference about the meaning of this, occurs in 'Romeo and Juliet.' In act i. sc. 1. of that play, we find Benvolio saying—

I, measuring his affections by my own,
That most are busied when they are most alone.

That is, when not interfered with either by society or occupation. For these reasons I think the original text must be restored.

J. NICHOLSON. Lond.

NEW CHRISTMAS BOOKS.

Now ready at all Booksellers,

TWO CENTURIES OF SONG,

Comprising Lyrics, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the last 200 Years.

GRIFFITH GAUNT; or, Jealousy.

By CHARLES READE.

3 vols. post 8vo. Second Edition.

"The whole story, from first to last, from the first plot of the low intriguer who falls in love with Gaunt's massive figure, to the meeting between the two wives, is a rare example of that chastity of art which can be naked, intentionally naked, and yet pure. We do not hesitate to pronounce 'Griffith Gaunt' a noble, though somewhat rugged, poem in prose."—*Spectator*.

ONLY GEORGE: a Story.

2 vols. post 8vo. [Second Edition next week.]

"It is written with extreme delicacy and good taste, several of the characters are hit off cleverly, and there are a number of sayings, terse, lively, and sensible, scattered up and down its pages. In a word, it is very pleasant reading. On the whole, then, if the reader wants to be amused with a bright, lively book, which he may get through easily at a couple of sittings, we can safely recommend 'Only George' to his notice."—*Times*, October 25.

SWEET SEVENTEEN: a Novel.

By ARTHUR LOCKER.

3 vols. post 8vo.

"There is scarcely any variety of the genus novel which, if good of its kind, will fail to command readers; and there must certainly be a great many persons who are weary of meeting people in books from whose society they would shrink in real life—accomplished forgers, beautiful murderers, and 'sic like cattle,'—and who would rather read a quieter book, provided the characters were people of decent reputation. Now, we think we can promise those readers who are satiated with crime, and who feel that newspapers supply heartrending incidents enough, without having such incidents repeated in the pages of fiction,—we think we can promise such people that they will meet very good company in the novel now before us. Our judgment, then, is that this is a very good novel, with only one fault—it is rather too long; but that, in the eyes of readers interested in the story, will, perhaps, be a merit."—*Times*, October 25.

CRADOCK NOWELL:

A TALE OF THE NEW FOREST.

By R. D. BLACKMORE.

In 3 vols.

"'Cradock Nowell' is a clever novel, decidedly original in style and mode of treatment; it is amusing too, and the reader who once fairly enters upon it will hardly fail to read it through." *Athenæum*.

AUNT MARGARET'S TROUBLE.

By a NEW WRITER.

Second Edition. Post 8vo. price 8s.

"After wading through the ordinary novels of the season, after learning to what depth of dullness and folly the human intellect can descend, and wondering at the hideous pictures of vice or insanity which men and women can paint as representations of human life, it is positive mental refreshment to come across such a book as 'Aunt Margaret's Trouble,' which, for pathos and idyllic tenderness, may compete with even the best novel of the day. It has nothing of the grandeur of high art about it; it has nothing of heroic tragedy nor of stately romance, still less of sensationalism; it is absolutely free from all deadly crimes, from all monstrous vices, from all maddening mysteries; being just a quiet story of selfishness on the one hand, and of love betrayed on the other, with the retribution sure to follow upon wrong as the moral justice done at the end. Yet it is a charming book, and worth half a hundred fictions of the more ambitious and elaborate kind. In the first work of a new and young writer we have to consider not only the ability it displays or more remotely indicates, but also the cast of mind shown in the work. Thus, if a new book is all about illicit love and the slangy talk of fast men, we know at once what manner of author we have to deal with. But if the book be sweet and modest, as this is, we know then that, whatever may be the strength or weakness of the future, we shall never be revolted by licentiousness or shocked by coarseness. We shall at least have pure work and decent, and sorrow gently touched, and sinfulness dealt with as sinfulness should be dealt with in life—tenderly and yet abhorrently."—*Saturday Review*.

A PRODIGY: a Tale of Music.

By HENRY F. CHORLEY.

3 vols. post 8vo.

"In our opinion, Mr. Chorley's last work is decidedly his best—more natural in thought, more ripe in scholarship, more genial and more attractive, than anything we have yet welcomed from his pen. The plot of 'A Prodigy' is sufficiently intricate and mysterious for even these days of sensation, and it worked out with all the ability of a master of the art of story-telling. It is unnecessary to say that in all those parts where music is the theme,—and they are, of course, many,—the subject receives the treatment we have a right to expect from one of the soundest and most trenchant musical critics of the day."—*Courier Journal*.

NEW EDITIONS.

THE OBERLAND AND ITS GLACIERS,

Explored and Illustrated with Ice-axe and Camera.

By H. B. GEORGE, M.A. F.R.G.S.
Fellow of New College, Oxford; Editor of the *Alpine Journal*.

With TWENTY-EIGHT PHOTOGRAPHS,
Illustrative of the various Glacial Phenomena, and of the Scenery described,
By ERNEST EDWARDS, B.A.
And a MAP OF THE OBERLAND.

"In this volume Mr. George has presented an agreeable and handsomely-embellished drawing-room book. The photographs are excellent. Glacier scenery is peculiarly suited for photographic representation, as it displays no great variety of colours, and the contrasts of light and shade are strong on tolerably fine days."—*Athenæum*.

"The interest of Mr. George's lucid exposition is greatly enhanced by the illustrations of Mr. Edwards. They are always beautiful, and often exceedingly instructive."—*Saturday Review*.

"Mr. Edwards is an excellent photographer, and his work is admirably executed. The book forms one of the most handsome quarto volumes we have seen for some time."—*Photographic News*.

"We have the Oberland Glaciers brought home to us with all their most characteristic details."—*Examiner*.
"Not only as a narrative of adventure, but also as an intelligent guide-book, we commend 'The Oberland and its Glaciers' as a work to be read for the interest which attaches to its matter, and to be looked at for the beauty of its photographic illustrations."—*Art-Journal*.

London: ALFRED W. BENNETT, 5, Bishopsgate-street Without.

GUTCH'S LITERARY AND SCIENTIFIC REGISTER AND ALMANACK For 1867.

"Carefully revised, corrected, and enriched from year to year with new matter, this excellent little annual continues in 1866 to be worthy of the high reputation which it has enjoyed for a quarter of a century. In a literary, as well as in a mechanical point of view, it is a marvel of fullness and handy compactness. Within a very small space it contains a cyclopædia of facts and figures pertaining to subjects of daily interest; also a useful almanac. Among readers and writers there are few, whatever be the extent of their learning or the tenacity of their memory, who might not find it for their advantage to have such a prompter always at hand."—*Daily Telegraph*.

"A more portable compendium can scarcely be imagined."—*Times*.

"Excellent, and full of information."—*Athenæum*.

W. STEVENS, 421, Strand, London.

Now ready, in 1 vol. post 8vo. price 6s. cloth extra; 6s. 6d. gilt edges.

NOOKS AND CORNERS OF ENGLISH LIFE, PAST AND PRESENT.

By JOHN TIMBS.

In this work the Author has brought to bear, from a variety of accredited sources, evidences of the Condition of the English People in their Homes and Modes of Life, in Cavern and Castle, Mansion and Cottage—The Origin of their Domestic Inventions—House-furnishing, Dress, and Personal Ornaments—Olden Cookery and Housewifery—Peasant Life, with its Curious Customs, Laws and Ceremonies—Fairs, Festivals, and Amusements—Traditions of Battle-fields and other Memorable Sites—Mansions and their Families, &c.

By the same Author, uniform in Size and Price,

STRANGE STORIES OF THE ANIMAL WORLD: a Book of Curious Contributions to Natural History. With Illustrations.

"Among all the books of the season that will be studied with pleasure as well as profit, there is not one more meritorious in aim or more successful in execution."—*Athenæum*.

GRIFFITH & FARRAN, corner of St. Paul's Churchyard.

LOCOCK'S PULMONIC WAFERS.—From Mr. Forrester, Chemist, Pittenweem: "Dr. Locock's Wafers are highly valued in this locality; they prove very beneficial to those who are troubled with asthma, &c. They give instant relief to asthma, consumption, coughs, and all disorders of the breath and lungs.—Price 1s. 6d. per box. Sold by all Druggists.

THE POPE'S HEALTH RESTORED by DU BARRY'S FOOD. Care No. 68,412.—"Home, July 21st, 1866.—The health of the Holy Father is excellent, especially since he abandoned all other remedies he has confined himself entirely to Du Barry's Revalenta Arabica Food, which has produced a surprising beneficial effect on his health, and his Holiness cannot repeat this excellent food too highly."—From the Gazette de Rome, July 25th.

DU BARRY'S delicious, health-restoring REVALENTA ARABICA FOOD restores good appetite, perfect digestion, strong nerves, sound lungs and liver, renews the functional regularity and energy to the most enfeebled or diseased, without medicine, incunavencies, or expense, as it acts directly, times its use in other remedies, curing dyspepsia, indigestion, constipation, flatulency, phlegm, debility, consumption, nervous bilious, liver and stomach complaints, low spirits, &c.—In use at 60,000 cases which had been counted as hopeless.—In use at 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, street, Liverpool; 16, Market-street, Manchester; and Wolver-**

**SILVER FIR FURNITURE, by HOWARD
& SONS.**—The Nobility and Gentry are respectfully invited
to inspect the Furniture made by HOWARD & SONS of this ele-
gant wood, being manufactured by steam-power, although of the
most suitable quality, the price is moderate.—25 and 27, Berners-
street, Oxford-street.

DELICATE and CLEAR COMPLEXIONS,
with a delightful and lasting fragrance, by using
THE CELEBRATED UNITED SERVICE SOAP TABLETS,
4d. and 6d. each. Manufactured by
J. C. & J. FIELD, UPPER MARSH, LAMBETH.
Order of your Chemist, Grocer, or Chandler.

THE OCEAN ST. LEGER of 1866.—What
Lord Lyon was to his Owner was the Taping to her Captain,
viz. winner of the race, having distanced all Competitors, as the
EAST INDIA TEA COMPANY have invariably done in their
choice and sale of fine new season's teas, now selling at importer's
prices.—Warehouses, 9, Great St. Helen's Churchyard.

BREAKFAST.—EPPS'S COCOA
is more commonly called Epps's Homoeopathic Cocoa, as being
prepared and introduced by James Epps, the Homoeopathic Chem-
ist first established in England. The very agreeable character
of this preparation has rendered it a general favourite. For
breakfast no other beverage is equally invigorating and sustain-
ing. This Cocoa is used by thousands who never used Cocoa
before. "Cocoa stands far higher than tea or coffee," Dr. Hassall
says.—Sold in 1 lb., 4 lb., and 1 lb. packets.

FRY'S CHOCOLATE—Medal, London, 1851.

FRY'S CHOCOLATE—Medal, New York, 1853.

FRY'S CHOCOLATE—Medal, Paris, 1855.
LONDON, 1862. DUBLIN, 1865.

J. S. FRY & SONS' CHOCOLATES have been
distinguished by uniform public approbation for upwards
of a Century. Their various descriptions are adapted both for
Eating and for the Table.

Manufacturers to the Queen and Prince of Wales,
Bristol and London.

WILLIAM SMEE & SONS respectfully
caution intending Purchasers of the "SMEE'S SPRING
MATTRESS, TUCKER'S PATENT" or "SOMMER TUCK-
ER," against various imitations and infringements, preserving
somewhat the appearance of the Original, but wanting all its
essential advantages.
Each Genuine Mattress bears the Label "TUCKER'S PATENT,"
and a Number.
The "Smee's Spring Mattress, Tucker's Patent," received the
only PRIZE MEDAL, or Honourable Mention, given to Bedding of
any description, at the INTERNATIONAL EXHIBITION, 1862, and
may be obtained (price from 25s.) of most respectable Bedding
Warehousemen and Upholsterers, and Wholesale of the Manu-
facturers, **WILLIAM SMEE & SONS**, Finsbury, Moorgate
Railway Terminus, London, E.C.

**"THE" Sauce (Dr. SOUTHWOOD SMITH'S
DIGESTIVE).**—Delicious with every dish. Wholesale
and Export by A. S. Stocker, Lamb's Conduit-street; Barclay &
Sons, Ratty & Co., London; and George Edmonds, Crown Cham-
bers, Liverpool. Retailed everywhere. Ask for "THE" Sauce.

**MAPPIN, WEBB & CO'S PLATE and
CUTLERY.**—SPOONS and FORKS of the best quality,
Prices as at the Manufactory, Royal Cutlery Works, Sheffield:—

DINNEFORD'S FLUID MAGNESIA.—The
Medical Profession for thirty years have approved of this
pure Solution of Magnesia as the best remedy for Acidity of the
Stomach, Headache, Heartburn, Gout and Indigestion; and as
a mild aperient it is especially adapted for Ladies and Children.
Prepared by **DINNEFORD & CO., CHEMISTS, &c.,**
172, NEW BOND-STREET, LONDON, W.

And sold throughout the World by all respectable Chemists.
Caution.—See that "Dinneford & Co." is on each Bottle and red
label over the cork.

**MR. HOWARD, SURGEON-DENTIST, 52,
FLEET-STREET,** has introduced an ENTIRELY NEW
DESCRIPTION of ARTIFICIAL TEETH, fixed without
springs, wires, or ligatures. They so perfectly resemble the natu-
ral teeth, as not to be distinguished from the originals by the
closest observer; they will never change colour or decay, and will
be found superior to any teeth ever before used. This method does
not require the extraction of roots, or any painful operation, and
will support and preserve teeth that are loose, and is guaranteed
to restore articulation and mastication. Decayed teeth stopped
and rendered sound and useful in mastication.—52, Fleet-street.

PEPSINE.—MORSON'S PEPSEINE WINE.
—MORSON'S PEPSEINE LOZENGES are perfectly
palatable forms for administering this popular remedy for weak
digestion.—Manufactured by **T. MORSON & SON, 31, 33, 124,
SOUTHAMPTON-ROW, Russell-square, London, W.C.**
PEPSINE WINE in Bottles at 2s., 3s., 4s., and 10s. each.
LOZENGES in Boxes at 2s. 6d. and 4s. 6d. each.
Pepsine Globules in Bottles at 2s., 3s. 6d. and 6s. 6d. each.

BILE and INDIGESTION, Sick Headache,
Flatulency, Heartburn, and all Bilious and Liver Affections,
are speedily removed by the use of

COCKLE'S ANTIBILIOUS PILLS,

which have been held in the highest estimation by all classes of
society for upwards of sixty-five years. May be had throughout
the United Kingdom, in Boxes at 1s. 1/2, 2s. 6d., 4s. 6d. and 11s.

CONSUMPTION.—Dr. CHURCHILL'S
Successful Treatment of Consumption, Diseases of the Chest,
Chronic Cough, General Debility, Loss of Appetite, &c., by the
Syrup of Hypophosphite of Lime, Soda, and Iron, and by the
Pills of Hypophosphite of Quinine and of Manganese, prepared by
H. H. SWANN, of Paris. Price 8s. 6d. per bottle.

A. MARION, SON & CO., 22 and 23, Soho-square, London, invite attention to their recent Importations of PHOTOGRAPHS, taken direct from the Original Pictures in the Galleries at Antwerp, Bruges, Brussels, Madrid, and other places; also to their Stock of Photographs in general.

Catalogues on receipt of four stamps.

Publishing Department on the First Floor of No. 22.

THE CHADBURN LANTERN, for projecting enlarged Images upon a Screen (similar to the Magic Lantern) from opaque objects. This instrument supplies a great want in schools and amateur illustrations; by its means, Maps, Moving Mechanisms (interior of watches), Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their colour and detail, thus rendering paintings on glass needless.—To be had direct from C. H. CHADBURN & SONS, Opticians and Instrument-Makers to H.E.H. the late Prince Consort, Liverpool.

Important and Unreserved Sale of First-class Wines.

MESSERS. DEBENHAM, TEWSON & FARMER have been instructed by Messrs. H. R. Williams & Co. (who are removing to their more extensive Warehouse and Vault in Lime-street), to SELL by Auction, on TUESDAY, November 20, at 1 o'clock, a PORTION of the well-selected Bottled STOCK, consisting of about 1,321 dozen of Ports, among which are some exceedingly fine and rare old Wines with others of equally choice later Vintages; also, about 250 dozen of Sherries, of selected qualities, and of superior character, and a dozen of the first quality Champagne. The name of these fine wines is a sufficient guarantee that the character and description of these wines are genuine, and Messrs. Debenham, Tewson & Farmer can, therefore, with confidence recommend the attention of their numerous Clients and the Public to this extensive and important Sale.

Catalogues at the Auctioneers' Office, 80, Cheap-side, and Crosby Hall, Bishopsgate-street, where the Wines may be tasted, and Sample Bottles obtained by payment at any time previous to the Sale.

For the convenience of Purchasers, Messrs. H. R. Williams & Co. will, if required, deliver the Wines within five miles of the Bank, or to any Railway Station in England, at the rate of 1s. per dozen. If the Wines are to be packed, 1s. per dozen will be charged for packing and cases.

"The task of selection has been performed with great judgment, while the arrangement is in every respect admirable."—*Morning Star.*

London: The Broadway, Ludgate.

CASSELL, PETTER & GALPIN'S NEW VOLUMES, FOR CHRISTMAS AND NEW-YEAR GIFT-BOOKS.

MILTON'S PARADISE LOST. Illustrated with Large Designs by GUSTAVE DORÉ. With Notes, and a LIFE OF MILTON, by ROBERT VAUGHAN, D.D. One large Folio Volume, bound in cloth, 5s.

THE HOLY BIBLE. Illustrated by Gustave Dore. Divisional Volume I. Folio, cloth, 1l. 1s.

DON QUIXOTE. By Cervantes. With about Four Hundred Illustrations by GUSTAVE DORÉ. In one handsome Quarto Volume, bound in cloth, 1l. 10s.; in half morocco, 2l. 5s.; in best morocco lines, 3l. 10s.

"The contrast of fact and fancy, of stoutness and leanness, of shortness and height, of the leathern jerkin and the rusty mail, of the smug donkey and the skinny steed, is invariably yet ever fresh."—*Full Mail Gazette*.

DANTE'S INFERNO, with Seventy-six full-page Illustrations by GUSTAVE DORÉ. CARY'S Translation and Notes. Crown Folio, price 50s.

"Messrs. Cassell & Co. have published a noble volume of Cary's text and Doré's illustrations. The publication is a sumptuous one, and reflects the highest credit on the enterprising publishers."—*Saturday Review*.

"Of the many sumptuous books of this season, Gustave Doré's 'Dante' (published by Messrs. Cassell, Petter & Co.) is not the newest, but it is one of the most important."—*Full Mail Gazette*.

"It is a grand book, and if looked at with intelligent eye will not be forgotten after."—*Guardian*.

THE HISTORY OF CROQUEMITAINE, and the CHIVALRIC TIMES OF CHARLEMAGNE. Illustrated throughout by GUSTAVE DORÉ. The Text freely rendered from the French by TOM HOOD. Quarto, cloth, printed on Toned Paper, 1l. 1s.

"This book deserves a place by the more dignified 'History of Don Quixote'; it is a tale of chivalry in which romance is made ridiculous, while ridicule is softened by pathetic touches and an undercurrent of morality."—*Full Mail Gazette*.

ADVENTURES OF BARON MUNCHAUSEN. A New and Revised Edition, with about 140 Illustrations by GUSTAVE DORÉ; and an Introduction by T. TEIGNMOUTH SHORE, M.A. Complete in One Volume, 4to. cloth, One Guinea.

"Munchausen's Travels is really the book for Gustave Doré, and we have to congratulate Messrs. Cassell on the publication of an edition of Munchausen which is a true *livre de luxe* as regards size, paper, print, and pictures."—*Saturday Review*.

THE LEGEND OF THE WANDERING JEW. With Twelve Large Designs by GUSTAVE DORÉ. Large Folio, cloth, 15s.

IDYLLIC PICTURES. Drawn by Pinwell, HOUGHTON, PAUL GRAY, BARNES, &c. Royal 8vo. cloth gilt, 10s. 6d.

THE CHILD'S GARLAND OF LITTLE POEMS. With exquisite Illustrative Borders by GIACOMELLI; and Original Poems by MATTHIAS BARR. Square 8vo. cloth gilt, 7s. 6d.

BRIGHT THOUGHTS FOR THE LITTLE ONES. Twenty-seven Original Drawings by PROCT. With Prose and Verse by GRAND-MAMMA. Square 8vo. cloth, gilt, 7s. 6d.

FOXES BOOK OF MARTYRS. Edited by the Rev. W. BRAMLEY-MOORE, M.A. Illustrated with full-page Designs by the best Artists. Complete in One Volume. Plain cloth, 12s.; handsomely bound in cloth gilt, 15s.

THE QUIVER, Volume for 1866. Illustrated with upwards of ONE HUNDRED ORIGINAL DRAWINGS. Bound in cloth, with plain edges, 7s. 6d.; with gilt edges, 8s. 6d.

CASSELL'S ILLUSTRATED HISTORY OF ENGLAND. The First Volume of the New Toned Paper Edition.—This volume, extending from the earliest period to the reign of Edward IV., is illustrated with about THREE HUNDRED AND FIFTY ENGRAVINGS. Bound in cloth, price 8s.

THE BEGGAR'S BENISON: a Clydesdale Story. With upwards of 300 Amateur Pen-and-Ink Sketches. 2 vols. post 8vo. cloth, 1l. 1s.

"The author has managed to throw into his story an amount of plain verisimilitude, after the manner of Defoe, which makes it a thousand times more readable than the mass of high-flavoured romances. Plain print cannot do justice to the infinitely grotesque little woodcuts with which this funny story is so funnily illustrated. There is something surprising in the amount of expression and character which the draughtsman has contrived to throw into some of them. Altogether, the book is one of the quaintest and most diverting we have read for a very long time."—*Saturday Review*.

THE NORTH-WEST PASSAGE BY LAND. Being the History of an Expedition from the Atlantic to the Pacific through British Territory, by one of the Northern Passes in the Rocky Mountains. By VISCOUNT MILTON, M.P. F.R.G.S. F.G.S. &c., and W. B. CHEADLE, B.A. M.D. Cantab., F.R.G.S. 8vo. cloth, with numerous Illustrations. Sixth Edition, 21s.

"The title of this very remarkable joint-description of a really notable adventure is not without its significance. The pluck and energy which characterise the carrying out of this highly-adventurous expedition were as creditable as the practical spirit in which it was conceived, and as the graceful and modest humour with which it is told. For fuller details of the journey we may safely recommend our readers to consult the letter-press and sketches of Lord Milton and Dr. Chedale."—*Saturday Review*.

CASSELL'S ILLUSTRATED GULLIVER'S TRAVELS. With Explanatory Notes and Life of DEAN SWIFT. By Dr. WALLER, Vice-President of the Royal Irish Academy. With 100 Illustrations by T. MORTEN. Complete in One Volume, cloth gilt, 7s. 6d.; or extra cloth gilt, 10s. 6d.

"Mr. Morten's illustrations throughout are excellent, capably drawn, and most humorous."—*Art-Journal*.

SHAKESPEARE'S COMEDIES (Cassell's Illustrated Edition). Edited, with Notes, by CHARLES and MARY COWDEN CLARKE. Illustrations by H. C. SELOUS. Complete in One Volume, 12s.

"A noble volume nobly illustrated."—*Illustrated London News*.

"A thoroughly handsome and valuable edition of the great dramatist's Comedies."—*Morning Star*.

CASSELL'S ROBINSON CRUSOE. Illustrated with 100 beautiful Engravings, printed on Toned Paper. 7s. 6d.

"This extremely attractive edition of the good old English story of 'Robinson Crusoe' is completed by the issue of the twelfth part, and a likeness of Defoe (whom, as some of our readers are aware, we are entitled to claim as a predecessor in the editorship of the *Courant*) is given to form the frontispiece of the handsome volume."—*Edinburgh Courier*.

GOLDSMITH'S WORKS (Illustrated). The Vicar of WAKEFIELD and POEMS, beautifully printed on Toned Paper, with 100 Illustrations by ANELAY and MORTEN. In One handsome Volume, cloth, 7s. 6d.; full gilt cloth, with gilt edges, 10s. 6d.; full morocco antique, 21s.

"The editor to whom Messrs. Cassell entrusted the revision of their 'Goldsmith' has most accurately performed his task."—*Illustrated London News*.

"For a Christmas or birthday present we should vote for Messrs. Cassell's production, which has the advantage of a Life of Goldsmith, from the pen of Dr. John Francis Waller, LL.D."—*Standard*.

CASSELL'S ILLUSTRATED BIBLE DICTIONARY. Complete in Two Volumes, bound in bevelled cloth boards, with red burnished edges, price 25s.; also in One Double Volume, cloth, price 25s.

"A thoroughly good dictionary of the Bible, at once moderate in price, sound and varied in its critical information, written up to the time, and, above all, uniting independence of thought with orthodoxy of belief, has long been a desideratum. The well-known firm of Cassell & Co. have supplied the want, in the publication described above. We have examined it with care and unaffected interest, and, finding it thoroughly well adapted to its purpose, warmly recommend it to our readers for their own use, as a ready and manageable book of reference, and for circulation among their lay fellow-helpers. We are the more desirous to do this, because of an unfair and most spiteful notice of the book which has recently appeared in the *Athenæum*."—*Record*.

THE FAMILY PRAYER-BOOK; or, Morning and Evening Prayers for Every Day in the Year. Edited by the Rev. EDWARD GARBETT, M.A., Incumbent of St. Bartholomew's, Gray's Inn-road, and Boyle Lecturer; and the Rev. SAMUEL MARTIN, of Westminster, Chairman of the Congregational Union for England and Wales. Complete in One Volume, price 7s. 6d.

"We heartily commend this praiseworthy attempt to aid those in whose hearts it has been put to set up the family altar."—*Record*.

"We can very honestly, as we would very earnestly, commend this work to all who may need it. If we mistake not, they will find in it what they have in vain looked for in works of this class—variety and reasonably brevity, as well as devoutness. It is a miracle of cheapness."—*Patriot*.

MESSRS. BELL & DALDY'S CHRISTMAS BOOKS.

Art and Song.

A Series of Original highly-finished Steel Engravings, from Masterpieces of the Nineteenth Century; with a Selection of the Choicest Poetry in the English Language.

HALF-HOURS WITH THE BEST

AUTHORS. A Library Edition. Remodelled throughout by its original Editor, CHARLES KNIGHT; with Selections from Authors added whose works have placed them amongst the "Best Authors" since the publication of the First Edition.

"* This book contains Three Hundred Extracts of the best efforts of our great Standard Authors, whether they be poets or historians, essayists or divines, travellers or philosophers, arranged so as to form half-an-hour's reading for every day of the year. The student finds a taste of every quality, and a specimen of every style. Should he grow weary of one author, he can turn to another; and if inclined to be critical, he can weigh the merits of one writer against those of his fellow. It gives us a glimpse of the celebrities assembled within its portals. At a glance, the student can obtain some idea of the subject. Such books as these are the true foundations of that knowledge which renders men celebrated and famous."

ILLUSTRATED WORKS.

A Fine-Art Gift-Book for 1867.

In post 4to. price 21s.; or morocco gilt or antique, 25s.

The SPIRIT OF PRAISE: A Collection of Hymns, Old and New. Elaborately printed by Dalziel Brothers, and fully illustrated with Illuminations and Original Pictures by G. J. Pinwell, J. W. North, Paul Gray, W. Small, T. Dalziel, A. B. Houghton, &c.

This important volume, which is expected to take a high rank amongst the Illustrated Books for 1867, has had every novelty of choice printing exhausted in its progress. Its ornamentations in red letter and border lines are quite original and unique.

In post 4to. price 12s. 6d. cloth, elegantly gilt, gilt edges,

The POETS of the NINETEENTH CENTURY. Selected and Edited by the Rev. R. A. WILLMOTT. With 100 Illustrations by J. Everett Millais, A. R. A., John Tenniel, F. R. Pickersgill, A. R. A., John Gilbert, Harrison Weir, &c. Engraved most elaborately by the Brothers Dalziel.

"A book of life, forcibly conceived, vividly depicted, and abounding in matter calculated to attract, rivet, and instruct."—*British Standard.*

HOPE CAMPBELL; or, Know Thyself.

"An admirable book, and one we can recommend heartily. It contains much wise counsel."—*Athenæum.*

AUNT AILIE; or, Patience and its Reward.

From the *Athenæum*, October 30, 1865.

"The pleasant and salutary writer to whom children owe thanks for many excellent stories has found the end of her labours; and in future holidays little people will ask in vain for another tale from 'Cousin Kate,' by which title Miss Catherine Bell was known to her juvenile admirers. Rendering a proper tribute of respect to the author, and at the same time meeting a public demand, Miss Bell's present publishers are putting forth her series of moral narratives, of which they justly observe, 'Their aim is to teach, in the attractive guise of fiction, the holiest and noblest truths, and to show how character is formed, faults cured, and virtues attained by God's discipline of daily life.'"

THE CHANDOS POETS.

Under this distinctive title will, from time to time, be published New and Elegant Editions of Standard Poetry.

Now ready, Red-Line Edition, new type, in crown 8vo. price 6s. cloth; with gilt edges, 6s. 6d.; or morocco, 12s. 6d.

Just ready, PART I. 21s.

EXOTIC ORNITHOLOGY. By Philip Lutley Sclater, M.A. Ph.D.

F.R.S. &c., and OSBERT SALVIN, M.A. F.Z.S. &c.

Under this title has been commenced the issue of a series of COLOURED LITHOGRAPHIC ILLUSTRATIONS of NEW, or hitherto UNFIGURED BIRDS, to form a SUPPLEMENT to TEMMINCK'S Planches Colorées, 5 vols. Paris, 1838; and DES MURS, Iconographie Ornithologique, Paris, 1845-49.

The subjects for illustration will be selected from the many new and remarkable ornithic forms which the exertions of modern collectors have recently brought to light in nearly every part of the world's surface, particularly within the tropics of both hemispheres.

To the description of each species figured, the authors will endeavour to add a complete list of the other known species of the genus, so that the letter-press will consist of a series of separate monographic essays.

The first series of this work will contain ONE HUNDRED PLATES. It will be published in Twelve Parts, at intervals of about two months. Each Part will contain Eight Coloured Plates, and two sheets of Letter-press. A thirteenth Part will contain the last four Plates, and the Title and Index to the volume.

Only ONE HUNDRED and FIFTY copies of the Work, in imperial 4to. will be prepared. The price of each Part will be 1s. 1s., to be paid for as the Work comes out.

FIFTEEN copies will be printed on LARGE PAPER, royal folio, to match the Large Paper issues of Temminck and Des Murs. The subscription price of these copies, will be, each Part, 2s. 2s.

HURST & BLACKETT'S
NEW WORKS.

NEW AMERICA. By William Hepworth Dixon. 2 vols. 8vo. [In the press.]

THE LIFE of JOSIAH WEDGWOOD.

From his Private Correspondence and Family Papers in the possession of Joseph Mayer, Esq. F.R.S., Francis Wedgwood, Esq., C. Darwin, Esq. F.R.S., Miss Wedgwood, and other authentic sources. By ELIZA METEYARD. Dedicated to the Right Hon. W. E. GLANVILLE. Complete in 3 vols. 8vo. embellished with Portraits and above 300 beautiful Illustrations, 42s. bound.

"We have to congratulate the authors on the publication of her Life of Wedgwood. We can award her the praise due to the most painstaking and conscientious application. She has devoted her whole mind and energy to her subject, and has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The two volumes before us are in themselves marvels of decorative and typographical skill. More beautifully printed pages, more creamy paper, and more dainty woodcuts have seldom met our eyes."—*Saturday Review*.

TRAVELS in FRANCE and GER-

MANY in 1855 and 1856; including a Steam Voyage down the Danube, and a Ride across the Mountains of European Turkey, from Belgrade to Montenegro. By Capt. SPENCER, Author of 'Travels in Circassia,' &c. 2 vols. 21s.

LIGHTS and SHADOWS of LONDON

LIFE. By the Author of 'MIRK ABBEY,' &c. 2 vols.

THE NEW NOVELS.

MADONNA MARY. By Mrs.

OLIPHANT, Author of 'Agnes,' &c. 3 vols.

"'Madonna Mary' is a book of great power and beauty—a perfect work of the kind."—*Morning Post*.
"In 'Madonna Mary' Mrs. Oliphant has added another to her many literary laurels. It is a story told with exquisite simplicity and beauty, and full of the deepest interest."—*Star*.

ANNALS of a QUIET NEIGHBOUR-

HOOD. By GEORGE MAC DONALD, M.A., Author of 'Alec Forbes,' 'David Elginbrod,' &c. 3 vols.

"Mr. Mac Donald is a true poet. The 'Annals of a Quiet Neighbourhood' are as full of music as was Prospero's Island; rich in strains that take the ear captive when they are first heard, and afterwards linger long upon it."—*Saturday Review*.

The charm and value of Mr. Mac Donald's work need not be sought. They present themselves unasked for in the tender beauty of his descriptions, whether of nature or of life and character; in his almost supernatural insight into the workings of the human heart and in his unceasing fertility of thought and happy exactitude of illustration. Whoever reads the book once will read it many times."—*Full Mail Gazette*.

KINGSFORD. By the Author of

'SON and HEIR,' 2 vols. 21s.

"A very good novel, written with great spirit. The plot is of such ingenuity as to maintain the interest of the reader to the end. The descriptions of scenery are capital, and there is great skill shown in the drawing of character."—*Star*.
"One of the most interesting stories we have read this season, and we are sure our readers will thank us for recommending to them a work so attractive and enthralling."—*Sun*.

LORDS and LADIES. By the Author

of 'MARGARET and HER BRIDESMAIDS,' &c. 3 vols.

"One of the most charming books with which the literature of fiction has been enriched this season."—*Morning Post*.

RACHEL'S SECRET. By the Author

of 'THE MASTER of MARTON,' 3 vols.

"A deeply interesting and affecting story, artistically and powerfully wrought."—*Morning Post*.

CHRISTIE'S FAITH. By the Author

of 'No Church,' 'Owen,' 'Mattie,' &c. 3 vols. [Next week.]

affixed to their various Articles.

This Edition is entirely new, and is
increased by a whole volume.

Edinburgh: ADAM & CHARLES BLACK.

LONDON, SATURDAY, NOVEMBER 17, 1886.

LITERATURE

A Book about Lawyers. By John Cordy Jeaffreson, Barrister-at-Law. 2 vols. (Hurst & Blackett.)

A Book about Lawyers is one that should address itself to all tastes. It should be at once a chronicle of heroic workers, a record of triumphs of intellect, a chapter in the brightest and basest part of the history of England, a report of tournaments where men fought with words.

There is one circumstance which ennoble the profession of the law,—industry and ability alone can grasp its highest honours. Some able men may not attain the most coveted dignities—opportunity may fail them; but they cannot be superseded by dunces. It is true that a knave—for there have been such, even in ermine—may now and then snatch the crown towards which purer hands were raised, but at least the knave must be a knave with brains. This may be no consolation to the loser in the race; but a brave and wise and well-qualified man suffers double humiliation when the garland he coveted is clapped by favour on the brow of the dunce.

We allude now especially to the Bar; but a book about lawyers cannot be silent as to attorneys. Among the latter gentlemen there is greater variety of quality. If now and then the "honour of the bar" has rather questionable illustration, the "sharp practice" of some attorneys is much nearer akin to rascality. Here, however, we take the exceptional cases to be few. If we judge of the general pious feelings of the profession by the number of saints it has yielded to the calendar, the verdict would not be very satisfactory, for there is only one such saint to be found, while the stage has yielded some half-dozen saints or professors. The general feeling of the Bar for attorneys, the measure of esteem dealt out to the latter, the value of their position in society and in the profession, are not badly illustrated by that old rule of etiquette which forbade the "hugging of attorneys," and which, while it prohibited barristers from dancing with attorneys' daughters, allowed them to make love (of any sort whatever) to attorneys' wives!

The proverbial "uncertainty of the law" has been an object of satire from time immemorial, especially on the part of those who have not gained their suits. But there is one thing to be said for that proverbially "glorious uncertainty." It really does not apply to the law at all. That is fixed and certain beyond all doubt. It is the alleged facts to which its application is to be made that are uncertain, not the law. As to the fixedness of the latter, it is only temporary. The laws of the Medes and Persians, which never changed, only immortalize the stupendous folly of those Eastern legislators. Change of circumstances and abuses of the law itself require corresponding changes in the latter; for, as Roger North says so happily, "It is impossible but in process of time, as well from the nature of things changing, as corruption of agents, abuses will grow up, for which reason the law must be kept as a garden, with frequent digging, weeding, turning, &c. That which in one age was convenient and perhaps necessary, in another becomes an intolerable nuisance." It is such a necessity that affords the best material for a book like Mr. Jeaffreson's. He has not only shown the process of this legal gardening, but excellently illustrated the persons and peculiarities of the weeders and diggers,—the legal labourers generally in

the garden of the Law which requires such careful tending to keep it from growing rank. Some of these labourers have laughed at their own work. Serjeant Maynard, who was called the "best old book-lawyer of his time," used to mockingly designate the law itself as "*ars bablativa*."

It did not, however, become a "talkative art" till it fell exclusively into the hands of laymen. Ecclesiastical lawyers were, generally speaking, men of few words. Those who have succeeded to the peculiar work of the Ecclesiastical Courts now, are to the full as wordy, and by no means so amusing, as their fellows. The importance of the profession was indicated, socially, morally and religiously, by its being at first in the hands of the clergy, or under the guard and watchfulness of some prince in the Church. But though this was the case in most countries, there was no lack of abuse in the administration, nor of selfishness on the part of the legislators. Lady Wortley Montagu remarked how, in her time, lawyer and priest were the same word in Turkey—law and divinity being there one science. She soon discovered, however, that while the Sultan could lay hands on the property of any man in his dominions, or on the inheritance of rich men's children, he never dared to touch the property of the Ulemas. These had recognized him as the general heir of his people,—always excepting themselves and families. With equal selfishness, the priests and lawyers of a rougher quality, whom Mungo Park found in one part of Africa, made laws with exceptions favourable to themselves. This was pleasantly illustrated in the country where eggs were scarce, and priests and lawyers loved them. It was deemed sacrilegious, and worthy of death, for any one to eat an egg who was not an expounder of divinity and a teacher of the law. Of samples of equal, though different, cunning and cleverness, there is abundance in these amusing volumes.

Perhaps we shall afford the best idea of the plan and contents of Mr. Jeaffreson's work by showing its general divisions. Its subdivisions are so numerous that we cannot indicate them. The author, then, sets out appropriately with a history of the Great Seal. He passes on to show, not the priest and lawyer, but the lawyer combined with the soldier, the lawyer on horseback, and the lawyer in love, duly wedded, and at home—in which department lawyers' ladies are not without their illustrations. "Money" deals with fees, retainers, bribes, and salaries, with strings of anecdotes hanging from each subject; and this may be said of another capital subject, capably treated, that of legal "Costume and Toilet." Then, although a barrister who sings may be set down as a fool, not because of his ability, but because of his eagerness to display what is pretty sure to be turned to his disadvantage,—although we say a barrister given to vocalizing is something of a rare monstrosity, like the singing-mouse, and should have something better to do, except among very intimate friends,—under the head of "Music" Mr. Jeaffreson has some appropriate illustrations, which lead us to conclude that, if there have been many musical barristers, they have had the good sense to confine the display of their power, and the pleasure of exercising it, to the limited circle of their own homes. A generation ago, a "barrister who writes" was a lost man. It indicated that he was good for nothing else. It may be a prejudice, but there is the same feeling still acting injuriously against the barrister who sings. We never heard of a man becoming Chancellor who had spent his time over the mysteries of demi-semi-quavers. In "Amateur Theatricals" will

be found some of the most brilliant incidents connected with the Inns of Court, referring, as they do, to the routs and masques once performed there in royal, noble, and—not meaning it as an invidious distinction—learned presence. The chapters on "Political Lawyers" introduce us to the struggles and triumphs of the more ambitious lawyers. Then follow half-a-dozen chapters on "Legal Education," referring to training, and to manifestations of power for the struggle and ability to secure the triumphs of those lawyers to whom we have alluded as being moved by no ordinary ambition. Another half-dozen chapters, with the general heading of "Mirth," introduce the reader to the wit and humour of lawyers, experiences of circuit, and encounters of counsel and witnesses. "At Home, in Court and in Society," describes itself; and the concluding portion, entitled "Tempora Mutantur," contrasts things as they are with things that have been; and a good story ends the series of several hundreds.

It will have been seen that there is no especial order in the succession of Mr. Jeaffreson's chapters. Had he intended that there should have been, he probably would have commenced with the subject of "Education," and ended with the history of the Great Seal, how it was obtained, and the fashion of life of the retired Chancellors who had more or less reluctantly yielded it to a royal master, or into the hands of a successor. On this last subject, a volume of itself might be written; and we may the less wonder that Mr. Jeaffreson has not written it when we are indebted to him for eight hundred pages, and that rare and valuable addition, a capital Index, all devoted to the history and illustration of legal men and things. It is much that we can say for a book that there is not a superfluous page in it; and this we can say of the work before us, making exception the while only of the Introduction, and of some passages where the author is inaccurate, as in the indestructibility of the Great Seal, the account of the alleged tricks played by the champion's horse at the Coronation of George the Fourth, and some few others.

In affording a taste of the quality of such a work, there is no more going by rule than Mr. Jeaffreson himself has done in the construction of it. We open one of the volumes, as Lord Dufferin would say, "promiscuously," and "Actors at the Bar" is the title of the chapter that meets our eye. In this we are told that the late Serjeant Wilkins was successively "an apothecary's apprentice, a strolling player, a clerk, an agent, before he entered the profession in which he achieved prominence, and for many years earned a very large income." Mr. Jeaffreson says of the Serjeant that "Prudence was not one of his characteristics," which is a charitable euphuism for a much plainer and more appropriate word. How far want of that characteristic,—and prudence is no great matter, it is merely "self-care," which, being wanting in a man, excludes him from self-respect and the respect of good men,—how far the lack of it brought him to misery and degradation, is a painfully familiar story. No doubt, had Serjeant Wilkins risen to the highest honours open to him by the exercise of his profession, the outline of his biography would be delicately sketched, and the "apothecary's apprentice," as Mr. Jeaffreson correctly describes him, would, under a flowery hand, be converted into a young gentleman who left the study of the science of medicine to follow the vocation made illustrious by a hundred learned heroes.

Mr. Jeaffreson leaves us to infer from his silence that the late Serjeant Wilkins was

the only barrister who had played in dramatic wigs before he pleaded, more or less dramatically, in forensic perukes. But though the list may not contain many names, the sole name set down by Mr. Jeaffreson might be added to, and of living men, as we are informed, that of Mr. Edwin James. Again, if the stage has contributed only a few men to the bar, the list is long of those who quitted the study or practice of the law for the more congenial task of writing for the stage. A chapter on this subject would have come pleasantly from Mr. Jeaffreson's pen. It would include men of greater or less note, but all of some reputation. Among them are Congreve, Wycherly, Rowe, Shadwell, Southerne, Durfy, Ravenscroft, and Bankes. Rymer, of the 'Fœdera,' is one of the wise fellows who held fast by the law, while he made a fool of himself, as dramatic author and critic, with respect to the stage. The late Mr. Justice Talfourd was still wiser, as he was better endowed, than Rymer. •It was not till he had secured an unassailable position at the bar that he appeared, with assured success, as a writer for the stage. In earlier days, kind friends would have whispered that a young fellow who wasted his time in writing plays could not possibly spend any in studying his profession; but the censure, or judgment, of the town took, properly enough perhaps, another tone, in Talfourd's case. It expressed an admiring surprise that any one so learned in the law had ever had leisure enough to win a stray but brilliant crown in a race with dramatic poets. Colley Cibber, we believe, presents the only known instance of an actor pleading in person at the bar. The creditors of Steele claimed a sum which he had assigned to his partners, Cibber, Booth, and Wilks. Cibber argued his and their cause. He was the most impudent man of his day; but he confesses to having been dreadfully abashed in the presence of court and judges. "When it came to the critical moment," he tells us, "the dread and apprehension of what I had undertaken so disconcerted my courage that, although I had been used to talk to above fifty thousand people every winter for upwards of thirty years together, an involuntary and unexpected proof of confusion fell from my eyes; and, as I felt myself quite out of my element, I seemed rather gasping for life than in a condition to cope with the eminent orators against me." The brilliant actor, however, recovered his self-possession, and won a verdict for himself and partners against two accomplished advocates who had the stuff in them which subsequently made of both a couple of effective Lord Chancellors.

While suggesting fresh matter for a new edition of this book, we cannot forbear from mentioning the subject of Serjeants' Rings. It is one full of the rarest and most curious matter, worthy of the amplest illustrations. A couple of these rings are presented to the sovereign by the newly-appointed serjeant. They are like little butter-tubs, and a long chapter might be written, not merely on how the honour fell on the ring-giver, but on the motives, droll or earnest, which led him to adopt the motto selected for the rings. The curiosity of our kings to know what the device was to be, their desire to possess the rings of serjeantry, and the care for preservation of them, are not things of the past. A serjeant, flushed by his new honour, may forget for awhile the tribute due to the sovereign; but a voice, or a written word, will reach him from Court. Finally, before we open some of the pages of Mr. Jeaffreson's book to our readers, we would suggest to the author, who is not, indeed, sparing of anecdotes that have not before been printed, that in place of

repeating some of those that have been in circulation through published works before, it would improve a future edition of the volumes before us if he were to substitute the little-known experiences of legal life, and the wit, humour, sense and nonsense—the latter by no means the least amusing of the whole—that are to be found in *printed* works, indeed, but yet in an unpublished form, which have, however, been printed only for private circulation, for the purpose of preserving among friends, colleagues and clients the memory of the wisdom or folly, unerring tact or blunders, lucidity or stupidity,—the leading characteristics, in fact, of the hero. In this unpublished literature there is a mine of wealth for those who will stoop, not to the lightly picking of it up, but to the labour of digging it out, separating the ore from the dross, and shaping what is valuable into an article to dazzle and delight the eyes of a fascinated public.

The Templars do not seem, at least as far as their valour is concerned, to enjoy an excessive measure of our author's respect: "During the Gordon Riots, in the year 1780, some of our lawyers," he says, "were compelled to fight—and fly." He adds, "Of the good stories concerning their valour, many of them are too good to be true, and some too true to be good." Then follow these good illustrations:—

"Judge Burrough used to tell that, when the Gordon rioters besieged the Temple, he and a strong body of barristers, headed by a sergeant of the guards, were stationed in the Inner Temple Lane; and that, having complete confidence in the strength of their massive gate, they spoke bravely of their desire to be fighting on the other side. At length the gate was forced. The lawyers fell into confusion and were about to beat a retreat, when the sergeant, a man of infinite humour, cried out in a magnificent voice, 'Take care no gentleman fires from behind.' The words struck awe into the hearts of the assailants, and caused the barristers to laugh. The mob, who had expected neither laughter nor armed resistance, took to flight, telling all whom they met that the bloody-minded lawyers were armed to the teeth, and enjoying themselves. The Temple was saved. The most exquisitely comical version of the incident which Judge Burrough's narrative points, came from Lord Erskine's lips in November, 1819; when in the House of Lords, speaking upon Lord Lansdowne's motion for an inquiry into the state of the country, he condemned the conduct of the yeomanry at the 'Manchester Massacre,' as certain ardent partisans even of this day designate the dispersion of Orator Hunt's meeting of workmen. 'By an ordinary display of spirit and resolution,' observed the brilliant egotist to his brother peers, who were so impressed by his complacent volubility and good-humoured self-esteem, that they were for the moment ready to take him at his own valuation, 'insurrection may be repressed without violating the law or the constitution. In the riots of 1780, when the mob were preparing to attack the house of Lord Mansfield, I offered to defend it with a small military force; but this offer was unluckily rejected: and afterwards, being in the Temple when the rioters were preparing to force the gate, and had fired several times, I went to the gate, opened it, and showed them a field-piece which I was prepared to discharge in case the attack was persisted in. They were daunted, fell back, and dispersed.' This is a good specimen of the vain-glorious statements which Erskine frequently made under the influence of egotism, high spirits, and lawless fancy. Walter Scott had some reason for his sweeping judgment—'Tom Erskine was positively mad!'"

The stories are good; but we must object to Mr. Jeaffreson's description of the great Reform meeting in St. Peter's Field, Manchester, as a "meeting of Orator Hunt's workmen," and his suggestion that to call the dispersion of it by the

name of the "Manchester Massacre" is merely a partisan description. On the day in question, 11th of August, 1818, fifty thousand people, men, women and children, had their faces turned towards Hunt, listening to him as he spoke from a platform, on the want of parliamentary reform. There was no disorder among the listeners; yet, suddenly, a troop of yeomanry cavalry, with swords drawn, charged from the rear through the crowd, up to the platform; and when they pulled rein, and faced about to ride back, four hundred, slain and wounded together, lay on the ground, bleeding witnesses of their prowess! Surely this was a "massacre,"—a name which, doubtless, partisanship will sometimes ascribe to acts that cannot justly be so recorded. Of some of the customs of the old days, and how a simple fact may be distorted, here are fair samples:—

"Barristers posting through the country saw far too much of each other. Bickerings and feuds arose; and sometimes the 'sad apprentices' having ordered the horses to stop exchanged shots at the halfway house of a long posting-stage. Even where they restrained themselves from expressions of hostility, mutual self-respect was utterly destroyed by undue familiarity. No judge ever named as guardian to his children, or even as executor, the brother-circuiteer with whom he was wont to post in days when they were at the bar. Greatly conducive to these petty squabbles was the irksome slowness of travelling. Of course the lawyers in good practice worked at their papers while the postmen cantered up hill and down dale at the average rate of eight or nine miles per hour; but briefless juniors, unless they were rare and most exceptional impostors, could not through a long day's drive feign earnest application to the statements of dummy briefs. Usually they shortened the hours with cards or dice; and where four men posted together in a double-seated coach, they would play whist on a table made by a plank fitted into the windows of the carriage. This custom gave rise to a painful scandal concerning a barrister, who after winning high honours in his profession is still alive. The story may be told; but the great man's name must be held secret. Many years since the lawyer lost an aged aunt, whose will required her body to be interred in a distant part of the country. Like a dutiful nephew, and in a manner becoming his aunt's executor, the young barrister, together with other gentlemen (closely connected with the deceased lady by blood or business), journeyed from London to the place of sepulture. The hearse containing the embalmed body had been sent forward, and the mourners followed it at an interval of a few days' journey. The first day was very tedious; and as several days would follow it, ere the place of interment could be reached, the nephew on the second morning of the dolorous expedition proposed to his companions in grief that they should have a rubber. He had cards in his pocket, and at the next roadside inn they could get a board that would serve them for a table. The suggestion was unanimously adopted; and throughout the remainder of the comfortless progress, the mourners played steadily with complete indifference to the scenery which surrounded them, and with that superb devotion to 'the game' which characterized whist-players half-a-century since. Under the circumstances the mourners 'progressed as favourably as could be expected.' Their spirits rose; much money changed hands; and when the four gentlemen stood in the old lady's mausoleum, the two who had won were sustained by an enlivening sense of worldly prosperity, and the two who had lost thirsted for revenge on the homeward journey. Unfortunately, however, certain local gossips of the puritanical district where the old lady was buried, had either seen the mourners at whist or heard how they amused themselves. The story passed from mouth to mouth, and reached London almost as soon as the melancholy whist-players. Of course in London the story lived; and years afterwards, when the nephew had risen to eminence in politics and law, people were told at dinner-parties how the great lawyer had taken his aunt's

body from London to Scotland, *playing cards on her coffin throughout the entire journey.*"

Mr. Jeaffreson makes saddening allusion to the moral atmosphere of the Temple. "The bare thought," he says, "of this sad life sends a shivering through the frame of every man whom God has blessed with a peaceful home and wholesome associations." A modest woman, it seems, can hardly show herself there. But we fancy there must be some exaggeration in this, and that the Temple thoroughfare is not, in its way, as odious as Hyde Park. Whether in the chambers or the courts, it must be something unclean, for Mr. Jeaffreson can only say, after his allusion to it, "nothing shall be said of it in this page." Of domestic life there in the old time, he gives some pleasant pictures. There were different inmates of those rooms than are to be found there now:—

"A century or two centuries since the case was often widely different. The rising barrister brought his bride in triumph to his 'chambers,' and in them she received the friends who hurried to congratulate her on her new honours. In those rooms she dispensed graceful hospitality, and watched her husband's toils. The elder of her children first saw the light in those narrow quarters; and frequently the lawyer over his papers was disturbed by the uproar of his heir in an adjoining room. Young wives, the mistresses of roomy houses in the western quarters of town, shudder as they imagine the discomforts which these young wives of other days must have endured. 'What! live in chambers!' they exclaim with astonishment and horror, recalling the smallness and cheerless aspect of their husbands' business chambers. But past usages must not be hastily condemned,—allowance must be made for the fact that our ancestors set no very high price on the luxuries of elbow-room and breathing-room. Families in opulent circumstances were wont to dwell happily, and receive whole regiments of jovial visitors in little houses nigh the Strand and Fleet Street, Ludgate Hill and Cheapside;—houses hidden in narrow passages and sombre courts—houses, compared with which the lowliest residences in a 'genteel suburb' of our own time would appear capacious mansions. Moreover, it must be borne in mind that the married barrister, living a century since with his wife in chambers—either within or hard-by an Inn of Court—was, at a comparatively low rent, the occupant of far more ample quarters than those for which a working barrister now-a-days pays a preposterous sum. Such a man was tenant of a 'set of rooms' (several rooms, although called 'a chamber') which, under the present system, accommodates a small colony of industrious 'juniors' with one office and a clerk's room attached. Married ladies, who have lived in Paris or Vienna, in the 'old town' of Edinburgh, or Victoria Street, Westminster, need no assurance that life 'on a flat' is not an altogether deplorable state of existence. The young couple in chambers had six rooms at their disposal,—a chamber for business, a parlour, not unfrequently a drawing-room, and a trim, compact little kitchen. Sometimes they had two 'sets of rooms,' one above another; in which case the young wife could have her bridesmaids to stay with her, or could offer a bed to a friend from the country. Occasionally during the last fifty years of the last century, they were so fortunate as to get possession of a small detached house, originally built by a nervous benchman, who disliked the sound of foot-steps on the stairs outside his door. Time was when the Inns comprised numerous detached houses, some of them snug dwellings, and others imposing mansions, wherein great dignitaries lived with proper ostentation. Most of them have been pulled down, and their sites covered with collegiate 'buildings'; but a few of them still remain, the grand piles having long since been partitioned off into chambers, and the little houses striking the eye as quaint, misplaced, insignificant blocks of human habitation. Under the trees of Gray's Inn Gardens may be seen two modest tenements, each of them comprising some six or eight rooms and a vestibule. At the present time they are occupied as offices by legal practitioners, and many a day

has passed since womanly taste decorated their windows with flowers and muslin curtains; but a certain venerable gentleman, to whom the writer of this page is indebted for much information about the lawyers of the last century, can remember when each of those cottages was inhabited by a barrister, his young wife, and three or four lovely children."

Mr. Jeaffreson, we believe, is not quite correct in stating that the late Mr. Mathews, who, when acting the part of *Flexible* in 'Love, Law, and Physic,' used to imitate the late Lord Ellenborough, the Chief Justice, desisted from that practice at the suggestion of certain authorities. He was peremptorily prohibited from continuing the practice by an order from the Lord Chamberlain's office. The practice was of long standing on the stage. Whenever a player represented a lawyer, he invariably imitated, or attempted to imitate, some leading judge or counsellor. Even the lively young ladies who acted *Nerissa* in 'The Merchant of Venice' aimed at this practice in the trial-scene. This was one of the great attractions of Mrs. Clive's *Nerissa*. As she stood in lawyer's attire in the trial-scene, her imitation of some popular leader at the bar was so successful that nobody was more delighted with it than the lawyers themselves. While on this subject, let us rectify an error into which Mr. Jeaffreson has fallen with respect to the great Mrs. Cibber; that Beauty married far worse than the Beast of the romance, Colley Cibber's son Theophilus. From this worthless scamp she was driven to seek the protection of Colonel Sloper, with whom she resided for many years. Mr. Jeaffreson says that "in private life she was remarkable for immorality and fascinating manners." Her private life was irreproachable save for the one offence into which her brutal husband drove her. The details of Theophilus's witnesses are no more to be believed than that rascal was on his oath. When Colonel Sloper made the unfortunate woman mistress of his house, there was not a quieter, a more graceful, or a happier home, in all England. Poor Mrs. Cibber taught her parrot to repeat scraps of plays, worked at her woman's work in spectacles, received some of the best male and female company in England, and went down to act, with Death at her side threatening her nightly. The "immorality" of her private life was nothing worse than that she presided in Colonel Sloper's home. The most virtuous of ladies, however, in those days had strange ways with them:—

"Amongst the many clients who were drawn to Murray, Sarah, Duchess of Marlborough, was neither the least powerful nor the least distinguished. Her Grace began by sending the rising advocate a general retainer, with a fee of a thousand guineas; of which sum he accepted only the two-hundredth part, explaining to the astonished Duchess that 'the professional fee, with a general retainer, could neither be less nor more than five guineas.' If Murray had accepted the whole sum he would not have been overpaid for his trouble; for Her Grace persecuted him with calls at most unseasonable hours. On one occasion, returning to his chambers after 'drinking champagne with the wife,' he found the Duchess's carriage and attendants on King's Bench Walk. A numerous crowd of footmen and link-bearers surrounded the coach; and when the barrister entered his chambers he encountered the mistress of that army of lackeys. 'Young man,' exclaimed the grand lady, eyeing the future Lord Mansfield with a look of warm displeasure, 'if you mean to rise in the world, you must not sup out.' On a subsequent night Sarah of Marlborough called without appointment at the chambers, and waited till past midnight in the hope that she would see the lawyer ere she went to bed. But Murray being at an unusually late supper-party, he did not return till Her Grace had departed in an overpowering rage. 'I could not make out, sir, who she was,' said Murray's clerk, describing Her Grace's appearance and

manner, 'for she would not tell me her name; but she swore so dreadfully that I am sure she must be a lady of quality.'

Among the mass of stories respecting evidence, we take the following:—

"Few stories relating to witnesses are more laughable than that which describes the mathematical process by which Mr. Baron Perrot arrived at the value of certain conflicting evidence. 'Gentlemen of the jury,' this judge is reported to have said, in summing up the evidence in a trial where the witnesses had sworn with noble tenacity of purpose, 'there are fifteen witnesses who swear that the watercourse used to flow in a ditch on the north side of the hedge. On the other hand, gentlemen, there are nine witnesses who swear that the watercourse used to flow on the south side of the hedge. Now, gentlemen, if you subtract nine from fifteen, there remain six witnesses wholly uncontradicted; and I recommend you to give your verdict for the party who called those six witnesses.'"

This process, however, was hardly so clever as that of the Irish prisoner accused of stealing a shirt from a hedge. "Here are three people who swear they saw you take it," said the magistrate. "Bad luck to them!" exclaimed Paudheen, "I can bring six honest people who'll swear they didn't see me take it!"

We feel that we need add nothing in further commendation or illustration of these volumes. They will afford pleasure and instruction to all who read them, and they will increase the reputation which Mr. Jeaffreson has already earned by his large industry and by his great ability.

Flower-de-Luce. By Henry Wadsworth Longfellow. (Routledge & Sons.)

'Flower-de-Luce' is the first poem in a collection which consists of only thirteen poems altogether. All of these are short; but, if we except 'The Golden Legend' and 'Evangeline,' it is probably by his shorter pieces that Mr. Longfellow will be best remembered. The poems before us, if they have not all the thoughtfulness and moral suggestiveness of the writer's early and, even now, most popular lays, are equal to them in melody, in picturesque fancy and in nicety of finish. In 'Flower-de-Luce' the emblem of pure and simple beauty is felicitously presented, the poet contriving to blend the tints of a delicate fancy with reality of description. The second poem, however, 'Palingenesis,' displays more depth of sentiment and not less beauty of manner. It expresses the melancholy which the Pilgrim advanced on the road of life often feels when he surveys the long retrospect, the horizon of which is still softly bright with memories, and contrasts it with the misty future. There is scarcely a stanza in the poem which does not contain some vivid picture or charming image, while the verse moves with a sad, sweet changefulness, like a fitful wind through autumnal woods:—

PALINGENESIS.

I lay upon the headland-height, and listened
To the incessant sobbing of the sea

In caverns under me,
And watched the waves, that tossed and fled and glistened,
Until the rolling meadows of amethyst
Melted away in mist.

Then suddenly, as one from sleep, I started;
For round about me all the sunny spaces
Seemed people with the shapes
Of those whom I had known in days departed,
Apparalled in the loveliness which gleams
On faces seen in dreams.

A moment only, and the light and glory
Faded away, and the disconsolate shore
Stood lonely as before;
And the wild roses of the promontory
Around me shuddered in the wind, and shed
Their petals of pale red.

There was an old belief that in the embers
Of all things their primordial form exists,
And cunning alchemists

Could re-create the rose with all its members
From its own ashes, but without the bloom,
Without the lost perfume.

Ah me! what wonder-working, occult sciences
Can from the ashes in our hearts once more
The rose of youth restore?
What craft of alchemy can bid defiance
To time and change, and for a single hour
Renew this phantom-flower?

"O, give me back!" I cried, "the vanished splendours
The breath of morn, and the exultant strife,
When the swift stream of life
Bounds o'er its rocky channel, and surrenders
The pond, with all its lilies, for the leap
Into the unknown deep!"

And the sea answered, with a lamentation,
Like some old prophet wailing, and it said,
"Alas! thy youth is dead!
It breathes no more, its heart has no pulsation;
In the dark places with the dead of old
It lies for ever cold!"

Then said I, "From its consecrated ceremonies
I will not drag this sacred dust again,
Only to give me pain;
But, still remembering all the lost endearments,
Go on my way, like one who looks before,
And turns to weep no more."

Into what land of harvests, what plantations
Bright with autumnal foliage and the glow
Of sunsets burning low;
Beneath what midnight skies, whose constellations
Light up the spacious avenues between
This world and the unseen!

Amid what friendly greetings and caresses,
What households, though not alien, yet not mine,
What bowers of rest divine,
To what temptations in lone wildernesses,
What famine of the heart, what pain and loss,
The bearing of what cross!

I do not know; nor will I vainly question
Those pages of the mystic book which hold
The story still untold,
But without rash conjecture or suggestion
Turn its last leaves in reverence and good heed,
Until "The End" I read.

Our extract affords new instances of Mr. Longfellow's well-known power to give characteristic glimpses of Nature in a happy phrase. Side by side with this faculty is his skill in catching the warm tone of an "interior" or the picturesque antiquity of cities. His studies in these respects have hitherto been chiefly European; but in the poem of 'Kambalu,' here given, the detail is no less graphic than of old, and the colour is thoroughly Eastern. We make room for the opening lines:—

Into the city of Kambalu,
By the road that leadeth to Ispahan,
At the head of his dusty caravan,
Laden with treasure from realms afar,
Baldacca and Kelat and Kandahar,
Rode the great captain Alâu.

The Khan from his palace-window gazed,
And saw in the thronging street beneath,
In the light of the setting sun that blazed
Through the clouds of dust by the caravan raised,
The flash of harness and jewelled sheath,
And the shining scimitars of the guard,
And the weary camels that bared their teeth,
As they passed and passed through the gates unbarred
Into the shade of the palace-yard.

Of the remaining poems one or two refer to the war; one pays tender homage to the memory of Hawthorne; five, treating Dante's great poem under the similitude of a cathedral, express, in words that, if we may say so, are Gothic in their florid and grotesque beauty, the impressions which a poet of to-day has caught from the genius of the old Florentine. When we have mentioned 'The Wind over the Chimney' (a debate in which the flame symbolizes Aspiration and the wind Despondency), and the stanzas in French, entitled 'Noël,' which were sent by the author to a friend one Christmas Eve, with various wines—the peculiarities of which are quaintly personified—we have specified nearly all the poems here collected. That we have done so, sufficiently marks our sense of the individuality which gives character to each piece. Mr. Longfellow has written many poems of greater pretension—many the healthy hopefulness of which we prefer to the pensive, if not desponding, vein which now and then appears in his present effusions. But in point of picturesque and completeness, the latter

may take rank with the best of his minor efforts. The slightest of them displays the art and fancy by which the poet can give value to what might else be trivial.

Sooner or Later. By Shirley Brooks. Illustrated by G. Du Maurier. (Bradbury, Evans & Co.)

The light and pleasant hand of Mr. Shirley Brooks has once again gone astray from weekly labour into monthly; from the humorous chronicles of the passing hour into the higher region of lasting Art. We are glad to see it; for Mr. Brooks is a master in some of the most difficult parts of a novelist's craft; to wit, in that of inventing and reporting conversation. At present, we cannot even guess at his secrets in 'Sooner or Later.' That the tale will be clever we presume; that the incidents will be exciting we infer; that the characters in the scene will be many, various, and contrasted, is more than likely; but that the conversational narrative will be easy, sprightly, truthful—that the club-talk will be real talk—we are perfectly sure. And do not think, dear Madam, that the art of inventing conversation is an easy one. A month of novel-reading, with a view to test the proficiency of writing-folk in this matter, will convince a sceptic that the art of making your paper people talk like beings of flesh and blood is the most rare and difficult of attainments.

Listen to this chatter of voices in the private dining-room of a London club:—

"Study your dinner, gentlemen," said Mr. Mangles. "Having had nothing to do with ordering it, I may be allowed to say that the document before each of you shows an effort of high art, for which labour we are much indebted to two persons, or shall I say parties, now present." "What's the objection to the word party?" said Milwarden. "I admit that it is used in the diplomacy of plebeians, but it is a good word, indicating an interest. Person is a feeble abstraction." "You speak as a mere lawyer, Milwarden," said Wigram in his melancholy voice. "Don't talk of mere lawyers as if they were blackbeetles, Mr. Wigram, but pass the cayenne." "Cayenne to that! Latrobe and Rydon, overlook the insult to yourselves, and let us ask the waiters not to tell Phelps." "Or rather," said Rydon, solemnly, "let him be told that it was only Milwarden who could so trample on an artist's feelings. I have always held that the law is a brutalizing profession." "One has heard the sentiment," said Milwarden, composedly, "chiefly, however, from vexatious defendants and prisoners whose alibis have broken down." "It's too early in the dinner for talk," said the gentle Walter Latrobe. "Especially chaff," said the instructive Dick Marsden. "Well, Willy Daines, how are your politics? Quite well? I saw a brougham at your door yesterday, and fancied it was Mr. Brand's. Are they going to put you in anywhere?" "I have not heard of it," said Mr. Daines, "but it would be a delicate attention on the part of the Cabinet." "You lost Mutford, I think?" said Marsden, in his curt unfeeling way, not that he meant to hurt feelings, but, having none of his own, he never recognized anybody else's. "You were nearly in, I believe, but came to grief in a hurry?" "I resigned when I saw that I could not go on without the use of means—which I did not intend to use," said Mr. Daines. But Marsden meant to say his say, and though he was not at all intimate with Daines, and though he was annoying that unlucky candidate very much, he went on. "Boosh, my dear fellow, we all know about that. A man who is in the Home Office told me exactly what was spent on both sides. The joke of it is that it is a matter of certainty that if you had not been frightened and thrown up the sponge at two, the other man would have given in at a quarter past. He makes no secret of it." "In that case you have a right to tell it," said Mr. Daines, enraged. "And I have a right to say that I don't believe a word of it." "But consider, my dear

Daines," said Milwarden, smiling, "how much more enviable is your position than that of your guilty opponent. He boasts a victory bought with gold, whilst you are proud of a defeat." "Boosh with bank-notes," said Launceston. "Hush," said Milwarden. "At the same time I regret the result because had Daines been returned, and petitioned against, as he would certainly have been, I think his regard for me would have been shown in brief." "You were certainly wrong to retire," you did," persisted Marsden the pachydermatous. "At least they all say so, and that they expect you would show more pluck." "Expected that I would stand more plucking," said Launceston. "I fear you are frivolous, Launceston," said M. Mangles. "Some wine! I say I fear you are frivolous. I wish you would read some books, and purify your mind from old jokes." "I like that returned Launceston, 'when it is the business of your life and that of your accomplices to prove that no books are worth reading.'" "The reply was prompt," said Mangles, serenely, "but I could probably make a few selections, of a rudimentary character, that might enable you to commence an education." "I'll come to you for it to-morrow, Samuel, my son," laughed Launceston; "and as shall come at lunch time, have out that famous Amontillado of yours."

This chatter may, or may not, have other merits—such as truth to character, importance in the story, and the like—but it is unquestionably the sort of talk you hear in Pall Mall and Garrick Street; and the forms and phrases are those actually used by gentlemen of the kind described in this present year of grace. This is a very great merit, in a book which offers a picture of our London society for the amusement of one generation and the instruction of many generations.

That Mr. Brooks can be effective in painting a quiet country scene a sample will prove:—

"Naybury is a small, quiet town in the very middle of England. The steep hill on which it is built is the hard idea which arises when the place is named. Otherwise, it is remarkable for little except the crookedness of the road up that hill, at the top of which are the ruins of a castle. This hold, after housing a forgotten series of strong handed and not always ill-conditioned aristocrats went to wreck under the blow of King Oliver Thenceforth, Naybury castle gave shelter to no person worse or better than an occasional tramp who might scale the old wall and sleep away his tipsy hours in what once was a great kitchen. The owl succeeded to the chaplain, and the sparrow-hawk to the lord. The castle, and a church, in which the patriotic wardens have for years done their best to avenge the Norman Conquest by persistent injury to the beautiful Norman architecture, are the features of Naybury. The weary pedestrian, and the wearier horse may take closer note of the long and crooked hill. It is called Naybury Street, and winds upwards, for about three-quarters of a mile as you approach from the east, and at last brings you to the foot of the off-lying eminence crowned by the ruins. It is a heart-breaking road to ascend, from the east, and there is a knee-breaking road to descend on the other side of the town. Visitors are usually conducted to the extreme top of the hill, because, as they are informed, they can thence see a long way, and this is a truth, but with the discovery that it is so, the advantages of the ascent appear, to commonplace minds, to end. You see a long way, and on a very clear day, just about the point where vision begins to fail, you may notice to the west something which, if not a cloud, is the beginning of some hills. But, generally speaking, your view is over a flat country, here and there divided by a narrow stream, here and there relieved by a church spire; and if you gaze for a long time on this scenery, as few persons are known to do, there grows upon you a conviction that you have seen this long, dull flat before. But you cannot tell where, and you tease your memory with questions until bed-time, when, if you have partaken of supper, and have not walked the after-mile, which those stupid ancestors of ours pre-

acribed, you will have the nightmare. Then, in struggling in vain across wide plains, with the avenger of blood behind you on an elephant, you will feel that you have miles and miles to run in your patent leather boots, and that you will miss the express train that is to take you to be married directly, and you know you have the key of the wine-cellar, and all your guests are waiting to go down to dinner on your birthday, and the Speaker of the House of Commons is calling wildly to you, in the very worst of language, to put in your false teeth and answer Mr. Bright, and your boots have suddenly become old slippers, which fall off every moment, and your wife is making signs that you must instantly go up in the balloon with her, or abandon her to Peter the Great for ever, and still you cannot make any progress, you wake up gurgling a very wrong kind of word, and instantly know that in previous nightmares you have seen the view from Naybury Castle."

Of course we shall not enter into the darker mysteries of this tale; in which a sudden death is recorded, a forger sent out of this kingdom, a lady saved from ruffians, a marriage criticized and put in jeopardy. Month by month we shall watch with eager eyes for the yellow cover that will bring in its tribute of mirth and mystery. As yet we have not seen the heroine, of whom we have heard so much; and until the Queen of Hearts comes on the scene, how could any one pretend to pry into her destinies?

'Sooner or Later' opens lightly and brightly, and we wish it every success.

Priest and Parish. By the Rev. Harry Jones. (Rivingtons.)

This little volume is almost entirely a reprint of papers which appeared in *Fraser's Magazine*. The author protests against Dr. Johnson's definition of priestcraft as "religious fraud," and pleads for the recognition of the term as professionally honourable. He claims respect for the true priest as qualified by his "liberal profession" and high aim to be the leader of human thought. He then proceeds to follow the priest in his study, his parish, his congregation, &c., commenting and advising, never without show of reason, and often with shrewd judgment. Mr. Jones inveighs against a slavish use of commentaries in the study, and advocates independent, prayerful thought, together with fearless, reverent investigation, recommending with characteristic common sense "a good lexicon as the chief human help in understanding the Scriptures." He takes occasion to reprimand the exclusiveness which would use God's house solely for public worship and the transaction of necessary business. "It should be," he says, "at stated hours, a retreat for secret prayer, meditation, or study of God's word. It should provide an escape from the vulgar irritation of the world, where the mind of the lonely and careworn might uncoil itself as in the kind sunshine of God's presence."—"In a city where poor Christians are crowded together like swine in a sty, and many a man has no chamber in which his heart may commune with itself and be still, no closet where he can shut the door and pray in secret to his Father which is in heaven, there should be a place of safety, a refuge into which he might turn at some moment of holy mood, and put up a prayer to God under all the soothing circumstances of uninterrupted encouragement which belong to His recognized house."

The author lays just emphasis on the importance of good elocution in the pulpit and the reading-desk. He censures the "religious sensitiveness which makes the priest shrink from the thought of professional assistance in the management of the voice when praying or reading the Scriptures," on the ground that the effectiveness of the divine message depends in

a great measure on the words in which it is conveyed and the manner in which it is delivered. The priest must speak not only intelligently but also intelligibly.

The author pleads for a sensuous ritual on the authority of nature; he could not take higher ground, yet there is danger in the sensuous feeling which not only conduces to piety, but sometimes takes its place. That full choral service "carries away," is but a doubtful argument in its favour. The author's own partiality for the intoning of the prayers scarcely justifies him in his rash statement that an impartial judge would pronounce it both scriptural and natural. Education alone can enable earnest prayer to find voice in that sweet, artificial intoning which forms part of the choral service. Mr. Jones refers the notorious dullness of preaching to the stilted artificiality which so often characterizes it, and the uselessness of sermons to that technical spiritualism in which they abound, and which seems a thing apart from "the common round, the daily task." He is a good preacher, says our author, who can make the cobblers in his congregation patch with more care, and the children spell and sum with more pains, not for fear of losing customers or getting the cane, but simply because it becomes a Christian cobbler and a Christian child to do his best. Another cause to which Mr. Jones attributes the unpopularity of sermons is their length, coming as they generally do at the end of three accumulated services. Why, he says, should those who wish to hear a sermon be never allowed to do so without an hour's previous devotion? Why should those who simply wish to pray be compelled to listen to a sermon when they have done their prayers? And here we take occasion to suggest the expediency of allowing an interval between the prayers and the preaching, a pause of a few minutes which would enable those who might not wish to hear a sermon to leave the church without disrespect to the preacher or annoyance to the congregation, and in which others who from motives of conscience or convenience, could not unite in the church prayers might take their places to listen to a sermon.

Of the priest in the school the author speaks with knowledge and judgment which seem to tell of experience. In fact, the tone of the whole book is that of an earnest, hard worker. The style is good and forcible; the illustrations and similes are not always seemly; they are too homely, sometimes approaching even to coarseness; but the honest, manly purpose which breathes throughout might cover a multitude of faults.

NEW NOVELS.

Sweet Seventeen: a Home and Colonial Story. By Arthur Locker. 3 vols. (Chapman & Hall.)

THE prediction with which we closed our notice of Mr. Arthur Locker's first novel has been fulfilled. After more than two years of thoughtful preparation, he has produced a story greatly superior to 'Sir Goodwin's Folly'; and our testimony to its goodness is given with all the more emphasis and satisfaction because in the present state of romantic art we feel that gratitude as well as praise is due to the young novelist who, instead of following an evil fashion, in the hope of winning speedy popularity, holds to the higher and purer traditions of his vocation, and declines to pander to corrupt tastes. Those writers of prose fiction who season their pages with mysterious crime and repulsive vice, should study the modes by which Mr. Locker captivates the imagination of his readers with scenes alike humorous and inno-

cent. Instead of making them endure his characters by rousing a morbid curiosity as to the sequel and result of a startling commencement, he leads them to enjoy his story by inspiring them with personal interest in its characters. From first to last the book is fresh with nature and unconstrained pleasantry. The actors are neither tame nor commonplace; the incidents bear no resemblance to the conventional arrangement of story-tellers; and yet the drama impresses us with a sense of its fidelity to human nature and society in such a manner that we seem to encounter old friends and familiar faces in every scene. Nor is this success the less noteworthy because much of it is due to the writer's prudence in confining his delineations to the kinds of life with which he is thoroughly acquainted. The world described is that of the middle and lower grades of our great middle class—the world of professional men and merchants, clerks, and petty tradesmen; and with such never-flagging humour does Mr. Locker set forth the ways and tempers of the various persons who are made to illustrate this comparatively humble life, that no idle reader will feel aggrieved by the one fault of a tale which runs to more than twice the length of an ordinary novel. Not that it is needlessly spun out, or extended beyond the requirements of art. Its bulk might, no doubt, be reduced here and there by the removal of needless words and redundant sentences; but for the most part it is closely written, and it nowhere contains an episode or a chapter that could have been withheld without injury to the elaborate and peculiar design of the narrative. Still, regard being had to the exigencies of busy people in these bustling times, the book is too long; and if it should fail to attain wide popularity, the failure will be due to its quantity rather than its quality.

Sweet Seventeen, the heroine of the drama, is a young lady of humble parentage and very humble connexions, who has been adopted by a Finsbury Square physician, Dr. Rippingille; and much of the reader's interest is found in overlooking her love affairs, and conjecturing which of her three lovers will eventually win her hand. All the circumstances of this young person's life whilst she remains under Dr. Rippingille's roof,—her humble relations in Tiverton Street, Pentonville; the character of her benefactor; the unselfish goodness of his daughter, Miss Rippingille; the doctor's dyspeptic footman, who studies homœopathy in the hall whilst his master practises allopathy in the consulting-room; the rival suitors for the young lady's hand,—are excellently portrayed. The Shankses of Tiverton Street, Pentonville, are inexpressibly ludicrous. Capital, also, are the experiences of Vincent Carnaby, the Oxford first-classman, who enters on a commercial career after quitting the university, and learns, in the rude school of a counting-house, that book-keepers and clerks have an intellectual standard of their own, by which they measure and judge their social superiors. In the whole range of prose fiction, nothing can be found more broadly comic and essentially truthful than Mr. Locker's sketches of Messrs. Gatty and Gubbins, and their intercourse with Vincent, in the counting-house of that opulent firm, "Tidd, Washburne & Naylor." An equal degree of special knowledge is exhibited in the Australian scenes, whence Richard Garland comes to London in search of "Sweet Seventeen," and whither she is carried at the close of the last volume, when the plots and counter-plots have all been thoroughly worked out, and old Capt. Parkinson has made full atonement for the lawless deed which, after a lapse of many years, becomes the motive power of the puppets who play their well-con-

trasted parts in Mr. Locker's ingenious and complicated story.

Archie Lovell: a Novel. By Mrs. Edwards. 3 vols. (Tinsley Brothers.)

A brisk, lively, and thoroughly readable tale, belonging to a low school of romantic art, 'Archie Lovell' will hit the taste of a particular sort of not fastidious readers, and would have had a chance of a somewhat wider success had the author corrected her proofs with a jealous eye for grammatical slips and blunders of carelessness; or, better still, had submitted her work to a competent and careful hand for requisite emendation. Though revision would have been powerless to remove the false theory and Bohemian sentiment that are worked into the warp and woof of its texture, any intelligent and conscientious reader for the press would have greatly reduced the number of solecisms and inconsistencies that disfigure the opening chapters of the work. At the outset the reader is taken to the sands of a French seaside place, where the "typical people of Morteville are assembled beneath the lighthouse at the extreme end of the pier; *inter alia* (!) Mrs. Dionysius O'Rourke, Mr. Montacute and his daughters, the literary element, Captain Waters, and old Mrs. Maloney." On the next leaf the author tells us that Mrs. O'Rourke "had been married twice," and proceeds to describe the lady's *three* husbands, of whom "the third and present one seemed to be viewed, both by his wife and by her friends in the light of a butler." Of the lady herself it is observed, in language that must be commended for expressiveness rather than purity, "*Barring the adventitious circumstances of seventeen stone of solid flesh, the ineradicable Tipperary, and an undue tendency to gorgeous yellow satin and birds of strange plumage in the matter of dress, she was really an entertaining, and, on the theory of Joe Gargery, a fine figure of a woman.*" Of Captain Waters, "it was believed, also, that *some one* thought they had once seen him in Italy robbing a church with the Garibaldians," and his malignant speeches are described as having "that quintessence of flavour which only education and refinement *knows* how to prepare for the palate of civilized man." These are but a few of the passages which Mrs. Edwards might improve in the first chapter, before printing a second edition. And throughout the book similar mistakes occur. Having in her description of Robert Dennison remarked, "Now for the features which really constitute a human face (the rest are but adjuncts), the lips and eyes," she throws aside this questionable view in the very next paragraph, which enumerates the personal attractions of Gerald Durant, of whom it is recorded, "His nose and mouth were of the cast Vandyke has taught us to identify with our weakest race of kings; and his chin—at once the characteristic, the index of every face—was characterless." It would be unfair to the author to think she meant to say what her words imply,—that Gerald Durant's chin was the index of every one's face. So, also, when Mrs. Edwards speaks of Robert Dennison's expression as being "more adamant than ever in the brilliant moonlight," we may charitably assume that "adamantine" is the word which she would use upon reflection.

The writer's object appears to be the vindication of Bohemianism as a state of society favourable to generosity and truthfulness of character; and to enforce this original and rather startling view respecting a kind of life which we are inclined to regard as singularly productive of meanness and falsity, she successfully exerts herself to make the reader take a

strong personal interest in the impulsive, wayward, truth-loving Archie Lovell, who has breathed the atmosphere of Bohemia from her infancy till she becomes a cause of scandal to the leaders of the English set at the French watering-place pointed at under the name of Morteville. A beautiful, high-spirited, outspoken girl, the granddaughter of an English peer, and daughter of an impoverished English clergyman, Miss Archie has been reared in continental studios, and has gathered from them other accomplishments besides knowledge of Art and proficiency with her pencil. She delights to shock the taste of Mrs. O'Rourke and party by flagrant and ludicrous improprieties. She smokes cigarettes in public, walks out in her father's hat and coat, and from her seat on the garden-wall of the house in which her father lodges she exchanges pleasantries with gentlemen who are total strangers to her. Wherever she encounters respectable people, or Philistines, as such persons are termed in her vocabulary, she forthwith proceeds to "take a rise" out of them and make them stare at her astounding violations of social decorum. In a railway carriage she frightens two formal English ladies almost into fits by singing songs at the top of her voice. Here is Mrs. Edwards's account of her darling's behaviour on the London and Folkestone line: "And then, though she was in reality all but crying, Miss Lovell began to sing aloud: French songs, Italian songs, anything that came into her head; and she ate more fruit than was good for her, throwing the stones away with reckless rapidity through the window; then she put her feet up on the opposite seat, leaned back her head and looked at her fellow travellers with something of the expression she had been wont to assume towards Mesdames O'Rourke and Maloney at home. The instincts of Bohemianism were deep-rooted, almost like religious convictions, in Archie's heart. Ever since she could think at all she had had a vague sense that respectability, Philistines, 'grocers,' and her father, were on opposite sides, consequently, that it was for her to do battle with respectability." To heighten the effect of the personal graces and moral excellencies of this terrible little damsel, Mrs. Edwards attributes the most odious and repulsive natures to the outwardly decorous O'Rourkes and Company with whom Archie wages war, under the very erroneous impression that they are representatives of the respectability which she hates. In this part of her picture the author indulges in caricature even more strongly than in her delineations of Archie's merits. The English society of Boulogne doubtless contains a large percentage of black sheep, but it is not so sordid and coarse and inhumanly malignant as Mrs. Edwards imagines; and in so far as it corresponds with her descriptions, it offends through Bohemian temper, rather than by qualities consequent upon its strivings after respectability. But though we differ from the writer's estimate of the kind of society which sowed the seeds of selfishness, ingratitude, and hypocrisy in Becky Sharp's nature, we can testify to the vigour and strong interest of the concluding portions of the narrative which tell how Archie Lovell was reluctantly carried over from the side of life for which she was too good, and was safely landed in the ranks of the Philistines. Gerald Durant's arrest on a charge of murder, and the subsequent investigation in a police-court, cannot be extolled on the score of originality; but in all that immediately concerns them, Mrs. Edwards proves herself to be a novelist of more than average power. Archie's share in the legal inquiry is told spiritedly, and in such a manner that the reader parts with the young lady on the best

of terms, and experiences lively satisfaction in seeing her a respectable woman married to a prosperous and highly estimable country gentleman.

Hena; or, Life in Tahiti. By Mrs. Alfred Hort. 2 vols. (Saunders, Otley & Co.)

HAD Mrs. Alfred Hort honestly endeavoured to describe the social aspects of Tahiti, she would have found readers whose curiosity about life in that loveliest of Pacific islands would have disposed them to deal tenderly with her artistic and literary shortcomings, and even to judge her still graver offences with leniency. But as 'Hena; or, Life in Tahiti,' regarded from its most favourable point of view, is merely one of those foolish novels that are annually published, in obedience to the dictates of personal vanity rather than in compliance with any genuine public demand for worthless literature, it is more than probable that the author will hear some hard truths about the least creditable features of her work.

The first chapter of the story introduces the reader to the natives of Papeete, the principal district of Tahiti, and also to the distinctive graces of the author, who describes the Tahitian "pareu" as being a piece of printed cotton, "which is wound round the waist, and replaces the necessity of pantaloons," and who remarks of the wearers of this simple costume, "When excited, or inebriated, they have a decidedly savage appearance. Their heads, shoulders and bodies decked fantastically with green vines, reminding one forcibly of groups of wild bacchanalians as represented in the paintings of the 'Roman Period.'" In recognition of their finer qualities, Mrs. Hort says:—"Towards each other the natives are generous and lavish to a fault; 'share and share alike' appears to be their motto and maxim, which they act up to from puffs at a straw cigarette, alternating between a group of men and women, down to the pig in preparation for their meal." That we may feel ourselves quite at home with the swarthy children of Papeete, we are informed, in sufficiently clear, though scarcely faultless, language, "They have frequent recourse to ablutions, the bath being a luxury common to all, its delights unknown out of a tropical clime. Bathing takes place in the open river; whilst preparing for the plunge and dressing occur under some friendly tree, whose wide-spreading branches protect the bather from the too-powerful rays of the sun, as well as the gaze of stray passers." It is whilst they are thus taking a river-bath that Hena, the lovely child of a Tahitian girl by a French officer, and her especial friend Taai, a native of pure blood, are surprised by Mr. Seymour, an English visitor to the island, and his friend De Lorme, a pleasure-loving Frenchman, who has recently come out to the settlement to fill a government office, and occupy "a cottage in a pretty little suburb, called St. Emilie, comprised of one long rural lane." The sight of Hena in the clear stream so completely upsets young De Lorme's prudent resolve to hold himself aloof from native women, that, maddened by what he saw through "that part of Hena's dress which must have been torn in the exertion of bathing, disclosing some portion of her form," he determines to make her charms his property at any cost short of marriage. But before he has effected his purpose, the discovery that Hena is his half-sister causes a sudden relinquishment of an intention which would have resulted in failure or incest. "To think, Seymour," exclaims De Lorme to his English friend, "that she is my own little sister after all! Has my father not acted infamously in thus abandoning such a child? I could almost curse

him for the barbarous act."—in response to which filial sentiment from a disappointed seducer, and in concession to circumstances which we are thankful to say there is no occasion for us to recapitulate, Mr. Seymour—the type of English culture, manliness, morality, and material prosperity—undertakes to provide for the wretched little Hena by making her his wife. All this is absurd and unpleasant enough; but that which follows is even more ridiculous and nauseous. Unable to achieve a complete victory over his abortive passion for Hena, De Lorme determines to search for a mistress whose shape and colour and grace may remind him of his sister's charms. If he cannot clutch the desire of his heart, he will at least have a fruit of the same fragrance and flavour as the forbidden. After vainly hunting for a girl with a stronger resemblance to Hena, he at length takes as a temporary wife a Tahitian girl whose eyes remind him of his sister's. Not only does he thus make his arrangements for private enjoyment, but he actually tells his brother-in-law what considerations guided him in the selection of a new mistress. "You," he exclaims to Arthur Seymour, "have obtained a wife, without the slightest manoeuvring, for whom I would have risked my reputation, my future, to call mine. I have hunted everywhere for such another Hena in vain; the young girl now under my protection I took because I fancied her large black eyes resembled hers." In what manner does Mr. Seymour respond to his friend's, his brother-in-law's, communication? Does he knock him down out of hand, or kick him, or throw him out of a window, or horse-whip him within an inch of his life, or with a self-command that would be more prudent than commendable under such circumstances turn away from him in disdainful silence, mentally renouncing him for ever? No:—the interview between the brothers-in-law is continued in the friendliest spirit; and before its termination Seymour renews his offers of assistance to De Lorme. On getting through this interview, which occurs at the beginning of the second volume, our countryman's dishonour affected us so acutely that we lost no time in dropping his acquaintance and the book that had brought us together. Where can Mrs. Alfred Hort have gained her notions about English character? How came she to imagine that such a book as hers could prove acceptable to any class of readers, even to the not hypercritical or over-squeamish devourers of season novels?

Goethe's Letters to Leipzig Friends. Edited by Prof. Otto Jahn. Translated by Robert Slater, Jun. With Three Lithographed Portraits. (Longmans & Co.)

WE are slow to perceive the reasons which have induced Mr. Slater to undertake the present translation, and still more slow to appreciate the way in which the translation has been made. Seventeen years ago, when Germany was celebrating the hundredth anniversary of Goethe's birth, Prof. Jahn's collection of the Letters to Leipzig friends, preceded by a sketch of Goethe in Leipzig, had much interest for Leipzig. The book has since been used by Goethe's many biographers. Some of the letters must have seemed unimportant—even to the first Leipzig readers. We fear that this will be the present verdict of English readers on the majority. Then Mr. Slater is not always either easy or accurate. In the prose parts of the book he is perhaps more accurate than easy, but his attempts at verse are lamentable in both respects. Surely it was not necessary for him to compete with all the poets, great and small,

who have translated Goethe's Songs and Ballads; for, even if the Letters were not to be found complete except in this volume, the "Leipzig Songs" are included in every collection of Goethe's Poems. Mr. Slater not only ruins the graceful turns of the original, but he sometimes conveys a meaning exactly opposite to the poet's meaning. Some of Goethe's songs are warm enough without being made "prurient," a word which Mr. Slater brings into one poem quite unnecessarily, and as unnecessarily proceeds to justify. For this he asks our kind indulgence. We much regret that we must withhold it. Of course we do not mean that this volume is devoid of interest, or that many of the letters are not valuable. Dramatically the collection is good, as it carries us from the early period of Goethe's "wild youth" to the staid sobriety of his ripened manhood. And there are passing allusions to events in the poet's life of a biographical significance; views and opinions thrown off easily from a great mind, and affording sudden glimpses into its recesses. But these are few in comparison with the even, business-like tenor of most of the later letters, while the reckless frolic of the early ones soon shows a sameness. Nothing is more remarkable than the change from the fullness of the early letters, the exuberance of words and spirits, to the curt sentences composing what Germans call Goethe's Privy Council style. Instead of growing garrulous in age, like Nestor, and other old men without Nestor's wisdom, Goethe seems to have exhausted that vein in his youth, and to use fewer words as his words become more precious. Lord Houghton was telling the Cambridge students the other day that Goethe refused to explain something in 'Faust' to a young man, on the ground that the young man would understand what was written in youth more easily than the old man could recall such distant memories. One of these letters has a passage of similar import:—

"The questions as to 'Wilhelm Meister' I should prefer replying to orally. In the case of works like this, the author may have proposed to his own mind what he pleased, but there will still always remain a necessity for a sort of confession, of which he can scarcely render any account even to himself. The style will always present certain defects, and the author may thank God that he was able to infuse so much of sentiment into his work that feeling and thinking men were found who laboured again to evolve his ideas. The critique in the *Journal of General Literature* is certainly very unsatisfactory to any one who has himself thought over the work, but still it is not without value, when regarded as a solitary expression of well-considered opinion. More might certainly have been expected of a critique, particularly of one so late in appearing."

—There is nothing about *well-considered* opinion in the original, Mr. Slater.

How unlucky it was Goethe could not have his youth back again, as the poet asks in the prologue to 'Faust,' in order to answer these questions. He is by no means chary of his opinions when he writes to his early friends and early loves, to Riese, and Schlenkopf, and Oeser, and the daughters of the two latter. By the way, why does Mr. Slater turn Käthchen into Kitty? We know Goethe's loves and heroines by their German names, not by English equivalents of their abbreviations. What should we say to any one who made Gretchen into Maggy? It is to Frederika Oeser that Goethe pours out this string of sentiments at which he would have shuddered some years later, though the spirit of them clung to him through life:—

"Thank God we have again peace! Of what use is all this cry of war? Yes, if it was a poetical style, with a fund of wealth, of allegory, sentiment,

and so forth. Then, indeed, there would always be fish to land. But nothing besides an eternal thunder of battle, the fire blazing from the warrior's eyes, the gilt hoof splashed with blood, the morion and plume, the spear, a few dozen monstrous hyperboles, and a perpetual ah! ha! when the line cannot be completed, and when it draws its slow length out—all this together is unbearable, Gleim, and Weise, and Gessner in one short poem, and enough to satiety of all else. It is a thing that fails altogether to interest; a wish-wash that only serves to pass the time. Forced pictures,—because the versifier has not seen nature; eternal repetitions,—for a battle is always the battle; and the situations are old used-up ones. And what does the victory of the Germans concern me that I should listen to the shouts of joy? Why, I can shout myself. Make me feel something which I have never felt—make me think of something which I have never thought of—and I will give you praise. But noise and shouts instead of pathos,—that does not suit me,—tinsel, and nothing more. Then there are in R. pictures of rural innocence which might be apt if applied to Arcadia; under the oaks of Germany no nymphs were born as under the myrtles in Tempe. And what in a picture is most insufferable is its want of truth. A fable contains its modicum of truth, and must contain it, or else it is no fable. And when the subject is so hashed up one grows afraid. Our friends think, then, the outlandish costume must produce effect! If the piece is bad, of what use are the fine clothes of the actor? When Ossian sings in the spirit of his times, I can willingly employ a glossary explanatory of his costumes, and can willingly give myself much trouble to comprehend it; but when modern poets strain their wits to present their poems in an old dress, it does not suit my humour to strain my wits to translate their lucubrations into modern language."

Most of Goethe's later letters in this volume are addressed to Friedrich Rochlitz, and are written in the character of manager of the Weimar Theatre. As such, Goethe says on one occasion that he has struck out of a play of Rochlitz's a few jests on philosophers, for fear of their making the common people jeer at something which they do not understand, but which they ought to reverence. He also gives some details about the performance of 'Faust,' which are curious even now:—

"It is praiseworthy on the part of the Germans that they did not require the work to be distorted, so as to be able to tolerate it upon the stage. The French were obliged to metamorphose it, and to lavish much strong spice and pungent ingredients on the sauce. According to the information which we have had given us, we can understand how it was that the jumble should have produced so much effect there."

On the next page we read that the performance of it in Germany was not satisfactory. The students at Leipzig applauded it so violently that the Dresden authorities forbade its being repeated, and Goethe himself was opposed to its being played, saying that the Devil ought not to be painted on the wall. Mr. Slater exaggerates the applause of the Leipzig students by telling us that it was found necessary to prohibit the play from being repeated in Dresden. Yet if, owing to the wording of German writers, it was not evident that Dresden referred to the authorities, not to the place of performance, the context should have kept the translator from such a blunder. Mr. Slater ought to have paid more attention to the context throughout. Many allusions which have a meaning to students of Goethe, and which would be clear to Germans, need an explanation for the English public, and, instead of some of them being omitted, Prof. Jahn's notes should have been supplemented. To parody words quoted already, more might have been expected of a translation, particularly of one so late in appearing.

International Policy. Essays on the Foreign Relations of England. (Chapman & Hall.)

THIS volume contains six essays by Fellows of Colleges at Oxford, and one by Mr. Hutton, a barrister of Lincoln's Inn, all professedly based on the principles of Positivism. These principles, as stated by the essayists themselves, are the following: First, the international relations of mankind are a fit subject for a systematic policy. Secondly, such systematic policy is to be based on the acceptance of duties, not on the assertion of rights, and ought to have a moral, not a political or purely national foundation. Thirdly, the arguments respecting such policy are in all cases to be drawn from considerations of a purely human character, as alone susceptible of legitimate and profitable discussion. Starting with these propositions, every essayist is allowed freedom in other respects in dealing with his subject, and we are told not to look for perfect agreement among the essays, but to think their writers attain their object if they "arrive in the main at convergent conclusions."

The aim of the first writer is to show that "the leadership of the human race is vested in the West." By this the reader is to understand not in America, "which cannot be," we are told, "in any sense a guide or a model for the Western statesman or thinker," but Western Europe, that is, France Italy, Spain, England and Germany, which are to form "a hegemony for the service and advancement of humanity." In order to arrive at this "hegemony" an eliminating process is gone through as regards other countries and regions. Africa, Asia and America are struck off at once as being too big and too foolish to manage themselves even. Africa and Asia, we are told, stand in a "passive and receptive attitude," an assertion singularly belied by certain persons of African descent, such as the contumacious Theodore of Abyssinia, and the negroes in Jamaica, and by the whole body of Turks, Wahabists, Afghans and other Asiatics, whose attitude, though it may be described as "receptive," is certainly anything but passive. America, as "the offspring of a period of negation and dissolution," "the offspring, too, of a nation which (alas, poor England!) is not by its antecedents, or by its present condition, qualified to take the lead in human affairs," must, "like the vast Polytheistic empires of the East, renounce any claim to the direction of others." As to Russia, her "exclusion is a cardinal point" with this politician, who thinks the Sultan has a better right to sit in the conclave of the Hegemony than the Czar. The Christianity of Russia is of no value; it was never "brought within the discipline of Catholicism," and a nation "only just clear of serfage cannot direct those that have long been free." The religion of Turkey, on the other hand, would make this philosophic writer wish for her admission among the directing nations of what once was Christendom till essayists found out a better name for it. But for reasons which he does not care to mention, the essayist regretfully avows that Turkey cannot be admitted into the Hegemony. Still he contends that her freedom of initiative should be scrupulously respected, that is, we suppose, that she should as long as possible continue to oppress Christians, and make an Inferno of the fairest regions of the earth. Having chosen the Great Council of the human race, the essayist proceeds to assign the presidency to France, France that has inherited so much from Papal Rome, France that took the first place in the Crusades,—a fact which we are surprised to find reckoned here to her advantage, since it was against that religion she fought, which we have

just been told almost entitles Turkey to a seat in the Great Council.

Of the remaining four representative nations, Spain seems to have enlisted the warmest sympathies of this writer. Some years ago, he "urged on the English Government and nation the restitution to Spain of Gibraltar." Strange to say, the Government and nation have remained deaf to this sage advice; but the philosopher continues to urge his country "to restore to its due honour and importance the Latin, Southern, and Catholic Spain." Regarding England, the views of this impartial writer may be summed up in the following extract:—

"We who urge on England a more moderate and more just estimation of herself, who urge her renunciation of any claim to be the first nation of the world, her acceptance of the secondary position accorded her by the whole of past history, who urge on her, lastly, to throw away the language of self-assertion, and concentrate her attention on her international duties,—we cannot be expected to hold a different language in relation to her great colony. We cannot recognize as valid in America claims which we reject on behalf of her parent."

With this pleasant advice we close the first essay, more dazzled than directed by its light, which resembles that of a Congreve rocket rather than a guiding star.

The main object of the second essay, 'England and France,' appears to be the glorification of France and the French Revolution, and of the ideas disseminated by that event.

The third essay, 'England and the Sea,' impeaches this country for erecting "upon a basis of violence and injustice a maritime supremacy incompatible with the orderly and peaceable development of European civilization." Of course a brief abstract of our naval history is inevitable with such a design. A good deal is said about Cromwell, who, "though his morality was tainted by his theology," was capable of large views and doubled the national fleet with a deliberate scheme "of building up a maritime and colonial empire." This idea was grasped by the people after the victory of La Hogue, and carried out by the elder Pitt. "The younger Pitt lived to be a curse to his country and to Europe." In the war which he directed against France our aim was only to get a share of the plunder for ourselves. In short, the case is made out against England, and all that she can now do is to make restitution, and the first thing is, of course, to restore Gibraltar, which is the *bête noir* of these Oxford philosophers. There is the more reason for giving it up because Spain, which is rapidly rising to be a great power, will certainly take it by force next time it suits her to claim it! Apropos of this, the essayist pours out the vials of his wrath upon Mr. Ford and his Handbook, Mr. Roebuck, and others who have the misfortune to differ from him.

'England and India' is the title of the fourth essay, as 'England and China' is of the fifth, and 'England and Japan' of the sixth. We read, "All who would rightly understand the state of this Asiatic question must regard our position in India, China and Japan respectively as forming points in an orderly series." "The India of yesterday is the China of to-day, and the China of to-day the Japan of to-morrow." Not so, we reply, unless the writer is prepared to prove that the man who has surfeited himself with eating a whole pudding to-day, will eat another to-morrow, and another the third day.

The fifth essay gives a description of China as far removed from the truth as the ridiculous figures we see on China jars are unlike nature. Mr. Bridges, following the spirit of this series of essays, commences by endeavouring to show

that England has displayed "gross ignorance," the spirit of "a buccaneer or pirate," "brutal greed and violence," "shuffling evasion," and "violence, greed and fraud," throughout her dealings with China. The Chinese Government, on the other hand, has acted in a way that redounds to its eternal honour. The only Europeans whose dealings with the Chinese are at all praised by the essayist are the Jesuits, of whom he thus writes: "The wise and broad views of the Jesuits, who had permitted the worship of Heaven, the worship of Confucius, and the worship of the dead, as pardonable, nay, as salutary, appendages to Christian doctrine, were counteracted by the narrow intolerance of the Dominicans who succeeded them, men who, like our own Protestant missionaries, would admit of no such compromise." So, according to the new school of philosophy, lying and deceit, if objectionable elsewhere, are laudable in the matter of religion! Further on we come to the panegyric on the Chinese system, which is said to be "a simple and ancient civilization, with thoughts and hopes narrower, certainly, than ours, yet still with a moral standard, with a theory of life and duty which we should do well not to despise." The panegyrist warms as he proceeds, and breaks out into rapture in describing the Fetishism of Confucius, from which springs, he tells us, "a rich growth of noble precepts, of glorious memories, of heroic lives, of sacred traditions." "Pernicious nonsense!" is the proper reply to this rhapsody; and indeed the only possible excuse that Mr. Bridges can have for indulging in it is that he has evidently never been in China, and has no practical acquaintance with the people or the country. Let us take the test which he himself proposes for religion, "its power to give calm or comfort in the time of death." If running away in battle, and committing suicide rather than face an enemy, or any great danger, be the sign of the calm or comfort which Confucianism gives, then has the essayist strong evidence on his side. But let us adopt a more general test, and judge of Fetishism by its fruits. Is there any country in which such oceans of blood are shed, such fiendish cruelty practised, such all-pervading corruption and swinish depravity exhibited as in China! Among other nations the executioner may have slain his thousands, but among the Chinese the victims have been millions; for if one mandarin, Yeh, boasted of having decapitated 70,000 human beings, what must have been the slaughter during the last quarter of a century throughout the empire! A host of authorities might easily be cited to show how debased the Chinese have become under the teachings of that Confucianism which Mr. Bridges so extols, and which has so well been described by better judges as "puerile and unattractive," and containing "un grand nombre de banalités." But it is sufficient to sum up, in the expressive words of the author of 'The Chinese Empire in 1849,'—"The national mind has become 'infinitely vicious.'" Mr. Bridges ought to know that the masses in China are the slaves of ridiculous superstitions, while "all cultivated Chinese are superstitiously and practically atheists," though they cannot stifle "a belief in a supreme, intelligent, rewarding and punishing Power, with more or less of will and personality." Is Atheism, then, the faith, the tranquil, firm conviction that Positivism supplies? Is it the genius of Atheism that the essayist adores in the person of China's great sage, who is declared by him to be "the most perfect type of morality, that is to say, of perfect manhood, that has ever yet commanded the general veneration of mankind?" If so, it is useless to argue, and better

to take leave at once of this great sage, or "budge doctor," as we should term him, and his Oxford disciple.

The sixth essay pursues the same line of argument as the two preceding, but in a more moderate tone. The seventh essay, 'England and the Uncivilized Communities,' which seems to us the best in the book, lays down principles for our colonial policy to which there is little to object.

OUR LIBRARY TABLE.

A Paper upon the Remains of Man and Extinct Mammalian Fauna, found at Eynesbury, near St. Neots, Huntingdonshire. By George Dawson Rowley. (Tribner & Co.)

THE ossiferous gravel on the banks of the river Ouse, wherever it can be excavated, is found to contain pre-historic relics of various kinds, and therefore demands the attention of landlords and other local residents, who may be able to rescue instructive remains from neglect or destruction. Mr. Rowley obtained a cinerary urn, a couple of querns, an article of bone, and the antler of a reindeer, from the above neighbourhood, and makes the most of them for his paper. As this, however, contains nothing new or notable, it must pass from our hands with a hope that Mr. Rowley will find more antiquities and learn more geology. It is rather singular to find an Englishman quoting from a Frenchman (Louis Figuier) a fact which the said Frenchman got from an Englishman. Still, whatever Mr. Rowley has to learn, we learn some few facts from him; and every man who adds to the common stock of facts so far deserves attention.

The Book of Dates; or, Treasury of Universal Reference: comprising the Principal Events in all Ages, from the Earliest Records to the Present Time. With Index of Events. New and Revised Edition. (Griffin & Co.)

OF the two parts into which this compilation of dates is divided, the first notices, "in synchronistic order," the principal events of all the countries and races of the world, and the second mentions the same occurrences in alphabetical order. This method has its special advantages; and if the ordinary student required in a Book of Dates a synopsis of universal history, the plan of this volume would as nearly as possible meet his wish; but since the majority of readers who use dictionaries of events refer to them for the facts bearing on a particular subject, much oftener than for a general survey of the events of an epoch, we question if the editor has adopted the best plan. The Index enables the reader without difficulty to ascertain the particular date of almost any fact; but on referring from the index to any table in the first part for further information about the point of interest, it is sometimes no easy task to pick out the required lines of notice from the mass of other notices in which they are set. Haydn's method of grouping his dates under the subjects to which they refer is a far more convenient system of classification for literary workers and students. The scheme, however, of this work has been carried out with conscientious care, and the book may be confidently commended to those who think that the possession of such a volume would lighten the labour of historical study.

Salus Mundi Summa Lex; and other Essays. By R. W. Ferguson. (Macintosh.)

THERE are five essays in this little volume, viz., on the subsidiary aims of the Mosaic law, the connexion between science and revelation, the judicial faculty as applied to theology, Romanism, and the relation existing between the Sabbath and the Lord's Day, which were written to be read at a clerical meeting. The first is evidently thought to be the most important and valuable by its author. Some ideas in it are just; as a whole it is most unsatisfactory, containing principles inconsistent not only with the attributes of God, but with any worthy adaptation on His part of means to an end. Bishop Shuttleworth has illustrated a few of the particulars in it in a masterly style, and the writer might have learnt something from him. The other essays are brief and perfunctory, with the exception of that on Romanism, portions of which are good.

The general impression which a perusal of the whole leaves upon the reader's mind is, that difficult subjects are handled very inadequately, that the author has a narrow theological creed which underlies and regulates his apologetic discussions, and that he has an antiquated view of a goodly portion of the Old Testament. His judicial faculty cannot be praised. Thus he allows that many events in the Mosaic creation are in apparent variance with the present theory of the solar system; but all he has to say is, "perchance clearer knowledge may reconcile the discrepancy." In relation to the subject of the last essay, the writer should have perused the chapter which Milton has upon it in his treatise on "Christian Doctrine." His bias is seen throughout in the manner he speaks of recent criticism, against which he shuts his eyes like many others, contented to take refuge in modes of thought and time-honoured traditions which reflecting men have shown to be worthless.

The Thames illustrated by Photographs. First Series. Richmond to Cliefden. (Marion & Son.)

THIS is a very pleasantly illustrated gift-book, comprising, with lightly-treated notes of the literary sort on the localities in question, some admirable photographs from well-chosen points of view on the banks of the Thames. Among these are Richmond Bridge, and the world-famous view from Richmond Hill, a very striking representation from Teddington Weir. Thames Ditton renders a pretty subject. The now destroyed bridge at Hampton Court is well recorded here. Magna Charta Island, Walton Bridge, Maidenhead Bridge, and Windsor Castle, with two capital views of Cliefden, of which one, where the mansion looks over the umbrage, is very good, are among the materials of this elegant trifle.

Washed Ashore; or, the Tower of Stormont Bay. By W. H. G. Kingston. Illustrated. (Jackson, Walford & Hodder.)

ALMOST every boy knows the manner of Mr. Kingston, so we need write no more on the literary qualities of this book than that it is equal to its forerunners by the same author. The illustrations are much below the average of modern boys' books.

In this age of examinations the meritorious *Analysis of English History*, by W. C. Pearce and S. Hayne, LL.B. (Murby), may be found of great service. It is not so well adapted for a reading-book as for a companion to a larger work, the matter being very condensed, and arranged in disconnected paragraphs, with an appropriate heading, in striking type, to each. Under these several headings are comprised all the main facts of each reign, expressed in a concise but distinct manner. A good deal of accurate constitutional information is given from Hallam, the genealogies of royal families are clearly exhibited, and tabular statements are appended of the battles of the Wars of the Roses and the Great Rebellion, with the commanders on each side and the issue of each engagement. The social condition, dress and literature of each period are well described.

BOOKS FOR CHILDREN.

Emma and her Nurse; or, the History of Lady Harewood. And The Mother's Grave. By Mrs. Cameron. Illustrated. (Houlston & Wright.)

THE prospects of the children's season are gloomy. The excessive production of literary toys for the play-room and nursery, that has covered our table with piles of ornate volumes in the Novembers of past years, seems about to be followed by a period of comparative dullness and stagnation. What the next few weeks may have in store for us, we cannot confidently predict; but at present the dealers in "juvenile literature" have failed to give those signs of enterprise which we expect from them on the advent of Christmas. Instead of new stories, some of them send us reprints of old tales, for which little in the way of commendation can be said, save that they were popular and sold well in former years. The editor of this volume assures us that upwards of seventy thousand copies of these stories by Mrs. Cameron have at some time or other found purchasers. If this be true, surely the world has had enough of them.

The Story of Little Henry and his Bearer Boosy: a Tale of Dinapore. By Mrs. Sherwood. Illustrated. (Houlston & Wright.)

HERE we have the reprint on toned paper of a story the popularity of which may be estimated "from the fact that upwards of two hundred and fifty thousand copies have been sold of the copyright or author's edition, besides large numbers of pirated and imperfect copies." A work so well and widely known needs no further introduction to buyers of literature for children.

Pleasant Rhymes for Little Readers; or, Jottings for Juveniles, affectionately inscribed to the Children of England. By Josephine. (Houlston & Wright.)

THE author of 'Our Children's Pets' has produced a welcome collection of nursery rhymes, in which she endeavours to inspire children with compassionate thoughtfulness for miserable and helpless creatures. Here and there Josephine shows a tendency to write above the intelligence of average little children; but her verses are so superior to most compositions of their unambitious kind, that we have much pleasure in telling papas and mamas to buy them.

Charles Lorraine; or, the Young Soldier, drawn from Scenes of Real Life. By Mrs. Sherwood. Illustrated. (Houlston & Wright.)

AN unfavourable specimen of its author's style and capacity to write wholesome stories for comparatively untaught people, this sketch of a young soldier, whose early death was mainly due to intemperance, has no qualities that justify its republication.

Johnny Jordan and his Dog. By Mrs. Eiloart. With Illustrations. (Routledge & Sons.)

Mrs. Eiloart's new story for the play-room narrates the practical jokes and wild pranks of a set of village schoolboys, who, notwithstanding the boisterous fun and mad merriment of their early years, turn out very useful and respectable men. The humour and spirit of the book accord with the mirthful and thoroughly wholesome tone of 'Ernie Elton' and 'Ernie at School,'—two books which induced us in past time to speak of Mrs. Eiloart as possessing in a high degree the qualities requisite for an entertainer of laughter-loving boys and girls.

Tom and the Crocodiles. By Anne Bowman. With Illustrations. (Routledge & Sons.)

ON the approach of Christmas we have been taught by the experience of several years to look for a new volume of prose fiction for children from Miss Anne Bowman, a writer whose special powers have strengthened with practice. On the present occasion the lady transports a family of gentlepeople—papa, mamma, and a bevy of children—from the neighbourhood of London to a charmingly picturesque island in the West Indies, where they have strange adventures and experience notable vicissitudes. On this well-chosen groundwork Miss Bowman has built up a tale that little people will read with interest and implicit trust in the truthfulness of its representations.

Helen in Switzerland: a Tale for Young People. By the Hon. Augusta Bethell. With Illustrations by E. Whymper. (Griffith & Farran.)

ALIKE clever at delineating good girls and naughty girls, the author of 'Maud Latimer' tells us yet another story with her customary freshness and good feeling. Mr. Whymper's pictures of The Chamois-Hunter, The Lion of Lucerne, The Castle of Chillon, and The Ice Cave of the Grindewald Glacier add greatly to the attractiveness of the volume.

Gerty and May. By the Author of 'Granny's Story Box.' With Illustrations by M. L. Vinning. (Griffith & Farran.)

A brief announcement says, "Thesayings and doings of the children in this story are real doings and sayings of little ones known to the writer." Gerty and May are such delectable little girls, and their sayings and doings as set forth in this pleasant narrative are so agreeable and satisfactory, that we are glad to hear they are not mere creatures of imagination. Whilst their papas and mamas are in India, Gerty and May are brought up in an English village near the sea by a certain Aunt Emmie; and

the intercourse of the three is excellently set forth in this volume, which may be found of service as a book for beginners in the art of reading, who are being led onwards from an imperfect knowledge of words of one syllable to a first acquaintance with words of two syllables.

How Peter's Pound became a Penny. By the Author of 'Dick and his Donkey.' (Seeley, Jackson & Halliday.)

THE moral of this well-meant and well-illustrated story may be inferred from its title. Honest, right-minded Peter, through falling into bad company at a village fair, loses or makes away with nineteen shillings and elevenpence of the sovereign which he had resolved to spend on a donkey and panniers for his mother; but in return for this material misfortune, he gains a large accession of modesty and a salutary dislike of idle associates. "He was," observes the moralist at the end of the tale, "a wise man who has written 'Much better is it to get wisdom than gold, and to get understanding rather than silver.'"

LIST OF NEW BOOKS.

Adam's Club Foot, its Cause, Pathology, &c. 8vo. 12s. cl.
Adventures of a Griffin, written by Himself, post 8vo. 6s. cl.
Andersen's Fairy Tales, new trans. by Mrs. Paull, post 8vo. 5s. cl.
Arctostaphylos, Christmas Volume, 1866, 8vo. 4s. cl.
Aristotle on Fallacies, with Translation and Notes by Poste, 8/6
Aunt Friedl's Gift, 75 coloured pictures, imp. 16mo. 9/6 cl.
Bartholomew's Evidence on Turkish Bath, 4to. 1/6 swd.

Trotter's Trigonometry for Beginners, 8vo. 18mo. 8/6 cl.
Trollope's (T.A.) Gemma, a Novel, 3 vols. post 8vo. 31/6 cl.
Zaida's Nursery Note-Book, by Author of A.L.O.E., fc. 8vo. 2/6 cl.

LITERARY COPYRIGHT.

6, St. James's Terrace, Nov. 14, 1866.

FINDING that during my absence from England the subject of literary copyright as between our own country and the United States has been occupying public attention, first at the Social Science meeting in Manchester, where it was introduced by Mr. Anthony Trollope, afterwards pretty generally in the London press, I am induced to say a few words about the state in which I found that question in the minds of authors, publishers, and legislators in America, and (so far as a man could learn such a fact in travelling over 10,000 miles of American ground, and mixing with all classes of the people) how it stands, generally, in the minds of the reading classes. On the whole, I think we are nearer to a settlement of this question than many persons suppose.

The authors, I can say with some confidence, are with their English brethren, to a man. At Boston, New York, and Philadelphia, I had opportunities of talking on this subject with such men as Longfellow, Agassiz, Lowell, Emerson, Holmes, Boker, Bayard Taylor, Bowles, Richardson, Horace Greeley, and their like. These eminent men of letters not only, as we do here, the rank injustice done to the plagiarists on both sides of the Atlantic, but also on all occasions warmly and eloquently expressed their views on publishers and the public, as our literature

rary fellows are concerned, we may rely on every assistance being given to us in our quest of justice.

The publishers are not unanimous, though they are very nearly so. Two or three houses—I need not name them—still persist in looking at the question solely from the point of view of their own trading interests. That they are making a great mistake in policy, even as regards their personal advantages, I have no doubt, after what I have seen and heard of the reprint-trade in America,—such a mistake as our own Cornish people made when clamouring for the right of wrecking,—such as our Norfolk people made when they protested against free imports of corn; but, being blind to their true interests, and taking only the lowest trade view of their duty, these two or three houses stand in the way of a complete unanimity among publishers. Messrs. Lippincott & Co., of Philadelphia, the largest book-distributors in America, perhaps in the world, are strongly in favour of a copyright convention. I can assert the same of Messrs. Ticknor & Fields, of Boston; and, indeed, of every liberal and enlightened publishing firm in the States. It is the same with the proprietors of periodicals. Mr. Leslie, a very large reprinter of English tales and novels, told me that he has found by long and large experience that it would be safer for him, as a publisher, to give the English writer a good price for his work than to steal it. The curse of all wrong-doing is, that more than one can play the evil trade. Our wreckers used to quarrel about their spoil, and would sometimes kill each other for a stolen article not worth a song. Pirates are proverbial for their frays and violence. No thief is ever satisfied to see his neighbour prospering on the results of a common crime, and no reprinter can be sure that his fellow in the offence will not invade his frontier and seek to appropriate his gains. Thus, to use Mr. Leslie's own illustration, the trade of reprinting from English works is, at best, a gambling transaction. Say he buys (for a small sum) from an English novelist the right to reprint a tale in one of his popular magazines. Before he has published half of it some one produces the tale in full. He never can feel sure of his property being his own. Every trade calculation has to be made in the face of this vitiating element. He can trust nobody, and he lives in a land where he cannot ask protection from the law. In fact, he has no property in the work, though it may be necessary for him to risk upon the reproduction many thousands of dollars. The return for his risk is just as uncertain as if he walked into Morrissey's "hell" and staked his money on the red and black. The clever publishers of the States are now beginning to see that even on the low ground of their personal interests—and many of them, I need not say, being gentlemen and scholars, take a far loftier view of this question—the need for a copyright law which should deal with intellectual property, as the law deals with all other kinds of wealth, is extremely urgent.

The politicians, so far as I could learn, from Secretary Seward and Vice-President Foster down to the humblest member of Congress, have no antipathy to a copyright law as such. They may have doubts whether the reading classes are yet prepared to give up the use of stolen books. They may hesitate as to whether, in the present condition of feeling in America towards England, any attempt to do an act of justice and favour towards English writers would be popular. But they do not argue for a continuance of the old piratical system on any pretended ground of right and honour. In fact, they admit the wrong, and only profess to doubt whether ignorant men who like a bargain can be made to see that robbing an author of his property is not the best way of getting all the good out of him which he is capable of yielding to a moral reader of his work. They see, however, that a change is coming. The man who likes a bargain and is willing to take it at his neighbour's cost, is not the best sort of citizen in a free commonwealth; hence it is beginning to be seen that his preference for other people's property is not a passion to be gratified by the legislature at all times and seasons. The brain of America, it begins to be seen, has some right to consideration as well as the pocket. That reprint-

ing which was serviceable to the Ohio farmer is clearly injurious to the Cambridge poet or professor; and when the latter rises up in the name of common right and common sense, his case is one that cannot be gainsaid. But for the unhappy differences which divide the two governments in the political field, this question might be set at rest. In the political circles of the United States—especially of the New England States—there is, just now, a passing passion of distrust and discontent, the deeper and fiercer from the love and reverence which it has for a day displaced. The causes of this ill-will are known to all my readers enough that the feeling prevails, and that it puts an obstacle in the way of friendly intercourse and legislation. This animosity, I hope, will die away when the old friendly feeling shall have revived a disposition to prepare a solution of this question will be found, I confidently believe, among a large majority of the intellectual representatives of the New England States. In their hands this question lies.

W. HEPWORTH DIXON.

METEORIC SHOWER.

Museum House, Oxford, Nov. 14, 9 A.M.

OUR sky-rocket dance began to be interesting by 11:30 P.M., grew brilliant by midnight, and enthusiastic by 0:30 A.M. From this time till 2, incessant shots were made from the covered battery in Leo, now striking the Bear's head or tail; and crossing the belt of Orion; at times flying over our heads, and, as the hours advanced, falling in sweeps to the western horizon. It was easy to see that of the hundreds, and indeed thousands, of bombs which came from the eastward, or diverged from the eastward, or merely flashed through the shortest imaginable arc there, or showed no arc at all but a mere globe of light, few or none manifested obedience to any other centre of discharge except that in Leo. Earlier indeed, at about 12, the radiant point was certainly marked several times between the pointers of the Bear and the stars of Leo, then just above the horizon; and later, at 2:30, when the flight of the stars was overhead and Leo was 40° above the horizon, few were seen near enough to Leo to be obviously referred to that centre.

The general type of the meteor was that of a rocket, ending in a globe of reddish light, with a long train of bluish, seemingly curdled, or resolved light; such that this train constituted a very long lanceolate gleaming mass, very often separated from the leading globe of light, thus:—

The globe was seen once to divide itself 12h. 42m. 10s. northward; often to expand like the end of an iron wire heated in oxygen gas, magnitude often far exceeding anything now in the sky, as Sirius; very many times brighter and larger than Mars; larger and brighter by far than Jupiter at his best; looming larger and immeasurably brighter than the Oxford Commissioners' street lamp, at a distance of eighty yards.

The train was rarely not quite straight or uniformly curved, but serpentine in appearance, probably a long spiral in reality. Length of very many trains, 30° and upwards to 60°. Trains which were followed overhead, across the zenith, took exactly a course at right angles to the meridional circle. Duration of flight, not exceeding one second; of train left, not exceeding three seconds. In two or three cases, one at 1h. 2m. to northward, a repetition of the globular appearance, and a double train, thus:—

In two or three cases the bursting of large globes gave so much light around as to be entered by one observer, who did not see the meteor, "lightning," e.g., at 12h. 30m., 1h. 3m. We did not see the meteors through small clouds, when these intervened. These and many other memorabilia were

noticed by my friends, Prof. H. T. Smith, Prof. Rogers, Mr. Chase, myself, and my servant, and I send them to you without delay. *Valent quantum.*
JOHN PHILLIPS.

THE WESTMINSTER WHOLE-LENGTH PORTRAIT OF RICHARD THE SECOND.

National Portrait Gallery, Nov. 13, 1866.

I ask leave to put on record an interesting discovery that has been made respecting the well-known Jerusalem Chamber (or rather Westminster Abbey) portrait of Richard the Second. The picture is too well known to require elaborate description. The King is seated on a throne, crowned, with sceptre and globe, and attired in regal costume; the size of the figure considerably larger than life.

It is now ascertained that the painting so recently seen at the South Kensington Portrait Exhibition—No. 7 of the Catalogue—was not the genuine picture, but the result of successive coatings of false paint, so laid on as not only to obscure, but materially to alter the drawing and to disguise the character of the original representation. Scarcely any of the colours composing this mask of re-paint seem to have been more than one hundred and fifty years old. It has been entirely removed; and I rejoice to state that the real old picture, painted in tempera, and apparently from the life, about the year 1390, has been revealed underneath it, in an almost perfect state of preservation.

Instead of a large, coarse, heavy-toned figure, with very dark, solid shadows, strongly-marked eyebrows, and a confident expression (almost amounting to a stare) about the dark-brown sparkling eyes, we now have a delicate, pale picture; carefully modelled forms, with a placid and almost sad expression of countenance; grey eyes, partially lost under heavy lids; pale yellow eyebrows, and golden-brown hair. These latter points fully agree with the King's profile in the well-known little tempera Diptych at Wilton, belonging to the Earl of Pembroke. The long thin nose accords with the bronze effigy of the King in Westminster Abbey; whilst the month, hitherto smiling and ruddy, has become delicate, but weak, and drooping in a curve, as if drawn down by sorrowful anticipations even in the midst of pageantry. Upon the face there is a preponderance of shadow, composed of soft brown tones, such as are observable in early Italian paintings of the Umbrian and Sienese schools executed at a corresponding period. Indeed, the general appearance of the picture now forcibly recalls the productions of Simone Memmi, Taddeo Bartoli, Gritto da Fabriano, and Spinello Aretino; but more especially those of their works which have suffered under a similar infliction of coatings of whitewash or plasterings of modern paint.

Many alterations seem to have been made by the restorer in various parts of this figure of King Richard, and well-devised folds of drapery quite destroyed through ignorance. The position of the little finger of his left hand, holding the sceptre, was found to have been materially altered. The letters R, surmounted by a crown, strewn over his blue robe, were changed in shape, and the dark spots on his broad ermine cape were distorted from their primitive simple tapering forms into strange twisted masses of heavy black paint. The globe held in his right hand, and covered with some very inappropriate acanthus leaves, was at once found to be false, and beneath it was laid bare a slightly convex disc of plain gold, very highly burnished. This, however, was not an original part of the picture. A plain flat globe with its delicate gilding was found still lower; and it was then ascertained that the head of the sceptre and the crown on his head had in like manner been loaded with gold and polished. Beneath these masses of solid burnished gilding, bearing false forms and ornaments unknown to the fourteenth century, was found the original Gothic work, traced with a free brush in beautiful foliage upon the genuine gold surface lying upon the gesso preparation spread over the panel itself, and constituting a perfectly different crown as well as heading to the sceptre from those hitherto seen. The singular device of a fir cone on the summit of the sceptre has disappeared entirely. The diaper, composed of a raised pattern, decorating the background, coated over with a coarse bronze powder,

and not even gilded, was found to be a false addition. It was moulded in composition or cement, possibly as early as the reign of the Tudors. Not only did it stand condemned in itself by clumsiness of workmanship and a reckless fitting together of the component parts, but it was found to have extensively overlaid some of the most beautiful foliage and pieces of ornamentation. The picture is painted on oak, composed of six planks joined vertically, but so admirably bound together as to appear one solid mass. The back is quite plain.

The large, clumsy frame was found to have concealed a considerable portion of the picture; and by removing it the carved end of the chair, on one side, and the lower part of the curved step in front were laid open to view. Unfortunately, the right side of the picture, beneath the frame, had been wantonly mutilated by hacking as if with an adze or hatchet, which rendered the chair on this side much less perfect. The raised diaper-work was continued under the frame, and, in the upper left-hand corner, had been curiously patched by two square pieces of inferior workmanship, which were let in as if to make good some incidental flaw.

The earliest record we met with of this picture is a short critical description among the MS. notes collected by Vertue for a history of the Arts in England, first undertaken by him in the year 1713. Subsequently to this, in 1718, Vertue made a large engraving of the whole picture, as then seen in the Choir of Westminster Abbey, for the Society of Antiquaries, who published it in their first volume of the 'Vetusta Monumenta.' Vertue was at that time the appointed engraver to the Society, and executed this work not from the picture itself, but from an evidently inaccurate drawing, done by Grisoni, at the expense of Mr. Talman, a well-known architect. On the commencement of repairs in the choir of the Abbey, in 1775, the picture was removed to the Jerusalem Chamber, and there remained in obscurity till the time of the great Manchester Exhibition, in 1857, where it was once more publicly seen. Meanwhile, Mr. John Carter, the well-known antiquarian architect, having observed differences between the picture as it then existed and Vertue's engraving after Grisoni, determined to make a fresh drawing, and to issue a new print of it. This he accomplished in a spirited etching, published, in 1786, in his well-known 'Specimens of Ancient Sculpture and Painting,'—which, indeed, may be accepted as a faithful record, excepting the background, of the picture as it recently appeared. During the period between the publication of these two engravings many alterations seem to have been made in the picture. A certain Capt. Broome, a picture dealer and restorer, was allowed to operate upon it about 1726. He is expressly mentioned in Walpole's 'Anecdotes' as having restored the picture after Talman's drawing had been taken. He appears to have repainted the face, altered the eyes, and added some absurd *straight* shadows, as falling from the shafts of the cross and sceptre upon the *curved* surface of the ermine cape. Vertue made a second engraving of this picture about 1730 for Rapin's 'History of England,' in which, after making several gratuitous alterations and deviations from the original, he adopted Captain's Broome's innovations, and the objectionable shadows became a conspicuous feature. In his former engraving after Grisoni no shadows appear upon the front of the cape, the left hand is more correctly drawn, and the face wears a much milder expression. In Vertue's earliest MS. note, however, he specially remarks on the eye; and indeed a small sketch which he made on the same page shows that the eye remained in its original form up to that period. Grisoni had failed to study and accurately copy what was then before him. The first alterations in the ornamentation of the crown and sceptre were of a much earlier time. They were executed upon the burnished gilding, and probably belonged to the sixteenth century. On clearing away the thickly-loaded burnished gilding, the original crown was found, still punctured with small round holes, forming patterns,—a peculiarity which appears to distinguish illuminated paintings executed towards the end of the fourteenth century.

A system of decorating flat backgrounds with minute architectural ornaments prevailed almost universally at this period. We see it adopted in Italian works, more especially by dotted patterns on gold within the nimbus and on suspended draperies, from the time of Giotto to Gennile da Fabriano. The highly-enriched pictures on the east wall of St. Stephen's Chapel, Westminster, executed in the reign of Edward the Third, and the compartment paintings, with sacred subjects, on the roof of the canopy of the tomb of Richard the Second in Westminster Abbey, afford striking proofs of the perfection to which this degree of ornamentation was carried. Nor should we omit to notice the fine metrical History of King Richard executed at the close of his reign, and now preserved in the British Museum. In the latter, all the illuminations admitting of landscape backgrounds have the sky invariably replaced by minute architectural patterns of various colours and singular brilliancy.

Enough, perhaps, has now been said upon this valuable picture: the earliest royal portrait now remaining to us; but it would be a grave omission on my part were I to fail to state to whom we particularly owe this important recovery. For the undertaking, and the success that has attended it, we are entirely indebted to Mr. George Richmond, R.A. Upon the clear enunciation of his views, and the strength of his representation as to the real condition of the picture, the Dean and Chapter authorized it to be thoroughly investigated, and directed its cleaning to be commenced without delay. The picture was accordingly intrusted to the experienced hands of Mr. H. Merritt; and, under Mr. Richmond's immediate supervision, and with his practical assistance, all operations were conducted. Mr. Richmond's power of distinguishing false Art from the true, and his jealous protection of all the finer points in the picture as soon as discovered, were of the greatest possible importance; whilst Mr. Merritt's extreme caution, judicious treatment, and thorough knowledge in the application of means to remove these masses of false colour—without in the slightest degree affecting the delicate tempera painting lying beneath—kept everything within due bounds. As a spectator of the whole proceeding, whilst thoroughly concurring in Mr. Richmond's views, and having already, in an official capacity, expressed a similar opinion, as to the former condition of the picture, to the Dean of Westminster, I bear willing testimony to the zeal and energy with which that distinguished artist has laboured—bestowing day after day of his valuable time—upon the picture; and I rejoice to think of the pluck and moral courage which have grappled with so serious an undertaking, and that the work has terminated in such perfectly satisfactory results.

GEORGE SCHARF.

THE PARISIANS OF PARIS.

Paris, November, 1866.

We are to understand that the superlatively beautiful, sumptuous, elegant, and *spirituelle* woman is a Parisian. Other cities may show lovely types of womanhood; but the perfect woman grows only by the banks of the Seine. The model Parisian is an honest woman. She has twelve hundred a year; is dressed by a *brave couturière*. She knows music thoroughly, yet never touches the piano. She is acquainted with history and the poets, and never writes. Her hair is exquisitely brushed, and her teeth are white and clean. She wears fine, closely-fitting stockings, gloves and boots. She has a dainty hand, that can artistically group flowers and fruit for the table. She can give the tone to a conversation and shine in it; and she alone among all the women in the world can do these things and have these attributes in perfection. A pleasant picture of woman, perfected according to French taste by art! Many will prefer Lucy, in the untrodden ways; or something more of warm Nature and less of Art, as in an English lady; or native grace that grows among the buttercups by the rural vicarage, or under the yeoman's roof. Yet the *Parienne*, to whom Art is Nature, whose tongue is as light and agile as her hand, who is "mistress of herself though china fall," and is mistress in her circle by her unaffected grace, her wit, and her amiable habit of seeking to please all

who approach her; this exquisite creature, made to refine and gladden the holidays of life, has claims upon our respect as well as Lucy. If you want an affection that will wear well, and grow under trials, and be triumphant at the close of life, take Lucy. Are you a diplomatist, and would you charm the elect of society, take unto wife Mlle. de Lys, of the gloomy Faubourg, and it shall be well with you.

Introducing a gallery of the *Parisiennes* of Paris, M. Théodore de Banville leads his readers to expect a series of portraits of exquisite delicacy and finish. I had a vision of noble *dames* and *demoiselles*,—some lightly suffused with the rosy tints of sentiment, of love; others sweetly pensive, with tender eyes, lighted to the very brink of laughter. I hoped to see M. de Banville linking to his canvas the elegant beauties of Paris *salons* as daintily as the Indian lifts the sweet scent of the roses from the bosom of a stream with the leaf of a lily. But whom have we here? Who are these Parisians of Paris? Surely Paris has heard, has read enough about *ces dames*! They affront honest women enough in public places. They stare Modesty out of countenance, and with their gaudy finery and sparkling jewels make the homely kirtle look homelier. Much ink has been spilt over their sorry histories, that had better have remained in the ink-bottle. The library of the Literature of Shame surely fills shelves enough. There is the wherewithal at hand to deaden the heart and degrade the manners of all the rising generation. M. de Banville is a writer whose dramatic force, whose fruitful fancy and whose literary skill would be invaluable in his time and country if he would exercise them on the side of decency and virtue. I find in the gallery of portraits of Parisian women before me abundant evidence of poetic fancy, of strong sympathies, and of the rare power of extracting the redeeming bit of sweetness and goodness that lies, we would all of us fain believe, in the most depraved and brutalized natures. In the 'Life and Death of Minette,' M. de Banville shows his powers at their best. The picture he draws of the clown and the rope-dancer is a revolting one, over which the reader cries again and again, "Enough! enough!" But he reads on; for the drunken clown reels palpably before him, and Adolphine, under her shaggy hair, glares at him. What a couple! Each has the ferocious instincts of a wild beast—the animal love and the passionate hate.

The gallery opens with a startling figure, that of Elodie, who has taken up the ideal as her speciality. She plays the game of innocence, and therefore is a little more disgusting than her companions. The second figure, the "bonne des grandes occasions," at once suggests to us the kind of company M. de Banville has provided for our amusement. How were we not deceived by the terms of the invitation in his Preface? His introductory description of the manner in which the brown bread of innocence is dropped for the white bread of shame, is told in vivid, dramatic touches. Émérance, the *ingénue*, is humorously described; but she is not reputable company. The Parisians, according to M. de Banville, live for love and luxury. Hence it is the paradise of women who love dress. Henriette, who was of no age, abandoned her lover when he ventured to ask her the year of her birth. Valentine of the Marble Heart is a figure that no English writer or publisher would venture to put forth; and he would be very adventurous who should submit to the English reader Berthe, the lady of the dressing-gowns.

Emmeline, the woman thirteen years old, is a pitiful little creature. She was the pet child of the Opera, and was covered with kisses by Mesdames Carito and Alboni. The picture of the little innocent at the Opera is delightful, and comes like a bit of sunshine in M. de Banville's gallery of shady characters. But a turn of the leaf parts us from the innocent, to show us the "woman of thirteen years of age,"—a repulsive little monster of audacious vice. Her innocence behind the scenes at the Opera is her best acting in the theatre. But Emmeline is not quite so repulsive as Claire, the virtuous girl. Claire's abode, in the Faubourg St.-Germain, and her severe bringing up, are sketched excellently

well. So strictly was she guarded, that in her ancestral park, the flowers she trod on would on no account have been permitted to rise and turn to look at her. She appears, to take up the younger Dumas's illustration, a speckless peach, of the thirty-sous basket at the very least. At length have we lit upon a sweet bit of honest womanhood. The pleasure lasts but for a moment. The speckless peach is cast among the most damaged of fruit. Claire's father is ruined, and he flies to Australia to repair his fortune. During his absence, Claire and her mother become acquainted with misery. An infamous old man enters the house to make a bargain, and Claire goes out one day, and returns with a "portemonnaie swollen with bank-notes." The bargain has been accepted. Was it worth while bearing us off into the respectable solitudes of the Faubourg St.-Germain for this? If behind the grey walls of these quiet streets good women are not to be found, where in the giddy capital of the Second Empire shall we look for them?

Perhaps the most skillful bit of painting is Lucie Chardin. Her account of the actress at home, married to the poor working journalist, is a true bit of nature. It is the story of two hard-worked people, two types of Paris life, free from intrigue or shameful episode. The old rope-dancer, Hebe Caristi, is exceedingly interesting, and at its close exceedingly horrible. The re-appearance of the old rope-dancer is pitilessly real. Towards the end of M. de Banville's gallery, he invites his readers to the "Festival of the Titans," at which Lord Angel Sidney, a Sir Charles Coldstream, with much more money than wit, plays the part of host. Tired of play and courtesans, and indeed of every pleasure he has tasted, Lord Angel commands his confidential servant to prepare the noblest feast Chevet can provide, to be served upon the sculptured gold of Barye. To this feast are bidden seven guests, each of whom is to be a professor of some trade or calling of which his lordship had never heard. You see that M. de Banville, having an absurd story to tell, does us the honour of making an Englishman its hero. The guests assemble, and include two women of whose character the less said the better. After dinner, his Lordship intimates to his guests that he is about to give 400*l.* a year to the person present whose means of gaining his or her livelihood shall be decided to be the most extraordinary or the most eccentric. Toby, for this is the name of Lord Angel's man-servant, places upon the table *rentes* representing 400*l.* a year, and 200 notes of 1,000 francs each, so that the winner may take his entire prize in cash, or receive it in the more prudent form of *rentes*. Then each guest describes his trade: one is a varnisher of turkeys' legs;—but let us pass over the list of eccentricities. To come to the point, the prize is unanimously given to a young man, who says in a soft voice at the last moment, "I am a lyric poet, and I live by my profession." I might pick out twenty happy bits of portraiture, or felicitous observation, from M. de Banville's gallery of the Parisians of Paris; but I will refrain for the present, in the hope that this vivacious, humorous, and dramatic writer will some day lead us into another gallery, among the gracious, witty, fascinating, and virtuous gentlewomen who make the charm and are still the ornament and rulers of society in Paris.

B. J.

OUR WEEKLY GOSSIP.

A very interesting mass of historical letters has been found in the old city library of Philadelphia. A book was being shown to a recent tourist in America as a collection of mere autographs, which the tourist saw, at a glance, contained a missing portion of the great series of public instructions from the Privy Council of James the First to the Lord Deputy of Ireland. The letters are numerous—many hundreds; and cover the whole of the very important administration of Sir Arthur Chichester. They are said to have been carried away (*abstracted* might be the better word) from Ireland by a retiring Lord Chancellor in the troubled time of William the Third. On its being pointed out to the city authorities that these records—of little value where they stand, isolated by the Atlantic Ocean from the series—belong to the Crown of

England, and are a portion of our national archives, a ready disposition to restore them to their proper place in our Record Office was at once evinced. Of course some forms will have to be gone through; but we have no hesitation in saying that when these forms have been observed, these remarkable State Papers will be restored to the Crown.

The extensive and valuable collection of microscopic sea-weeds, technically known as Diatomaceæ, belonging to the late Dr. Greville, has been recently acquired by the Botanical Department of the British Museum. They contain all the type-specimens so exquisitely figured by him in the *Transactions of the Microscopical Society*, and in other journals, as well as of the more obscure species described and figured by the late Prof. Gregory. It is fortunate for the numerous students of these minute organisms that they have become the property of this national institution, and been added to the typical collection of the late Prof. W. Smith. This large series of authentic specimens, now the property of the public, will at all times be accessible for the identification of obscure species, and for the clearing away of doubts.

Mr. Edmund Sharpe has presented to the British Museum a statue of the son of Ramesses the Second, about four feet high. He bears a standard on each side; it is of most beautiful workmanship, on hard polished breccia. It is placed near the head of Memnon, in the Egyptian Gallery. It is in a very good state of preservation, and is a beautiful specimen of Egyptian Art. It is curious as a lithological specimen, the breccia being formed of the consolidated sand of the desert, inclosing jasper, chert, and other siliceous pebbles.

The Royal Geographical Society have during the last week appointed to their Library Mr. Lamprey, a gentleman well known to men of science for his industry and accuracy.

At Mr. Murray's Annual Trade Sale, last week, the following large numbers were subscribed for by the London booksellers:—1,200 Lyell's Principles, and 400 of his Elements of Geology,—600 Fergusson's History of Architecture,—400 King George the Third's Correspondence with Lord North,—550 Darwin on Species,—650 Milman's Jews, 3 vols.,—300 Guizot on Christianity,—180 Grote's Greece, 8 vols., and 220 of his Plato, 3 vols.,—350 Gladstone's Reform Speeches,—800 Stanley's Jewish Church, 2 vols., and 500 of his Sinai and Palestine,—350 Forsyth's Life of Cicero,—200 Lord Derby's Homer, 2 vols.,—600 Smith's Dictionary of the Bible, 3 vols., and 700 of the Smaller Dictionary,—1,100 James's Æsop,—700 Barbauld's Hymns,—1,500 Student's Manual of the New and 900 of the Old Testament History,—2,800 Byron's Works,—1,000 Hallam's Histories,—2,400 King Edward the Sixth's Latin Grammars,—6,300 The Student's Hume,—2,600 Smith's Classical Dictionaries, 4,800 Latin Dictionaries, 12,100 Greek and Latin Course, 6,800 smaller Histories,—600 Murray's British Classics,—350 Hook's Church Dictionary,—7,500 Little Arthur's England,—8,900 Mrs. Markham's Histories,—350 Dr. Child's Benedicite, 2 vols.,—550 Robertson's History of the Church, Vol. III.,—500 Blunt's Scriptural Coincidences,—5,000 Murray's Student's Manuals,—and 2,000 Murray's Handbooks.

Mr. George Cruikshank will preside at the distribution of prizes, and deliver an address, to the students of the Government School of Art in connexion with the Liverpool Institute, on Wednesday, the 28th.

The Society of Arts commences its one hundred and thirteenth Session on Wednesday, the 21st inst. Sir T. Phillips delivers the opening address as Chairman of the Council. For the subsequent evening meetings up to Christmas the following bill of fare in the way of papers is announced:—November 28, 'On the Effect of Limited Liability Partnership on the Progress of Arts, Manufactures and Commerce,' by Mr. W. Hawes,—December 5, 'On the Trade in Foreign Cattle,' by Mr. J. Irwin,—December 12,—'On Old London: its Streets and Thoroughfares,' by Mr. J. G. Craze,—December 19, 'On the Study of Indian Architecture,' by Mr. J. Fergusson.

The following pensions on the Civil List have been granted:—Dr. Arthur Hassall, 100*l.* a year, on account of his eminence as a scientific chemist, and his services in connexion with the inquiry into the adulteration of food.—Mrs. Carpenter, 100*l.* a year, on account of the services of her husband, the late Mr. Carpenter, as Keeper of the Prints and Drawings in the British Museum, and of her own merit as a portrait-painter.—Mrs. Sykes, 75*l.* a year, on account of the services of her husband, the late Mr. Godfrey Sykes, to the industrial arts of the country, and to the Museum at South Kensington.—Mrs. Coulton, 75*l.* a year, on account of the literary merit of her husband, the late Mr. David Coulton.—Dr. Patrick White, 75*l.* a year, in consideration of his services as an author, public lecturer, and illustrator of the minstrelsy and bardic literature and music of ancient and modern Ireland.—Henry John Doogood, Esq., 40*l.* a year, for many years engaged in literary pursuits, and in connexion with the public press as a Parliamentary reporter, and now blind and paralyzed.—George Thomason, Esq., 40*l.* a year, on account of his services in connexion with the periodical literature of the day, being now afflicted with blindness.—Robert Young, Esq., 40*l.* a year, in recognition of his services as an historical and agricultural poet in Ireland.—Miss Mary Craik and Miss Georgiana Craik, 30*l.* a year each, in consideration of the services of their father, the late Dr. Craik, as Professor of History and English Literature in the Queen's College, Belfast.

"If you can't stand fun, you will be d—d, and you ought," said Artemus to a Mormon elder, who had a thought of scalping the showman for his audacities. This was, in effect, the verdict of Brigham Young, when the offender appealed to him for protection against the irate Mormons. Artemus has brought his "fun" to London, and very good fun it is—of its kind. The humorist is a tall, thin man, with a well-shaped, not large, head; an aquiline nose, and thick, piercing eyes; all indicating at once a capacity for observation, combined with a keen intelligence. We need not say that he was greeted with applause when he first entered on the platform. This event was, indeed, humorously anticipated in his programme, and we might copy the whole of this document with safety as containing a true report of his progress. His lecture is accompanied with pictures painted from photographs which are not very new; in which we have a scene representing the Great Desert at night, a bird's-eye view of Great Salt Lake City, the Salt Lake Hotel, the Mormon Theatre, the harems of Brigham Young and Heber C. Kimball, the Mormon Tabernacle, the proposed Temple, the Great Salt Lake, the Endowment House, the Rocky Mountains, the plains of Nebraska, the prairie on fire, and other places and things; together with a picture of Brigham Young sporting with his children among his numerous wives. The description of the Mormons and their social state is delivered by Artemus seriously, though that is the funniest part of all. The lecture is composed of telling sentences, slowly delivered, and each ending with a trap, into which the listener is sure to fall, and from which he extricates himself by a hearty laugh. Meanwhile, the speaker maintains a steadfast countenance, showing no expression, except occasionally an affected one of indignation that his remarks should be the subject of derision. In all this there was no appearance of acting, the mere absence of which operated as a charm.

Almanacs and year-books begin to crowd our tables. First, we take up Messrs. De La Rue's series—one among these being more especially our own pocket companion. 'The Red-Letter Diary' is for the office-desk; the 'Indelible Diary,' in two forms, is for a gentleman's pocket and for a lady's reticule. These year-books have all their customary merits, and, being rather astronomical, fall in just now with the public humour for skyey information. We have also on our table Mr. Fulcher's 'Ladies' Memorandum Book,' a collection of useful information and pretty feminine poesy.—'Thorley's Gardeners' Almanac,'—'The Farmer's Almanac and Calendar for 1867,'—and 'Tom Toddlers' Comic Almanac.'

Nos. 40 and 41 of Mr. Edward Walford's 'Photographic Portraits of Men of Eminence in Literature, Science, and Art' contains memoirs and portraits of Mr. C. Knight, Prof. De Morgan, Mrs. Elizabeth Blackwell, Mr. W. G. Palgrave, Sir Rowland Hill, and Mr. Cyrus Redding. We put the memoirs first in view, because, on the whole, they are very good,—often quite original, and full of facts not otherwise found in books. The work, however, is good throughout. No. 40 completes the fourth volume of this publication.

An album portrait of Prof. Seeley, author of 'Ecce Homo,' has been published by Mr. Crellin. The likeness is a very good one; a trifle flattering, perhaps, to the original. Mr. Crellin has also laid on our table portraits of Prof. De Morgan, Prof. Grant, Prof. Pole, Prof. Waley, Prof. Morley, and of a dozen others, all belonging to University College, London. The collection is gathered into a little portfolio, making a pleasant *souvenir* to a member of that college, and a treasure to the collector of celebrities.

We have received the following satisfactory note in answer to a query as to the whereabouts of Thomas Stothard's tomb:—

"Earlsmead House, N.E., Nov. 13, 1866.

"I am glad to answer your query as to the last resting-place of our great historic artist, Stothard. His vault in Bunhill Fields will be found E. and W. 29, N. and S. 33; and the inscription is or was legible when I last saw it. He died April 27, 1834, aged 79 years.—Yours, &c., CHARLES REED, Chairman of the Committee for the Preservation of Bunhill Fields."

The youth of London light their cigars with a new invention, called *poudre de feu*. It consists of pyrophorus, which is preserved in a small tin case, with a narrow orifice. When a small quantity of this dark powder is poured out on the end of a cigar, and breathed on gently, it becomes incandescent, and lights the pipe or cigar.

A very interesting and exhaustive statistical return of casualties at sea in all parts of the globe has recently been compiled by the Committee of Lloyd's. By this it appears that, during the six months ending 30th of June last, 5,455 ships, 506 of which were steamers, met with 6,138 casualties. Sixty-seven of the ships are missing, 186 abandoned; 40 of these were recovered, and the remainder were lost. The number of lives lost by these casualties is reported as 1,400, but the Committee state that this Return is most imperfect, the actual numbers being, doubtless, greatly in excess of that given.

The great work on 'The Textile Manufactures and Costumes of the People of India,' already announced by us as in preparation, by order of the Secretary of State for India, is nearly ready for presentation in connexion with the collections of specimens already presented to the chief seats of commerce in this country.

Under the title of 'The Theatre of Mystery,' Madame Stodare is about to revive her late husband's entertainment at the Egyptian Hall. The first performance will be given this morning, Saturday.

A portrait of the late principal Librarian of the British Museum, Sir Henry Ellis, painted by Mrs. Margaret Carpenter, has been presented to the Trustees by Dr. J. E. Gray. The portrait was exhibited at the Royal Academy in 1856, and is a good specimen of Mrs. Carpenter's talent as an artist. The Museum already possesses the portraits of several of the Principal Librarians who preceded Sir H. Ellis, as Mr. Knight, Dr. Matty, and Mr. Planta, the latter by the late T. Phillips, R.A. It is to be hoped that the Trustees will collect them together, as the commencement of a series of portraits.

What will our sprightly neighbours, the French, take from us next? They have borrowed from us our "*boulingrin*," our "*bifteks*," our "*bouledogues*," and their "last" is the establishment of a sporting journal with the seducing title of *Le Derby*.

The French Minister of the Interior announces that a prize of 1,500 francs will be given, in 1867, to the author of the best work on Archaeology; and

that another prize of the same amount will be given for the best essay on the Commerce and Industry of the Middle Ages, derived from authentic documents, referring either to a province or to a town, with reference especially to the practices and rules of trades, the condition of workmen, employers, customers, &c.

Prof. Agassiz has been delivering lectures in the United States on the physical features of the river Amazon, which he has lately investigated at the expense of Mr. Thayer. The Professor states that there is no difficulty whatever in navigating the Amazon and all its tributaries with steamers. The climate he describes as delightful. The nights are cool, because the Amazon runs from west to east, in the face of the trade-winds, so that cool breezes are continually blowing up the river; and the steamers of the Amazon Steam-Ship Company are so comfortable and well managed, that a trip to the foot of the Andes in them is, according to the Professor's experience, as agreeable as an excursion on the Rhine.

INSTITUTE OF PAINTERS IN WATER COLOURS.—The WINTER EXHIBITION OF SKETCHES AND STUDIES is NOW OPEN, at their Gallery, 83, Pall Mall (opposite Marlborough House.—Admission, 1*s.*; Catalogue, 6*d.* JAMES FAHEY, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, admission, 1*s.*, at T. McLean's New Gallery, 7, Haymarket, near the Theatre Royal.—Admission, 1*s.*; Catalogue, 6*d.* B. CLOTHIER, Hon. Sec.

WINTER EXHIBITION.—THE FOURTEENTH ANNUAL EXHIBITION OF PICTURES, the Contributions of British Artists, is NOW OPEN, at the French Gallery, 130, Pall Mall.—Admission, 1*s.*; Catalogue, 6*d.* LÉON LEFÈVRE, Secretary.

Will open on Monday, November 26.
SOCIETY OF PAINTERS IN WATER COLOURS.—The ANNUAL WINTER EXHIBITION OF SKETCHES AND STUDIES by the MEMBERS. 5, Pall Mall East. WILLIAM CALLOW, Secretary.

MR. MORRY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 24, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Frith, R.A.—Ross Bonheur—Henriette Brown—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersgill, R.A.—Caldron, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, sen.—Robson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Ford—Fire—Rulphert—Liddell—George Smith—Duverger—Peter Graham, &c.—Admission on presentation of address card.

COLONEL STODARE, EGYPTIAN HALL, Piccadilly.—MADAME STODARE (Widow of the late Colonel Stodare) announces that, having taken a very prominent part in all her late husband's incomparable Feats of Magic, she has made arrangements (with the assistance of Mr. Fribank Burman, Pupil of the late Colonel Stodare) to resume the Entertainment which has been given by Colonel Stodare at his Theatre of Mystery, Egyptian Hall, with such remarkable success for a period of nearly two years. The FIRST REPRESENTATIONS will take place on Saturday morning and evening, November 17, at 3 and 8, and will be repeated every evening at 8, and on Wednesday and Saturday afternoons at 3. The surprising illusion of the Sphinx, the Famous Indian Basket Trick, and the Marvel of Mecca, all originally invented and introduced by Colonel Stodare, will be produced in the varied Entertainment.—Admission, 1*s.* and 3*s.*; Stalls, 3*s.*; which may be secured at the Box-office, Egyptian Hall, from 10 till 5; and at Mitchell's Royal Library, 28, Old Bond Street. Mr. JAMES WEAVER, Manager.

ROYAL POLYTECHNIC.—Meat cooked at a distance of 100 feet from the fire by visible rays. A cigar lighted and other combustibles set on fire in a darkened room by invisible rays. These and other remarkable experiments will be exhibited in Professor Pepper's New Lecture on "Combustion by Invisible Rays," which will be given on Monday, Thursday and Saturday at 3 and 8, Wednesday at 8, and Friday at 1.

SCIENCE

SOCIETIES.

GEOGRAPHICAL.—Nov. 12.—Sir R. I. Murchison, President, in the chair.—Sir H. C. Rawlinson, M.P., read his paper 'On the Recent Journey of Mr. W. H. Johnson from Leh, in Ladakh, to Khotan, in Chinese Tartary.' He said the journey of Mr. Johnson was a most remarkable one, not only for the boldness with which it was undertaken, into an almost unknown country, many hundred miles distant from the British frontier, but for the scientific precision with which the places traversed were made known to us. Mr. Johnson was born and bred in India, and having received his education in one of the hill-stations, was very early engaged on the Great Trigonometrical Survey, and instructed by Sir Andrew Scott Waugh and other officers of the Survey. It was whilst carrying out the Survey to the extreme northern limits of the territory of the Maharajah of Cashmere that he was enabled, at the invitation of the Khan of Khotan, to perform the remarkable service now under consideration. The city of Ilchi, or Khotar,

had not been visited by a European, except Marco Polo, Benedict Goetz, and a few Jesuit missionaries in the last century. It is important as being in the line of one of the great commercial routes between Russia, India and China. The brothers Schlagintweit had advanced from the Karakorum, as far as Puahia, a few miles to the south of Ilchi, but did not reach the city. It was necessary to make this remark, as it had been asserted on the Continent that they had really anticipated Mr. Johnson in the discovery (as it may be termed) of Khotan. In ancient times Ilchi was the high place of the Buddhist religion in Central Asia, and in the fourteenth century some Chinese pilgrims found fourteen convents in the city, each of them containing 3,000 devotees. Till within the last few years the country had been in the possession of the Chinese; but, owing to the shock which the empire had received through the war with England, the whole of these Turkestan states had risen in rebellion, and thrown off the Chinese yoke. The neighbouring city of Yarkand is at present in a state of anarchy, and Mr. Johnson gave an amusing account of the offer which the principal inhabitants had made to him whilst at Ilchi to take possession of the place on behalf of the English. This state of things had produced a favourable opportunity for opening up relations, especially commercial, with these Turkestan states; and the Khan of Khotan, having formerly travelled through India and become an admirer of British rule, had shown himself most anxious to cultivate trade with us. The difficulty of communication between India and Central Asia had hitherto been not merely physical, but political; and a great obstacle still exists in the right maintained by the Maharajah of Cashmere, whose territory lies to the south, and includes the mountain passes into Turkestan, of levying transit duties: these are so high that they almost paralyze commerce. Mr. Johnson, however, describes a road, practicable for wheeled carriages throughout the year, which passes from Ilchi into India, to the east of the Maharajah's dominions. If this information prove true, it will be one of the most valuable results of Mr. Johnson's expedition. The road is called the Polu Road, and crosses a depression in the Kuen Lun chain, through Rudok, towards the south. On the more direct route taken by Mr. Johnson, the passes were from 15,000 to 18,000 feet above the sea-level, and an elevated plateau had to be crossed, about 16,000 feet high, occupying several days' journey. Sir Henry, in conclusion, expressed his regret that the adventurous journey of Mr. Johnson should have met with a sort of rebuke from the Government of India. Of course he had not authority to enter into political relations with this potentate, but being in his country he could hardly avoid receiving such communications as were addressed to him.

GEOLOGICAL.—Nov. 7.—Prof. A. C. Ramsay, V.P., in the chair.—The Rev. W. Gover was elected a Fellow.—The following communications were read:—‘On some remains of large Dinosaurian Reptiles from the Stormberg Mountains, South Africa,’ by Prof. T. H. Huxley.—‘Additional Notes on the Grouping of the Rocks of North Devon and Somerset,’ by Mr. J. Beete Jukes.

ARCHÆOLOGICAL INSTITUTE.—Nov. 2.—The Very Rev. Canon Rock in the chair.—After advertising to the success of the late Congress in London, the Chairman expressed his very deep regret at finding himself in the position he occupied, inasmuch as it was owing to the great loss the Institute had sustained in the death of the Marquis Camden. He was sure the meeting would join him in the expression of his profound grief at that event. While the late Marquis was ever ready, and able, to appreciate most highly the value of archaeological studies, he continued always to put himself forward only as a learner. Ever most courteous and kind to all, he was especially so to the members and friends of the Institute. As they had so often the pleasure of witnessing, he presided very regularly at their meetings, and he was most attentive to all the interests of the Society. His last public act in connexion with them—only a few days before his decease—had been to obtain Her Majesty's permis-

sion to prefix the word “Royal” to their title. As to the vacancy in the office of President produced by this sad event, the Council had fallen back upon their valued friend Lord Talbot de Malahide, whom he had good reason to hope would resume for a time the office he had formerly so well filled. On this occasion that office would be no sinecure, inasmuch as the President of the Institute would be an *ex officio* member of the Council for the great Paris Exhibition next year. As regards that Exhibition, our French friends were taking a leaf out of our book, and there would be a “Loan Exhibition” similar to that which obtained such fair fame at South Kensington. He begged leave to congratulate the Institute on the auspicious opening of the session, which had brought together so large, so valuable and curious a collection of objects as that on the tables before him.—A paper by the Rev. H. M. Scarth, ‘On some recent Discoveries of the Roman Period in the Parish of Bathwick,’ was then read. In August last a pit was dug in the grounds of the Bath Proprietary College, to obtain gravel for the College walks. At about 10 feet from the surface two stone coffins were found, in one of which was the skeleton of a man, in the other that of a horse's head. Unfortunately no one was present to make any very accurate observations, and, the work being by contract, the remains were quickly covered up again. The writer of the paper, however, expatiated on the facts he was able to collect in reference to those objects, and tried to connect with them the discovery of what seemed to be the remains of cooking apparatus found in the vicinity of the coffins, as though a feast had taken place at the interment. Some discussion occurred, in which instances of similar interments were adverted to—the latest, perhaps, that mentioned by Mrs. Piozzi in the account of her travels in Italy. Dr. Rock noticed the ancient belief that the horse conveyed the body of the deceased to the banks of the Styx, over which Charon ferried him. In England the horse of a deceased noble was often made an offering to the Church.—Col. A. L. Fox gave an account of the objects exhibited by him, and which had been found at a great depth in the vicinity of the old London Wall. They had been brought to light in the course of excavations made for the extension of a wool warehouse in “London Wall,” about 40 yards south of the pavement, on the site of the wall, and so within the inclosure of Roman London. At 16 feet in depth gravel was found, overlaid by an irregular deposit of peat, upon which was the made-earth and modern rubbish. Stumps of oak piles were found all over the area excavated, sometimes in rows, sometimes in clusters. They seem to have been squared and pointed with the axe, and driven through the peat into the gravel, doubtless to support structures built upon them. The objects exhibited were found at various depths in the peat, either singly, or collected in refuse heaps, like the “kitchen-middens” of the North. The bulk of these heaps consisted of shells of oysters and other fish, mixed with pottery, bones of animals and miscellaneous objects. Nearly all the bones were broken, and many were split lengthwise as if for extracting the marrow. Among them are bones of the horse, the wild goat, the wild boar, the red deer, the *bos longifrons* and the roebuck. The miscellaneous objects comprise bone handles, skates, and implements, a hatchet of iron, iron knives, bronze pins, fragments of pottery, and large tiles, and coins of various dates. Col. Fox was not able to speak positively of the different levels at which these objects were found; but the bones were all in the peat from the level of the piles to within 9 feet of the surface. The pottery is undoubtedly Roman, very like that of the Upchurch Marshes, or the coarser kind worked in London. On a fragment is the mark of MACRINUS. The occurrence of this pottery with the more primitive remains make the elucidation of this curious deposit somewhat difficult; and in the discussion which ensued further information was hoped for. It was suggested that these might be vestiges of the ancient British inhabiting the marshy tracts round London who were undisturbed by their conquerors.—A paper by the Rev. Canon Trollope, ‘On the Maladery, or House of Lepers, near Lincoln,’ with a notice of a remarkable sepulchral slab

found on the site, was then read. Mr. E. Smirke, Vice-Warden of the Stannaries, who had lately brought the subject of lepers before the Institute, mentioned that some documents had lately been printed referring to a similar establishment in Cornwall, by which it appeared that about two hundred years ago the Court of Chancery had settled the revenues of that house upon the general hospital of the county, directing a preference to be given to lepers, and that an eminent living physician had signified his intention to turn the privilege to account, thereby raising an important legal question which was now under consideration. The disease was stated to be more general than usually supposed.—A considerable number of objects were exhibited, among which were, a picture-map of Palestine, in which the Holy City with its domed buildings is conspicuous. The chief cities are shown in a sort of bird's-eye view, the names being inscribed in Hebrew, and in what seems the *lingua franca*, or mixed Italian, commonly used by the Israelites in Eastern lands. The relative position of these cities and of the other main geographical features seems quite imaginary. Towards the top of the sheet are seen the Cities of the Plain, and a curious object like a staircase, inscribed “Moglia di Lot,” or Lot's wife. Recent travellers state that, according to local tradition, the position of the “pillar of salt” is associated with a spot near the Dead Sea, where an abrupt acclivity occurs, the strata of which may be indicated by these steps. The map is on paper, and coarsely coloured. It probably preserves the general features of a map of greater antiquity. Such maps are not uncommon among the Israelites, and are sometimes woven in cotton fabrics.—A large woodcut, of rude execution, probably Italian, the chief feature being a representation of the Holy City. In compartments around it seem to be the names of patriarchs and of other persons of Old Testament history.—A coarsely emblazoned sheet of parchment, being a Hebrew marriage settlement, probably cancelled.—Several Hebrew charms, blessings and curses, written on parchment, and rudely emblazoned. The names of the ancient patriarchs and of their wives are introduced on the margins. On these charms appear various ornaments, doubtless of a symbolical import. Although these mysterious scrolls do not appear to be of any great antiquity, it is probable they are reproductions of *formulae* of a much earlier period. They were exhibited by the Rev. G. J. Chester, who had acquired them in the East.—Drawings of ancient cannon in the Museum of the Society of Antiquaries, Edinburgh, were exhibited by Mr. J. E. Lee. Mr. J. Hewitt remarked that the oldest of these cannon is of the fifteenth-century type, with a core of longitudinal staves, round which hoops of iron have been shrunk, leaving a space for the “chamber.” A wooden handle is fixed over a spike to direct the fire. The four guns, arranged as an “orgue,” are of Swedish construction, of the time of Gustavus Adolphus, with a core of metal overlapped with cord and leather. They are mentioned in Turner's “Pallas Armata” as very useful from their lightness. Various examples of the “orgue” are to be found in the Royal Artillery Museum at Woolwich.—Mr. W. B. Smith exhibited a remarkable Indian “Puttah,” or gauntlet sword. The “Solingen” blade has a hilt of steel plated with silver, in the form of an elephant's head armed for battle. Also fragments of a privy coat of defence, or mail, probably Venetian, *circa* A.D. 1500. The formation is of small plates of steel in rows, overlapping each other. Each plate is riveted through the coat, which was often of velvet, the heads of the rivets looking like studs or spangles. Between the rows of plate are strips of fine chain mail. Such coats are often depicted in the portraits of the time. Mr. W. B. Smith also exhibited a woodman's axe, with bullet-marks, one of which had perforated the iron; also a finely-worked rosary in silver, with a pendent Latin cross, on which was a puzzling inscription. The workmanship was probably Ruthenian.—Mr. J. Henderson exhibited another example of the Indian “Puttah,” with a fine Italian blade, and the hilt in the form of a tiger's head, finely worked. This weapon has an interesting story attached to

as having been carried by a Sepoy, Ruggoneth okul, when protecting Capt. Gordon, of the 6th Active Infantry, in the late mutiny at Allahabad, by whom that officer's life was saved.—Mr. Yates produced a copy of the photograph of a remarkable Greek inscription on a marble arch at Ioniiki, which justifies the reading *πολιτάρχας* Acts xvii., 6, 8, about which there had been a difference of opinion.

INSTITUTION OF CIVIL ENGINEERS.—Nov. 18.—Fowler, Esq., President, in the chair.—The first paper read was, 'On the Results of the Employment of Steam-Power in Towing Vessels on the Gloucester and Berkeley Canal,' by Mr. W. B. Egram.—The second paper read was, 'On the Employment of Steam-Power upon the Grand Canal, Ireland,' by Mr. S. Healy.

MATHEMATICAL.—Nov. 8.—*Annual General Meeting.*—Prof. Cayley, V.P., in the chair.—This was the first meeting which has taken place at Burlington House.—The Secretaries' and Treasurer's Reports for the preceding year were read, and the following officers were elected for the ensuing year:—*President*, Prof. Sylvester; *Vice-presidents*, Prof. Cayley, Prof. De Morgan, and R. Spottiswoode; *Treasurer*, Prof. Hirst; *Secretaries*, Mr. G. C. De Morgan and Mr. M. Jenkins.—Prof. Sylvester gave a rule by which Gauss's formulae for spherical triangles may be remembered. Mr. T. Cotterill communicated some new and simple properties of cubic curves.

- MEETINGS FOR THE ENSUING WEEK.**
- Nov. 18. Asiatic, 8.—Hymns of the Gaupayanas.—'Legend of King Asmâdâ,' Prof. Max Müller.
 - Entomological, 7.—Gynandromorphous Mimic Butterfly, B. America, Prof. Westwood; 'Protective Resemblances,' Mr. Wallace; 'Stathmopoda,' Mr. Stalston.
 - Royal Academy, 8.—Anatomy, Mr. Partridge.
 - Architects.
 - Nov. 19. Horticultural, 3.—General Meeting and Lecture.
 - Statistical, 8.—Rogers's History of Prices, Mr. Newmarsh; 'Railway Extension,' Mr. Baxter.
 - Engineers, 8.—'Steam-power on Canals,'—'Smelting Copper Ores, Australia,' Mr. Morgan.
 - Ethnological, 8.—'Skull of a Patagonian,' Prof. Huxley; 'Zulus, &c., of Natal,' Dr. Mann; 'Results of Arab Conquest of Spain,' Mr. Crawford.
 - Nov. 20. Literature, 8.—Greek Inscription from Mitylene, Mr. Newton.
 - Meteorological, 8.
 - Society of Arts, 8.
 - Geological, 8.—'Marine Deposits of Secondary Age, B. Wales,'—'Echinodermata, Dana,' Dr. Duncan; 'Lima,' Mr. Woodward; 'First Cataract, Upper Egypt,' Mr. Hawkshaw.
 - Nov. 21. Mathematical, 8.—'Harmonies in Space,' Mr. Clifford.
 - Zoological, 4. General.—8. Scientific. Inia, Mr. Flower; 'Fishes of Central America,' Dr. Günther.
 - Royal, 8.
 - Antiquaries, 8.
 - Nov. 22. Botanical, 8.

FINE ARTS

MR. WALLIS'S EXHIBITION.

As before, this gathering contains many old pictures and drawings of high quality. Among them *Cader Idris* (No. 1), by Copley Fielding; *Dono d'Ossola, Venetia*, (2) *Study from Germany* (48), by S. Prout; *Hawking Party, Haddon Hall*, (24) by D. Cox. Also the works of many recent as well as living popular favourites:—a capital landscape, *On the Thames near Putney Bridge* (10), by Mr. B. Foster; *Leading down Hill* (54), and *The Pets of the Pack* (58), by Mr. F. Tayler; and drawings too numerous to mention by Mr. J. D. Harding and D. Roberts.

A certain showy, brilliant, and merely pretending character, which is rife among noteworthy pictures of this collection, presents itself clearly in the works of Mr. J. Pettie,—a very fortunate, clever, and attractive artist, whose pictures can hardly be said to improve in quality, and who himself promises, with others of the same standard, to supply the popular, flashy, and unsound element to the Royal Academy of the future with paintings which, however attractive while fresh from the mint of youth, and warm with the fire of novelty, will, we fear, fall to the ranks of mere furniture, and remain lashing, occasionally even splendid, yet with shallow invention, showiness instead of solidity, pretence instead of labour, dexterity in the place of Art, and remain rich only in the superficial wealth of the palette and the easel.

Rosalind (195), by Mrs. M. Robinson. Rosalind thinking, with hands clasped before her; her face, not without well-rendered character apt

to the theme, is no unworthy subject. That the face lacks purity of form and, slightly, spirit of expression are rather things to be regretted than to be set down against the artist. The painting of parts of this picture is excellent: see the rich colour of the green robe.—Mr. Dobson's *The Pet Calf* (235) seems like an old acquaintance, and is not an unpleasant picture. A young girl feeds a calf.—Mr. E. Nicol's *Kept In* (242), like many others of his works, illustrates a certain coarseness of taste which, we think, is his great defect. Mr. Nicol has recently abandoned the practice of depicting brutality or blundering stupidity in action, and has given us many pictures of humour which was none the less racy because the coarse grain of his taste still remained visible. We write thus in view of two pictures, one of them at the last Academy Exhibition, the other here; the latter concerns us now. The rank Irish schoolmaster of the former is, with forceful characterization, dirt and tyrannical humour, here again, the very man of whom it might be said, we think, not unfairly, that, however fortunate as a model to an artist of Mr. Nicol's unquestionable ability, not even that ability or his own aptitude can ensure the brute a second welcome. We think the artist depicted enough, and more, of what was worth painting in the fellow in the first-exhibited picture, which was better painted than its fellow here. Two other pictures by Mr. Nicol, *Good News* (265), and *Bad News* (274), are, although less coarse, less powerful than the above.—Mr. T. Faed's *Flower from Paddy's Land* (250) is not worthy of him in painting, although it is as wealthy in character as is usual with his works.—*Marchand d'Habits* (255), by M. J. L. Gérôme, has nothing novel in value or quality about it. An oriental bazaar, a merchant selling a scimitar to a trooper.

Mr. Linnell's *The Last Load* (263) has likewise no new character about it. A great wain is receiving its topmost shocks of grain in harvest; the sky is the harvest-sky so fortunately and frequently painted by this most able artist.—Mr. E. Long's *Theatre at a Spanish Fair* (268) shows a performance from 'Don Quixote' before an excited and delighted audience. The Don, a capitally conceived picture of that hero, adorns the kneeling lady, and with apt dignity receives her prayer. In this picture much of the execution is painty and splashy, but not offensively so. The audience is given with singular spirit. *The Return of Columbus* (323), by the same, exaggerates the splashy execution, and is without the rich characterization of the latter. It is one of the coarsest of spectacular pictures, without without its proper qualities. The subject shows the reception of the navigator, his crew, and imported Indians, by the Spanish citizens.—Mr. H. C. Whate's *God's Acre* (267)—an old moorland chapel and cemetery—has much love for Nature and knowledge of her ways: a very good landscape, that is worthy of considerate study.—*Neapolitan Peasants before the Farnese Palace, Rome*, (288) by M. Bonnat, shows sulky-looking peasants abiding at the palace-gate of the expelled Bourbon: some gaze upwards; others lean against the walls; some recline, with true Neapolitan indolence, upon the earth below the heavily-barred windows of the prison-like palace of the ruined king. This is a gloomy picture, interesting on account of its perfect telling of the story, notwithstanding our distrust of such pretending and low-toned paintings. The same artist's *St. Vincent de Paul taking the place of the Galley Slave* (291), is hackneyed in all respects.—*Gordal Scar, Yorkshire*, (308) by Mr. Gill, is an effective sketch rather than a complete picture of that famous earth-rent and its waterfall.—*Alone* (311)—a monk in the high tower-gallery of Notre Dame, Paris, looking down upon the city—has an idea such as we do not often find in pictures of its class; a common one, the work of Mr. A. H. Tourrier.—Mr. O. Weber's *First Appearance of Snow on the Alm, Tyrol*, (313) gives, with much academical felicity, the atmospheric incident in question. Snow lies in patches on the herbage, gathers for a heavier fall in dense mists about the distant mountain tops, and is dashed with watery gleams of sunlight; the herds of the pe-

sants traverse the whitened field, oxen, sheep, and an ass; the Tyrolean themselves, a man and woman, armed with long alpenstocks, follow their beasts.—Mr. G. D. Leslie's *Phyllis* (285),—a young lady, in the dress of Queen Anne's time, loitering, as many young ladies have of late loitered, in pictures, before the gate of an ancient house; a dainty little damsel: a picture that is very cleverly treated. By the same are *The Invalid's Breakfast* (320), a young dame giving instructions to a servant, who bears some sufferer's early meal upon a tray; and *Expectation* (325), a younger lady, apparently the same, waiting in an entry for some one's arrival, her dog equally expectant. Both these works show considerable power of dealing with character, and much clever treatment of what might, without these advantages, be trivial subjects. Without possessing much, these pictures fulfil their purpose; this is more than we can generally say for their compeers.—*Marguerite trying on the Jewels* (358), by M. H. Merle, is a thoroughly academical repetition in the manner of A. Scheffer, not only as regards the countenance of Mephistophiles, but the model of the features of Marguerite, and, as to all, the very mode of execution throughout the picture, and the mock sentiment which has admitted the false presageful expression to the eyes of Marguerite herself.

By M. De Jonghe are several pictures with pleasant mannerisms and sentiments, pictures that are but inefficiently represented in England by such works as those just named from Mr. G. D. Leslie's hands. These possess a charming, superficial, French sort of grace and agreeableness. Their principal defect is coldness of colour, occasional hardness, and some paintiness of handling.—*The Invocation to the Virgin* (450), by M. Bouguereau, is another of those cleverly-painted, machine-made, academical French pictures, which are not only in excess in number here, but obtainable in any quantity and wonderfully uninteresting. A woman, with a baby in her arms, kneels before a statue, we suppose, of the Virgin.—M. Meissonnier's *The Lost Game* (455) is, comparatively speaking, so ineffective and rough in execution that one might be excused for attributing it to another hand than his.—*The Young Student* (459), by M. E. Frere, will please many.

FINE-ART GOSSIP.

Mr. Frith is far advanced with that which will be his most important work, a picture which is about eight feet long, and contains many figures. The subject is 'The Last Sunday at Whitehall before the Death of Charles the Second,' as described by the Diarist. The persons represented are the king and his duchesses, musicians and courtiers; the Diarist himself is placed behind them. This work will appear at the next Academy gathering.

The National Gallery, British School, which is temporarily housed at South Kensington, has just received a noteworthy addition by means of the donation by Mrs. Martha Beaumont of two fine portraits on one canvas, by Reynolds, half-lengths of gentlemen in Vandyke dresses; the one holds an engraved portrait of a clergyman in his hand, the other looks over. This picture is in good condition, and is entitled 'Portraits of Two Gentlemen.'

Mr. Woolner has just finished one of the most beautiful modern sculptured monuments. This is in alto-relief, to be erected near the altar of the church at Wrexham, and is intended to commemorate the wife of Mr. Archibald Peel, son of General Jonathan Peel. The lady died not long since, and soon after the death of her infant son. From this circumstance Mr. Woolner has derived what may be called the incident of his sculpture. The lady is seen as if received at the entrance of a heavenly abode by an angel or genius, who bears in arms the formerly lost infant, and allows it to stoop forward to caress once more the fainting mother, who, in an ecstasy, hesitates at the moment of ascending a step at the gate of the "heavenly mansion." The child, leaning forward, with the sweetest conceivable attitude of caressing, places one hand behind the mother's head, the other beneath her chin, with a very tender action, that may seem commonplace enough to a reader,

but which, when seen, is obviously possessed of pathos. As the child thus leans forward, its weight is borne by both hands of the genius, the one under its side, where the flesh softly yields to the pressure; the other bears up one of the child's feet, the action of which, no less than the subtle manner of rendering the effect of such a weight upon the arm and hand of the genius, is beautifully and most thoughtfully expressed in the sculpture. The arm is exquisitely carved, from the delicate modelling of the upper portion of the limb to where the tendons of the wrist pronounce themselves. The child's feet are diverse in action; that which the genius sustains clasps the hand with the toes; the other—which is free from pressure—hangs free in front, so that the toes are not in action. There is purity, quite free from commonplace sentiment, in the face of the genius, withal singular and peculiar beauty. Not less grand is the figure of the genius, in the full dignity and grace of its contours, that are perfect in execution. The fluttering drapery and hair express the lightness of this figure no less than its ineffable freedom of motion. Contrasted with this admirable figure's freedom and gravity of attitude, and suave dignity of design, are the mother's form and draperies, which, on the other hand, as if to express the sinking ecstatic placidity of her state, fall in broad and simple folds, or adapt themselves to the slender form and pure contours within their substance. The face of the mother expresses, with extraordinary delicacy and perfect feeling on the sculptor's part, the languors of attained delight that are too great for demonstration by the frame.

Mr. A. Cooper has tendered his resignation as full R.A., and retires to the Honorary Academician-ship. This act creates another vacancy. In the next election, of E.A.s and A.R.A.s, the new laws will be carried into effect, and the Associates vote with the full members.

The works of restoration at St. John's Gate, Clerkenwell, are to be continued at the further cost of a relation of the late Mr. B. Foster, who began the, in this case, good work of renovation. The modern staircase is to be removed from the west side of the gate, the rooms restored to their original size, the wood-work cleaned and put in order; the wooden newel in the north-west tower and the stone doorway, so far as the altered level of the ground permits, are to be restored.

Wren's church of St. James's, Westminster, has been closed for repairs for some time past; these works are now completed, to the great benefit of the interior, inasmuch as the architect's original intentions with regard to its arrangement and appearance have been, at least to a great extent, realized. The organ has been placed in a less injurious position than heretofore, and is to be greatly increased in power.

The recent discoveries of ancient work beneath the altar at Westminster Abbey, as stated by us some weeks since, have led to the re-consideration of the plans, which, until then, were in process of execution on that famous spot. It is probable that the new rerados—which was designed by Messrs. Clayton & Bell, and produced by M. Salvati—will not be erected in the originally-intended manner. Some time, probably twelve months, may elapse before we shall have an opportunity of examining this important work in its proper situation.

Messrs. A. Mansell & Son, of Gloucester, have published a valuable series of photographs, forty in number, and apparently taken from lithographed or copper-plate engraved drawings of the famous and more ancient frescoes in the Campo Santo, at Pisa, by Benozzo Gozzoli, or Pietro di Orvieto, Spinello Aretino, Antonio Veneziano, Giotto, Buffalmacco, Simone Memmi, Orcagna, Laurati, and Bruno. Although it would have been desirable to reproduce this series in completeness, and direct from the frescoes themselves, the collection before us, notwithstanding the rather small size of the photographs, is most welcome as supplying memoranda for reference. The forty works in question leave, we are bound to add, but one or two pictures and a few comparatively unimportant fragments unrepresented here. Essentially, this is the Campo Santo. Few care for copies of the

seventeenth-century pictures which have space on the walls of the famous burial-place. As a gift-book of the graver sort for artists and archaeologists, no less than for general use, we cordially commend this publication.

The opening address of the President of the Institute of British Architects was delivered on the 5th inst. Mr. Beresford Hope reviewed the positions of the Society and the profession, their relationship and influence. He alluded, as was to be expected, to the so-called "loss" which might occur by the destruction of Burlington House, and described the positions of the Royal Academy, the National Gallery, the Courts of Justice, the arrangements for the forthcoming contribution to the Exposition in Paris; as regards architecture in this country, the Architectural Museum, the history of its origin and connexion with the South Kensington establishment. The President added some interesting and pertinent remarks on the series of prizes that have been offered by the Council of the Society, the first of which is for a Gothic theatre, a preference for the style of which he acknowledged, together with belief in the peculiar aptitude of the style to modern theatrical requirements. He also stated a conviction that recent architects had overlooked this alleged fitness, and gave perfectly valid reasons for the advantages he claimed as the birth-right of his favourite style. The second subject for a prize is the restoration of old St. Paul's Cathedral, a very curious and nearly perfect subject for an essay; the original he believes to have been more like Ely Cathedral than any other of our known great churches. Mr. Hope alluded to the destructive "restoration" of Lincoln Cathedral with that regret, and we suppose some share of that profound shame, for the inconceivable ignorance and obstinacy which neglected, if they did not resent, the remonstrances and expositions of those most competent and disinterested advisers who spoke of "the deplorable scraping" to which the once noble Minster has been subjected by those whose obstinacy scarcely excuses their ignorance, and is not accounted for by their indifference.

MUSIC AND THE DRAMA

THE EDINBURGH CHAIR OF MUSIC.

THE fact stated as follows by a Correspondent, might have been foreseen:—

"Being one who has cordially agreed with your strictures on the recent appointment to the Music Chair in our University, I write to inform you of the last stage in the proceedings. Prof. Oakeley has intimated to the *Senatus Academicus* that the state of his health is such as to prevent him doing any work here this winter. He sent a medical certificate from Brighton that his nerves were much shattered, and that he required complete rest for some months. This singular upshot to an unfortunate and discreditable job is, I think, worth mentioning in the *Athenæum*."

A second communication on the subject must be added:—

"As you may be interested in knowing how the Music Chair at Edinburgh—the most richly endowed in the kingdom—is getting on, I may mention that I inquired this week at the office of the University secretary, when that gentleman informed me that as Prof. Oakeley is in bad health there will be no music class during the session now commencing. I understand Prof. Oakeley has just applied for three months' leave, which the *Senatus*, though indignant, have granted. They asked if he would be prepared, at the expiry of the leave, to lecture, but he did not promise to do so. In February last, at the time of the Reid Concert, the Professor addressed the students, and assured them he meant to make the class a reality, and to do his work earnestly and honourably. He was then in good health, and has had ample time to prepare lectures; yet though he has been appointed upwards of a year, he has not once lectured. Of thirty-four professors in Edinburgh University, all give lectures each session, and not one is non-resident during session but Mr. Oakeley. No one could object to his not lecturing when he is ill, but there is the handsome allowance of 200*l.* a year provided for an assistant. Year after year these

lectures have been put off, and the object of the munificent founder frustrated, to the discredit of the University of Edinburgh."

The discredit in this matter of the Reid Chair at Edinburgh is twofold; the first on the part of those who preferred a Professor merely because of family connexions; the second on the part of the gentleman thus appointed, presuming that he can satisfy himself to draw salary for work not done—not as yet even touched. The story is, throughout, one most disagreeable to follow, but one which ~~will~~ be followed, in every interest of Art. We wait for the sequel.

CONCERTS.—Mr. Mellon does not slacken his efforts as his concerts draw towards a close. Among the latest events of his performances has been the engagement there of Mr. Walter Bache, the pianist—Madame Goddard played at the *Popular Concert* on Monday Dussek's noble "Invocation" *Sonata* and Mendelssohn's *Sonata* in D major, with violin cello. The singer was Miss Edmonds. Mr. Sullivan's songs seem coming into request, Mr. Santle having given a new one at the first concert with such applause that it is to be repeated. There is really no need to travel about the world with 'Kitty Bonnet,' or 'Maria in the Back Lane,' by way of gratifying a public! We shall not cease to draw attention to every proof that sense in poetry and science, conjoined with sweet sound in music, have not lost their charm in this country, in spite of the persistent attempts of some among our bee-singers to degrade, in place of raising, the taste of their audiences. There has never been a time in England when trash was less essential to popular musical enjoyment than at the time present. There has never been a time when it has been so pertinaciously thrust on the public.

The managers of the *Crystal Palace* concert leave no stone unturned in the production of novelty. This day week the principal orchestra pieces were Haydn's ninth Symphony of the *Salm* mon set, Mendelssohn's 'Meerestille' overture almost matchless among sea pictures, and three pieces of the music written by Schubert for Madame von Chezy's stupid drama, 'Rosemonde.' No recent case of rescue and disinterment has excited greater interest than this. Every day's experience, without deadening our sense of the disproportion which impairs many of the composer's most ambitious efforts, cannot but quicken our appreciation of his deliciously poetical fancy—of his affluence in a vein of German melody entirely *sui generis*, perfectly distinct from those of Haydn, Mozart, Beethoven, and Weber,—of his amazing fertility which bore him up against want of hearing for the productions which possibly he valued the most, and which (to name but one, the *Mass*, lately published, rich in beauties of the highest and most religious order) contain many separate portions as exquisite and distinguished as the *Lieder* by which he at once rose into a special fame. For the moment we must condense from the *Times* the account there given of these remarkable fragments. They were "an *entr'acte* in B minor, a romance for mezzo-soprano voice, and an *entr'acte* in B flat major. The first *entr'acte* (*allegro molto moderato*) and by far the most important, is one of those magnificently gloomy inspirations with which Schubert was so frequently visited. The sudden transition from the minor to the major key near the close is one of the most extraordinary surprises in music; but the entire movement is a masterpiece of sombre colouring. A sense of power is ever there, and a feeling that the master is bending you to his tone of mind with irresistible fascination. The other *entr'acte* (*andantino*) is of a wholly opposite character. Those acquainted with the charming pianoforte *improvisations* in the same key (B flat major) will recognize a slight reminiscence in the opening bars, but all the rest is different. This *entr'acte* is one unbroken flow of tone—in a strain of gentle softness of its kind unique—and arranged for the orchestra with consummate art. We can hardly recall an unpretentious score more full of subtle and delicate touches. The performance of these remarkable *entr'actes* would alone have repaid a visit to the Crystal Palace. The *entr'actes* were heard with Schubert's own instrumentation. Not

so the romance ('Der Vollmond strahlt auf Bergeshöh'n'), the instrumental parts of which are unfortunately unobtainable. Herr Manns, however, undertook the not very grateful responsibility of scoring the accompaniment for orchestra; and though we cannot but think it would have been discreeter, under the circumstances, had he used the pianoforte arrangement, we must in fairness compliment the zealous conductor on the good taste and extreme ability with which he has accomplished his task. The romance—a beautiful romance even for Schubert—was sung with such charming expression by Mdlle. Enquist as to win a hearty and unanimous encore."—To-day Handel's 'Alexander's Feast' is to be given. If Herr Manns is in such force as to be able to bring forward choral works on so large a scale, why should he not extend our obligations in *re Schubert* by producing the best numbers, if not all, of the Mass aforesaid?

PRINCESS'S.—On Monday was produced a four-act drama, on the subject of 'Barnaby Rudge,' which gives a new view of it, according to our English notions, but one we believe perfectly familiar to American audiences. It is probable, indeed, that Messrs. Watts Phillips and Vining have somewhat moderated the tone of the Transatlantic version, and that they have, in more senses than one, "adapted it to the stage, and expressly for this theatre." With the play, the chief performer in it is imported, "the celebrated comic actress from America, Mrs. John Wood," who made her "first appearance in London," on Monday evening. The part which she has made the leading character in the piece is *Miss Miggs*, whom we all know as the splanetic spinster of Mr. Dickens's novel, but whom we should scarcely recognize in "the Yankee girl" of Mrs. Wood. This lady evidently follows in the steps of Mrs. Barney Williams and Mrs. Florence, as an eccentric character-actress; but while she far outstrips them in the extravagance of her caricature, she is much inferior to them in those more natural touches of acting by which the burlesque is redeemed within the limits of legitimate Art. Mrs. Wood aims only at the absurd, and affects the most awkward attitudes, and the coarsest utterances, to compel the unreflecting laugh. There is undoubtedly fun in what she does, but it is hard and forced, and also bolstered up with conventional tricks which, with the vulgar low-comedian, are the substitute for real humour. Unfortunately for Mrs. Wood, the precise quality of her style was detected early in the evening, and considerable sibilation was audible. As might have been expected, the manager was aroused to a sense of her danger, and gallantly came to her rescue. Accordingly, at the end of the third act, Mr. George Vining announced that he had been watching his audience from a private box, and there were some hissing individuals whom he should like to expel. "To the degradation of their manhood," he exclaimed, "they had hissed a lady who was a stranger to this country." Such an exhibition of bad taste stands self-condemned. With regard to the play itself, we may add that it very imperfectly represents the substance and characters of the novel, omitting many of the latter, and altering the former to suit stage exigencies; and that it is very clumsily constructed, so that it gives no clear outline of any story at all. It consists of long-sustained scenes, which are made endurable only by crowded groups, and the eccentricities of the principal performers,—for Mrs. Wood is not the only offender who seeks to secure attention by stage tact rather than by true histrionic merit. There seemed to be a general understanding that each was to make himself as ridiculous or as violent as possible,—that effect might be produced anyhow, so that it was produced. We may except from this censure the *Gabriel Varden* of Mr. E. Shepherd, who certainly acted like an artist; and the *Sir John Chester* of Mr. J. G. Shore, who attempted the fine gentleman with much success. Mr. Charles Horsman, as *Maypole Hugh*, was a striking personage, but not enough careful in some situations, which should scarcely have been ventured or suffered on the boards at all. The part of *Barnaby Rudge* himself was picturesquely realized by Miss Katherine Rodgers, who gave to her portion of the dialogue a

natural pathos, which favourably contrasted with the artificial delivery of the rest; nevertheless, she too sinned by an exaggeration of manner, which it will be wise in her to subdue on future occasions. Two songs were introduced; one, entirely new, sung by Miss Augusta Thomson, who represented the part of *Dolly Varden*, and the other by Mrs. John Wood, entitled, "My Love he is a Prentice Boy," a shrieking ditty, usually sung by her in the United States. The scenery, by Messrs. Lloyds & Hann, was throughout superb; particularly one scene in the second act, in which the setting sun, in its transit from glory to shadow, was grandly portrayed. As a spectacle, the production is magnificent; as a drama, below criticism.

STRAND.—A new comedietta, by Mr. John Oxenford, was produced on Saturday under the title of 'Neighbours.' The piece is in two acts, and makes us acquainted with one *Mr. Ebenezer Block* (Mr. Parselle), who has retired to Pedlington, a country town, where he meets with *Mr. Benjamin Bunn*, who, though formerly only a pastry-cook, is elected mayor, notwithstanding that Block himself was a candidate for the office. Block's daughter, also, is in love with an artist, whereas he intends her for a wealthy husband. Bunn's daughter, meanwhile, is in the same predicament in relation to a foppish cousin. But *Miss Marian Block* (Miss Ada Swanborough) is a clever girl, and suggests to her father that the true object of her own lover's attachment is *Angelina Brown* (Miss Fanny Hughes). Having failed to induce old Bunn to consent to their union, he counsels an elopement. Marian and *Frederick Mastick*, her lover (Mr. Gaston Murray), are disposed to take his advice to themselves, and, indeed, proceed to act upon it; but honest scruples intervene, and ultimately they confess all, and obtain old Block's consent. The sprightliness of the dialogue compensated the slightness of the plot, and, being well spoken, sustained the interest, so that the piece was more than usually successful.

MUSICAL AND DRAMATIC GOSSIP.

THE publication of Mr. Benedict's *Canata*, 'St. Cecilia,' by Messrs. Lamborn Cock & Co., may be here announced.

The energetic gentlemen of Birmingham are already up and doing with a view to next year's Festival. It is to open on the 27th of August.

The concerts of the *Sacred Harmonic Society* will commence on Friday next, with Beethoven's Mass in C and Mendelssohn's 'Lobgesang.'

The following reply to a communication from an intelligent instrumental amateur, with reference to the variety possible to be given to concerts made up of non-professional players, may not be without general interest:—"We should only," says the writer, "be too happy to offer variety, but the difficulty we feel is *how* to do it. We have a very extensive library of music already, and there are those amongst us always ready to present the Society with new pieces when wanted; but it is not desirable, I think, for amateurs to fly at such high game as the 'Italian' and 'Scotch' and 'Power of Sound' symphonies. Better stick to Haydn and such like, which we can play very creditably, and which always please, than make a hash of Mendelssohn and come to grief! Again, our best men (fiddles), too, are so wonderfully impressed with classic music, that were we to suggest a waltz, for the sake of variety, one-half would walk out of the orchestra, and the other moiety would not play, or, if they did play, they would do their best to play the — with the music. What is to be done, then?"—We are not wholly inexperienced in the difficulties besetting caterers for amateur societies, in part arising from that want of self-knowledge which permits players to attempt that for which they are manifestly unfit, and singers to fly "at the game" of the newest bravura, not always safely brought down by the opera queens and kings of the minute. It would appear on theory inconceivable that refined and appreciating persons (such as are the majority of our musical amateurs) can be so deaf to their own inevitable shortcomings as is the case. The difference betwixt what is almost tolerable and altogether

complete in execution,—betwixt a vain struggle with difficulties and that conquest over them lacking which there is no real Art,—is greater in no other world of imagination than that of Music. It was disregarded of this distinction which, some years ago, made an end of Mr. H. Leslie's well-organized and zealously-directed amateur Society. No magic of mutual admiration could make its audiences conceive that Beethoven's C minor Symphony and works of the kind could be adequately presented there. Yet, without audiences, amateur musicians thrive worse even than professional ones do; seeing that, whereas the latter may sue for their pay in public court of law, whether they succeed or not, the former can hardly dispense with private praise and sympathy. Surely the programmes of Mr. Halle at Manchester, and of Herr Manns at the capital Crystal Palace concerts, might be studied with advantage by the managers of amateur entertainments. There are single movements in orchestral works perfectly accessible to such players as can be assembled. There are such things as *entr'actes*, which, nevertheless, are not waltzes. There is a large amount of ballet music (Gluck's among the rest, and the best) lying about among the scores of foreign, and especially French, operas. To produce these adequately in their own characteristic fashion would be for the players a better thing to do, and for the audiences more amusing to hear, than for incomplete players to "toil and moil" at effects which are totally impossible to be brought out by those who come together.

Mrs. Kemble, every true lover of Shakespeare will be glad to hear, is again giving dramatic readings in the provinces. Miss Glyn is about to do the same thing in London; and at her reading of 'Macbeth,' Mr. H. Leslie's capital choir, with the aid of "principals," will sing the equivocal music ascribed to Lock, possibly belonging in reality to Eccles. The whole thing is a mistake because an interpolation.

Cherubini's magnificent 'Requiem' in C minor (*the 'Requiem'* we cannot but think) has been executed at the first of the Gürzenich concerts at Cologne.—The Mass to be given by annual usage in Paris on St. Cecilia's Day, is to be Beethoven's 'Missa Solennis' in D.—A mortuary Mass was performed the other day, in the church of St. Roch, for the souls of the victims of the late frightful American catastrophe,—the wreck of the *Evening Star*, which involved the destruction of an entire Opera company.

Madame Cziliag, announced by some of our contemporaries as a complete novelty, is about to try her fortune before the fastidious audience of the Italian Opera at Paris. In London, when she was some years younger, she was not able to maintain her ground.—Mdlle. La Grée (an artist to whom our public failed to do due honour) appears to have made a Parisian success as *Desdemona*. But, then the journal which recounts this has equal praise for Signor Pancani!—the *Otello* of Signor Rosmini's finest tragic opera.

The *Romeo*, of M. Gounod's coming Shakespearean opera at the Théâtre Lyrique, is not after all to be M. Capoul, for whose possession managers have been fighting as though he were a (tenor) pearl of great price, but M. Michot.

The re-opening of the revived Teatro Fenice at Venice (closed so long by political doubts and disasters) has not been brilliant. The truth seems to be that there are not, at the time present, vocalists enough to serve the theatres of Italy.

Herr Albert's 'Astorga' has been produced with great success (we are told) at Leipzig. Marschner's 'Templar and Jewess' is to follow it. A new setting of what—no offence to M. David's 'Herculanum'—we deem an intractable story for the stage, 'The Last Days of Pompeii,' by Dr. Muck, is in preparation at Darmstadt.

MISCELLANEA

Reproduction of Manuscripts.—The increasing demand amongst literary men and students for the materials necessary to them in pursuing their studies amidst the higher branches of literature, and the difficulties of obtaining access, except to the few who reside within a limited distance, to those

original sources of information which are contained in many of the manuscripts preserved in the national libraries of Europe, renders it necessary that some means should be taken to supply the desideratum. I venture to suggest whether this could not in part be effected by photography. If a few important manuscripts were selected and negatives of them taken page for page, copies could be obtained from these, which even were they no larger than a *carte de visite*, yet, if carefully taken, would, by the aid of a common reading-glass, become of the utmost service to many who at present are unable to consult the originals, and thus, at a trifling expense, almost fac-similes might be possessed not only by our many public libraries, but also be brought within the reach of a numerous class of students and others who, debarred by present difficulties, would gladly avail themselves of this opportunity for studying and comparing some of the most valuable documents contained in the various European libraries. Nor would the advantage thus produced end here; it would tend, by giving a greater impulse to the reading and deciphering of ancient manuscripts, to perfect the knowledge of our historical sources, and at the same time faithful copies of the text would be preserved of many precious manuscripts, so that in the event of any accident ever occurring to the originals the severity of the loss would thus in some slight measure be mitigated. D.

Egyptian Locks in Devon and Cornwall.—In your review of Mr. Tildesley's article on locks, you give a quotation from him that the Egyptian lock "may still be found in the Faroe Islands, and in some parts of Devon and Cornwall." The statement has been repeatedly made that these locks are known in Devon and Cornwall; but after many inquiries, I have failed to discover them. I should be greatly obliged if any of your readers can give me any reliable information on the matter. I have specimens of these locks from Egypt and the Faroe Islands, and there were some also in the Great Exhibition of 1862 from Chili, all identical in principle, and differing but slightly in details.

JOHN CHUBB.

57, St. Paul's Churchyard.

Disputed Readings.—You perhaps may again find room for a word or two on Shakspeare readings in illustration of what I have already said in your columns on the necessity of not altering a word unless it is clearly a misprint, and of attending to the sound of a word or expression that appears erroneous, on the supposition that the text was read to the printer. In 'Twelfth Night' (act 1, sc. i.) is the well-known passage,

—It had a dying fall;
Oh! it came o'er my ear like the sweet sound
That breathes upon a bank of violets,
Stealing and giving odour.

The word *sound* has been objected to by all the commentators from Rowe downwards, and no end of substitutes have been suggested. Now, the expression "to sound" is used in 'As You Like It' (act 5, sc. ii.) for "to swoon"; with this to guide us, why should not "sound" stand? meaning a sigh or sigh, "a dying fall" so very faint as not to break upon the general stillness. Perhaps there is not another single word that would so well convey the true shade of meaning sought. Using similarity of *sound* as a guide to restoration, Leonato, in 'Much Ado' (act 5, sc. i.), says, speaking of any one who could have been overwhelmed by such misery as his,

If such a one will smile and stroke his beard
And "sorrow wag" cry; hem when he should groan.

This is Knight's text, treating "sorrow wag" as a proverbial phrase. To say nothing of the utter dislocation of the pause and cadence, the interpretation seems very far-fetched. I should read, as retaining the sound and being much more in keeping with the train of thought,

And sorrow *gag*—cry hem when he should groan.

To *gag* sorrow is to stop its utterance, to think to choke down the cry that cannot be stifled. Leonato is justifying himself for speaking of his misery, challenges his hearers to find a man that can help it, and says, "but there is no such man." H. D.

Milton House, Ludgate-hill.

NEW PUBLICATIONS.

RE-ISSUE OF THE GLOBE SHAKESPEARE, IN FIVE SIXPENNY PARTS.

This day is published,
Part I. containing NINE PLAYS, price Sixpence.

Also, now ready, Complete, THE GLOBE EDITION OF SHAKESPEARE'S WORKS.

In One compact Volume, royal fcap. 8vo. beautifully printed & toned paper.

Edited by W. G. CLARK and W. ALDIS WRIGHT.
Paper covers, 2s. 6d.; cloth, 3s. 6d.

ARISTOTLE on FALLACIES; or, the
Sophistici Elenchi. With a Translation and Notes by ED-
WARD FORSTER, M.A., Fellow of Oriel College, Oxford. 8vo.
cloth, price 3s. 6d.

LESSONS IN ELEMENTARY PHY-
SIOLOGY. By T. H. HUXLEY, F.R.S. With numerous
Illustrations. 18mo. cloth, price 4s. 6d. [Just ready.]

TRIGONOMETRY for BEGINNERS,
with numerous Examples. By I. TODHUNTER, M.A.
F.R.S. 18mo. cloth, price 2s. 6d. [Just ready.]

NEW BOOK by Rev. F. D. MAURICE, M.A., Professor of
Moral Philosophy, Cambridge.

The COMMANDMENTS considered as
INSTRUMENTS of NATIONAL REFORMATION. By the
Rev. F. D. MAURICE, M.A. Crown 8vo. 4s. 6d. [Just ready.]

The ALPS of HANNIBAL By WILLIAM
JOHN LAW, formerly Student of Christ Church, Oxford. With
Map and Plan. 2 vols. 8vo. cloth, price 12s. [Just ready.]

GUESSES at TRUTH. By TWO
BROTHERS. New Edition. With new Biographical Notes
and Portraits. Extra fcap. 8vo. cloth, price 3s. [Just ready.]

The ILIAD of HOMER. Translated
into English Accented Hexameters. By Sir JOHN F. W.
HERSCHEL, Bart. K.H. M.A. F.R.S. &c. Beautifully printed
on toned paper, with Vignette, after the Antique, engraved by
Jeana. Demy 8vo. cloth, price 15s.

LEGENDARY FICTIONS of the IRISH
CELTS. Collected and Arranged by PATRICK KENNEDY.
With Vignette Title and Frontispiece. Crown 8vo. cloth, 7s. 6d.

TRAINING in THEORY and PRACTICE.
By A. MACLAREN (Oxford). With Frontispiece and
other Illustrations. Demy 8vo. handsomely bound in cloth,
price 7s. 6d.

"All rowing men, and in fact all men who contemplate training
for any object whatever, should read this book." *Land and Water.*

Fourth Annual Publication.

University by MACMILLAN & CO. London.

S. & T. GILBERT'S SELECT LIST OF VALUABLE BOOKS,

Chosen from their extensive Stock, and well worth the attention of all Book-buyers in search of really good Works on liberal terms, either for presentation, reference, or general reading.

> Insure the exact Books and Bindings described it is respectfully requested that application be made direct to S. & T. GILBERT, who have incurred the expense of placing the List before the Public.

Note the Address—No. 4, Copthall-buildings, back of the Bank of England, London, E.C.

MILTON and DORÉ.—Milton's Paradise Lost, illustrated with large and splendid designs from the Master Penril of Gustave Doré, with Notes and a Life of Milton, by Robert Vaughan, D.D., in 1 large folio vol. cloth, 4s.; pub. at 5s.

A LIBRARY IN ITSELF.—The Penny Cyclopædia of the Society for the Diffusion of Useful Knowledge, the Articles contributed by the most Eminent Authors, complete, with the Supplements, profusely illustrated with Wood Engravings, 30 vols. bound in 17, cloth, 3s. 15s.; pub. at 15s.

This fine work of reference is fast going out of print.

ENGLISH LIFE and SOCIETY.—The late John Leech's Pictures of Life and Character, being a Selection from Parson of the most celebrated Sketches by this lamented artist, comprising hundreds of illustrations from his spirited and humorous pencil, 4 vols. oblong folio, bound in 2, half morocco gilt, cloth sides, 2s. 15s.; pub. at 3s. 2s.

JOHN LEECH'S BEST SKETCHES.—Parson, a complete set, from its commencement in 1841 (Leech's first sketch appears in August of that year) to 1860, with thousands of humorous Wood Engravings by John Leech, Richard Doyle, John Tenniel, and others, bound in 20 vols. 4to. imitation half morocco, gilt edges, 6s. 10s.; pub. at 11s. 11s.

The SUPPRESSED VOLUME.—POEMS and Ballads by Algernon Charles Swinburne, fcap. 8vo. cloth, 7s. 6d.; pub. at 5s.; postage, 6d.

"That a book thus dealing with the desire of the flesh should have been denounced as profligate because it does not paint the outside of the Sodom's apple of the like colour of the ashes that it shows within, says little indeed for the thoroughness of current criticism."—*Examiner*.

A CHARMING BOOK for GIRLS.—Aunt Judy's Christmas Volume, edited by Mrs. Alfred Gatty, containing Tales, Poetry, Natural History, Emblems, Charades, Proverbs, &c., with 36 illustrations by Morten and others, cloth gilt, gilt edges, 4s. 2d.; pub. at 5s.; postage, 6d.

The OLD FAVOURITE.—Peter Parley's Annual for the New Year, full of amusing and instructive Stories, with Eight original Pictures, printed in Oil Colours, and upwards of 200 Engravings, cloth gilt, gilt edges, 4s. 2d.; pub. at 5s.; postage, 6d.

SPECIMENS of MODERN ART.—Idyllic Pictures, a series of choice Drawings by Barnes, Paul Gray, Pinwell, Houghton, Leitch, Edwards, Small, Thomas, and others, with appropriate Verses, many published for the first time, small 8vo. cloth elegant, 5s. 2d.; pub. at 10s. 6d.; postage, 1s.

Coloured from Nature.

A SERIES of STANDARD WORKS on Various Branches of NATURAL HISTORY, &c., produced with great care in the best style, at a moderate cost:—

1. MORRIS'S HISTORY of BRITISH BIRDS, with 350 finely coloured Engravings, 6 vols. royal 8vo. cloth gilt, 2s. 10s.; pub. at 5s.
2. MORRIS'S NESTS and EGGS of BRITISH BIRDS, with 225 exquisitely coloured Engravings, 3 vols. royal 8vo. cloth gilt, 2s. 2s.; pub. at 3s. 2s.
3. MORRIS'S BRITISH BUTTERFLIES, with 71 beautifully coloured Plates, royal 8vo. cloth gilt, 14s. 6d.; pub. at 20s.
4. LOWE'S NATURAL HISTORY of BRITISH and EXOTIC FISHES, with 225 finely coloured Plates, 5 vols. royal 8vo. cloth gilt, 4s. 4s.; pub. at 6s. 6s.
5. LOWE'S NATURAL HISTORY of NEW and RARE FISHES, containing Species and Varieties not included in Fishes, British and Exotic, 73 coloured Plates and Woodcuts, royal 8vo. cloth gilt, 14s. 6d.; pub. at 20s.
6. LOWE'S NATURAL HISTORY of BRITISH GRASSES, with 74 exquisitely coloured Plates, royal 8vo. cloth gilt, 15s.; pub. at 1s. 1s.
7. LOWER BEAUTIFUL-LEAVED PLANTS: being a Description of the most Beautiful in Cultivation in this Country, with 60 beautifully coloured Engravings, royal 8vo. cloth gilt, 14s. 6d.; pub. at 1s. 1s.
8. COUGH'S HISTORY of the FISHES of the BRITISH ISLANDS, with 255 beautifully coloured Plates, 4 vols. royal 8vo. cloth gilt, 2s. 11s. 6d.; pub. at 3s. 11s.

Still further Reduced in Price.

The Late DAVID ROBERTS'S GREAT WORK. Popular Edition. Sketches of the Holy Land, Syria, Idumea, Arabia, Egypt, and Nubia, by the late David Roberts, R.A., from the Lithographs by Louis Haghe, with Historical and Descriptive Notices and an Introductory View of Jewish History by the Rev. Geo. F. Hill, 250 plates, executed in the highest style of double-tinted Lithography. The 250 Prints, of which the work consists, comprise the Holy Land, Syria, Idumea, Arabia, Egypt, and Nubia.

6 vols. in parts, paper wrappers, pub. at 7s. 7s., reduced in price to 2s. 15s.; now reduced to 2s. 10s.

6 vols. cloth elegant, pub. at 10s. 10s., reduced in price to 4s.; now reduced to 3s. 10s.

6 vols. bound in 3, cloth elegant, pub. at 5s., reduced in price to 3s. 10s.; now reduced to 3s. 10s.

6 vols. bound in 3, whole morocco, elegant, pub. at 11s. 11s., reduced in price to 4s. 10s.; now reduced to 4s. 4s.

* S. & T. GILBERT'S only reason for further reducing the price of this beautiful book is want of room.

Still further Reduced in Price.

A MASTERPIECE of ILLUMINATION.

—The Sermon on the Mount, illuminated by W. & G. Audley, Architects. Chromo-lithographed by W. R. Tymms, with an illustration in the most perfect style of Chromo-lithography, after the picture by Charles Rolt.

The Work contains 'The Sermon on the Mount,' St. Matthew, chapters v. vi. vii. It is a series of 27 full-page illuminations, gorgeously executed in gold and colours, all of which are entirely different in design and treatment, with an illustration from a Picture painted expressly for the Work by one of the first Artists of the day. The size of the Work is 23 by 17 inches.

Artist's Proofs, on finest extra thick paper, bound in full morocco (only 210 printed), published at 12s. 12s., reduced in price to 8s. 6s.; now reduced to 5s. 5s.

General Copies on thick paper, handsomely bound in extra cloth gilt (only 200 printed), published at 8s. 8s., reduced in price to 5s. 5s.; now reduced to 3s. 3s.

* S. & T. GILBERT are much pressed for room, in consequence of their accumulating stock, and this is the only reason for the further reduction in price of this elegant work.

A MOST INTERESTING NOVEL.

DIARIES, DIRECTORIES, POCKET-

BOOKS, ALMANACKS, PEEPERAGES, and all Annuals for the New Year 1867, supplied at a discount of 2d. in the Shilling from the published price, for cash. Orders are recommended to be given at once, to insure early delivery.

DISCOUNT.—Although S. & T. GILBERT'S

recognized Discount is 2d. in the shilling, there are many books on which they can make a still more liberal allowance, as may be seen by reference to this List; but all New Books, no matter by whom published, including Medical Books and Law Books, supplied at a Discount of 2d. in the Shilling.

CATALOGUES of S. & T. GILBERT'S

extensive and varied STOCK, containing Books suitable for all buyers, from 1s. upwards, sent post free on application.

BOOK SHOW-ROOM.—At S. & T. GIL-

BERT'S Show-room may be seen all the principal Works of the day. Each work is marked in plain figures with the price fixed by the Publisher, from which a most liberal discount is allowed.

BOOKBINDING in every style of the

Art.—S. & T. GILBERT undertake the Binding of every class of work in the most approved and modern style of finish. Books entrusted to their care for Binding meet with careful attention, as none but the best workmen are employed and the best materials used. Estimates given.

MUSIC.—The FULL-PRICE SHEET

MUSIC supplied at half the published price, and sent post free. By applying to S. & T. GILBERT, stating clearly what is wanted, time will be saved, and the trouble and annoyance of writing to various places avoided.

OLD BOOKS.—S. & T. GILBERT have great

facility for obtaining OLD BOOKS out of print and scarce, and orders for Books of this kind meet with their particular attention and study. Information as to price and condition supplied free of charge.

FREE TRADE in BOOKS.—S. & T. GIL-

BERT were among the first to adopt the system of Free Trade in Books, and to offer to Book-buyers the utmost discount. They hope this fact will prompt the public to respond to their endeavours, as it is only by doing a large trade the system can be successfully carried out.

APPLY DIRECT.—It is respectfully requested

that applications be made direct to S. & T. GILBERT, who have incurred the expense of advertising this List, so that they may receive whatever benefit arises from the orders, and insure to the applicants the exact goods described.

SCHOOLS.—The Proprietors of Schools will

find S. & T. GILBERT'S Bazaar and General Catalogues first-rate mediums to select from for Prizes of all descriptions and cost.

FURTHER REDUCTION.—A further

Reduction will be made to Buyers of three or more Copies of the SAME WORK, and orders of 50l. and upwards sent carriage free to any part of the United Kingdom, Ireland excepted (carriage paid to Holyhead only).

WARRANTED PERFECT.—NOTICE.

The whole of the Books mentioned in this List are warranted perfect in every respect, and precisely the same as when issued by the various Publishers, and equally good as if the full published price were paid.

NOTE the ADDRESS.—S. & T. GILBERT,

Booksellers, 4, COPTHALL-BUILDINGS, back of the Bank of England, London, E.C.

"A thoroughly healthy book like this, equally pure in thought
and diction, with ample interest, and with almost every character
drawn with a firm and accurate hand, is a great boon."
—*Church and State Review*.
"The story is well written from first to last."—*Reader*.
"We are treated to a great number of carefully-drawn sketches
of English and French domestic life. These are all evidently the
work of an eye-witness, who has an artist's power of graphically
describing things as they actually exist; and the quiet, graceful
style of the diction adds to the charm of this very readable and
interesting volume."—*Public Opinion*.

THE CHRISTMAS GIFT BOOK, 1866.

"This will probably be the most superb volume ever published."—ATHENÆUM, Sept. 23, 1866.*"It has about it all the essential elements for success in precisely this very kind of enterprise—viz., adventurous publishers, skilled engravers, a gifted artist, and a poet whose verses are suggestive of what we doubt not they will receive from Gustave Doré's facile hand, superbly imaginative embellishments."*—SUN, Sept. 21.On December 1st, 1866, will be published, in imperial 4to. with paper and type *made expressly for the Work*, and in elegant cloth, price 21s.

E L A I N E.

By ALFRED TENNYSON.

ILLUSTRATED BY GUSTAVE DORÉ.

With Nine exquisite full-page Drawings on Steel, in the first style of art, by HOLL, BAKER, JEENS, ROBINSON, and others.

MONSIEUR DORÉ'S OWN OPINION OF THE ENGRAVINGS.—"Paris, October 24, 1866.—Nous aurons fait un très beau livre, un livre unique. Veuillez donc complimenter de ma part les artistes qui m'interprètent si bien."

The designs of this Artist have never yet been engraved on steel, and consequently have never been interpreted in their fullest sense. M. Doré has made these Drawings with special reference to this mode of Engraving, and it was at his earnest request that the Publishers determined to incur the great outlay necessary to produce this book. It is too the first time that M. Doré has illustrated the works of a contemporary author, and, to use his own words, he desires the work

*"To be a Monument to Mr. Tennyson and to his own powers."**"Mon frère a fait cette fois-ci le grand succès qui fera descendre son nom à la postérité."*—ERNEST DORÉ.

A few impressions of the Plates, Proofs before Letters, will be published, price Five Guineas, cloth; and to insure these it is necessary at once to apply to the Publishers or to the local Agent.

The Work may also be had, with Photographs from the Original Drawings in lieu of Engravings, price Two Guineas, cloth. These are printed by a special process by Wm. Jeffrey.

London: EDWARD MOXON & Co. Dover-street. New York: CASSELL, PETTER & GALPIN.

THE RECORD OF ZOOLOGICAL LITERATURE

For the YEAR 1865

(Second Annual Volume).

Edited by Dr. ALBERT GÜNTHER.

The object of the 'RECORD' is to give in an Annual Volume Reports on, and Abstracts of, the various Zoological publications which have appeared in the preceding year, to acquaint Zoologists with the progress of every branch of their science in all parts of the globe, and to form a repository which will retain its value for the student of future years. This Volume contains *résumés* of about 35,000 pages of the Zoological Literature of 1865, with references to more than 7,000 New Species.

street, Liverpool; 16, Market-street, Manchester; and Wolver-
hampton.

SILVER FIR FURNITURE, by HOWARD
& SONS.—The Nobility and Gentry are respectfully invited
to inspect the Furniture made by HOWARD & SONS of this ele-
gant wood; being manufactured by steam-power, although of the
best possible quality, the price is moderate.—25 and 27, Berners-
street, Oxford-street.

DELICATE and CLEAR COMPLEXIONS,
with a delightful and lasting fragrance, by using

THE CELEBRATED UNITED SERVICE SOAP TABLETS,
4d. and 6d. each. Manufactured by

J. C. & J. FIELD, UPPER MARSH, LAMBETH.

Order of your Chemist, Grocer, or Chandler.

THE OCEAN ST. LEGER of 1866.—What
Lord Lyon was to his Owner was the Tasping to her Captain,
viz. winner of the race, having distanced all Competitors, as the
BEST INDIA TEA COMPANY have invariably done in their
choice and sale of fine new season's teas, now selling at importer's
prices.—Warehouses, 9, Great St. Helen's Churchyard.

BREAKFAST.—EPPE'S COCOA
(more commonly called Eppe's Homeopathic Cocoa, as being
prepared and introduced by James Eppe, the Homeopathic Che-
mist first established in England). The very agreeable character
of this preparation has rendered it a general favourite. For
breakfast no other beverage is equally invigorating and sustain-
ing. This Cocoa is used by thousands who never used Cocoa
before. "Cocoa stands far higher than tea or coffee," Dr. Hamall
says.—Sold in 4 lb., 1 lb., and 1 lb. packets.

WILLIAM SMEE & SONS respectfully
caution intending Purchasers of the "SMEE'S SPRING
MATTRESS, TUCKER'S PATENT," or "SOMMER TUCK-
ER," against various imitations and infringements, preserving
somewhat the appearance of the Original, but wanting all its
essential advantages.

Each Genuine Mattress bears the Label "TUCKER'S PATENT,"
and a Number.

The "Smee's Spring Mattress, Tucker's Patent," received the
only PRIZE MEDAL, or Honourable Mention, given to Bedding of
any description, at the INTERNATIONAL EXHIBITION, 1863, and
may be obtained (price from 10s.) of most respectable Bedding
Warehousemen and Upholsters, and Wholesale of the Manu-
facturers, **WILLIAM SMEE & SONS, Finsbury, Moorgate**
Railway Terminus, London, E.C.

SAUCE.—LEA & PERRINS'
WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by Connoisseurs

"THE ONLY GOOD SAUCE."

Is prepared solely by **LEA & PERRINS.**

The Public are respectfully cautioned against worthless imita-
tions, and should see that Lea & Perrins' Names are on Wrapper,
Label, Bottle and Stopper.

ASK FOR "LEA & PERRINS'" SAUCE.

* * * Sold Wholesale and for Export, by the Proprietors, Wor-
cester: Messrs. CROSSE & BLACKWELL, Messrs. BARCLAY
& SONS, London, &c.; and by Grocers and Oilmen universally.

TONIC BITTERS.—WATERS' QUININE
WINE, the most palatable and wholesome Bitter in existence,
AN EFFICIENT TONIC.

An unequalled stomachic, and a gentle stimulant.
Sold by Grocers, Italian Warehousemen, Wine-Merchants,
Confectioners, and others, at 30s. a dozen.

Manufactured by **WATERS & WILLIAMS,**

2, MARTIN-LANE, CANNON-STREET, LONDON.

Wholesale Agents, E. Lewis & Co. Worcester.

GALVANISM, the great RESTORATIVE
of deficient vitality and muscular power.—Invalids should
send two stamps to Mr. HALSE, Warwick Lodge, 40, Addison-
road, Kensington, London, for his PAMPHLET on MEDICAL
GALVANISM. The extraordinary cures made by his appa-
ratus, after all Medicines and other Galvanic Machines have
failed, have been very remarkable, particularly on Paralysis,
Loss of Muscular Power in any part, Spinal Complaints, Indiges-
tion, Liver Complaints, Tio-dolourneur, Asthma, Loss of Sleep,
Paralyzed Children, Rheumatism, Sciatica, and in various com-
plaints, which it would not be right to mention, except by private
letter. Terms and price of apparatus in Pamphlet.

THE POPE'S HEALTH RESTORED by DU BARRY'S FOOD.
—Cure No. 63,413.—"Rome, July 31st, 1866.—The health of
the Holy Father is excellent, especially since abandoning all
other remedies he has confined himself entirely to Du Barry's
Refrigerant Arabica Food, which has produced a surprisingly
beneficial effect on his health, and his Holiness cannot praise
this excellent food too highly."—From the *Gazette du Midi*,
July 25th.

**DU BARRY'S delicious, health-restoring REVVA-
LENTA ARABICA FOOD** restores good appetite, perfect
digestion, strong nerves, sound lungs and liver, refreshing sleep,
functional regularity and energy to the most enfeebled or disor-
dered, without medicine, inconvenience, or expense, as it saves fifty
times its cost in other remedies, curing dyspepsia (indigestion),
constipation, flatulency, phlegm, debility, consumption, nervous,
bilious, liver and stomach complaints, low spirits, as proved by
60,000 cures, which had been considered hopeless. In tins, 2s.
and 11lb., 1lb., 2lb., 4lb., 6lb., 12lb., 25lb., 50lb., 100lb., 200lb.,
REGENT-STREET, London; all Grocers and Chemists.

**MORE CURES of CONSUMPTION,
COUGHS, ASTHMA, and DISEASES of the CHEST
and LUNGS, by Dr. LOCOCK'S PULMONIC WAFERS.**—From
Mr. C. Wain, Stationer, 40, Market-place, Hackneydown, York-
shire:—"Cures of Consumption, Asthma, and other diseases of
the Chest and Lungs, are regularly occurring here. To Singers
they are invaluable. They have a pleasant taste. Price 1s. 1d.,
2s. 6d. and 4s. 6d. per Box. Sold by all Druggists.

DAVID NUTT'S

DEPOT FOR FOREIGN LITERATURE.

FOREIGN BOOKS, OLD AND NEW, in every Branch of Literature.

WEEKLY and SEMI-WEEKLY IMPORTATIONS from the CONTINENT.

ORDERS for BOOKS not in Stock executed as quickly as possible.

PERIODICALS and NEWSPAPERS supplied by post.

New Catalogues preparing.

London: DAVID NUTT, 270, STRAND.

MILLER'S CATALOGUE OF BOOKS, Scarce, Curious, and Uncommon.—The New Number for DECEMBER, Just ready, gratis and post free for one penny stamp.—JOHN MILLER, Bookseller, 7, Green-street, Leicester-square.

UNIVERSITY COLLEGE, London.—PORTRAITS recently taken, uniform in style, of Professors Casell, De Morgan, Foster, Hirst, Key, Seeley, and others, price 1s. each (by post, 1s. 1d.). From Mr. Lewis, Gower-street; or Mr. OAKLEY, Photographic Studio, 162, Regent-street, W. Lists from Mr. Orellin on application.

THE CHADBURN LANTERN, for projecting enlarged Images upon a screen (similar to the Magic Lantern from opaque objects). This instrument supplies a great want in scientific and amusing illustrations; by its Coins, Medals, Moving Mechanisms (interior of watches), Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their grandeur and detail, thus rendering paintings on glass needless.—To be had direct from C. H. CHADBURN & SON, Opticians and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

THE LITTLE MODELLER; or, How to make the Cardboard Models.—A Model Village, beautifully coloured, a Model Railway, a Swiss Cottage, a Volunteer Review, a Cricket Field, a Model Farm, and a Watering Place. 350 Engravings, with full instructions, post free for 14 stamps.—H. G. CLARKE & CO., 252, Strand.

SALOM'S NEW OPERA and FIELD GLASS, and THE RECONNOITERER GLASS, price 10s. 10d., sent free.—This "Tourist's Favourite," through extraordinary division of labour, distinctly shows small windows 10 miles off, landscapes 10 miles off, and the sea 10 miles off. The MARQUIS of CARMARTHEN: "The Reconnoiterer is very good." The EARL of BRISBOL: "I find it all you say, and wonderfully powerful for so very small a glass."—EARL of CAITHNESS: "It is a beautiful glass."—REV. LORD NICHOLSON: "I approve of it."—LORD GIFFORD: "Most useful."—LORD GARRARD: "Remarkably good."—SIR DIONY CATLEY: "It gives me complete satisfaction, and is wonderfully good."—CAPT. SENDEY, Royal Small Arms Factory, Enfield: "I have found it effective at the 1,000-yards range."—F. H. HAWKES, of Farnley, Esq.: "I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power for its size with so much clearness."—The Field: "We have carefully tried it at an 800-yard rifle range against all the Glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price." Notes and Queries: "I have been sending tourists for boxes without without such an indispensable companion to a pleasure trip." The celebrated "HYTHIE" GLASS shows bullet-marks at 1,200 yards, and men at 34 miles, price 31s. 6d. All the above Glasses, respectively bearing the registered trade-marks, "Salom," "Reconnoiterer," and "Hythie," are only to be had direct from SALOM & CO., 98, PRINCE-STREET, EDINBURGH, and 137, Regent-street, LONDON.

No Agents of any kind anywhere.

BRITISH NATURAL HISTORY SOCIETY. GLASS CAPPED CIRCULAR BOXES.

Almost the entire number of these boxes, made under the superintendence of the Secretary during 1865, have been required for sending out the Collections of Fossils and recent British Shells to Subscribers, and it consequently has not been in the power of the Secretary to attend to applications for boxes without collections. Arrangements, however, are now in progress for making half-a-million of these boxes and of this number, ten thousand, consisting of Nos. 1, 2, 3, 4, 5, are finished, and in the hands of the following agents:—

Charles Pomeroy Button, 149, 148, Chancery, E.C.
T. Chubb, 10, Abchurch-lane, W.C.
H. Cutler, Bloomsbury-street, W.C.
James Gregory, Great Russell-street, Covent-garden.
E. Henson, 113a, Strand, W.C.
James How, 2, Foster-lane, Chancery, E.C.
G. Houldy King, 100, Great Portland-street, W.
F. P. Marrat, 2, Peveril-terrace, Edge-lane, Liverpool, and Derby Museum, Liverpool.
G. B. Sowerby, 45, Great Russell-street, Bloomsbury, W.C.
Jas. Tennant, 149, Strand, W.C.
T. Warren, Bookseller, Croydon.
Bryce Wright, 36, Great Russell-street, Bloomsbury, W.C.

A lithographic plan of the sizes and prices of the boxes will be forwarded on the receipt of a stamped addressed envelope.
EDW. CHARLESWORTH, Secretary,
British Natural History Society,
Whittington Club, Arundel-street, W.C.
November, 1866.

DORÉ'S DANTE.
DANTE'S INFERNO, with Seventy-six full-page Illustrations by GUSTAVE DORÉ. CARY'S Translation and Notes. Crown folio, price 50s.

OPINIONS OF THE PRESS.
 "The most Dantesque work on Dante that ever was produced from the Pontificate of Leo X. to that of Pius IX. M. Doré's sketches have for a considerable time attained a European celebrity, and any words that may be suggested to us by the splendid English edition now before us can scarcely add to or detract from it."—*Times*.
 "Messrs. Cassell & Co. have published a noble volume of Cary's text and Doré's illustrations. . . . The publication is a sumptuous one, and reflects the highest credit on the enterprising publishers."—*Saturday Review*.
 "Of the many sumptuous books of this season, Gustave Doré's 'Dante' (published by Messrs. Cassell, Petter & Galpin,) is not the newest, but it is one of the most important."—*Pall Mall Gazette*.
 "It is a grand book, and if looked at with intelligent eye, will not be forgotten after."—*Guardian*.
 CASSELL, PETTER & GALPIN, Ludgate-hill, London, E.C., and Broadway, New York.

NEW NOVELS TO BE HAD AT ALL LIBRARIES.

VITTORIA. By George Meredith. 3 vols. post 8vo. [In a few days.]

GEMMA. By T. A. Trollope. 3 vols. post 8vo. [This day.]

GRIFFITH GAUNT; or, Jealousy. By CHARLES READE. 3 vols. post 8vo. Second Edition.

"The whole story, from first to last, from the first plot of the low intriguer who falls in love with Gaunt's master, to the meeting between the two wives, is a rare example of that chastity of art which can be naked, intricate, naked, and yet pure.... We do not hesitate to pronounce 'Griffith Gaunt' a noble, though somewhat rugged, piece of prose."—*Spectator*.

ONLY GEORGE: a Story. 2 vols. post 8vo. [Second Edition this day.]

"It is written with extreme delicacy and good taste, several of the characters are hit off cleverly, and there are a number of sayings, terse, lively, and sensible, scattered up and down its pages. In a word, it is very pleasant reading."—*Times*.

"With only one or two exceptions, 'Only George' may be trusted by the anxious student as a faithful representation of manners and customs. The style is easy, natural, and graceful; and the whole atmosphere of the story is pervaded by good sense, and by wholesome and natural feeling."—*Saturday Review*.

SWEET SEVENTEEN: a Home and Colonial Story. By ARTHUR LOCKER. 3 vols. post 8vo. [Second Edition in the press.]

"We think we can promise those readers who are satiated with crime, and who feel that the newspapers supply heartrending incidents enough, without having such incidents repeated in the pages of fiction,—we think we can promise such people that they will meet with very good company in the novel now before us."—*Times*.

"Mr. Locker captivates the imagination of his readers with scenes alike humorous and innocent. Instead of making them endure his characters by rousing a morbid curiosity as to the sequel and result of a startling commencement, he leads them to enjoy his story by inspiring them with personal interest in its characters. From first to last the book is fresh with nature and unconstrained pleasantness."—*Athenæum*, Nov. 17, 1866.

CRADOCK NOWELL: a Tale of the New Forest. By R. D. BLACKMORE. In 3 vols.

"'Cradock Nowell' is a clever novel, decidedly original in style and mode of treatment: it is amusing too, and the reader who once fairly enters upon it will hardly fail to read it through."—*Athenæum*.

A PRODIGY: a Tale of Music. By H. F. CHORLEY. 3 vols. post 8vo.

"In our opinion, Mr. Chorley's last work is decidedly his best—is more natural in thought, more ripe in scholarship, more genial and more attractive, than anything we have yet welcomed from his pen. The plot of 'A Prodigy' is sufficiently intricate and mysterious for even these days of sensation, and is worked out with all the ability of a master of the art of story-telling. It is unnecessary to say that in all those parts where music is the theme—and they are, of course, many—the subject receives the treatment we have a right to expect from one of the soundest and most trenchant musical critics of the day."—*Court Journal*.

The New Story.

AUNT MARGARET'S TROUBLE. By a NEW WRITER. [Second Edition.]

"It is a charming book, and worth half a hundred fictions of the more ambitious and elaborate kind. In the work of a new and young writer we have to consider, not only the ability it displays or more remotely indicates, but also the cast of mind shown in the work. Thus, if a new book is all about illicit love and the slang talk of fast men.... we know at once what manner of author we have to deal with. But if the book be sweet and modest as this is, we know then that, whatever may be the strength or weakness of the future, we shall never be revolted by licentiousness or shocked by coarseness.... We shall at least have pure work and decent, and sorrow gently treated, and sinfulness dealt with as sinfulness should be dealt with in life—tenderly and yet abhorrently."—*Saturday Review*.

193, PICCADILLY.

THE
NEW ALDINE EDITION OF THE BRITISH POETS.

In 52 vols. fcap. 8vo. with Portraits, 12l. 18s. 6d.

MESSRS. BELL & DALDY, having become sole Proprietors of the Copyright of the ALDINE EDITION of the BRITISH POETS, originally published by the late Mr. Pickering, have endeavoured to give increased value to the new issue by a careful revision of the texts, by the correction of errors, and by the addition of any illustrative matter that recent literary investigation has provided. Nearly all the Authors have undergone this revision, and the services of the most competent Editors have been secured. The Publishers believe that the handiness of its size, the elegance of its external appearance, and the care which has been taken to secure correctness and completeness, render this the best, most accurate, and most scholar-like Edition that has yet been produced.

A very superior Large-paper Edition of the ALDINE POETS may also be had (sold in Sets only), price £18 18s.

Mark Akenside.

With a Memoir by the Rev. ALEXANDER DYCE. The Text is reprinted from the most authentic Editions, and Three valuable Letters, recently brought to light, are appended. 5s.

James Beattie.

With a Memoir and Notes by the Rev. ALEXANDER DYCE. 5s.

Robert Burns.

With a Life by Sir HARRIS NICOLAS, copious Notes, and a Glossary. The most complete Issue extant, embodying some entire Poems and numerous important variations contained in more than Two Hundred Autograph Letters of the Poet, collected expressly for this Edition. The allusions to his Poetical Works in Burns's Correspondence are appended to the Pieces to which they refer, in order to make the Author himself, as far as possible, the Illustrator of his Poems. 3 vols. 15s.

Samuel Butler.

With a Life by the Rev. JOHN MITFORD, and copious Notes, in which all important variations in the Text are displayed. 2 vols. 10s.

Geoffrey Chaucer.

Edited by R. MORRIS, Esq. With a Memoir by Sir H. NICOLAS; and a full Glossary. 6 vols. 30s.

Charles Churchill.

TOOKE'S Edition, carefully revised and corrected. The Text has been carefully collated with the old Editions, and all important variations marked in Foot-notes. With a Memoir by JAMES HANNAWAY, Esq., and a New Index. 2 vols. 10s.

William Collins.

Edited by W. MOY THOMAS, Esq. Great pains have been taken in this Edition to give the reading finally adopted by the Poet. With a Memoir by the EDITOR. 2s. 6d.

William Cowper.

Edited by JOHN BRUCE, Esq. F.S.A. This Edition is probably the most correct ever published, as doubtful passages have been carefully collated with all the most authentic Issues. It contains all the Miscellaneous Translations and some Copyright Pieces. With a Memoir by the EDITOR. 3 vols. 15s.

John Dryden.

With a Memoir by the Rev. RICHARD HOOPER, F.S.A. Carefully collated with the old Editions. Numerous Notes, including some of the most valuable Contributions of former Editors, are appended. 5 vols. 25s.

William Falconer.

With a Memoir by the Rev. J. MITFORD; and an Appendix, with Critical and Explanatory Notes. 5s.

Oliver Goldsmith.

With a Memoir by the Rev. J. MITFORD, and Two additional Poems. Carefully revised and annotated. 5s.

Thomas Gray.

With Notes and a Memoir by the Rev. J. MITFORD, and an Appendix containing some curious information about the Poet. 5s.

Henry Kirke White.

With a Memoir by Sir H. NICOLAS. Carefully revised and annotated by NORRIS DECK, Esq. 5s.

John Milton.

With a Life by the Rev. J. MITFORD, derived from the most authentic sources. The Text is accompanied with copious Illustrative, Critical, and Explanatory Notes. 3 vols. 15s.

Thomas Parnell.

With a Memoir by the Rev. J. MITFORD. 5s.

Alexander Pope.

With a Memoir by the Rev. A. DYCE. All obscure allusions are fully explained in the Notes. 3 vols. 15s.

Matthew Prior.

With a Memoir and full Notes by the Rev. J. MITFORD. 2 vols. 10s.

William Shakespeare.

With a Memoir by the Rev. A. DYCE. This Edition of Shakespeare's Poems includes the Songs from his Plays. 5s.

Edmund Spenser.

The Text and Life are taken from the Library Edition by J. PAYNE COLLIER, Esq. 5 vols. 25s.

Howard, Earl of Surrey.

Edited by JAMES YEOWELL, Esq. The Text has been carefully collated with the old Editions, and Notes have been added. With a Memoir by the EDITOR, containing fresh information about the Poet. 5s.

Jonathan Swift.

With a Memoir by the Rev. J. MITFORD. Allusions to topics of the day are explained in Notes. 3 vols. 15s.

James Thomson.

It is believed the Text of this Edition is the most accurate extant. With a Memoir by Sir H. NICOLAS, annotated by Mr. PETER CUNNINGHAM. Eight important Letters recently brought to light, addressed to Mallet, are appended. 2 vols. 10s.

Sir Thomas Wyatt.

Carefully Edited, with a Memoir, by JAMES YEOWELL, Esq. 5s.

Edward Young.

With a Memoir by the Rev. J. MITFORD; and some additional Poems. 2 vols. 10s.

London: BELL & DALDY, Fleet-street, and York-street, Covent-garden.

Oxford: Printed at the Clarendon Press; and Published for the University by MACMILLAN & CO. London.

MR. SKEET

HAS NOW READY—

GRASPING at SHADOWS: a Novel.

3 vols. By Mrs. MACKENZIE DANIEL, Author of 'My Sister Minnie,' 'Old Maid of the Family,' &c.
"In the study of the characters the reader will find much interest."—*Sunday Gazette*.
"It is one of the best of Mrs. Mackenzie Daniel's admirable works."—*Observer*.
"Of more than average quality. The style is as flexible as it is vigorous."—*Bell's Messenger*.

NO EASY TASK: a Novel. 2 vols.

By MARK FRANCIS.
"Is an interesting and dramatic work, telling plainly and amusingly a story that is worth telling."—*Sunday Times*.

SCENES in FRENCH MONASTRIES.

By ALGERNON TAYLOR, Author of 'Convent Life in Italy.' 1 vol. with numerous Illustrations, 10s. 6d.
"No one could be better qualified for such a book than a writer who, while he tells us that his deepest sympathies are with the political and social fruits of Protestantism, abjures all sectarian bias. He writes not only dispassionately, but with a thorough knowledge of his subject, and a full sympathy for its aesthetic as well as for its social and religious aspects."—*London Review*.
"A wide field of interesting travel—the result of five tours made in Provence, Avignon, Languedoc, Dauphiny, Lyonsnais, in Nevers, Paris and Boulogne."—*Observer*.

ELEGANT
GIFT-BOOKS

JUST PUBLISHED BY

WILLIAM P. NIMMO.

Small 4to. handsomely bound in cloth extra, gilt sides and gilt edges, 10s. 6d.; or Turkey morocco, 21s.

ROSES AND HOLLY:

A Gift-Book for all the Year.

With Original Illustrations by

GOURLAY STEELL, R.S.A.

R. HERDMAN, R.S.A.

SAM. BOUGH, A.R.S.A.

CLARK STANTON, A.R.S.A.

JOHN M'WHIRTER.

J. LAWSON.

And other eminent Artists.

Engraved by ROBERT PATERSON.

Uniform with the above,

Price 10s. 6d.; or Turkey morocco, 21s.

PEN AND PENCIL PICTURES

FROM THE POETS.

Uniform with the above,

Price 10s. 6d.; or Turkey morocco, 21s.

GEMS OF LITERATURE:

Elegant, Rare, and Suggestive.

"As pretty a volume as need ever nestle among the gifts under a Christmas tree, or greet a fair lady with good wishes on the opening morning of the new year."—*The Reader*.

"The artists in this book are new to us. They seem to be all Scotchmen, and not one of them but exhibits marked powers. The woodcutters are also all Scotchmen: so is the printer, so is the publisher. The volume is a highly creditable one to Scotch taste, artistic feeling, and liberality, and to everybody concerned in its production."—*Saturday Review*.

"For really luxurious books, Nimmo's 'Pen and Pencil Pictures from the Poets,' and 'Gems of Literature,' may be well recommended. They are luxurious in the binding, in the print, in the engravings, and in the paper."—*Morning Post*.

SECOND EDITION, NOW READY.

Just published,

Royal 16mo. handsomely bound, cloth extra, gilt edges, price 3s. 6d.

KARL-OF-THE-LOCKET

AND

HIS THREE WISHES:

A TALE

By DAVID SMITH.

"To that portion of the public which cares about knowing such things, it has not been unknown for some time that Mr. David Smith, brother of the poet, Alexander, is likewise in possession of the literary faculty, and even of the gift of song; but this beautiful little book, which will be the delight of all boys and the admiration of many men, so far as we are aware, is the first substantive work from his pen. Meant, as it is, for a boy's book, it presents a terseness in the style, a poetic tint in the language throughout, and a vividness in the descriptive passages, which we do not often find in such literature in England."—*Daily Review*.

Edinburgh: WILLIAM P. NIMMO.

London: SIMPKIN, MARSHALL & CO.

Sold by all Booksellers.

London: WM. SKEFFINGTON, 163, Piccadilly, W.

WM. H. ALLEN & CO.'S

PUBLICATIONS.

The History of the British Empire in

INDIA, from the Appointment of Lord Hardinge in 1844 to the Death of Lord Canning in 1859. By LORD KILGERRIE, late of the 2nd Bengal Fusiliers. 7 vols. 8vo. cloth (1865), 32s.

"Here we have before us the first volume of an eminently readable history.... The arrangement of the matter, the style, and above all, the spirit which pervades his pages, are worthy of great commendation. Mr. Trotter is singularly free from the taint of a partisan writer.... The volume concludes with a masterly criticism on Lord Dalhousie's character and services."
Calcutta Englishman, March 1865

Yesterday and To-Day in India.

By SIDNEY BLANCHARD, Esq. In 1 vol. post 8vo. *[Just ready.]*

97. Twelve Drawing-room Pieces.

98. Ten Nocturnes and Mazurkas.

99. Ascher's Nine Original Pieces.

MODERN ANTHEMS by EMINENT

COMPOSERS.

Published this day, price 3d. each (the set post-free for 1s. 8d.), the following Anthems:—

Grant, we beseech Thee, Merciful Lord.—Henry Smart.

O, be joyful in God, all ye lands.—Henry Smart.

The Lord preserveth the souls of His saints.—J. L. Hatton.

Like as a father pitieth his own children.—J. L. Hatton.

Thy mercy, O Lord, reacheth unto the heavens.—J. Barnby.

Let thy merciful kindness, O Lord.—J. Barnby.

"The Anthems before us are deserving of the highest praise, whether we regard them simply as pieces of scientific music, or as devotional compositions calculated to draw our minds from the things of this earth to the contemplation of things above. The diffusion of such music cannot but be highly beneficial to the general spread of good taste, and, if encouraged, to swamp the execrable rubbish too prevalent in our places of Divine worship."

—Chor., Oct. 6.

BOOSEY'S NEW STRING BAND MAGA-

ZINE, for Nine Performers (Septet, with Side Drum and Trombone). Price 1s. each Number. Now ready.

NEW AMERICA. By William Hep-
worth DIXON. 2 vols. 8vo.
[In the press.]

The LIFE of JOSIAH WEDGWOOD.

From his Private Correspondence and Family Papers in the
possession of Joseph Mayer, Esq. F.S.A., Francis Wedgwood,
Esq., C. Darwin, Esq. F.R.S., Miss Wedgwood, and other
authentic sources. By ELIZA KETTERVED. Dedicated to
the Right Hon. W. E. GLANVILLE. Complete in 3 vols. 8vo.
embellished with Portraits and above 300 beautiful illus-
trations. 42s. bound.

"We have to congratulate the authoress on the publication
of her Life of Wedgwood. We can award her the praise due to
the most painstaking and conscientious application. She has
devoted her whole mind and energy to her subject, and has
achieved a work not less creditable to herself than it is indis-
pensable to all who wish to know anything about English
ceramic art and its great inventor. The two volumes before us
are in themselves marvels of decorative and typographical skill.
More beautifully printed pages, more creamy paper, and more
dainty woodcuts have seldom met our eyes."—*Saturday Review*.

A BOOK ABOUT LAWYERS. By

J. C. JEAFFRESON, Barrister-at-Law, Author of 'A Book
about Doctors,' &c. 3 vols. 8vo. 3s. bound.

Principal Contents:—The Great Seal, Royal Portraits, The
Practice of Sealing, Lords Commissioners, Old Damasking, The
Rival Seals, Purves of State, A Lady Keeper, Lawyers in Arms,
The Devil's Own, Lawyers on Horseback, Chancellors' Cavalcades,
Ladies in Law Colleges, York House, Powis House, Lincoln's In-
nards, The Old Law Quarter, Loves of the Lawyers, The Three
Graces, Rejected Addresses, Brothers in Trouble, Feet to Counsel,
Retainers Special and General, Judicial Corruption, Gifts and
Sales, Judicial Salaries, Costume and Toilet, Millinery, Wigs,
Bands and Collars, Bags and Gowns, The Singing Barrister, Actors
at the Bar, Political Lawyers, The Peers, Lawyers in the House,
Legal Education, Inns of Court and Inns of Chancery, Lawyers
and Gentlemen, Law French and Law Latin, Readers and Moot-
men, Pupils in Chambers, Wit of Lawyers, Humorous Stories,
Wits in Silk and Puns in Ermine, Circuiters, Witnesses, Wit-
nesses, Lawyers and Saints, Lawyers in Court and Society, Attorney-at-
Law, Legal Haunts, Westminster Hall, Law and Literature, &c.
"These volumes will afford pleasure and instruction to all who
read them, and they will increase the reputation which Mr. Jea-
ffreson has already earned by his large industry, and by his great
ability."—*Athenæum*.

A WINTER with the SWALLOWS.

By MATILDA BETHAM EDWARDS. 8vo. with illus-
trations. 12s.

TRAVELS in FRANCE and GER-

MANY in 1865 and 1866; including a Steam Voyage down
the Danube, and a Ride across the Mountains of European
Turkey, from Belgrade to Montenegro. By Capt. SPENCER,
Author of 'Travels in Circassia,' &c. 3 vols. 21s.

LIGHTS and SHADOWS of LONDON

LIFE. By the Author of 'MIRK ABBEY,' &c. 3 vols.

"To great originality and the keenest possible sense of the
ludicrous, the author adds powers of observation actively em-
ployed and sedulously trained. The reader follows him with
equal pleasure, whether through the glowing fancies of fiction, or
the brief and humorous, the grave and realistic interpretations
of things as they are in this world of London."—*Morning Post*.

THE NEW NOVELS.

MADONNA MARY. By Mrs.

OLIPHANT, Author of 'Agnes,' &c. 3 vols.

"'Madonna Mary' is a book of great power and beauty—a per-
fect work of its kind."—*Morning Post*.

In 'Madonna Mary' Mrs. Oliphant has added another to her
many literary laurels. It is a story told with exquisite simplicity
and beauty, and full of the deepest interest."—*Star*.

CHRISTIE'S FAITH. By the Author

of 'No Church,' 'Owen,' 'Mattie,' &c. 3 vols.

ANNALS of a QUIET NEIGHBOUR-

HOOD. By GEORGE MAC DONALD, M.A., Author of
'Alice Forbes,' 'David Elginbrod,' &c. 3 vols.

"Mr. Mac Donald is a true poet. The 'Annals of a Quiet
Neighbourhood' are as full of music as was Prospero's Island;
rich in strains that take the ear captive when they are first heard,
and afterwards linger long upon it."—*Saturday Review*.

"The charm and value of Mr. Mac Donald's work need not be
sought. They present themselves unasked for in the tender beauty
of his descriptions, whether of nature or of life and character; in
his almost supernatural insight into the workings of the human
heart and in his unceasing fertility of thought and happy exacti-
tude of illustration. Whoever reads the book once will read it
many times."—*Pall Mall Gazette*.

KINGSFORD. By the Author of

'SON and HEIR.' 2 vols. 21s.

"A very good novel, written with great spirit. The plot is of
such ingenuity as to maintain the interest of the reader to the end.
The descriptions of scenery are capital, and there is great skill
shown in the drawing of character."—*Star*.

"One of the most interesting stories we have read this season,
and we are sure our readers will thank us for recommending to
them a work so attractive and enthralling."—*Star*.

LORDS and LADIES. By the Author

of 'MARGARET and HER BRIDESMAIDS,' &c. 2 vols.

RACHEL'S SECRET. By the Author

of 'THE MASTER of MARTON.' 3 vols.

LEYTON HALL, and other Tales.

By MARK LEMON. 3 vols. [Just ready.]

COMPLETION OF DR. FAIRBAIRN'S BIBLE-DICTIONARY.

Just published,

In 2 large vols. imperial 8vo. cloth, 3l. 12s.

THE IMPERIAL BIBLE-DICTIONARY,

HISTORICAL, BIOGRAPHICAL,
GEOGRAPHICAL, AND DOCTRINAL

By numerous Eminent Writers.

EDITED BY

REV. PATRICK FAIRBAIRN, D.D.

Author of 'Typology of Scripture,' 'Commentary
on Ezekiel,' &c.

With many Hundred Engravings on Wood and Steel.

BLACKIE & SON, 44, Paternoster-row.

FOR SCHOOL, COLLEGE, AND GENERAL REFERENCE.

Imperial 16mo. 826 pp. cloth, red edges, 18s. 6d.; half morocco, 12s.

THE STUDENT'S ENGLISH DICTIONARY,

ETYMOLOGICAL, PRONOUNCING and EXPLANATORY

By JOHN OGILVIE, LL.D.

With about 300 Wood Engravings.

"Altogether we think this is a very commendable work. Dr.
Johnson has said that 'Dictionaries are like watches; the best
is better than none, and the best cannot be expected to go quite
true;' but he who relies on this one will hardly ever find himself
mistaken."—*Daily News*.

"A complete though comprehensive Dictionary for the higher
class of English students, carefully prepared, well printed, and
published at a very moderate price."—*Notes and Queries*.

"A very valuable work, and one which, though chiefly intended
for the young student, will not seldom aid the mature scholar."
—*Edinburgh Times*.

"This is the best etymological dictionary we have yet seen at
all within moderate compass."—*Spectator*.

"This excellent work supplies a want which has long been felt
by teachers and pupils in our colleges and advanced schools."
—*Times*.

LONDON, SATURDAY, NOVEMBER 24, 1866.

LITERATURE

History of the United States, from the Discovery of the American Continent. By George Bancroft. Vol. IX., 1776 to 1778. (Boston, U.S., Little, Brown & Co.; London, Low & Co.)

COVERING the interval between the summer of 1776 and the spring of 1778, the Declaration of Independence, and the publication of the American-French treaty, this ninth volume of Mr. Bancroft's great work recounts the trials of George Washington during the gloomiest period of the struggle that resulted in well-deserved victory to the young republic; and with a full sense of the responsibilities of an historian venturing to deal with a subject of such grandeur and importance, the writer has done his utmost to prove himself worthy of his theme. From the date of Lord Howe's arrival at Staten Island on July 12, 1776, till the Christmas Day of that year, the commander-in-chief of the revolutionary forces had few grounds for hope, apart from confidence in the goodness of his cause, and a religious assurance that the God of Battles would not eventually permit the unjust to triumph; and whilst the leader strove to conceal his reasonable depression and fears, not a few of his less resolute and less patriotic followers surrendered themselves to despair. On both sides of the Atlantic clouds were rapidly gathering over the fortunes of the insurgents. In Europe the first announcement of the Declaration of Independence had caused impressions unfavourable to their purpose. In England the immediate effect of that bold renunciation of the mother-country was most disheartening to the small band of statesmen and politicians who had denounced the ministerial policy and demanded justice for the colonies. Englishmen, who were fully satisfied that the British Parliament had no right to impose taxes on the settlers of New England, could not see that the colonists were justified in revolution as well as resistance. To such men, scarcely less than to the most violent defenders of George the Third's ministers, it seemed that the dignity and authority of the Crown were to be maintained at any cost, and that the submission of the insurgent states must precede the enactment of measures for the relief of their grievances. Nor was this feeling confined to the mother-country. Though the French King desired nothing more than that Great Britain should be embarrassed by the discontents and commotions of her Transatlantic States, he was not prepared to sanction revolution, and give his support to principles which even his dull vision could see were fraught with menace and peril to monarchical interests. There were also other reasons which made the young Louis reluctant to take a step which would be necessarily followed by war with the first naval power in the world; and though he could not quench the generous enthusiasm of the youthful Marquis de Lafayette, —to whose chivalric mind the glory of fighting for liberty was far preferable to all the delights which princely wealth placed within his reach,—he turned from the solicitations of Vergennes with a prudent resolve to wait awhile before he committed himself to all that would inevitably follow his recognition of the new nation. Similar considerations influenced Spain. Thus the European agents of the American States endured the mortification of seeing their influence wane on the Continent, just at the time when England was making it clear to her conscience it was the duty of her king to punish

disaffection and subjugate rebels. "The new attitude of the United States," says Mr. Bancroft, "changed the relation of parties in England. The former friends to the rights of Americans as fellow-subjects were not friends to their separate existence; and all parties were summoned, as Englishmen, to unanimity. The virtue of patriotism is more attractive than that of justice; and the minority opposed to the Government, dwindling almost to nothing, was now to have against them king, lords and commons, nearly the whole body of the law, the more considerable part of the landed and mercantile interests, and the political weight of the Church."

Whilst this was the state of things in Europe, the affairs of the revolutionists were not more hopeful on the actual ground of struggle. With the exception of a small number of brave leaders, distrust and despondency prevailed throughout the ranks of the colonial malecontents. Jealousy of supreme power was the chief cause of their weakness. Having just broken from their connexion with a tyrant in Europe, they were resolved not to create for themselves a new tyrant nearer to their doors. To such a degree were the United States suspicious of each other that, after taking ample precautions to preserve their individual sovereignty and mutual independence, they could not, for their common security and the triumph of their common cause, bring themselves to invest their commander-in-chief with requisite powers or to furnish him with adequate supplies of men and arms. A similar distrust prevailed in all classes. The sentiment which Cobden happily designated "fireside jealousy" produced its natural fruit in dissensions and petty rivalries. Inferior captains of the army despised their commander; private soldiers had no faith in the ability or patriotism of their regimental officers; a considerable proportion of the non-belligerents had so little respect for an army of militiamen, drawn from just such people as themselves, that they could not believe in their ability to win a grand battle over regular troops. As might be expected, this faithlessness in and despair for the rebellion were less general amongst the rural populations than in the towns, where the official supporters of King George's Government were concentrated, where men had been trained in habits of respect for long-established authority, and where the consequences of war upon commerce and trade were most sharply and immediately felt. Amongst the superior classes of the colonists there was a general feeling that the rebellion would be speedily crushed by the King's troops; and consequently, many men who wished success to Washington's operations deemed it prudent to hold aloof from his army. "In New York," says Mr. Bancroft, "where two-thirds of the men of wealth kept aloof from the struggle, or sided with the enemy, the country people turned out of their harvest-fields with surprising alacrity, leaving their grain to perish for want of the sickle."

Whilst the timidity and jealousies of the colonists left George Washington to maintain the struggle with a handful of raw troops, the British Government poured mercenaries and munitions upon the scene of contest; and for a time their energy was rewarded with a series of successes. The battle of Long Island may not have heightened the lustre of British arms, but it was a grievous blow to the States, increasing the despondency of the people, whilst it compelled their commander-in-chief to withdraw his men from Long Island. Sixteen days later the King's army took possession of New York, in which city a conflagration, that broke

out just five days after the entry of the Hessians, consumed one out of every ten houses, and roused the victorious soldiery to wild and savage fury against the inoffensive populace. "The British troops," says the historian, "angry at the destruction of houses which they had looked upon as their shelter for the coming winter, haunted with the thought of incendiaries, and unwilling to own the consequences of their own careless carousals, seized persons who had come out to save property from destruction, and, without trial or inquiry, killed some with the bayonet, tossed others into the flames, and one, who happened to be a royalist, they hanged by the heels till he died." The affair of White Plains, a comparatively trivial reverse for the Americans, was followed by the disaster at Fort Washington; and during the dark days of his famous "retreat through the Jerseys" Washington saw from their conduct that the inhabitants looked upon his ruin as inevitable. "The men of New Jersey, instead of turning out to defend their country, made their submissions as fast as they could, moved by the wavering of their Chief Justice and the example of Samuel Tucker, who, though he had been president of the convention which formed the constitution of the state, chairman of the committee of safety, treasurer and judge of the supreme court, yet signed the pledge of fidelity to the British." It seemed that the Howes and the Hessians, aided by Indian mercenaries, were destined to carry all before them.

In Europe these successes, which to men of ordinary vision appeared the beginning of the end of the rebellion, lost none of their importance. They inflated with insolence the English ministers and their supporters, who by this time numbered ninety and nine out of every hundred persons in the entire population. Howe was extolled as the greatest general of modern times; and the King's firmness in declining to retire before his contumacious subjects was the theme of admiration throughout the country. Corresponding depression existed amongst the few Englishmen who still remained true to the colonies. "Franklin's troops," wrote Voltaire, giving utterance to gloom which possessed the hearts of those Frenchmen who wished success to America, "have been beaten by those of the King of England: alas! reason and liberty are ill received in this world." But whilst English ministers were congratulating themselves on their victory, and chuckling over the discomfiture of the rebels, intelligence was crossing the Atlantic of events that had altogether changed the aspect of affairs. Even in his retreat before an overwhelming force the American commander had snatched successive victories from his enemy. The brilliant surprise of Trenton—concerning which Lord George Germain exclaimed, "All our hopes were blasted by the unhappy affair of Trenton"—was followed by the battle of Princeton; and before the first month of 1777 had closed, Washington was in a position to order all the Jerseymen who had sworn allegiance to Britain to "withdraw within the enemy's lines, or take the oath of allegiance to the United States of America." It would have been well for British fame if our statesmen had seen the lesson of this change in the tide of war; but instead of yielding or making any overtures for a just settlement of the dispute, they continued the war with a brutal ferocity for which Burgoyne's capitulation and Cornwallis's surrender were insufficient punishments. Englishmen of the present day blush for the shame of their land when they read the story which sets forth the dealings of our ancestors with the red men who

were hired by English ministers to plunder and burn the homesteads of defenceless backwoods-men, and slay their inoffensive wives and children. "Il faut," said Le Corne Saint-Luc, the ruthless partisan, "lâcher les sauvages sur les frontières de ces Canals, pour imposer des terreurs, et pour les faire soumettre au pied de la Trône de sa Majesté Britannic." In accordance with this counsel, the savages were let loose upon the settlers, their women and their babes, to inspire terror and make them submit. It is enough to hint at atrocities the details of which shock humanity; and yet when Edmund Burke ventured to denounce the employment of such means of warfare, and to declare that red men armed with tomahawks were no fit allies for the King of England, no fit companions for British soldiers, or even for Hessian mercenaries, he was upbraided for his lack of patriotism, and sneered at in good society for his sentimental softness. Englishmen reverend by years and profession were heard to argue that, for the subjugation of rebels, ministers were bound to employ "every means that Providence had put into His Majesty's hands"; and amongst prosperous people at London dinner-parties it was an affair of good breeding to say that critics sitting in their arm-chairs in England had no business to condemn measures which received the approval of officers in America, who knew from personal experience the exigencies of the war, and were employed to bring it to an honourable conclusion. So his Britannic Majesty fought on with his Hessians and his red men, with results that justified Chatham's words, "My lords, you cannot conquer America." Mr. Bancroft's ninth volume, however, stops short of the date which witnessed the final justification of the elder Pitt's prediction, and closes with the reception of the American Commissioners by Louis the Sixteenth.

Smart Sayings of Great Personages. A Repertory of Wit, Anecdote, Apophthegm, and Repartee, of Statesmen, Courtiers, Divines, Lawyers, Actors, Poets, Painters, and Philosophers. (Darton & Co.)

THE title-page of this book bears for epigraph a supposed smart saying of Dr. Channing's, "One anecdote of a man is worth a volume of biography,"—the absurdity of which need not be demonstrated. The anecdote may be good in itself, but it will not enable us to mark the lights and shadows of a whole life. Any one ingredient of a compound mixture has but little in it, after all, of the one composite flavour. The choice of this epigraph or motto led us to doubt the editor's capacity for selection, and the latter seems to have been made rather from old books of *ana* than by a process of original reading, and notes made in the course of that process. It may be doubted, moreover, whether the collector understands the meaning of a "smart saying," of which he says, that "although necessarily brief, it may be either grave or gay in its subject." Can it be said of solemn truths that they are smart truths? Yet we find ranked among "Smart Sayings" the solemn lines by Francis Quarles on Man and Death; the sage advice of Polonius to his son; the profound earnestness of Luther's sentiments on children being educated in the love and fear of God; the definition of wisdom by Lavater; and the words of wisdom that fell from Jeremy Taylor. We should as soon have thought of describing an elephant as *lively*, or Dr. Johnson as a *smart fellow*, as including the terse gravity and truth of the great teachers of mankind among specimens of smartness.

It may be that the editor thinks it a smart

thing to joke with his readers. For instance, we have the following presented to us as a sample of the quality to which we have alluded:—

By all means use sometimes to be alone:
Salute thyself, see what thy soul doth wear;
Dare to look in thy chest, for 'tis thine own,
And tumble up and down what thou find'st there.

In these lines the reader is told that he has "Wordsworth's Counsel to Mankind." We do not see the joke of such an intimation, or perhaps the latter is founded on ignorance. The lines themselves form part of the twenty-fifth verse of grave George Herbert's 'Church Porch.' It certainly never entered the poet's head to imagine that they would be quoted as specimens of smartness.

Occasionally, there appears to be a lurking sentiment of satire in some of the selections. The following is not particularly smart on the part of Thackeray, though it may produce feelings that may be so described on the part of his more intimate friends. Under the head of "Scarcity of Gentlemen," we read: "Thackeray says, 'A gentleman is a rarer thing than some of us think for. Which of us can point out many such in his circle,—men whose aims are generous, whose truth is constant and elevated, who can look the world honestly in the face, with an equal manly sympathy for the great and the small? We all know a hundred whose coats are well made, and a score who have excellent manners; but of gentlemen—how many? Let us take a little scrap of paper, and each make out his list.'" We can fancy that the friends and acquaintances of the late writer, who had studied them so narrowly, might be a little fluttered at the above, if it were seriously meant. They would naturally cast over in their own minds whether they were likely to be registered on the long list of the well-dressed, on the briefer roll of the good mannered, or, with a brace, perhaps, of others, on the little scrap of paper considered sufficiently large to hold all the writer knew who might fairly be recorded as gentlemen. The incident reminds us somewhat of an occurrence which led to a really smart saying by Foote. At an evening party, he was reminded by the master of the house that his handkerchief was hanging out from his coat-pocket. "I thank you, Sir," said the humorist, as he thrust the embroidered cambric out of sight, "you know the company better than I do!"

The editor's shortcomings extend to ignorance of the descent of anecdotes. Some of the stories told here have had for heroes or heroines personages earlier by centuries than those who figure in them in these pages. On questions of locality there is equal uncertainty. For example, "Dibdin, the Ocean Minstrel, the sailors' poet, once gave a musical entertainment at Torbay, and called the rooms in which it was given "*Sans Souci*," which gave occasion to the following quib:—

What more conviction need there be,
That Dibdin's plan will do?
Since now we see him *sans souci*
Who late was "*sans six sous*."

Dibdin's *Sans Souci* theatre was first established in the Strand, opposite Beaufort Buildings; a new one was subsequently opened by him in Leicester Place, Leicester Square. It was in the latter that Charles Dibdin gave during several seasons his entertainment of recitations and songs, having a house adjoining for the sale of his musical compositions. The house was opened as a theatre, but generally for private theatricals, within these thirty years. During the "fashion" of Fanny Kemble's early performances, a daughter of her cousin, Henry Kemble, acted at the *Sans Souci*, where she showed considerable dramatic power, especially in her performance of *Mrs. Haller*.

The portion of the volume we now close, which is devoted to the "Smart Sayings of Distinguished Women," is even more didactic and solemn than that occupied by the "distinguished men." The fact is, that selection is not so easy a task as it seems.

The States of the River Plate: their Industries and Commerce. By Wilfred Latham. (Longmans & Co.)

ALTHOUGH the author of this work professes to have no pretension "to the detail, interesting or amusing, which usually makes up works descriptive of foreign countries," and though much of his subject-matter is in itself unattractive, he has written an interesting volume.

Be it known that Mr. Latham writes from an agricultural point of view. He dwells on the advantages to colonists afforded by the States of the River Plate, their delicious climate, their richness of resources, the low price at which land is to be had, and the high rate of wages. He wishes to tempt all those for whom England is too narrow and too crowded, who are told by their parents or guardians that farming is ruinous in the mother-country, and that they must either sign articles or emigrate. There has always been a repugnance to articles in the young and enterprising mind, and some whose sole occupation in life has been to see the moon grow yellow over the lessening riot of the streets would gladly exchange that sight for the sunrise of the Pampas. We have no doubt that Mr. Latham will find many willing ears to hear him. Whether he will succeed with the owners of large capitals, which he says cannot fail to produce profitable results under ordinarily intelligent management, may be a question. Large capitals do that in England. But there is not the same chance at home for "smaller capitals, even to the smallest," for "practical and enterprising young men of small means," "sons of country gentlemen, professional men, farmers," unless their fathers can find them an opening, and have not cut off the entail of brains and industry. As for agricultural labourers, they might certainly better their fortunes if they could get a lift across the ocean. Mr. Latham promises them wages of from 4*l.* to 5*l.* per month, with every prospect of speedy promotion to the rank of bailiffs if they are sober, industrious, and intelligent. Yet the life is not free from care or hardship either to the small capitalist or the labourer. What the capitalist who invests in farming or in sheep has to encounter must be studied in Mr. Latham's book by all who would follow his advice. Here is a picture of the shepherd's life:—

"The life of a shepherd in the camp is solitary enough: a man who does his duty should never leave his flock, until, at least, they are shut up at night; and then not for long. It is not always that a flock is shut up in the 'corral'; in fine weather they are left on the 'rodeo,' a bare piece of ground near the house, to which they are driven to pass the night, where they have more space, are kept cleaner, and can rest perfectly quiet; in wet and dirty weather it becomes impossible, without serious prejudice, to put them into 'corral,' on account of the accumulation of excrements and mud. Under these circumstances, on stormy nights, the shepherd is required to be up with his flock, riding or walking round them ('rodeando' them), to prevent their driving before the wind and rain; in heavy gales there have been instances of large numbers being swept away, running before the blast, and encountering a swollen brook, plunging head foremost into it, under the influence of the hindmost, and perishing to the last. In the daytime, in a storm, they are very apt to drive, and especially in a dust storm, by which, occasionally, great losses and

considerable inconvenience through the mixing of the flocks is incurred."

At the same time, the price of everything has risen so much during the last twenty years that fortunes are not to be made so easily as they were before that time. The value of sheep has increased tenfold; but with this the breeds have undergone a great improvement. Mr. Latham alludes to the time when Creole sheep were of so little value as to be killed that their carcasses might be used as fuel; and, from his judgment of the "Plate beef," he seems to think that both the breed of cattle and the mode of killing them are nearly as backward. At the time when so much is expected of South American meat, and so many companies are being started for its exploitation, Mr. Latham's words will seem disappointing. But we are glad to find him approving of the extract of meat which has Baron Liebig for its sponsor. The preparations of South American beef to which he chiefly objects are those preserved by salt. Dr. Morgan he thinks would be very salt; and the meat generally is not in such good condition as to take salt well. The cattle are too wild; their feeding is unequal and irregular. In order to drive a regular trade in supplies of meat it would be necessary to organize a regular system of cattle-feeding, and to have large farms closely adjoining the cities. But not only is this organization wanting; the meat put on the tables of dwellers on the Rio de la Plata is poor, and the cooking is as defective as the salting. On this matter we will hear Mr. Latham:—

"The beef in these countries is almost universally, if roasted (baked) in the oven or fried, cooked with a large quantity of grease. The lean quality of the beef, the absence of layering or veining of fat in the flesh, renders this necessary, to supply the needful proportions of heat-giving substance or carbon on the one hand, and on the other to check the drawing away of the albuminous matters from the substance of the beef in the cooking process. When meat is boiled, 'puchero' is the dish usually made from it; that is, meat boiled with vegetables of various descriptions, and rice, the vegetables, &c. supplying the deficient starchy or carbonaceous matters, and taking up the albuminous juices so readily parted with by ill-fed beef. In all stews and 'made dishes' the beef is found to be hard, almost horny, and perfectly tasteless. It is the mere fibre of flesh; such nutritious matter as it contained, as in the case of salting, has drained away from it. To compensate for the deficiencies of nutritious and carbonaceous matters, and to absorb the juices that drain from the flesh, a variety of fruits and vegetables are cooked with it. Pumpkins, maize, raisins, olives, apples, pears, peaches, &c. &c., supplying saccharine matters—alkalies, vegetable acids, &c.—compensating to a certain extent for deficiencies in nutrient matters, or adjusting the proportions of the food elements. These things are not only desired by the palate, but are absolutely requisite to constitute food, and as correctives; much in the same way as raisins, limes, &c., are necessary with a salt meat diet."

Of the process of Messrs. Paris & Sloper, by which meat is to be transported to England in hermetically-sealed tins, and is to emerge from them as fresh and palatable as butchers' meat, Mr. Latham scarcely speaks. He seems only to have heard of their process after writing his chapter on the 'Utilization of River Plate Beef,' and he alludes to it very briefly in a note. All these schemes are seen by him in the same light, and all must answer the same question—Can the Plate beef be preserved, and be nutritious, without an improved system of feeding? He answers in the negative, but he looks forward most sanguinely to another answer being given when the breeds and the food are improved. Meanwhile, he gives in his adhesion to the "Extractum Carnis

Liebig," as thoroughly nutritious, as capable of being packed in the smallest compass, and as promising to be cheap when the manufacture is no longer confined to a part where meat is comparatively costly. We have said that Mr. Latham attributes some of the defects of La Plata beef to the mode of killing; let us give his sketch of the mode in use at Buenos Ayres:—

"Herds of fine semi-wild cattle, consisting of several hundred head, are driven in from the country by mounted herdsmen, looking as wild, if not really so, as the cattle they drive—the affrighted animals bellowing and making desperate attempts to break away as they approach the pens—the mounted herdsmen swinging their lassoes and dashing at the cattle on flank and rear, to close them into a compact phalanx, so as to force the foremost on. The slightest break in the mass, from an inequality of pressure, through which an animal or two can contrive to turn, and there is a wheel and a stampede: and then look out! away go the gaucho drivers, as if fleeing before the galloping, maddened herd; but, with their fleet horses, crossing and recrossing in front and on the sides, they gradually close up the ranks, succeed in turning the cattle again, and so work them till they get them into the pens (corrals) of tall hard wood posts, six to eight inches in diameter, by eight or ten feet high, ranged alongside each other, and bound together by cross bars securely lashed. Occasionally, indeed frequently, a point of two, three, or half-a-dozen animals will break away from the lot, and then away go the skirmishers of the party of drovers, lassoes whirling in the air, at headlong gallop, to come up with the runaway beasts; a vain attempt would it be to turn them, so the lasso is thrown, the noose goes over the animal's horns, the well-trained horse answers to the rein, he gallops to one side and comes suddenly to a stop; the animal is swung round, a second lasso is thrown by another horseman; one takes one side, the other the other; the enraged animal rushes to and fro, but he is checked by the lassoes; and so, by the dragging of the lasso-men and his own mad rushes, he is worked on to the remainder of the herd. At other times, he is hamstrung by a third person, and left until the herd being penned, they return to kill and skin him."

We might have chosen a more pleasing specimen of Mr. Latham's style; but there is true spirit in this extract, even if it remind us of some of Sir Francis Head's hasty jottings, so evidently written on the saddle. There are more scenes like this to describe, and Mr. Latham would not have found less favour with the enterprising young men whom he hopes to allure up the River Plate, if he had been freer with stirring episodes and not so lavish of practical suggestions.

NEW NOVELS.

Madonna Mary. By Mrs. Oliphant. 3 vols. (Hurst & Blackett.)

Few novelists in the higher ranks of literary artists have written to better purpose, and few have at times used their pens with less satisfactory results, than Mrs. Oliphant. In the exercise of her vocation she is an uncertain player; at one time exhibiting the most perfect knowledge and mastery of a difficult art, at another failing in the simplest strokes. Just as she happens to be in the right humour, or "out of play," she writes with a fineness of humour and delicacy of touch that are delicious to critical readers, or flounders about in a mire of words, wasting her strength in futile endeavours to be gracefully agile at moments when she has lost the command of her feet. This variability of merit, which is the perplexing feature of her labours, is in a great measure attributable to the unintermitting constancy with which she works away through darkness as well as light, through periods of mental

vacuity no less than seasons of intellectual activity and productiveness, alike through days of despondent heaviness and times of spiritual elasticity. However sincere he may be, and however honestly bent on working to the best of his powers, physical inability and mental disinclination for arduous exertion can be neither concealed by the artifices nor counteracted by the volition of the writer who persists in unseasonable toil. The best efforts of the artist working "against the grain" are feeble and fruitless in comparison with the unlaboured achievements of his brighter hours. Of these truisms Mrs. Oliphant is a notable illustration. On opening a new story from her pen, we are prepared to find it very good indeed, or very far below the high standard by which the great excellence of some of her tales has taught us to judge her. And even when we have read the earlier chapters with satisfaction, such is our experience of the writer's unevenness that until we are fairly within sight of the end we cannot dismiss the fear that on the turn of a leaf she will make a sudden drop to a low level. The present volumes, however, contain no passage that gives a colour of justification to the nervous apprehensions for the author with which we perused them. From first to last 'Madonna Mary' is written with evenness and vigour, and overflows with the best qualities of its writer's fancy and humour.

Save that it depends on the defective evidence of a Scotch marriage—a basis of operations which has been the foundation of so many novels since the first outbreak of the Yelverton-Longworth scandal—the story is thoroughly original, so far as its plot and leading incidents are concerned; and though its main interest is open to objection on the ground of its exceeding painfulness, the strength of the narrative is such that we question if any reader will lay it aside, notwithstanding the fullness in his throat and the constriction of his heart, until he has shared in the happiness which is liberally assigned to the actors of the drama, before the falling of the green curtain. But the principal charms of the work are the subtle humour, fineness of touch, and seeming ease with which Mrs. Oliphant delineates and contrasts her numerous characters. The tone and spirit of the listless, languid, fretful life of the Indian station are indicated with skilful suggestiveness; and the residents, especially the female residents, are in keeping with the life of the place, where Mrs. Ochterlony—the Madonna Mary of the story—is induced by her worrying, honest husband to raise suspicions as to the validity of her Gretna Green marriage by submitting to a second union performed in accordance with the Church of England ceremony. The colonel's wife, Mrs. Kirkman, is described as "troubled by an abiding consciousness that it was into her hands that Providence had committed the souls of the station. 'Which was an awful responsibility for a sinful creature,' she said in her letters home; 'and one that required constant watch over herself.'" If we did not know how slow people are to detect the force of satire that is especially applicable to themselves, we should be inclined to think that the ridicule with which Mrs. Oliphant covers Mrs. Kirkman's affectations must have been very unpalatable to the readers of the publication in which 'Madonna Mary' first appeared. Nor is the author less successful in her pictures of the domestic circle to which Madonna Mary returns on the death of her husband, bringing with her the three boys, whose education becomes henceforth her chief care. Nothing but true poetic insight could have enabled Mrs. Oliphant to bring her readers

face to face with the unselfishness and womanly purity of Aunt Agatha, in whose heart, deeper than the strong love which she bears all her kith and kin, there burns, inextinguishable and for years almost unrecognized by herself, a sacred lamp of maidenly affection for one whose wife she might have been, had he been as simple, brave and strong as she. Very pathetic—all the more so because the circumstances of the case are not wanting in something that borders closely on the ludicrous—is the joy of this gentle old spinster on learning after her lover's death that throughout his long career of selfish dilettantism he had cherished a sentimental tenderness for the woman to whose devotion he had responded with neglect, if not with contempt. "It was the truest grief that was in her heart, and yet with that there was an exquisite pang of delight, such as goes through and through a girl when first she perceives she is loved, and sees her power! She was as a widow, and yet she was an innocent maiden, full of experience and inexperience, feeling the heaviness of the evening shadows, and yet still in the age of splendour in the grass and glory in the flower." Upon the whole, we are inclined to place Aunt Agatha, as an artistic achievement, above all the other creations of the book,—above the heroine, whose simple nature and maternal influence over her boys are excellently described,—above the buoyant, prosperous, self-complacent Mr. Penrose, in whose portrait the typical qualities of the energetic, unrefined and domineering Englishman are given broadly, but without undue harshness,—and even above Wilfred Ochterlony, whose precocious cleverness, constitutional jealousy, and unprovoked badness aid largely in bringing about the positions which wring his mother's heart with anguish, and when they have discharged their function, as sources of nervous agitation to the reader, result in the marvellous boy's penitence and moral reformation.

Paul Massie: a Romance. 3 vols. (Tinsley Brothers.)

A long extinct and unhappy love, a lost ring, a designing, middle-aged (but of course still beautiful) lady, of democratic tendencies, are three points quite sufficient to form the groundwork for a story which disdains all circumlocution, and at once proclaims itself a "romance." And the anonymous author has made no bad use of the materials thus briefly described. There is a deep veil of mystery hanging over the story, which is carefully kept from the various persons interested until the proper time arrives for its revelation. We may add, that out of the main plot several minor complications arise, in which the agents are unconsciously working out their proper destiny, while apparently striving for objects inconsistent with the author's intended climax. It is only just to say that the various plots and counterplots are contrived and worked out with considerable dexterity. On the other hand, the reader will probably find some difficulty in taking an earnest interest in any of the most important characters. It is not that the power of a draughtsman is wanting, for it must be admitted that the various figures are well designed and well carried out as far as they go. But there is an absence of that warmth of colouring which is necessary to enlist the feelings and to call out human sympathies. The prim young High Church rector, indeed, is not intended to be a sympathetic character; and, looking at rectors from the author's point of view, we are content to find him very correct and very cold. But we wished to be able to open our eyes to the reality to Sarah,

his young cousin and fiancée, who, though brought up in a dull school of conventionality, allows true feeling to triumph in the great struggle of her life. We should have wished, too, to feel rather more enthusiastically towards Paul Massie, the hero, who is honest, clever, truthful, and evidently a "good fellow" besides. But somehow or other we do not care very much about them, or even about old Mrs. Massie, whose early romance and misfortunes form the pivot on which the whole machinery turns. When we come, however, to speak of the lighter features of the book, we have no fault to find. There is much humour in the description of Salome (the democratic lady above mentioned), and the motley assemblage of native and foreign "Bohemians" in her drawing-room. Whether such drawing-rooms exist in London we cannot say; but it is quite possible, now that, as the author says, people "take to patronizing revolutions as they might to patronizing Art or high farming." We may mention, *par parenthèse*, that Salome, otherwise Madame de Luca, is a little more forward than we should expect a well-connected lady, living in the English metropolis, to be; but she is an eccentric character, a privileged person, and it is part of her rôle to transgress a little the ordinary rules of society. Madame de Luca is, doubtless, the character on which the author has bestowed his principal care, and he has no reason to regret the result of his labours. In his descriptions and incidental remarks, the author is sometimes very happy. He is evidently rather hostile to High Church clergymen, and he shows this feeling without disguise, but, at the same time, in a very quiet way. The account of the inquest in the third volume is rather slovenly; and we doubt whether a death by violence could have been smuggled up and represented as an accident in the manner there represented. The author atones to some extent for this in his graphic account of a "maiden speech," and a "count out," which is full of humour and truth.

No Easy Task. By Mark Francis. 2 vols. (Skeet.)

THE heroine of this novel is, we presume, Miss Augusta Bennington, a young lady of large fortune and strong will, whose peculiarities of character render her, in the eyes of the reader, far the most important person in the book. In the eyes of Mr. Philip Davison, the hero, alas! poor Augusta is uninteresting, and hence arises Miss Bennington's enmity for the fair girl who becomes his wife, an enmity which, together with a mad woman and a family mystery, forms the groundwork of a story constructed with considerable ingenuity. The inventive power of the writer is cleverly exercised in the artifices by which the heroine, goaded by secret jealousy and by certain imaginary wrongs, manages to set husband against wife, lover against lover, and friend against friend, while all the time she maintains a friendly demeanour, and avoids rousing the suspicions of her victims. At length a looker-on discovers the whole game, and in the end several loving couples are happily married, and "all's well that ends well." Mr. Francis has no bad idea of sketching character; and Mr. Tom Gurdon, the rusticated Oxonian, who exhausts his slender energies in drinking and playing music-hall tunes on the cornet, and whom the artful Miss Bennington permits, for certain dark purposes of her own, to flutter moth-like about her, is especially amusing.

Angelo Lyons: a Novel. By William Platt. 3 vols. (Saunders, Otley & Co.)

Angelo Lyons is a hero who has inscrutable, black eyes, but who is so handsome, so amiable,

so popular, so rich—he comes from the West Indies, where he has inherited the fortune of a rich planter, his kinsman,—that he wins the heart of the mayor and corporation and all the inhabitants of Shiphampton,—which may stand, if the reader pleases, for Southampton.—He has taken up his abode in a house where two dreadful and mysterious murders had been committed some years before. The house had gone to ruin, for no one would live there; but Mr. Angelo Lyons repairs it and adorns it and furnishes it, regardless of expense, and lives there with his only daughter, an angel with blue eyes, who loves wild flowers and white muslin better than fine clothes and jewels, and who is an exasperatingly "sweet creature." There is a mysterious housekeeper named Faith Lincoln, who is bound to Mr. Lyons by some bond, which is not that of matrimony, and who is constantly singing a plaintive song, called 'The Lost Boy,' which always has a peculiar effect upon Mr. Angelo Lyons. At last, after a good many years, Mr. Angelo Lyons, who has been growing better and brighter and richer every day in the eyes of his admiring fellow-townsmen, is accused by a negro, who, immediately after seeing him, becomes "a jabbering idiot," of having been the actual murderer of the two ladies whose mysterious fate had baffled all the police detectives of Great Britain, and horrified the inhabitants of Shiphampton. Another negro accuses him of having made away with the lawful heir of his kinsman, who is the original "lost boy" of whom Faith Lincoln is always singing,—the "lost boy" himself having, meanwhile, grown into a handsome young man, and won the affections of Rachel Lyons, to the extreme displeasure of her father, who has contemplated aristocratic marriages both for himself and his daughter. The heretofore admiring townsmen of Mr. Angelo Lyons seem to credit the accusation of the two negroes with great facility; for a deputation of them come to his house provided with a warrant, and constables in attendance. Mr. Angelo Lyons does not wait to be committed to prison; he shoots himself through the head with a pocket pistol, in the presence of them all, his daughter entering the room at the fatal moment. The "lost boy" immediately becomes the possessor of his lawful inheritance, and Rachel becomes a Sister of Charity, in spite of all persuasion to the contrary. How the discovery which causes the catastrophe took place will require a sagacious reader to discover; for the plot of the novel is vague, rambling, and overrun with digressions. It is, indeed, entire nonsense, from one end to the other; but as it contains a murder and a mystery, it may meet with readers who will have the patience to follow them out.

A Brief Essay on the Position of Women. By Mrs. C. H. Spear. (Trübner & Co.)

THAT blessing which women really need, and which underlies all the arguments which are raised and wrangled about as to their "position," is—that the need of education, the thirst for self-improvement, should be awakened within them: the rest will follow. It is of no use to begin arguing their abstract right as human beings to become watch-makers, jewellers, wood-engravers, book-keepers, clerks, or even physicians and lawyers: the first thing needed is to impress women with a genuine desire to learn, to be, to do, anything thoroughly, whether it be learning in college classes, or being put to a business. If the desire be once awakened, the object will be accomplished; but, until then, it is a case of trying to make water run up-hill. Nobody in the present day denies the importance of woman's place in nature, and there is

no sort of restraint put upon any genuine wish she may feel to be taught whatever she wishes to learn in the way of education; the *thoroughness* of what she learns must, and ever will, depend on her own nature. The average of girls' schools are quite as good as those for boys; with the addition, that the common necessities of learning are better taught. Writing, ciphering, geography and grammar are better known by girls on leaving school than by the generality of boys; only girls come to live at home until they are married, and forget their book-learning, whilst boys are put out to some business by which to earn their living, unless they go through the intermediate training of college to fit them for higher professions. Even then it would be curious to know how many young men of the average class of intellect either have to learn their common things afterwards or remain in ignorance of them. The present movement in favour of general education is a mark of an awakened conscience, that to educate both boys and girls thoroughly is not an optional, but an imperative duty; as imperative as to give them food and clothing. That *female* education should be as good, as thorough, as general in its scope as that given to boys, is a point that is conceded—in theory: it depends on the students themselves how far it goes into practice. That women themselves claim to be brought to the test of examination is the best proof that they have an earnest desire to grasp the solid benefit of learning, to be *thorough* in what they do. It is the want of *thoroughness* that has been their great hindrance in the task of gaining their own livelihood. Men have at present the monopoly of many ways of earning money because women have not yet steadily settled in their own mind that to earn a living in any department they must give up their lives to it, as men do. A man marries a wife, and goes to his work with more energy than ever; but a young woman is always haunted by the idea that she will be married. Let her be bound apprentice like a boy, grant her any of the trades so much pleaded for to be thrown open to women, the prominent idea in her mind is not that her trade is the chief object of her life; but that when she is married she will have a house of her own and have no need to work for herself. It is this sense of the uncertain and insecure tenure of her services that keeps employment for women scarce. What girl of the average class of ability would give the seven brightest years of her youth to serve an apprenticeship—say to a druggist—with the prospect of becoming at the end of that time a druggist's assistant? If a chance of marriage came in the mean time, would the indentures hold her? A woman who should steadily make up her mind to follow a business, except it be such as can be followed in her own house, diminishes her chances of matrimony. She changes her position, takes her stand as a man, and must put marriage on one side as secondary to her work or profession. If she marries, her work must still stand foremost, if it is to be the staff of subsistence; and the family, if there is one, must be relegated to others. If a woman takes the outside life of work in the world, some other person must be found to undertake her inner family life and responsibilities.

We read the other day the announcement of an American lady physician who had passed a brilliant examination, and who visited Middlesex Hospital, being shown through the wards by the authorities, dressed in modified male costume,—a low felt hat, and long plush coat, and trousers. If she had a strong bent to the medical science, such as makes men fling themselves into a profession, she would find the power of

obtaining the knowledge she sought its own reward; but if she went into the profession merely to earn her living as a medical practitioner, she would only lose her womanly nature to become an uncomfortable anomaly. The fact of women being capable of being trained into excellent nurses, and having, in fact, a natural aptitude and instinct for taking care of the sick, has nothing to do with her qualifications to become a doctor. They are two distinct employments, and their duties cannot be muddled together as the author imagines. The author of the brief treatise before us, which has been the text for what we have written, pleads a series of passionate commonplaces to prove that women and the feminine influence are essential to the elevation and civilization of men. She pleads that "rich young women whose time is not at all consumed in providing for the external necessities of life," shall be saved, by a more complete education from the miseries, follies, and vices coming of idleness or absorption of mind upon themselves and dress. She goes on to say, as though it were a natural sequence, "Pure science, pure literature, and pure art must sometime find votaries: and where may those lofty pursuits be so closely followed as among those free from the need of fame and care for worldly wealth?" Nothing could be more desirable than that rich and idle young women should be induced to employ themselves; but riches and idleness are not the materials out of which artists are made. The author goes on to say, "The fact that woman has an intellect which needs developing signifies that it must be brought out towards perfection, and until it is developed in proportion to her other powers, her character must be incomplete," which is a truism that holds good of men as well as of women. "I only ask," continues the author, "that arbitrary barriers imposed by custom and superstition may be removed; that woman may think and act from principle, not from conventionality; that inward and outward freedom may be acknowledged as her right, not yielded as a concession, the same as for a man." Nobody can be made free by acclamation or Act of Parliament. Both men and women must work out their own freedom, as well as their own salvation; it cannot be done for them. Women have nothing to hinder them externally from starting or running the race to perfection, and nobody wants to hinder them. But before the question of equal rights in all that pertains to legislation can be settled, women must be at least qualified to exercise them. The thorough education and cultivation which is now called for on behalf of women, as well as for men, is the real need of both. It is not mere knowledge for the sake of knowing, but the cultivation and more perfect balance of all the faculties which is hoped for as the result. The social position of women may safely be left to adjust itself. As regards their "right" to have every career thrown open to them, the matter practically settles itself every day. Whoever can do anything well enough to make it worth the while of others to pay for it, such person, man or woman, is allowed to do it; but a mere declaration of freedom does not give capacity; and all the discussions about the "rights of women to labour" resolve themselves into the old saying of "tools to those who can use them."

St. Paul's Epistle to the Galatians. A Revised Text, with Introduction, Notes and Dissertations, by J. B. Lightfoot, D.D. (Macmillan & Co.)

THERE are many commentaries on the Epistle to the Galatians. That of Winer is excellent as

a critical one—less so as purely exegetical. On the contrary, that of Prof. Jowett is expository rather than critical. The present work is more ambitious than either, in scope and aim. The author intended it to be as comprehensive as possible, embracing everything necessary for the right understanding of the text as well as of the apostle's meaning. Collateral topics are discussed, and allusions fully explained.

Dr. Lightfoot appears to possess the amount of knowledge and learning requisite for his task. He has read preceding works on the Epistle, is able to estimate their respective values, and is evidently familiar with Hellenistic as well as classical Greek. His book bears on its pages the stamp of solid, substantial scholarship. Good judgment and critical sagacity are seen throughout it. He has done well to avail himself so largely of Winer, whose Grammar leaves little to be desired in the province to which it is devoted. His sentiments are orthodox, as those of a Cambridge Divinity Professor must be; and his attachment to the Church of England is patent, even to the ignoring of Dissenters' books. But he moves freely within a certain compass, and is not afraid to avail himself of the researches of Germans, however heretical he may think them. We know no English commentary on the Epistle that can be compared with it in fullness. The notes are copious, and accompanying dissertations largely swell the pages. Whether it be superior to that of Prof. Jowett is a point which need not be mooted here, depending as it does on the theological opinions which readers may have previously formed.

On consulting various passages which involve points of the most difficult and delicate criticism we have been much disappointed. The author's prepossessions and his incompetence for the highest criticism prevent him from perceiving the meaning in several cases, or, at least, from bringing it out to the light. Thus his note on iii. 16 is most unsatisfactory. What is meant by saying that the question involved is "no longer one of grammatical accuracy, but of theological interpretation"? Does not the theological interpretation depend on the grammatical accuracy, or, in other words, on the grammatical sense? The apostle undoubtedly reasons from the language he quotes, and rests the force of his argument on the word "seed." Neither our author nor Tholuck expounds the Pauline reasoning aright, because of their prejudgments. Again, the note on iii. 19, respecting the presence of angels at the giving of the Law, throws no light on the exact point in which a difficulty lies. Indeed, we see a sort of evasion in the statement, "the theology of the schools having thus enlarged upon the casual notices in the Old Testament, a prominence was given to the mediation of angels, which would render St. Paul's allusion the more significant." In the Old Testament there is but *one* notice of angels in connexion with the announcement of the Law; and there the text is undoubtedly corrupt. Why could not the critic afford to say that the apostle followed a Rabbinical speculation, for which the Old Testament affords no basis?

The note on iii. 11 does not properly bring out the apostle's meaning. The commentator never tells us whether the translation should be "the just shall live by faith" or "the just by faith shall live." Doubtless he would agree with Winer; but the latter sense has been held by many, from Jerome down to Rückert, and deserves special mention. In v. 5 the expression *ἐκ πίστεως* is not expounded in its connexion. Indeed, the whole verse is slurred over loosely. The author should consult Rückert's note, from which he will see that there is need of elucidation.

There is a good note on St. Paul's allegorizing

the story of Hagar and Sarah, in which Dr. Lightfoot admits that St. Paul's mode of teaching was coloured by his early education in the Rabbinical schools. The bearing of this on inspiration is touched with a timid hand.

The Introduction comprises several essays, which, though containing nothing new, are valuable and judicious. In settling the date of the epistle the writer's reasoning is unsatisfactory. The close of the volume consists of three dissertations, respecting the Galatians being Celts or Teutons, the brethren of the Lord, and St. Paul and the Three, i.e. Peter, James and John. The first two are excellent; the last, one-sided, apologetic and inconclusive. The original preface shows that the writer has tolerably strong prepossessions, which blind his mind to the perception of the merits of some critical editors; while the dissertation on St. Paul and the Three equally proves his incapacity to deal with the highest problems of New Testament interpretation. "The difference between the earlier and the later writings of St. John," says our author, "is not in the fundamental conception of the Gospel, but in the subject and treatment and language." This assertion advertises critics of the perfunctory method in which great questions are disposed of. The note on page 345 about the Paschal controversy and St. John wearing the priestly mitre, as Polycrates tells us, is as superficial as the observations about the apostle's writings.

Dr. Lightfoot is a good guide up to a certain point. He cannot, however, be followed implicitly in the region of the difficult and disputed. His book might be greatly improved by the careful exclusion of all superfluous matters. We think it unnecessary for him to give the Greek text, though it professes to be a revised one. It is no better than Tischendorf's last—hardly so good. It is also useless to give from Wetstein and Schöttgen information bearing on Hebrew and Rabbinical questions. References to Winer's Grammar and to the linguistic remarks of Fritzsche might also be dispensed with. Some of his dissertations should be omitted. By such means the work could be reduced to one-half its present dimensions, without much disadvantage. The masterly condensation of De Wette's commentary should be imitated; and thus the lumber of useless learning excised. As it is, students will thank him for his copious commentary; but scholars will go elsewhere for the elucidation of such passages and the true solution of such difficulties as his theological standard precludes him from giving.

English Children as painted by Sir Joshua Reynolds. An Essay on some of the Characteristics of Reynolds as a Painter, with especial reference to his Portraiture of Children. By Frederic G. Stephens. Illustrated with fifteen Photographs by A. and E. Seeley. (Seeley, Jackson & Halliday.)

On the 7th of August, 1865, there calmly died, in her quiet home, a lady between ninety and a hundred years old, who is said to have been, for a brief time before she died, the sole survivor of the thousands who had sat for their portraits to Sir Joshua Reynolds. The lady in question was the Dowager Countess of Shaftesbury. The last survivor but one was, we believe, the once stalwart drayman who, at a sale at Christie & Manson's, stood beside the picture of 'Puck' or 'Robin Goodfellow,' then being sold, for which he had originally sat on Reynolds's doorstep when the great-grandfathers of many persons then in the room were boys.

They have all passed away, those magnificent men, those graceful women, those matchless

children,—whose living, breathing, almost speaking presentments, still glow from the canvas with fuller or fainter flush. No artist has had more admirers or more commentators than Reynolds. Some of the latter have addressed themselves to his failures in classical illustration, others to his lack of success in the ultra-romantic, the heroic which is beyond nature,—giving a natural tone to which destroys the heroic element. Some, again, debate upon the truthful character, not merely the facial likeness, but the spirit and sentiment of Sir Joshua's male portraits; others love to dwell upon the ineffable graces of his women, whom he has handed down to posterity, as mere mortals have a fair right to be, at their very best. You may reasonably guess at the disposition of any one of those delicious creatures. The mind is there as unmistakably as the form. If Sterne's forefinger to his temple, Elliott's iron key in his iron hand, and the evanescent air of fine gentlemanism in some of his fops of good blood, bespeak not only the men, but what sort of men they were, so the falling of a curl, the glancing of an eye, the wave or the composure of a petticoat, all help the spectator to conclude the manner of woman before him, and whether a paradise with her would be likely or not to be traversed by storms.

All having gone, and the last survivors having been two individuals belonging to Sir Joshua's very numerous family of children, the subject of 'English Children as painted by Sir Joshua Reynolds' was one of the most appropriate that could have been chosen. It has met with corresponding success in its treatment at the hands of Mr. Stephens. As a painter of children, his estimate of Reynolds is of the very highest. He places the old bachelor artist—who had no children, yet possessed many in his love for, appreciation of, and sympathy with them—above Fra Angelico with his seraphic babies, above Raphael with his adult cherubs, above Murillo with his elfish, dirty rogues, above Velasquez, at least in extent of labour, and even above Rubens, who, Mr. Stephens thinks, cannot "be compared with Reynolds, either with regard to the refined quality, or the number of the pictures that are recorded in the Appendix to this Essay, which, let it be borne in mind, comprises only engraved works." The number of only these engraved works amounts to 299. Some of these contain whole families of children; and when we think of the numbers that were not engraved, we may have some idea of what a bright and brilliant crowd might be made up of the "boys and girls" of Sir Joshua Reynolds.

His great success lay in his discernment of what was natural, and his power in giving it expression and beauty. Sir Joshua painted also 'The Russell Family,' in 1777, in which there is much mythological nonsense and classical blundering. There is also an exquisite child, little Lord William Russell. The little lord—he was ten years old—was most unwilling to be painted, sulked, and cowered down in one corner of the room. Reynolds saw the appropriateness of the action to the feeling, and out of both put the only bit of nature that is to be found in the "Russell Family," the chief of which is St. George handsomely pinking the dragon, and the rest of the members decently glad at what is going on. Lord William, as he entered for his sitting, huddled against the wall in sulky anger and distrust. Reynolds, who knew how to deal with children, and could manage them so perfectly that he contrived to paint more of them, and better, than any one else, cried out, "Ah, my little man! Keep where you are." The little fellow obeyed.

Three-and-sixty years later, he lay, an old man, with his throat cut by his Swiss valet Courvoisier, who went as quietly to bed as if he, too, had only been concerned on a work of Art.

Reynolds, in his youthful portraits, could seldom lift himself from earth to heaven. His 'Angels' Heads,' comprise five portraits, in different positions, of Miss Frances Gordon. They are beautiful, innocent English faces, worthy of heaven, but with human expression belonging to what is purest and brightest of the earth. As readily as Sir Joshua saw the effect to be produced from the picturesque reluctance of Lord William Russell, did the artist perceive the beauty presented to him in a little street child sitting enthroned on his door-steps in Lincoln's Inn Fields. He did not, indeed, take the child's portrait, but he made of the little, lively, happy fellow, a joyous, undraped child, which gave such delight to Alderman Boydell, who was then producing his "Shakespeare Gallery," and whose thoughts and purposes were directed thitherward exclusively, that he expressed a wish for its introduction into the Gallery in question. "Well, Mr. Alderman," said Nicol, who was of the party, "it can very easily come into the Shakspeare, if Sir Joshua will kindly place him on a mushroom, give him faun's ears, and make a Puck of him." Sir Joshua, we are told, "liked the notion, and painted the picture accordingly." Nevertheless, as Mr. Stephens remarks, it is not a Puck at all, nor was it originally intended for one. As such, indeed, it is "really an absurd picture," but it is, as he says, "of the widest fame," "inexhaustible of character, splendidly spirited as the portrait of a gleeful baby brimming over with life." The artist obtained a hundred guineas for his work. At Rogers's sale, the Earl Fitzwilliam purchased it for nine hundred and eighty guineas.

In family portraits, where children abounded, Reynolds was even more successful. When we look at 'Cornelia,' Lady Cockburn and her three baby boys (all of whom inherited the baronetcy), we can hardly fancy that in one we see the Sir George who conveyed Napoleon to St. Helena (and whose figure is still remembered about the Admiralty), or in the youngest, that dignified Dean of York who used to preside with such solemn grace at the musical festivals in York Cathedral. A singular incident, sample of rare and spontaneous homage, occurred when this charming picture was brought (in 1774) before the Royal Academicians, to be hung in the Exhibition. Every Royal Academician then present stood forward and received it with loud clapping of hands. "Conceive the painters, each in his swallow-tailed coat, his ruffles and broad cuffs, his knee-breeches, buckles, long waistcoat, and the rest of the garments of those days, thus uniting in one acclaim." For this great work, including four portraits, the President received the poor guerdon of 183*l.* 15*s.* It lives only in the engraving. The original has simply disappeared. No search after it has ever yet brought the earnest and indefatigable seeker to any other conclusion than that it has disappeared. There is no record either of robbery or destruction. It is not to be found, and that is all that is known about it.

Some of the early sitters have looked in their old days on the portraiture of their youth only with saddened, sometimes with angry feelings. A once reigning toast, a queen of beauty in her beauty's prime, met a portrait of herself as a child, when she had become an octogenarian; she gazed eagerly, sighed deeply, and said as she raised her "still tightly-gloved though trembling finger, 'Ah! you would never think

that pretty thing could ever become a wrinkled old hag like me." Probably, the person thus addressed was as gallant as the Frenchman who remarked to a lady thus disparaging herself, "Madame, la beauté est de tout âge!" for Mr. Stephens says, "The apt compliment that was expected was promptly paid, and the lady went her way less displeased than most persons would be after a *rencontre* with the picture of their youth." That such pictures could ever offend at all seems to us stranger still. That one at least gave great offence is shown by the present condition of a picture which formerly represented Miss Greville and her brother as "Hebe and Cupid," but which now presents to us only Hebe and a tripod. Fulke Greville, the father of this pair, happened to quarrel with his son. The bitterness of his wrath had a touch of insanity in it; for he had the undraped, bright-limbed figure of his son clinging to the Hebe who holds a vase, cut out of the picture, and a tripod inserted in its place. It stands, the monument of the father's mean revenge.

Another instance may be added to those we have mentioned of Sir Joshua's happy readiness in taking models suitable to his purpose. There was a little street hero of his day, an orphan boy, who supported his brothers and sisters by selling the cabbage-nets he taught them to make. Sir Joshua painted him with one of his sisters, and if every one of the meshes of his nets reckoned for a guinea, it would not purchase this exquisite sample of the painter's art. Of the famous 'Gipsy Boy,' the head only is by Sir Joshua, apparently from the same model as that of the well-known 'Blackguard Mercury.' The body was added, we are told, by R. Westall, R.A.; his brother, W. Westall, A.R.A., then a boy, sat for this figure. How Reynolds kept (he being court-painter) portraits of the King and Queen on hand, ready for presentation, how he failed in religious subjects, how he *did* paint his own landscape backgrounds, these, with a large measure of illustrations of Reynolds's power in various branches of his art, are told succinctly, with much sound criticism, in this beautiful volume. How well the writer can himself create word-pictures, the following will show:—

"Reynolds painted scores of portraits of ladies with their children, and did none better than those in which his exquisite sense of beauty and power in characterization were employed in depicting the maternal instinct at its most lovely phase. Of such compositions none is more simple and beautiful than the well-known 'Pickaback.' He depicted Lady Cockburn, with a triad of rollicking babies; Lady Dashwood and her child, repentant after naughtiness, with pretty, blubbered face, and fondest gesture, embracing the maternal cheek, which from the lips to the eyes ripples to a smile; pretty Lady Betty Delmé, with her shy daughter and bolder son. The Duchess of Devonshire, a buxom dame, dances the crowing Lady Georgiana Cavendish upon her knee, and enjoys the child's delight, as it watches her hand waving to the tune of—

Ride a cock-horse
To Banbury Cross.

The same tune seems to be sung in that other portrait, Caroline, Duchess of Marlborough, whose baby, wild with fun, capers on her knee. Lady Harrington's 'big baby' is by its mother held up to be seen. Mrs. Hartley carries her child as a Bacchus minor, and crowned with vine-leaves, astride of her shoulder, as she dashes along and sings aloud. Lady Herbert's naked infant—a mischief-loving imp—chucks its pleased mother under the chin. Mrs. Lascelles' strapping boy sits in his mother's lap, and bending back pulls down her face to his, using hands that are all fists. There are at least a score of these charming compositions. The only foolish one among them is that

of the Duchess of Manchester, as 'Diana stealing the bow of Cupid.' This was probably produced under similar inspiration to that which dictated to the painter the sentimental 'Ladies with the Term of Hymen,' in the National Gallery. As we said just now, no work of this class is sweeter than 'Pickaback, Mrs. Payne Galloway and Child,' the young mother with her little one upon her shoulders, as if they were thus in a park together; the child wears a broad-brimmed hat that scarcely holds to its head, looks over the lady's shoulder with a pair of dove-like eyes, and clings with a fairy arm, that is stayed in its place by one of the mother's hands, while the other holds up the little burden behind. The companionship thus simply indicated was not destined to last."

Of some of the "young gentlemen" we have the subjoined notices:—

"We have not said much to illustrate the ways and manners of Sir Joshua's boy-sitters; there are, however, some rather amusing stories told of them. One of them displays Reynolds's kindly consideration and knowledge of the nature of lads. A picture by Reynolds was exhibited in 1758, entitled 'Master Mudge,' a portrait of the younger son of Dr. Mudge, whom the artist also painted. This boy was taken ill during a residence in London, and, with that natural longing to go home which is anything but wholly selfish, fretted with desire to see his father on his sixteenth birthday. Going was out of the question, so Reynolds, moved by the boy's distress, and glad of an opportunity to please his own old friend the doctor, said, 'Never mind, I will send you to your father.' And he accordingly, says Mr. Cotton ('Reynolds and his Works,' p. 83), so painted his portrait, that when the case containing it was opened, the doctor should be agreeably surprised by seeing his son looking at him, with a boyish and glad smile, from behind the heavy folds of a curtain. The portrait thus produced has been engraved by S. W. Reynolds. * * Among other anecdotes of children in connexion with the painter take this. The Master Wynn who sat to Reynolds for 'St. John at the Spring,' grew up and had a grandson, who sat to Lawrence while yet a boy. In the middle of the operation this lad, with the most evident gravity, and as if after long meditation, suddenly demanded of that President who above all things dreaded a blunder in tact, and was not a little sensitive about his own age and appearance, 'Are you the man who painted my grandfather?'"

This well got-up volume is superbly illustrated with photographs of some of Sir Joshua's portraits of children; but its abiding value lies in what is said of them in Mr. Stephens's text.

The Mormon Prophet and his Harem; or, an Authentic History of Brigham Young, his numerous Wives and Children. By Mrs. C. V. Waite. 3rd edition. (New York, Hurd & Houghton; London, Low & Co.)

AMONG the many silly books about Brigham Young and his singular colony at Salt Lake City, which for our sins we have been condemned to read, Mrs. Waite's is beyond all question the silliest. Unlike a recent writer, who began her revelations of the private life of this lord of harems and odalisques with the words "The sun was setting on the domes and spires of the city"—there being neither dome nor spire in the place,—Mrs. Waite seems to have actually visited Utah; but we certainly cannot offer her congratulations on her mastery of the arts of what to observe and how to describe. She means to abuse the Mormon men, to pity and caress the Mormon women; but she lacks all power of carrying out her purpose in such a way as to entrap the reader into sympathy with her ideas, if indeed she has any other idea than that of making an indecorous, popular book.

Mrs. Waite does not say in what capacity she lived at Salt Lake. From the respect with which she invariably speaks of the Prophet

Joseph, the reverence with which she quotes the Book of Mormon, we might infer that she is one of the Saints. She does not choose to explain how she came to be so intimate in Brigham's house, and under what circumstances she acquired her familiarity with his private habits. She leaves us wholly in the dark as to her means, her motives, and her opportunities. We only know, from her own pen, that nothing at Salt Lake was hidden from her eyes. She knew every chamber in the Prophet's house; in all his houses, both within and without the walls; in the Bee house; in the Lion house; in the White house; in the School house. She knows what lady is immured in each cell. She can tell you which is the present favourite; which was the recent favourite; how long the reign of each new wife endured in her husband's heart; in what phrases she was courted; by what pledges she was won. She is free of the Prophet's office, of his study, of his private bed-room, "which few even of his own family are permitted to enter without special invitation." Mrs. Waite knows all about this bedroom:—"Here is the 'veil,' behind which the Prophet receives his 'revelations.' Here he consults on his most private and important matters. He usually occupies this room alone, and when he desires the company of one of his wives, sends a message to that effect. When he is sick, he designates one of them to attend upon him." All this seems odd for an enemy of the Mormons and their Prophet to have been allowed to see and learn. Was Mrs. Waite an enemy? But this knowledge of external things in Salt Lake City is far from all. Mrs. Waite is no common person. She has penetrated to the centre of all mysteries. She knows everybody's motives; she is aware of everybody's hypocrisies. No Cynthia of the minute can deceive her vigilance. A wife of the impostor may be gay in public, quiet in private; ordinary people might be taken in by this show of happiness: not Mrs. Waite; she can draw aside the veil of cunning, unmask to scorn the designing wretch who is trying to make the world believe in her domestic bliss. To wit, there is Amelia Folsom, a Mormon lady, who is attempting to deceive people in this brazen manner: "Amelia is evidently living under constraint, and acting an assumed character. She is playing the rôle of a happy wife, with a breaking heart." Fie, Amelia! how can you! What is the use of your pretending to be happy, when you know that you are in this miserable, neglected, and degraded state? "Amelia stands the recognized Queen of the Harem. She leads the *ton*, and is the model woman for the Saints. Thousands bow low as she passes, and think themselves happy to receive her passing recognition. She is now a queen, and is to be a goddess in the celestial world." Is not this state and splendour evidence enough of her unhappiness? But this is not the whole: Amelia is actually the spoiled and petted child of the American Mohammed. "The new wife sometimes becomes restive and impatient, and treats her liege lord rather shabbily. She is at times notional and imperious, and somewhat coquettish,—to all of which her husband submits with good grace for the present, and pets her as a child." How can a woman be otherwise than wretched under such conditions?

The case is nearly as bad with Harriet Barney. "This lady is tall, slender, and graceful. She has hazel eyes, light-brown hair, mild, sweet expression of countenance, and is indeed a beautiful woman. Her character is as lovely as her face, and the suffering and sorrowing always find a friend in her. She is patient and forbearing, and would rather suffer wrong than do wrong. Her kind and sympathetic nature

and excellent character place her far above all the other inmates of the harem." But Harriet is a deceiver—a gay and smiling deceiver—like the rest; even with her hazel eyes and her sweet expression, she is a deceiver; pretending to be happy when she is perfectly miserable. "She loves, with all the intensity of her nature, him for whom she has sacrificed everything. Of course, she deeply feels his neglect, but, like a true woman, complains not." How ungrateful of her not to complain! Why doesn't she complain? If she feels her husband's neglect so deeply, what prevents her saying so? Why will she compel Mrs. Waite to feel for her, and to publish her misery, on her sole authority? "Having sacrificed her happiness upon the altar of her faith, she continues to love, to endure, and to suffer." What a shameful hypocrite!

But all these ladies—mistresses and harlots, Mrs. Waite is polite enough to call them—"are infatuated with their religion and devoted to their husband." So much the worse for them, no doubt. If they had only a little more spirit of their own, something might be done for them. But in the presence of Brigham they have no spirit left in them at all. "If they cannot obtain his love, they content themselves with his kindness, and endeavour to think themselves happy. As religion is their only solace, they try to make it their only object. If it does not elevate their minds, it deadens their susceptibilities, and as they are not permitted to be women, they try to convince themselves that it is God's will they should be slaves."

Eliza Snow, known to many English readers as the chief Mormon poetess, though the laurel she so long wore alone is now contested by Miss Carmichael, is let off with a softer slap on the face:—

"*Eliza Roxy Snow* is of middling stature, dark hair, well silvered with gray; dark eyes, noble intelligent countenance, and quiet and dignified in manner. She is the most intellectual of the women. Her literary taste and acquirements are good, and she has composed some very creditable hymns for the church of which she is a conscientious and devoted member. A volume of her poems has also been published, some of which evince genius of a high order. She is quite exclusive in her tastes, and associates but little with the 'women.' She occupies a small room on the third floor of the Harem, about twelve by fifteen feet in size. A neat carpet covers the floor; a common bedstead occupies one corner. There are some oak chairs grained, with crochet covers, white window-curtains and bed-spread, her 'own handiwork.' Behind the door is a neat little wardrobe. On a shelf over the window, stands a vase of artificial flowers. A stand, covered with books, usually occupies the centre of the room, and these articles, with a neat little stove, make up the furniture. This is the home of 'the sweet singer of Israel.' She has cast the charm of her genius over the rude materials, and there is an air of neatness, comfort, and refinement about her little sanctum which is not apparent in any other portion of the house. Here she receives and entertains her company. She occupies her time chiefly in writing, and in needle-work. She is highly respected by the family, who call her 'one of the nobles of the earth.' When tired of writing and study, she walks out and visits her friends. If any one is sick in the house she looks after the invalid, and shows every kindness and attention. She soothes the afflicted, and cares for the infirm and aged. She and Zina D. Huntington are the most lady-like and accomplished of the wives."

Nearly all this happens to be really true; but why Mrs. Waite forgets to say that Eliza is a pretender and a hypocrite, we cannot presume to say. However, the poetess may be included in the general judgment—"in fact, all the women are miserable."

Enough of this. The Saints of

Utah offer a tempting subject to strong-minded New England spinsters and matrons; and especially for such as have no genius for the higher branches of romantic art. If Mrs. Waite's 'Mormon Prophet' were not slightly indecent, it would be considered insufferably dull.

Translations from Alexander Petöfi, the Magyar Poet. By Sir John Bowring, LL.D. (Trübner & Co.)

Alexander Petöfi, successively actor, soldier, and poet, was born in 1823, his father being a butcher in the county of Pesth. Educated through the kindness of relatives, but betraying early an erratic disposition, and a delight rather in the indulgence of poetic fancy than in the acquisition of learning, his youth was alternately passed in the army, from which he procured his discharge, and on the stage, for which he seems to have had an intense passion, but no corresponding qualifications. At twenty, discarding his Hungarian name of Petrovich Sándor for that of Petöfi, he made his way to Pesth. "He had hidden," says Sir John Bowring, "a volume of manuscript poetry between his shirt and his breast; he wore shoes padded with straw, and, carrying a staff in his hand, started for the capital, full of dreams for the future." Through the good offices of Vörösmarty, the most celebrated Magyar poet of that time, Petöfi gained an immediate entrance into the literary society of Pesth. His first poems were published and received with such encouragement that fresh ventures followed rapidly, each with increasing success, until his fame was established. The extent of his popularity, the affection borne for him by his countrymen, and the romantic circumstances of his death, are thus set forth in Sir John Bowring's brief memoir:

"His position in Hungary resembled that of Robert Burns in Scotland. As the kirk called the Ayrshire bard 'profane,' the *dilettanti* of Pesth insisted that Petöfi was 'vulgar.' The popular voice awarded him, however, more renown than dainty critics were able sensibly to diminish. 'He never went to bed at night, he never arose in the morning,' says a contemporary, 'without hearing his songs from the multitudinous passengers in the public streets.' In the very theatre where his mimic powers had been put to shame, the whole audience afterwards rose at his entrance, and the Eljén (Hail!) was repeatedly reiterated until he took his seat. Once in an obscure village in Transylvania, his presence was suddenly announced to a regiment of peasant soldiers. 'Is it the poet?' was the inquiry, and to the affirmative reply every voice re-echoed 'All hail!' The political storm which burst out in Central Europe in 1848 roused the Magyar spirit, and Petöfi was one of its most influential and most eloquent representatives. Many an harangue he delivered at public assemblies, and launched the first newspaper which was emancipated from the censorship. In October of that year he joined the patriot army, and was made a captain in the Honvéd battalion. In the beginning of 1849 he joined Bem, whose adjutant he became, and whose correspondence he conducted. He was present at the fearful slaughter in Segesvár, on the following 31st of July. What part he took, if any, in that disastrous day, is not certain, but it is believed he was trampled to death in the flight and confusion which followed the retreat of the Magyar army. The body was never discovered, but was thrown undistinguished, and probably undistinguishable, into an enormous trench, which received the corpses of many hundreds of men who thus perished. More than one false Petöfi presented himself to the Hungarians, and much spurious poetry was published under his name. As the Portuguese believe that King Sebastian will re-appear, and lead them forth to victory, so Petöfi is said by his countrymen to be 'not dead, but sleeping.'"

So great a renown—confirmed not only by the translation of the poet's works into various

European tongues, but by the verdicts of such authorities as Heine, Bettina von Arnim, and Alexander Humboldt—will excite expectations in those who have only heard of the poet which will hardly be fulfilled by the volume of selections before us. Let it at once be admitted, however, that (putting aside, for the present, the question of adequate or inadequate translation, justice can hardly be done to Petöfi by such a method as Sir John Bowring has here adopted with respect to one of his principal achievements. That Sir John has condensed 'Janós, the Hero,' interpolating various explanations for the sake of brevity, is not in itself a matter for censure, as in a mere volume of specimens we thus gain some idea of Petöfi's most remarkable work. Still, a series of fragmentary relations, strung together, like beads, on a too apparent thread of prose statement, certainly exhibits the poet to disadvantage. But were all justice done to the original, we should be at a loss to account for the renown which 'Janós, the Hero,' acquired in Hungary. Its variety of description and invention entitle it to high praise, though (as regards the latter quality, at least) not to the highest. The invention here shown rather ignores difficulties than overcomes them. Janós comes triumphantly out of all his adventures less by his own wit and endurance than by the magic of his weapon and the stupidity of his foes. With a small band he encounters vast hosts, yet victory is ever on his side. At another time his companions perish at sea in a fearful storm; but the obliging billows only lift Janós high enough to catch the skirt of a convenient cloud, to which he firmly holds, until, having drifted shoreward, it deposits him upon dry land. Again, he goes to the land of giants, cuts down the sentinel with the greatest ease, and slays the giant king in his own palace with a pebble. Though the king falls surrounded by a whole court of giants, the latter, so far from taking revenge on Janós, look "bewildered and affrighted":—

One said this, one that,—there was a dreadful quarrel,
And they dropped big tears, one tear would fill a barrel.

Finally, they invite Janós, whose life the least of them might have pinched out with ease, to be their king. Relations of this kind belong rather to burlesque than to the true heroic narrative, from which, however marvellous the events, human sagacity and enterprise cannot be absent. There are touches of Gulliver, and even of Münchhausen, in the adventures of Janós; while, as a hero, he has his prototype rather in a "Jack the Giant-Killer" than in a Hector or an Æneas.

The invention of Petöfi, as seen in this poem, though not of the best kind, is unflagging, and, joined to his powers of description, well calculated to maintain interest. We cannot think, however, that his merits, so far, at least, as 'Janós' is concerned, are adequately reflected in the present translation. There is a frequent carelessness—we had almost said recklessness—in Sir John Bowring's version of this poem, which makes it seem as if his great object had been to press rhymes into his service at any price. Upon what other principle does he write such a forced couplet as this—

He who laughs at death, and looks on life as zero,
He was born for us, and born to be a hero?

A modern burlesque-writer might emulate the word-twisting of the following lines:—

She was childless—but she had a husband brutal—
When she urged her suit, he negatived her suit-all.

But he would scarcely admit into his work such awkwardness of expression, such diffuseness and repetition of idea, as Sir John shows when he continues—

On my head he hurl'd a heavy imprecation,
Spoke of her with scorn and rage and indignation.

We cite a few more examples of redundant expression. Janós catches hold of the cloud,—

Firmly did he hold, both of his hands applying,
So was Janós saved, and lived instead of dying.

Janós discovers that his beloved Iluska is dead,—

Had he not been seated, he had fallen lifeless—
Dreadful, dreadful doom—the widowed and the wifeless!

A fisherman, whom Janós would induce by money to row him over the lake, utters this disinterested sentiment,—

Money I desire not, and as I desire not,
For my friendly service money I require not.

The charge of strained or uncouth rhymes already preferred we must support by such evidence as this:—

Two companions never, never Janós quitted—
One was the deep grief with all his feelings knitted.
For that pathway leads to strongholds of the giants—
Better not go there, for they are ugly clients.

On the corpse he trod, it served him for a bridge there,
Happy augury was such a privilege there.

A giant

Asked to be dismissed, and after long farewelling,
Crossed the lake alone, returning to his dwelling.

It is scarcely credible that these inelegancies and superfluities of diction find their parallels in Petöfi himself; to whatever source attributable, they form grave blemishes in the poem of 'Janós,' as here rendered. The minor pieces in this selection are, as a rule, more carefully finished. That indifference of Nature to individual suffering, which is the constant source of pathetic mystery with modern poets, is very delicately and concisely expressed in three verses:—

How the ancient earth
The young sun, her brother,
Welcomes,—in their mirth,
Kissing one another.

See! the sunny beams
Temple, steeple, shrine.
Mountains, valleys, streams,
Kissing as they shine.

Calmly wakes the sun,
Calmly wends him home—
Has the careless one
Seen Etelka's tomb?

We pass over 'Hungarian Plains,' 'The Stork,' 'The Pusztá in Winter,' and several other poems which show the author's keen eye for the picturesque characteristics of his native land, and extract one of the political lyrics, which have, perhaps, most of all conducted to the idolizing admiration of his countrymen:—

ONE ONLY THOUGHT.

Egy gondolat bánt engemet.

One thought torments me sorely—'tis that I,
Pillowed on a soft bed of down, may die—
Fade slowly, like a flower, and pass away
Under the gentle pressure of decay.
Falling as pales a fading, flickering light
In the dark, lonesome solitude of night.
O God! let not my Magyar name
Be linked with such a death of shame;
No! rather let it be
A lightning-struck, uprooted tree—
A rock, which, torn from mountain-brow,
Comes rattling, thundering down below.
Where every fettered race, tired with their chains,
Must their ranks and seek the battle plains;
And with red flushes the red flag unfold,
The sacred signal there inscribed in gold—
'For the world's liberty!'

As, far and wide, the summons to be free
Fills east and west,—and to the glorious fight
Heroes press forward, battling for the right:
There will I die!
There, drowned in mine own heart's blood, lie,—
Poured out so willingly; th' expiring voice,
Even in its own extinction shall rejoice.
While the sword's clashing, and the trumpet's sound,
And rifles and artillery thunder round;
Then may the trampling horse
Gallop upon my corpse,
When o'er the battle-field the warriors fly.
There let me rest till glorious victory
Shall crown the right—my bones upgathered be
At the sublime interment of the free!
When million voices shout their elegy
Under the unfurled banners waving high:
On the gigantic grave which covers all
The heroes, who for freedom fall,
And welcome death because they die for thee—
All holy! world-delivering Liberty!

The poet's fervour here is contagious. A lyric like the above resembles the first beacon-light

at the signal of which answers of fire spring up far and near. On the whole, we have in Petöfi a poet of a wide range,—of a fancy discursive though often extravagant,—and of a sympathy so general that, with whatever faults, he is not out of his element either in wild and fairy-like legends or in the cosy details of a modern interior. He responds with tender and subtle feeling to the claims of personal affection—with large and generous impulsiveness to the claims of a nation. His humorous attempts are not his happiest; but he now and then paints snug and comfortable pictures with almost Dutch fidelity. If he be not found in England so high or perfect in any one function of poetic genius as might have been expected from his fame, the universality of his gifts will still claim admiration and surprise. Sir John Bowring has done a service in presenting these specimens of the poet—a service which would have been much enhanced had the longer poems in the book been as carefully and felicitously rendered as are some of the shorter ones.

OUR LIBRARY TABLE.

On the Jostedal-Bræ Glaciers in Norway; with some General Remarks, and a Plate. By C. M. Doughty. (Stanford.)

"Bræ" is the Norwegian word for glacier, and the Jostedal-Bræ lies between the parallels of 61° and 62°. It consists of a ridge of irregular shape, and is about sixty miles long and of inconsiderable breadth. Mr. Doughty visited and partly explored it, and gives the results very concisely in fourteen pages. He describes the southern slope, and the several ice-streams, whose names are given in a small chart appended. He states the results of his measurements of the diurnal motion of four principal ice-streams, and it appears that this motion varies considerably, from one to fourteen inches (Norwegian). His observations tend to confirm the opinion of the perfect identity of the glacier-streams of Norway with those of the Alps. Some casual remarks are instructive, as that the Norwegian geologists maintain that scores of Norwegian lakes have more than one outlet. If capable tourists would observe as carefully and report as concisely as Mr. Doughty, they would render service; and a volume or two of such tracts would embody much information, which should not be lost.

Lays of Ancient Rome. By Lord Macaulay. With illustrations, original and from the antique, by G. Scharf. (Longmans & Co.)

This new edition of a well-known publication, with Mr. Scharf's capital illustrations, needs only the announcement of its appearance, to which may be added a general expression of esteem for the spirit with which the artist has caught the true character of a certain class of antique art. The work is learnedly decorated with drawings from Roman antiquities, coins, sculptures and the like, such as refer incidentally or directly to the subjects and matter of the "Lays."

A Sketch of the Geology of Fife and the Lothians; including Detailed Descriptions of Arthur's Seat and Pentland Hills. By Charles Maclaren. Second Edition. (Edinburgh, Black.)

A remarkable second edition is this, in its almost resurrection from the limbo of old geology. The first edition was dated October, 1838, and the second comes to hand in October, 1866. In this same month, also, the venerable author died, at the age of eighty-four. He wrote the Preface to this second edition in August last. Known to the northern country as the editor of the *Scotsman*, he was only known to geologists as the author of this sketch, which has long been out of print. We remember reading it many years ago with advantage, but to day we glance over it only with a melancholy interest in its departed author. The work served a good purpose in its day; generally, by teaching and exemplifying a habit of patient and careful observation; and locally, by giving accurate geological information on the districts

named, without admixture of fanciful inferences. Even now it will be found locally instructive to students and tourists, for it abounds in detail. But the reader must have been over the ground himself, or be such a thorough Scotchman as to love even what is under the ground in Scotland, in order that he may persevere in going through the volume. Had the author chosen to modernize the terminology, and to recast the whole, he might have added to his claims upon our respect. But it was hardly doing his old fame justice to let the volume reappear with such abrogated terms as "grey-wacke," "greywacke slate," &c. The chapter on the Alluvial Phenomena of the district described is one of those which most betrays the lack of revision. At least the author might have added a few notes and some references to recent publications and opinions on the subject. The getting up of the volume does display the advance of typography; but nothing shall be said of the few maps and plans at the end, which look as old as the author.

Journal of the Royal Geological Society of Ireland. Vol. I. Part II. 1865-66.

WE are glad to afford a line or two to the *Journal* of this Society, recording the papers read during its second session. As the members increase, so, doubtless, will the number and interest of its communications increase. Much good geological work in Ireland demands resident workers; and the members of this Society appear to be zealous as well as accomplished residents. Mr. J. Beete Jukes contributes to the present part a careful comparison between certain rocks in the south-west of Ireland and similar ones in North Devon and in Rhenish Prussia. From their lithological characters and their imbedded fossils (a list of which is added), the writer forms two conclusions: first, that it was a mistake to include under one designation the Old Red Sandstone and the beds containing marine shells to which the name Devonian has been given; secondly, that these latter are merely geographical representatives of the beds commonly called carboniferous, and are chronologically identical with them. The value of constant local research is manifested by some remarkable fossils—alleged to include six or seven new genera of reptiles—brought from a part of the Leinster coalfield. Altogether, this Part of the *Journal*, though small in bulk, is satisfactory and promising.

We have on our table new editions of *A History of the Jews, from the Earliest Period down to Modern Times*, by Henry Hart Milman, D.D. (Murray);—*On the Origin of Species by means of Natural Selection, or the Preservation of favoured Races in the Struggle for Life*, by Charles Darwin (Murray);—*Essays*, by Dora Greenwell (Strahan);—*The Use of the Laryngoscope in Diseases of the Throat; with an Appendix on Rhinoscopy*, by Morell Mackenzie, M.D. (Hardwicke);—*Albuminuria, with and without Dropsy: its different Forms, Pathology, and Treatment*, by George Harley, M.D. (Walton & Maberly);—*Sir Walter Scott's Waverley, Kenilworth, Old Mortality, The Monastery, Rob Roy, The Pirate (Hotten)*,—*Hans Christian Andersen's Stories for the Household*, translated by H. W. Dulcken, Ph.D. (Routledge);—*The Rich Husband: a Novel*, by Mrs. J. H. Riddell (Tinsley);—*Peter of the Castle and the Fetches*, by the O'Hara Family, with an Introduction and Notes by Michael Bannin, Esq. (Dublin, Duffy);—*Dan's Treasure; or, Labour and Love*, by Leigh Tempest (Darton & Co.);—*Wildflower; or, Rights and Wrongs*, by Frederick William Robinson (Chapman & Hall);—*A Tangled Web, and other Interesting and Amusing Stories*, by Eminent Authors (Edinburgh, Nimmo);—*The Eldest Miss Simpson and her Matrimonial Mishaps* (Ward & Lock);—*Penny Readings in Prose and Verse*, selected and edited by J. E. Carpenter (Warne);—*Original Penny Readings: a Series of Short Sketches*, by George Manville Fenn (Routledge);—*Our Charades, and How we Played them*, by Jean Francis (Houston & Wright). We have also the following pamphlets: *The Law relating to Ritualism in the United Church of England and Ireland*; with Practical Suggestions for Amendment of the Law, &c. Form of Bill

for that purpose, by F. Hargrave Hamel (Butterworths).—*The Alleged Conversion of the Irish Bishops to the Reformed Religion, at the Accession of Queen Elizabeth, and the assumed Descent of the present established Hierarchy in Ireland, from the Ancient Irish Church disproved*, by W. Maziere Brady, D.D. (Longmans).—*Dogma versus Morality: a Reply to Church Congress*, by Charles Voysey, B.A. (Trübner & Co.).—*A Charge delivered to the Clergy of the United Dioceses of Dublin and Glendalagh and Kildare, at the Ordinary Visitation, September, 1866*, by Richard Chenevix (Hodges, Smith & Co.).—*The Conscience Clause in 1866: Speeches delivered in the Chapter-House of York Minster, on the 13th of October, 1866*, by John Gellibrand Hubbard, M.P., and Rev. George Trevor (Masters).—*The Continuity of the Schemes of Nature and of Revelation: a Sermon*, preached by request, on the occasion of the Meeting of the British Association at Nottingham, with Remarks on some Relations of Modern Knowledge to Theology, by the Rev. C. Pritchard, M.A. (Bell & Daldy).—*Probatio Sacerdotalis: Scenes from Scottish Clerical Life*, by Bryce (Glasgow, Graham).—*and Devout Moments*, by Lord Kinloch (Edinburgh, Edmonston & Douglas.)

BOOKS FOR CHILDREN.

Wild Roses; or, Simple Stories of Country Life. By Frances Freeling Broderip. With Illustrations. (Griffith & Farran.)

ROUSING herself under the burden of a recent sorrow, to which an unobtrusive allusion is made in the dedicatory page of this pleasant volume, Mrs. Broderip has bravely put forth her best powers, so that her readers might not in the holidays of the coming Christmas ask in vain for a new book from her pen. The six stories which are the result of this effort, made amidst depressing circumstances, and in the gloom of domestic bereavement, will endure comparison with the best things that have come from the same fresh and graceful writer. 'Polly's Pupil' is a truthful and humorous picture of country life. Dame Simcoe reminds us of Shenstone's 'Schoolmistress.' Mr. Anelay's illustrations, unlike the artistic disfigurements of many a book for children, heighten the attractiveness of the volume.

Cassell's Story-Books for the Young.—The Elcheater College Boys, by Mrs. Henry Wood: followed by *A Christmas Story*, by T. S. Arthur; and *Red-headed Andy*, and *A Rainy Day*, by Fanny Fern. (Cassell, Pether & Galpin.)

OF course Elcheater School is in the centre of a cathedral town, and has a strong ecclesiastical aroma pervading its lecture-rooms and corridors. Of course the cathedral choristers are taught within its walls, and the clerical powers of the cathedral—the dean and his whole army of canons—are made to watch, lecture, and influence the king's scholars in a fashion peculiar to the clergy who hover about Mrs. Wood's grammar-schools. Needless, also, is it to say that the model boy of Elcheater School is birched when he deserves no punishment whatever, and is compelled to endure the slings and arrows of a very outrageous fortune during a period of moral probation and intense intellectual exertion, which terminates with his successful candidature for a scholarship, and the humiliation of his adversaries; after which occurrences he moves off to one of our old universities, amidst the applause of spectators, and with the approval of his own conscience. Such matters are expected in a story of schoolboy-life by Mrs. Wood; and, on the present occasion, her king's scholars are just as talkative, her choristers just as mischievous, and her clergymen just as didactic as we have always found them in times past. 'Elcheater College' has the virtue of brevity; and it is followed by three slight sketches, which serve to pad out the volume, though they do not contribute much to the entertainment that may be found within its boards.

The Texan Ranger; or, Real Life in the Buckwoods. By Capt. Flack. (Darton & Co.)

Capt. Flack, whose writings on the sport of the American prairies and forests met with the approval of readers, is now to judge such compositions, and

amongst the hunters of the bear and the buffalo, has here thrown together some of his most stirring recollections of perilous exploits for the diversion of schoolboys. Besides anecdotes about sport, Capt. Flack finds occasion to give his readers a considerable amount of useful information concerning the agriculture and manufactures of the Southern plantations. He is a writer of sterling stuff, and will not fail to find as many readers amongst the young as he has already gathered amongst persons of riper years.

Lucy West; or, the Orphans of Highcliff. By Mrs. H. B. Paull. With Illustrations. (Warne & Co.)

Mrs. Paull has succeeded in combining the most disagreeable qualities of the religious tale with the most ridiculous characteristics of the Rosa-Matilda novel. The heroine of the story, Lady Arabella, is a pious young lady who delights in reading the Bible and praying with her maid, Patty, whilst her sisters, the Lady Esther and the Lady Alice, fix their thoughts upon the things of this world, and beyond all other possessions, earthly or spiritual, desire to get rich and distinguished husbands. To show how the wicked are frustrated, and the good are rewarded with plenteousness in this world as well as in the life to come, the story makes Lady Arabella a duchess, and assigns altogether inferior social positions to her unregenerate sisters. "Oh!" said Lady Alice, laughing, "Arabella is an exception. She thinks these gaieties very wicked; she is a Methodist."—"A Methodist is she? Pray what is that?" asked the Duke.—"Really," said the young lady, "it is quite out of my province to discuss theology, especially with gentlemen." After this reply the Duke said no more; and, in a few days, the sisters found he had left town—not, however, without an invitation from the Earl to visit Denham Court in the autumn. At first he felt inclined to excuse himself, but then the recollection of the little "Methodist" who resided there altered his intention. Yes, he would pay the Earl a visit. A real Methodist in an earl's house was just what he wanted to find. In the autumn he came, and found the little Methodist so charming that he determined to make her his wife, with the Earl's permission and her own consent. None could be more surprised than the sisters of Lady Arabella; and some little feeling of envy was mixed with the surprise. No one could be more pleased than the Earl,—yes, and surprised, too. Both he and his daughters had forgotten the text, "Them that honour me, I will honour." Such is the religion of not a few prosperous and self-complacent people in this nineteenth century of the Christian era.

The Cumberstone Contest: a Story for the Young. By the Author of 'The Best Cheer,' &c. (Seeley, Jackson & Halliday.)

WITH commendable pains, though to no very satisfactory purpose, the author of 'The Best Cheer' and 'The Battle Worth Fighting' has written a story which sets forth the folly of the boy who runs away from home because he has a quarrel with his bread-and-butter, or deems himself to have been treated with undue severity by his domestic authorities. The moral is unassailable; but we question whether tales inculcating the wholesome and sound doctrine are likely to exercise any beneficial effect on boys who, in a fit of black temper, are foolish enough to meditate flight from parental control, and to imagine themselves capable of making their way in the world without parental assistance. A few weeks since we encountered in a Welsh hotel a miserable lady, whose only child had run away from school with two companions. In her natural grief and anxiety she had dispersed handbills, setting forth the personal characteristics of the truant lads, throughout the Snowdon country, whither they had turned their steps in search of adventures and fortune; and she was urging the police to employ every measure that might discover her darling and restore him to her arms. The poor lady could not see that her best course was to remain quietly at home, and rest assured that when he had spent his pocket-money and made salutary acquaintance with the sufferings and privations of vagrancy, her foolish child would return to her roof, properly disciplined by hunger and exposure,

and by no means likely to repeat his absurd freak. The moral disease of the runaway boy is not to be treated with mildly dissuasive homilies. 'Cumberstone Contest' opens better than it closes. Perhaps on a future occasion and for other work, we shall be able to say more in praise of its author.

The Red Shoes; and other Stories.—The Little Match Girl; and other Stories.—The Silver Skilling; and other Stories. By Hans Christian Andersen. Translated by H. W. Dulcken, Ph.D. Illustrated with many Pictures. (Routledge & Sons.)

AT this season of comparative dullness in the manufacture of new literature for the play-room, Messrs. Routledge & Sons present us with three volumes of selections from the tales of Hans Christian Andersen, whose stories have already found their way into the hands of English children in almost every social grade, and to whose special powers the *Athenæum* has on more than one occasion paid an appropriate tribute of respect. The present series consists of handy little volumes, skilfully embellished, and in all respects "well got up." Concerning the method pursued by the editor in selecting and arranging the tales for publication we are told by a prefatory advertisement, "The more simple stories have been taken for the earlier volumes, and thus the reader, gradually progressing, will find the most advanced in the concluding volumes, each book being complete in itself." Each volume of this "Andersen Library," it may be added, contains about one hundred and fifty pages.

LIST OF NEW BOOKS.

- Airy's Treatise on Partial Differential Equations, cr. 8vo. 5 s. 6 d.
 Ansted's Physical Geography, post 8vo. 12 s. 6 d.
 Argyle's (Duke of) The Reign of Law, cr. 8vo. 12 s. 6 d.
 Baxter's The Paine of 1866, cr. 8vo. 3 s. 6 d.
 Bonar's Hymns of Faith and Hope (Royal Edit.), post 8vo. 7 s. 6 d.
 Boy's Wonder Book, illust. 8vo. 3 s. 6 d. gilt.
 Brown's Memorials of Passages in Life of an Indian Merchant, 1 s.
 Burritt's Sparks from the Anvil, illust. edit. 12mo. 1 s. 6 d.
 Burritt's The Mission of Great Suffering, cr. 8vo. 3 s. 6 d.
 Carpenter's Penny Readings, Vol. 9, 12mo. 1 s. 6 d.
 Charlesworth's Ministering Children (sequel), cr. 8vo. 5 s. 6 d.
 Christie's Faith, by author of 'High Church,' 3 vols. post 8vo. 11 s. 6 d.
 Christianity and its Evidence, edited by Knight, post 8vo. 5 s. 6 d.
 Church's (The) Year, Hymns on the Collects, &c., 12mo. 2 s. 6 d.
 Cliff's (The) Tale, 12mo. 1 s. 6 d.
 Corbet's Golden Kippie, photo. illust. 8 s. 6 d.
 Dickens's Uncommercial Traveller, People's edit. cr. 8vo. 2 s. 6 d.
 Doyle's The Return of the Guards, and other Poems, 12mo. 7 s. 6 d.
 Dyer's Ruins of Pompeii, 18 photo. Views, 4to. 21 s. 6 d.
 Edwards's Battle Fields of 1861, post 8vo. 12 s. 6 d.
 Edwards's Winter with the Swallows, 8vo. 15 s. 6 d.
 Epitome of the Bible, compiled from Old and New Testaments, 8 s. 6 d.
 Everard's 'Not Your Own,' 12mo. 1 s. 6 d.
 Fenn's Original Penny Readings, Vol. 8, 12mo. 1 s. 6 d.
 Fenn's History of the Army of the American War, 18mo. 1 s. 6 d.
 Fowler's Elements of Deductive Logic, post 8vo. 2 s. 6 d.
 Freeland's Fountain of Youth, from the Danish, post 8vo. 6 s. 6 d.
 Fryer's Illustrations of Poetic Imagery, 4to. 21 s. 6 d.
 Goss's Wires, String of Strange Stories, 8vo. 1 s. 6 d.
 Glover's The Finding of the Saviour in the Temple, cr. 8vo. 4 s. 6 d.
 Griffith's Victory Deane, 3 vols. post 8vo. 21 s. 6 d.
 Hall's Animal Sagacity, 5 s. 6 d.
 Hemans's Hist. of Ancient Christianity & Sacred Art in Italy, 7 s. 6 d.
 Henry's Matthew, Exposition of the book of Psalms, cr. 8vo. 8 s. 6 d.
 Hullah's Sacred Music for Family Use, folio, 21 s. 6 d.
 King's The Three Choirs' Handbook to Cathedral, post 8vo. 6 s. 6 d.
 Leighton's 36 Illustrations from The Cornhill, imp. 4to. 10 s. 6 d.
 Macleod's Simple Truth spoken to Working People, 10 s. 6 d.
 Maitland's 29 Illustrations from The Cornhill, imp. 4to. 10 s. 6 d.
 Mommens's History of Rome, Vol. 4 (3 Parts), post 8vo. 16 s. 6 d.
 Newlyn House, by E. A. W., 12mo. 3 s. 6 d. gilt.
 Notes on Territorial Changes through War in Germany, &c. 4to. 1 s. 6 d.
 Pope's Essay on Criticism, by Neil, cr. 8vo. 1 s. 6 d.
 Prendergast's Polynesian Reminiscences, illust. 8vo. 16 s. 6 d.
 Quarry's Genesis and its Authorship, 8vo. 21 s. 6 d.
 Ritter's Comparative Geography, trans. by Gaze, 4 vols. 8vo. 21 s. 6 d.
 Sains's William Hogarth, Painter, Engraver, &c., cr. 8vo. 7 s. 6 d.
 Saville's Beating to Windward, 3 vols. post 8vo. 31 s. 6 d.
 Short stories to explain Bible facts, by H. H., 12mo. 1 s. 6 d.
 Smith's Manual of New Testament History, post 8vo. 7 s. 6 d.
 Smith's Thistle-down Verses, Original and Translated, illust. 1 s. 6 d.
 Station Dangerous, and other Tales, for Young, by O. F. T., 3 s. 6 d.
 Stoney's Theory of Strains in Girders, &c., 3 vols. (Vol. I.) 15 s. 6 d.
 Story (The) of Little Alford, by D. J., 12mo. 1 s. 6 d.
 Sunday Afternoons at Parish Church of a University City, 16 s. 6 d.
 Tennyson's Elaine, illust. by G. Doré, folio, 21 s. 6 d.
 Townshend (Chas.), Wit and Statesman, by Fitzgerald, 8vo. 10 s. 6 d.
 Twiss for Nests, Notes on Nursery Nurture, illust. 8 s. 6 d.
 Van Zee's French Grammar, Part 3 (Exercises), 12mo. 2 s. 6 d.
 Von Borcke's Confederate War for Independence, 3 vols. cr. 8vo. 21 s. 6 d.
 Walker's 27 Illustrations from The Cornhill, imp. 4to. 10 s. 6 d. gilt.
 Whittier's Snow Bound, a Winter's Idyl, photo. illust. 4 s. 6 d.
 Winning Words, and Series, 12mo. 1 s. 6 d.
 Wright's Treasury of Poetry, by M. H. C., 12mo. 1 s. 6 d.
 Xenophon's Anabasis, books 1-3, Notes by Lister, 12mo. 3 s. 6 d.
 Yanker's Illustrated Crest Book for Monograms, 4to. 11 s. 6 d.

ISRAEL IN EGYPT.

7, Hamilton Terrace, Nov. 16, 1866.

I hope it may not yet be too late to take up the challenge offered me in the remarks of the *Athenæum* on the performance of 'Israel in Egypt' at the recent Norwich Festival.

I reply to the demand, "Is Mr. Macfarren sure that the accompaniment of recitative, namely, that of chords in *arpeggi* on the violoncello, is a modern practice?" that, though sure of nothing, I fully believe the testimony upon the subject of Sir George Smart, who, when a choir-boy in the

Chapel Royal, under the mastership of Dr. Ayrton, was habitually selected from among his fellows to turn over the leaves for Joah Bates, at the public performances under his direction. In Handel's oratorios, Bates used to accompany the choruses and songs upon the organ, the latter, not with simple chords alone, but often with contrapuntal figures, and to accompany the recitatives, in plain or spread chords, upon the harpsichord or pianoforte that stood beside the organ, the bass notes of which were strengthened by the principal violoncello and double bass. He distinctly forbade Cervetto, who was famous for his *arpeggiando* accompaniment of recitative on the violoncello at the Opera, to follow the same practice in oratorios. Further than this, when asked why he commonly played so much that was not written, Bates replied, "Because Handel used to do so." Bates was born nineteen years before the death of Handel, who died one week after playing in a performance of 'The Messiah.' He founded the Ancient Concerts, first held at the room in Tottenham Street, now known as the Prince of Wales's Theatre, and subsequently at the Hanover Square Rooms; he originated, planned and directed the famous Commemoration of Handel in Westminster Abbey, and he died in 1799. His brother, who long survived him, often deplored the innovations he witnessed in the manner of performing Handel's music, and this one particularly, in the method of accompanying recitative. Sir George Smart's only dispute in his long career as a conductor was on this very subject, with Lindley, who wished to play *arpeggios* after the manner of Cervetto, but was always reproved upon the authority of Bates.

Let me refer to M. Scholcher's 'Life of Handel' for evidence of the prominent importance of the composer's playing on the organ and harpsichord in the public performances of his works; again, to Herr Jahn's 'Life of Mozart,' for proof that this master wrote his instrumentation of 'The Messiah,' 'Acis and Galatea,' and 'Alexander's Feast' at the suggestion of the intelligent and well-informed Baron von Swieten, not to "embellish," but to complete those works by filling up the hiatus caused by the absence of Handel's organ or harpsichord accompaniment; and yet again, let me cite Mendelssohn's letter of the 10th of July, 1838, to Herr Simrock, and the preface to his edition of 'Israel in Egypt' (dated July 4, 1844, though published between two and three years later) for a sound, recent opinion as to the necessity for such additions for the good effect of Handel's works.

I will only prolong this letter to remind you that 'The Messiah' was given on a very large scale at the Stratford Festival in 1864, and at the inauguration of the Surrey Gardens in 1856, at both without organ, and both performances having been "since the days when sacred music was travestied on the London stage in Lent," to which instances I might add others.

G. A. MACFARREN.

* * We are obliged to Mr. Macfarren for answering, not a challenge, but a question. When time serves, we may have something more to say on the subject; the matter is not finally disposed of in this letter.

FEELING OF BEAUTY AMONG ANIMALS.

Tynron, Dumfriesshire, Nov. 19, 1866.

FROM the ancient references in Eastern literature to the serpent charmers down to modern times, the facts showing that certain animals are gratified by music have been accumulating. He would be a bold man who should say that birds have no delight in their own songs. I have been led to conclude from experiments which I have made, and from other observations, that certain animals, especially birds, have not only an ear for fine sounds, but also a preference for the things they see out of respect to fine colours or other pleasing external features. To begin with ourselves, the pleasure which we derive from a certain class of objects is universal and well marked; even when man becomes animalized this instinct is never lost, but only undergoes modification. Christian babes and cannibals are equally vain of fine clothes, and have a similar passion for beads and glittering toys. Carlyle suggests that the love of ornament

rather than the desire of comfort was at the origin of clothes. It is chiefly among birds, when we consider the case of animals, that a taste for ornament and for glittering objects, often very startling and human-like, is to be found. The habits of the pheasant, peacock, turkey, bird of paradise, several birds of the pigeon and crow kind, and certain singing birds, are evidence. The Australian satin bower-bird is the most remarkable of that class which exhibit taste for beauty or for glittering objects out of themselves, that is, beauty not directly personal; collecting, in fact, little museums of shells, gaudy feathers, shining glass, or bits of coloured cloth or pottery. It will be found with many birds that fine plumes, a mirror and an admirer, are not altogether objects devoid of interest.

Another consideration leading me to the same conclusion, is the fact that beauty in animals is placed on prominent parts, or on parts which by erection or expansion are easily, and at the pairing season, frequently rendered prominent, such as a crest or tail. A spangle of ruby or emerald does not exist, for instance, on the side under the wing, which is seldom raised, of our domestic poultry. Such jewels are hung where man himself wears his, on the face and forehead, or court attention, like our own crowns, trains, shoulder-knots, breast-knots, painted cheeks, or jewelled ears. I cannot account for the existence of these gaudy ornaments to please man, for nowhere are they more gorgeous than in birds which live in the depth of the tropical forest, where man is rarely a visitor; I cannot account for them on the principle that they do good to their possessors in the battle for life because they rather render them conspicuous to their enemies, or coveted by man. But when I consider that the beauty of these beings glows most brightly at the season of their love-making, and that most observers agree that the female is won partly by strength, partly by gestures, and partly by voice, and that the male, whose interest it is to be most attractive, is often in his wedding-suit, the most gaily decorated, it seems to me that beauty, through a wider range than has yet been generally acknowledged, is accessory to love.

Butterflies, it is true, have gay patterns on the under wing, but this rather strengthens than diminishes the force of my argument, for with them, in a state of rest, the wings are folded erect, whereas others of that class, as moths and hawk-moths, whose wings, when at rest, are either inclined, horizontal, or wrapped round the body, have only the upper side of the wings beautiful. It is to be noticed also that these creatures, out of the three states in which they exist, are only remarkable for beauty in that state in which they seek their mates, and whoever compares many of their males (as that of the orange-tip) to the females will find that gaudy colouring also favours the former. These delicate and ephemeral creatures are often to be observed flying lazily, as if aware of their splendour, and as if giving time that it might be seen.

Among fishes it is amusing to watch the combats of male sticklebacks for the females, which can be witnessed in an aquarium, and to note how the victor waxes brilliant in hue, and the vanquished, if he survive, wanes greatly in splendour. Fishes, and more especially insects, are often destroyed through the strange attraction which light has for them.

Birds are sometimes caught, especially larks in France, through the same allurements; and those very fire-flies, whose luminosity is so pretty to us, I have no doubt find it attractive to themselves. They are caught by means of their eagerness for light by those West Indian ladies who use them as jewels for their head-dress at a dance.

I am much strengthened in the conclusions at which I have arrived on this subject by the reference made to it by Mr. Darwin in the fourth edition of his work on Species, a copy of which has just now reached me. The selection of beauty in their mates by some animals is there made to follow from their appreciation of it, so that effect and cause mutually throw light on each other. Some profound and interesting remarks are further added by the author, explanatory, on scientific grounds, of the origin of flowers, which strike

me, although the remarks are very brief, as being the first likely solution of what has been for ages an inscrutable problem.

J. SHAW.

LUMINOUS METEORS.

Pall Mall East, Nov. 21, 1866.

THE splendid phenomenon of the 13th and 14th inst. will not soon be forgotten by those who had the good fortune to witness it. Although the appearance of these luminous and fleeting bodies had been predicted, indicating an advance in the knowledge of their position, or, so to speak, of their chief rendezvous, yet their nature, source, destination and uses cannot be said to have been made out with equal satisfaction. Wonderment, admiration, awe, and even worship, have been excited by their display; but the question—What are they? finds answer in little more than hypothesis.

One of the oldest treatises on Astronomy in the English language contains some curious opinions relative to these bodies. The book referred to is by William Fulce, and was published in London in the year 1563, and is thus entitled: 'A Goodly Gallerye, with a most pleasant Prospect into the garden of naturall contemplation, to behold the naturall causes of all kynde of *Meteors*, as wel fyery and aery, as watry and earthly, of whiche sort be blasing Starres, shooting Starres, flames in the ayre, &c., th'oder, lightning, earthquakes, &c., rayne, dewe, snowe, cloudes, springes, &c., stones, metales, earthes, &c. to the glory of God, and the profit of his creatures.'

The following extract will show the author's opinions about "shooting starres," &c.—(we take the liberty to modernize the spelling):—

"Of the general Cause of all *Meteors*.—The matter whereof the most part of meteors doth consist, is either water or earth, for out of the water proceed vapours, and out of the earth come exhalations. Vapour, as the philosopher saith, is a certain watery thing, and yet is not water; so exhalation hath a certain earthy nature in it, but yet it is not earth. For the better understanding of vapours, understand that they be as it were fumes or smokes, warm and moist, which will easily be resolved into water, much like to the breath that proceedeth out of a man's mouth, or out of a pot of water standing on the fire. These vapours are drawn up from the waters and watery places, by the heat of the sun, even unto the middle region of the air, and there, after divers manners of meeting with coldness, many kind of moist *meteors* are generated, as sometimes clouds and rain, sometimes snow and hail, and that such vapours are so drawn up by the sun, it is plain by experience. *Exhalations* are as smokes that be hot and dry, which, because they be thin, and lighter than vapours, pass the lowest and middle region of the air, and are carried up even to the highest region, wherefore the excessive heat; by nearness of the fire they are kindled, and cause many kind of impressions. The first and efficient cause is God, the worker of all wonders. The second cause efficient, is double, either remote, that is to say, far off, or next of all. The further cause of them, as of all other natural effects, are the same, the sun, with the other planets and stars, and the very heaven itself in which they are moved: but chiefly the sun, by whose heat all, or at leastwise the most part, of the vapours and exhalations are drawn up. But to return to the heat of the sun, which is a very near cause . . . he draweth vapours out of the water, and exhalations out of the earth, and not only draweth them out, but also lifteth them up very high from the earth, into the air, where they are turned into divers kinds of *Meteors*. Concerning the formal and final cause, we have little to say, because the one is so secret that it is known of no man, the other so evident that it is plain to all men.

"Of *Fiery Meteors*.—A fiery impression is an exhalation set on fire, in the highest or lowest region of the air, or else appearing as though it were set on fire and burning. If it (the matter) be great, heavy and gross it cannot be carried so far as the middle region of the air, and therefore is set on fire in the lowest region; if it be not so great, light and full of heat, it passeth the middle region and ascendeth to the highest, where it is easily kindled and set on fire. According to their

diverse fashions, they have diverse names, for they are called burning stubble, torches, dancing or leaping goats, shooting or falling stars, or candles, burning beams, round pillars, spears, shields, globes or bowls, firebrands, tapes, flying dragons, or firebrakes, pointed pillars, or broched steeples, or blazing stars, called comets.

"Of Shooting and Falling Stars.—A flying, shooting, or falling star, is when the exhalation being gathered, as it were, on a round heap, and yet not thoroughly compacted in the highest part of the lowest region of the air, being kindled by the sudden cold of the middle region is beaten back, and so appeareth as though a star should fall, or fly from place to place. Sometimes it is generated after another sort, for there is an exhalation long and narrow, which being kindled at one end burneth swiftly, the fire running from end to end; as when a silk thread is set on fire at the one end. Some say it is not so much set on fire, as that it is direct under some star in the firmament, and so receiving light of that star, seemeth to our eyes to be a star. Indeed, sometimes it may be so, but that is not so always, nor yet most commonly, as it may be easily demonstrated. The *Epicurians*, as they are very gross in determining the chief goodness, so they are very fond in assigning the cause of this meteor. For they say, if the stars fall out of the firmament, and that by the fall of them, both thunder and lightning are caused; for the lightning (say they) is nothing else but the shining of that star that falleth, which falling into a watery cloud, and being quenched in it, causeth that great thunder, even as hot iron maketh a noise if it be cast into cold water. But it is evident that the stars of the firmament cannot fall; for God hath set them fast for ever, he has given them a commandment which they shall not pass. And though they should fall into the cloud, yet could they not rest there, but with their weight being driven down would cover the whole earth. For the least star that is seen in the firmament is greater than all the earth. Here will step forth some merry fellow, which of his conscience thinketh them not to be above three yards about, and say it is a loud lie, for he can see within the compass of a bushel more than twenty stars. But if his bushel were on fire twenty miles off, I demand how big it would seem unto him. He that hath any wit will easily perceive that stars being by all men's confession so many thousand miles distant from the earth, must needs be very great, that so far off should be seen in any quantity. Thus much for the shooting or falling stars."

And thus much for the ratiocinations of our forefathers three centuries ago. W. C.

Dumfries, Nov. 21, 1866.

Was it to some meteoric shower which had happened about the time, that Dryden alludes in the following curious passage of 'The Hind and Panther' (Part II., *sub fin.*)?—

Such were the pleasing triumphs of the sky
For James's late nocturnal victory;
The pledge of his Almighty patron's love,
The fireworks which his angels made above.
I saw myself the lambent easy light
Gild the brown horror and dispel the night.
The messenger with speed the tidings bore,
News which three labouring nations did restore.
But Heaven's own Nuntius was arrived before."

Was this the poet's actual belief (he was, latterly, superstitious), or a mere poetical flight? How remote, either of them, from this age. X.

OUR WEEKLY GOSSIP.

THE Anniversary Meeting of the Royal Society will be held next Friday (St. Andrew's Day), and will, as usual, be followed by the annual dinner at Willis's Rooms.

We regret to hear that Prof. De Morgan has sent in his resignation of the Chair of Mathematics in University College.

Two more theatres are to be forthwith erected, one on the site of the Horse Bazaar in High Holborn, and the other on that of Saville House, in Leicester Square.

Prof. Tischendorf, during his sojourn in Rome in the spring of this year, succeeded in clearing up many contradictions in C. Mai's edition of

the New Testament—from the Codex Vaticanus—and in discovering many readings and peculiarities of the manuscript which have hitherto been overlooked. Partly by actual transcription, partly by careful collation; he is now in a position to publish, for the first time, the New Testament of the Codex Vaticanus, in a text which will be perfectly trustworthy and to offer exact information on the state of the text, and on its palaeographic peculiarities. This work will be published in the spring of next year. A companion volume will contain an Appendix, with fac-similes of Greek originals from Sinai, the Vatican and the British Museum.

The most important event connected with our Early Ballad Literature that has occurred in our time is Mr. Furnivall's announcement that the Early English Text Society has obtained possession, for a few months, of Bishop Percy's Ballad Manuscript, with permission to copy and publish it. "Wherever English Literature has been studied for the last hundred years," says Mr. Furnivall, "Bishop Percy's 'Reliques' have been household words among ever-increasing circles of readers. The 'Ancient English Poetry,' from the time of its appearance, greatly influenced our literature. It inspired in a greater or less degree Southey and Coleridge, Burns and Scott, and has been the delight of untold thousands of boys and men. Yet not one in ten thousand of all these readers has ever known how much or how little of the different poems was really ancient, how much was sham antique of Percy's own. By the Bishop's own showing, he altered his manuscripts at discretion. His introduction to 'Sir Cauline' marks the spirit in which he regarded his authorities:—'The whole [poem in his manuscript] appeared so far short of the perfection it seemed to deserve, that the editor was tempted to add several stanzas in the first part, and still more in the second, to connect and complete the story in the manner which appeared to him most interesting and affecting.' Accordingly, as the manuscript Ballad married Sir Cauline to his love—

then he did marry this King's daughter
with gold & silver bright;
& 15 sonnes this Ladye beere
to Sir Cawline the knight—

and the Bishop thought this ending a most unaffecting one, he wrote some fresh verses, killed both knight and lady in what he considered a pathetic style, and of course abolished the fifteen sons. With a true instinct Prof. Child remarked in his 'Ballads' (edit. 1861, vol. iii. p. 172), 'It is difficult to believe that this charming romance had so tragic and so sentimental a conclusion.' By way of justification, the Bishop tells his readers that 'His object was to please both the judicious antiquary and the reader of taste; and he has endeavoured to gratify both without offending either.' Now 'in a polished age like the present,' as Percy described his own time, a judicious antiquary (unlike Ritson) might possibly be pleased with such treatment of manuscripts as the Bishop's was; but in an age which (like our Victorian) has, thank Heaven, lost that kind of polish, a judicious antiquary would get judiciously furious at such tampering with a text, and demand imperatively the very words of the manuscript. After their production he might listen to any retouchings and additions of editors clever or foolish, but not before. He cares first for the earliest known authority (however late it may be), and its sentiment, not for the 'interesting and affecting' alterations made in a 'polished age.' This feeling led Prof. Child, of Harvard University, years ago to apply to me to find out where Bishop Percy's folio manuscript was, and print it—that manuscript of which Percy, speaking of his 'Reliques,' says, 'The greater part of them are extracted from an ancient folio manuscript in the editor's possession, which contains near 200 poems, songs, and metrical romances.' My request to the Bishop's descendants to see the manuscript was (like that of nearly every other applicant) refused, as was also my offer of 100*l.* for the right to copy and print it. But lately a fresh negotiation, through Mr. Thurstan Holland, a friend of Prof. Child's, has resulted in my obtaining (for 150*l.*) possession, for six months, of the long-hidden manuscript, with the right to make

one copy of it and print it. The MS. contains 189 pieces (some fragments) in nearly 40,000 lines, and is in a hand of James the First's reign. Percy's list of its contents at the end of this circular shows how many unprinted ballads and romances it contains—for what the Bishop printed of the manuscript must be considered unprinted for our purpose—and how incumbent it is on all men who care for such things to get the whole manuscript into type as speedily as possible. As above said, the sum paid for the right to print the manuscript was 150*l.* The copying and printing of it will cost at least 350*l.* more, and for extras and incidental expenses another 100*l.* should be provided: altogether 600*l.*"

The British Museum has lately received a series of specimens of the beautiful sponge called Venus's flower-basket (*Euplectella speciosa*). It is more like the work of the lace-maker than a congeries or republic of minute jelly-like animals; and the thread of which it is woven is so hard that it will scratch glass.

Mr. Bonomi writes:—

"13, Lincoln's Inn Fields, Nov. 19, 1866.

"Will you allow me to correct a statement respecting the name of the donor of the last addition to the Egyptian collection in the British Museum, and to make a few remarks on the statue itself. In the first place, then, the statue was presented to the nation by Mr. Samuel Sharpe (not Edmund), the well-known Egyptologist, and author of a History of Egypt, better known and esteemed in Germany than in England. Now with respect to the statue. It represents, as you remark, a son of Rameses the Second, who was a standard-bearer in the Egyptian army, and very likely the same who accompanied his father into Ethiopia, as recorded in the sculpture of the small temple at Kalabsha. The material of the statue is from the quarries of Gebel el Ahmar, the red mountain, a few miles to the east of Cairo, and was very likely chosen on account of its durability and peculiar colour, resembling as it does the complexion of the people of Thebes; for, in other respects, it would be impossible to find a less adaptable material for sculpture. Nevertheless, it has been fashioned into the figure of a man, and may be reckoned one of the best specimens of Egyptian sculpture in our national collection. The statue is entire, except its beard, which was probably broken off by the invaders of Egypt under Nebuchadrezzar, of whom it is said in Jeremiah, chap. xlii. v. 13, 'He shall break also the images of Bethshemesh, that is in the land of Egypt; and the houses of the gods of the Egyptians shall be burn with fire.' Bethshemesh may mean Heliopolis, where was one of the most famous temples in all Egypt, and where this statue was probably standing on its pedestal when it received that blow on the chin which has deprived it of its beard, and which, according to Asiatic notions, is the greatest indignity that can be offered.—I am, &c.,

"JOSEPH BONOMI."

We witnessed on Saturday morning Madame Stodare's Séance at the Egyptian Hall. Mr. Firbank Burman, Col. Stodare's pupil, performed all the accustomed tricks with adroitness and politeness. After these, Madame Stodare appeared herself; and the Sphinx, the Marvel of Mecca, and the Basket-Trick were exhibited. The "Theatre of Mystery," as the chamber is named, was well attended.

What appears to have been the ancient stone altar-slab of the lady-chapel, Gloucester Cathedral, has been recently found, as tradition asserted it existed, in the pavement of the south porch. As usual, this slab was laid face downwards, having been so placed at the Reformation, or in Elizabeth's time, when all such altars were ordered to be removed from their original positions; these were, in many cases, ignominiously set in the common footway.

What appears to be the tomb-statue of Henry, eldest son of Henry the Second of England, and brother to Richard the First, has been discovered during the recent excavations in Rouen Cathedral. Readers will remember that a figure of the last-named monarch was also found at Rouen about

twenty years since. Henry Plantagenet, his brother, is sometimes called Henry the Third, because his father had him crowned, or was forced to do so, at Westminster, July 13, 1170; after this he was written of as "the young king," or "the king the son." He died after an extraordinary death-bed scene of self-humiliation and repentance, at Martel, near Limoges, in 1183.

The original correspondence between the late Dr. O'Donovan and Dr. R. R. Madden, respecting the literary frauds and forgeries professing to be the prophecies of St. Columbkille, has been presented to the Royal Hibernian Academy by Dr. Madden.

The Director of the Geological Survey of India, Dr. Oldham, states, in his last Reports on the coal-fields, that about 400,000 tons are raised annually in Eastern Bengal, while the large deposits in other parts of the empire appear to be neglected. The great beds in the valley of the Nerbudda, and in the Kurhurbari district, still lie undisturbed; but the latter will soon be traversed by a railway—a chord of the East Indian line. Another extensive deposit is the Peuch coal-field, discovered in 1852 by a missionary, the Rev. J. Hislop, in the Chendurua district of the Central Provinces, which is described as the thickest in India. Assam, too, besides its plantations of tea, abounds in coal of "rich" quality. Hence it is expected that, in course of years, there will be a great coal-trade in India. The demand for consumption on railways must necessarily increase; and when once a steady coal traffic is established between the mines and the coast, the Peninsular and Oriental, and other trading companies, will take their supplies from thence, and save the heavy expense of sending out coal from England. Among the advantages that may naturally be anticipated will be a reduction in the cost of travelling in Indian waters, and between India and Egypt.

A new magnet of considerable power has been introduced by M. Greiss, consisting of a long spiral iron or steel film, such as is obtained from iron-turning. According to M. Greiss, the south pole of such a magnet is always at that end of the spiral which the instrument has first touched. He also states that the magnetism of these spirals is of a very permanent nature.

A remarkable communication was made by M. Babinet at the last meeting of the Academy of Sciences, on the evolution of gas in the process of making coffee. If cold water be poured on roasted coffee finely ground, such as is generally used with boiling water, a considerable quantity of gas is generally evolved, about equal in volume to the amount of coffee used. If a bottle be half filled with this ground coffee, and cold water be then poured in until the cork is reached, which is to prevent the escape of the gas, a violent explosion, sufficient to force the cork out of the bottle, or even to break the latter, will result.

The Sculpture Gallery in the Louvre is about to be considerably enriched by a variety of Phœnician antiquities from the island of Cyprus, among which are several statues.

The body of Marmontel, the author of 'Bélisaire,' 'Contes Moraux,' and the once "Perpetual Secretary of the Academy," was transferred, on the 8th inst., from the private ground in which it lay, in the hamlet of Habloville (where he died, in retirement, in 1799) to the Cemetery of the commune, at St. Aubin. M. Marmontel, grandson of the celebrated writer, and Professor of Music in the *Conservatoire*, delivered an address at the side of the second grave, which was listened to amid marks of the liveliest emotion.

The great enterprise of tunnelling the Mont Cenis has been completed to one-half of its extent. The perforation now extends 6,110 metres; strong hopes are entertained that the entire work will be completed in three years.

In the course of recent excavations made in the Court of the Louvre, the workmen came upon the foundations of the fortress built by Philip Augustus. This sovereign considerably enlarged Paris. In his reign (1180) Notre Dame was commenced, and the city surrounded with a wall,

having on it 500 towers, with 130 gates. It is stated that the exact site and plan of the fortress in the court-yard of the Louvre were known from various historical documents preserved in the Imperial Library; the portions discovered consist of one of the principal entrances and two flanking towers.

A beautiful imitation of ivory is now made in France from a mixture of papier-mâché and gelatine. It is called Parisian marble.

A monumental statue is about to be erected at Feltre, in Italy, to Panfilo Castaldi, of that town, the inventor of movable printing type. The statue, which is completed, is by the sculptor Corti, of Milan, and, at its inauguration, a festival of Italian printers will be held at Feltre.

INSTITUTE OF PAINTERS IN WATER COLOURS.—EXHIBITION OF SKETCHES AND STUDIES, OPEN from Ten to Six, at their Gallery, 33, Pall Mall (opposite Marlborough House).—Admission, 1s.; Catalogue, 6d. Gaiuslight at dusk. JAMES FAHEY, Secretary.

WINTER EXHIBITION.—THE FOURTEENTH ANNUAL WINTER EXHIBITION OF PICTURES, the Contributions of British Artists, is NOW OPEN, at the French Gallery, 130, Pall Mall.—Admission, 1s.; Catalogue, 6d.

LÉON LEFÈVRE, Secretary.

Will open on Monday, November 26.
SOCIETY OF PAINTERS IN WATER COLOURS.—THE WINTER EXHIBITION OF SKETCHES AND STUDIES by the MEMBERS. 5, Pall Mall East.—Admission, 1s. Tea till Six. WILLIAM CALLOW, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at T. McLean's New Gallery, 7, Haymarket, next the Theatre.—Admission, 1s. R. CLOTHIER, Hon. Sec.

MR. MORBY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 24, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Frith, R.A.—Bosa Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersill, R.A.—Calderon, R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Andsell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linn, sen. & Debono, A.R.A.—Cooper, A.R.A.—Gale—Munks—F. Hardy—John Faed—Frère—Rulperer—Lidderdale—George Smith—Duvrigny—Peter Graham, &c.—Admission on presentation of address card.

ARTEMUS WARD.—EGYPTIAN HALL.—EVERY EVENING at Eight. Doors open at half past Seven. Saturday afternoon at Three P.M. In consequence of the great success of ARTEMUS WARD AMONG THE MORMONS, Stall seats should be engaged some days beforehand. They may be secured at Mitchell's Royal Library, 33, Old Bond Street; Austin's Ticket Office, St. James's Hall; and at the Egyptian Hall, Stalls, 3s.; Floor, 2s.; Gallery, 1s.

MADAME STODARE (Widow of the late Colonel Stodare) begs to announce that the THEATRE OF MYSTERY, Egyptian Hall, is NOW OPEN for the Season. Madame Stodare will have the honour to give the Sphinx, Marvel of Mecca, and Basket Trick, assisted by Mr. Firbank Burman, Pupil of the late Colonel Stodare, in Colonel Stodare's Royal Entertainment of Magic.—Admission, 1s. and 2s.; Stalls, 3s.; which may be secured at the Box-office, Egyptian Hall, from 10 till 5; and at Mitchell's Royal Library, 33, Old Bond Street.—Mr. JAMES WEAVER, Manager.

ROYAL POLYTECHNIC.—Meat cooked at a distance of 100 feet from the fire by visible rays. A cigar lighted, and other combustibles set on fire in a darkened room, by invisible rays. These and other remarkable experiments will be exhibited in Professor Pepper's New Lecture on "Combustion by Invisible Rays," which will be given on Monday, Thursday and Friday at 3 and 5, Tuesday and Wednesday at 3.

SCIENCE

Memoirs of the Geological Survey of India.—*Paleontologia Indica; being Figures and Descriptions of the Organic Remains procured during the Progress of the Geological Survey of India.* Parts 3 and 4.—*Memoirs of the Geological Survey of India.* Vol. IV. Part 3; and Vol. V. Part 1.—*Catalogue of the Organic Remains belonging to the Echinodermata in the Museum of the Geological Survey of India, Calcutta.*—*Annual Report of the Geological Survey of India and of the Museum of Geology, Calcutta.* Ninth Year, 1864-65. (Calcutta; and London, Williams & Norgate.)

THE several portions of the serials of the Geological Survey of India, which we have noted above, plainly indicate that the Survey is in continued operation, under the careful direction of its head officer, Dr. Thomas Oldham. The annual Report gives brief but sufficient particulars of the progress made for the year, which Dr. Oldham considers to be very satisfactory. "Good solid results," says he, "have been obtained, and much done to clear the way for

future inquiry." Fever and cholera, however, are formidable hindrances to the rapid execution of field geology in India, and obviously some years must elapse before the Survey can be fully completed. In looking through the *Memoirs* we note the carefulness with which the fossils are described and named, in connexion with the study of European geological publications. It is worth remarking that even so local a work as Stoppani's *Paleontology of Lombardy* has been received in Calcutta, together with other local publications, which have been made use of for comparison. The *Catalogue of Fossil Echinodermata* is another example of studious attention in the form of references to the several publications illustrating them. The Calcutta Museum appears to possess a singularly fine collection of Echinodermata, and large collections have been made by the Survey which have not yet been subjected to any careful examination.

Judging from the two Fasciculi of the *Paleontologia Indica* before us, this publication, when completed, will be a credit to all who are concerned in its production. The Cretaceous Cephalopoda of Southern India are admirably figured, and well described; while our own Prof. Huxley has written the text to the figures of vertebrate fossils submitted to him from the Panchet rocks, near Ranigunj, Bengal. Unusual interest is attached to some of these fossils, which prove to be remains of reptiles, and the first remains of Vertebrata, and, further, the only important remains of animals in the great group of rocks associated with the coal-bearing formations of Bengal,—rocks hitherto mainly distinguished from and classified by their fossil Flora. Geologists will peruse with interest Mr. Blanford's appended observations on the manner of occurrence of the reptilian remains found in the Panchet beds, and on the probable conditions existing at the time when the rocks were deposited. It is thought that these Panchet Reptilia were not marine, and that possibly they may have been terrestrial.

To the geologists of Europe the chief interest of the figures and descriptions of Indian fossils will be found in a comparison of them with European and other fossils of similar geological age. Thus, for instance, the remarkable similarity and partial identity of the Himalayan Triassic Fauna with that of the Alps has been noticed by Mr. Salter, and Prof. Suess, of Vienna. The uniformity of at least the Upper Trias, and its inclosed Fauna in all parts of the world, is a very striking and interesting fact in the geological history of our earth. Again, it has been found that more than one-fourth of the 148 species of Cephalopoda described in the series of the *Paleontologia Indica*, and derived from the cretaceous rocks of Southern India, are identical with species known in Europe and elsewhere. If we should be enabled, in the end, to correlate Indian with European and other strata, and to identify or discriminate their respective Fauna and Flora, one principal scientific object of the Indian Survey will have been attained. This expected ultimatum alone can impart any general interest to the often arid details of rocks and fossils contained in these publications; and in this prospect the officers of the Indian Geological Survey must be regarded as occupied in the slow and sober solution of a great geological problem, which cannot be fully and satisfactorily demonstrated for many years. Meanwhile, they should be encouraged in their arduous labours, and should not be subjected to a too rigid criticism. They are scientific pioneers, labouring under climatic difficulties, and sometimes only able to arrive at conjectural results. All that can be expected from them is a full and faithful discharge of

their duties to the best of their judgment and ability.

SOCIETIES.

ROYAL.—Nov. 15.—Gen. Sabine, President, in the chair.—The following papers were read: 'On a Crystalline Fatty Acid from Human Urine'; and 'On Oxalurate of Ammonia as a Constituent of Human Urine,' by Mr. E. Schunck.—'On the Structure of the Optic Lobes of the Cuttle-Fish,' by Mr. J. L. Clarke.—'Spectroscopic Observations of the Sun,' by Mr. J. N. Lockyer.—'On the Congelation of Animals,' by Dr. Davy.—'Letter to the President on the India Trigonometrical Survey,' by Lieut.-Col. Walker, R.E., Superintendent of the Survey.

ASIATIC.—Nov. 19.—Sir T. E. Colebrooke, Bart., in the chair.—Prof. Goldstücker communicated to the meeting the intelligence he had received from Lahore of the existence in that city of a most extensive Sanskrit Library, in the possession of Pandit Radha Kishen. From an examination of the Catalogue that had been sent him, he was able to state that the library contained a great many rare and valuable works, some of which had hitherto been supposed to be lost. He had also been promised catalogues of similar collections of Sanskrit MSS. in other parts of India, of the contents of which he would keep the Society informed as they came to hand.—The paper read was by Prof. Max Müller, 'On the Hymns of the Gaupāyana, and the Legend of King Asamāti.' After some remarks on the proper use to be made of Sanskrit manuscripts in general, and on the principles of criticism by which the writer was guided in his edition of Sāyana's Commentary on the Rig-Veda, he proceeded to show, by an example, the character of the three classes of MSS. he had made use of, and the manner in which the growth of legends was favoured by the traditional interpretation of the Vedic hymns. He had selected for this purpose the four hymns of the Gaupāyana (Mandala x, 57-60), and the legend of King Asamāti, quoted by Sāyana in explanation of them, and then related the latter according to the various forms in which it has been handed down to us, from the simple account given in the Tāndya Brāhmana and Katyāyana's Sarvānukrama, to the more expanded one in the Satyāyanaka Brāhmana, the Bṛhaddeśatī, and the Nēhmanjari. He then gave a double translation of the hymns in question, one in strict conformity to Sāyana's interpretation, and another in accordance with his own principles of translation, the latter as a specimen of what he intends to give in his forthcoming translation of the whole of the Rig-Veda. The writer concluded with a *résumé* of the various points of interest which these hymns, though by no means fair specimens of the best religious poetry of the Brahmins, present,—the healing powers of the hands, the constant dwelling on the divinities which govern the life of man and the clear conception of a soul as separate from the body, of a soul after death, going to Yama Vaivasrāta, the ruler of the departed, or hovering about heaven or earth, ready to be called back to a new life. If we reflected, he said, on these germinal thoughts, and on the vast proportions they were to assume in the later history of the Aryan world, we should have to admit that, even if we lost the legend of King Asamāti, and the squabbles of his rival priests, there was still enough left, even in these meagre hymns, that would repay the student for the patient deciphering of the sacred records left to us by the fathers of our own, the Aryan, race.

NUMISMATIC.—Nov. 15.—W. S. W. Vaux, Esq., President, in the chair.—G. Feuillant, Esq., was elected a member.—The Rev. A. Pownall exhibited a cast of a groat of Edward the Fourth, countermarked with the arms of Dantzic; a silver medal of Charles the First and his queen.—Mr. Akerman exhibited a sterling of John, Duke of Brabant, who reigned from 1312 to 1346. The coin was struck at Brussels, and had lately been found near Abingdon.—Mr. Evans exhibited a small gold coin of Andocimus, found in Oxfordshire.—The Rev. A. Pownall read a paper by himself, entitled 'An Account of the Coins found at Hol-

well, in the County of Leicester, with Remarks on the Money of the Calais Mint.'—Mr. Evans read a paper, communicated by W. H. D. Longstaffe, Esq., entitled 'On the Distinctions between the Pennies of Henry the Fourth, Fifth, and Sixth.'

MEETINGS FOR THE ENSUING WEEK.

MON. Actuarial, 7.—Value of Half-Yearly and Quarterly Annuities, Mr. Sprague.
— Royal Academy, 8.—'Anatomy,' Mr. Partridge.
— Geographical, 8.—'Letter from Dr. Livingstone, Rovuma River, E. Africa'; 'Physical Geography of Natal,' Dr. Inam.
TUES. Engineers, 8.—'Smelting of Copper Ores, Australia,' Mr. Morgan; 'Cofferdams for No. 2 Contract of the Thames Embankment,' Mr. Ridley.
WED. Society of Arts, 8.—'Effect of Unlimited Liability Partnership on Progress of Arts, &c.' Mr. Hawes.
THURS. Antiquaries, 8.
FRI. Royal, 4.—Anniversary.

FINE ARTS

The Proportions of the Human Figure, according to a New Canon, for Practical Use. By W. W. Story. Illustrated. (Chapman & Hall.)

THIS book has for its subjects what may be called those out-of-the-way matters—the Cabala of numbers and symbols, an examination of the Canon of Proportion of Polyclethus, and the author's proposed new canon. The connexion between these themes is clear enough to the student; the author's method of treating them is lucid, if not very complete, or, as it may be better to write, exhaustive. This, to a certain extent, is due to the narrow limits of the volume before us, which contains, nevertheless, enough for the already-informed reader. Although some of them have emanated from the brains of men who stand among the foremost in intellect, we do not believe the so-called "systems of proportion" are of the slightest use to ordinary artists, or, indeed, to any artists who could not master the things desired by eye rather than by numbers. It is, we are bound to say, undeniable that not only is the canon before us possessed of intense attraction to a peculiar order of minds, but that our author's theory is well worth the attention of sculptors, and in a less degree that of figure-painters, who may care to see how recondite are some of the sources of design. Mr. Story is the author of those statues of 'Cleopatra' and 'The Sibilla Libica' which attracted so much attention at the International Exhibition.

As to the Cabala, or Gematria of Numbers, Mr. Story, with gravity that is due to the tremendous nature of the subject, sketches the mysterious connexions, or rather the correlation and significance of the symbols, and states the qualities and characteristics which have been accepted by many nations as proper to those signs and whatever they represented; this is according to Pythagoras and Macrobius. As to the general use of the Cabala itself in antique art and science, there can be little doubt that something unknown to us but by this name did rule the artists of old. Certain formulae were for ages accepted, which, while they often resulted in mannerism, were really safe guides enough for mediocrity; for genius there was no such direction, it would seem. The danger of these patent safety arrangements is, that they almost serve to justify the domination of mediocrity over genius. Mr. Story, after referring to the "formalized and half-symbolical" school of Egypt, says it is needful for the student of Greek Art to study the former. It is undeniably advisable to do so, although the author does not seem to know that his further statement has been questioned, which is given as a reason for that extension of study he desires, and is to the effect that Greek Art was erected on the foundation of the Egyptian. The challengers of this common belief are probably in error; but their respectability is such that it might have called for notice at our present author's hands. He believes that

the scientific canons of Art—which, by the way, may mean much more than a mere canon of proportion—in Greece were probably derived from Egypt, and expressed by the Cabala, glimpses of the nature of which we must look in the ancient writings of the Jews and the Hellenic philosophers. It seems to us a bad course to examine the sculptures themselves that remain to us as outcomings of the all-influences of the Cabala.

Plato and Pythagoras declared alike in the Beautiful had a mathematical and geometrical foundation,—assertions they may safely make, because few indeed would venture to question their truth. The difficulty was to discover this foundation; it is more the doubtful if it was ever found. There are several attempts—or what seem to be such—which differ, however, in their elements exactly as the ideas of their proposers might be expected to differ. Thus, the so-called Sanskrit canon is characteristically different from others. This diversity seems to hint that the standard of the Beautiful shifted with differing races, which is exactly the thing we should expect. This alteration by no means exalts one's notions of the value of ancient canons. There are many such rules well known to us; no fewer than three have been found with Egyptian titles. Comparisons between these, with allowance for error, reduce at once their number and their value. We have a brief sketch of the history of other ancient canons, including that attributed to the statue, by Polyclethus, which was styled 'The Lance-Bearer,' and may have been the original of the later practice of antique artists. The famous passage in Pliny which refers to this statue and the achievement of Polyclethus with the canon may be, as Mr. Story says, read in three different ways; that which he adopts—describing the sculptor as deviser of the canon according to which he made 'The Lance-Bearer'—is the only reasonable one,—surely the only one acceptable to artists. Artists will also refuse to believe that the Greeks, and those who followed them, adopted any one canon of form as of universal application. If they accepted the Doryphorus as canonical, it must have been with strict limitation to figures of its own order. The use of a canon in any more extended fashion than this would be to impose fetters on sculpture to which the sternly logical practice of Egypt was comparatively licentious. It will be remembered that this Egyptian practice was generally architectonic in its purpose, while that of Greece in the middle and later stages was in sculpture proper. Admitting the canon of Polyclethus to have been adopted in the antique world of Art, for which admission there is ample warrant in tradition and in statuary, to it may be ascribed something of that formalized aspect which is dominant in all later and inferior sculptures. "Polyclethus was judged to have reduced art to a science, soon after which the end of noble design was nigh at hand. The gist of a remark of Pliny is patent to the student who goes with us in this matter; "he was the first," says that writer, "who made statues standing on one leg." To those who remember that almost all figures of the later and decadent antique times are so placed, there is a sardonic sense in this quaint remark, which has what may be called a reflected bitterness upon canons in general. What Pliny, who was the most accomplished among Roman members of the "lay element," really thought of the effect on Art of the deviser of statues "standing on one leg," we do not gather; it must not, however, be forgotten that he was but a gossip, who lived many centuries after the sculptor and the statuary's art itself were dead. The truth probably is, that Poly-

cletus devised a work so glorious that his followers and inferiors imitated it to the ruin of design, just as the imitators of Michael Angelo brought us to Bernini, those of Raphael to Albano. The sculptor of the great "Hera" did something more than statues "standing on one leg." The evil was in the misuse of the Canon, so that designers contented their genius with adherence to its dictates, and wrought statues rather to show how well they understood and observed the law than to express new thoughts of their own to which execution in any case should be subordinate.

What has been said of Pliny's report about Polycletus and his Canon may be said also of that account which Vitruvius gives of the same, an account which, although filled with mistakes and corrupt in its sense, is yet comprehensible and capable of explanation. The key to this seems to have been put into our author's hands by one of Da Vinci's marvellously sagacious remarks, which seem to penetrate the most intricate jargon for a meaning, and to get the truth out of a blundering reporter, who himself doubtless did not thoroughly understand the matter he described. The interpretation which suits our author of the sole remaining but imperfect record of the great Canon differs essentially from those adopted by artists and thinkers who lived between Giotto and Flaxman; these adopted as a key-note in their systems of proportion some element of the figure, *e.g.*, face or foot; on the other hand, Leonardo points clearly to twelve, the perfect number, as applied on an ideal system.

The recalcitrant nature of this subject, its purely technical applications, and the difficulty of dealing worthily with Mr. Story's theory, restrict us to general remarks and a positive recommendation of the book to those among our readers who may care to go further. Suffice it that, according to him, we have in 12 the perfect figure designated by the circle; in 4, the emblem of stability and law designated by a square; and in 3, the symbol of the triangle, the soul, we have not merely a mystical statement of man, but the symbol and canon of all his proportions. The writer shows how his theory is applicable to some of the best antiques; it is especially curious that this should be the case with that noteworthy statue the Egyptian Antinous of the Vatican, which was found at Hadrian's Villa about a century since, and has always been held as intended for a standard of proportion. This figure stands straight upright, looks right forward, and clenches the hands of both arms a little way from the hips; there is a cast of it in the Crystal Palace, none at South Kensington or the British Museum. Mr. Story tells us that the lines on the wings of the head-dress are twelve, and gives a scale for its proportions, which are remarkably well fitted to his "New Canon." A similar alleged coincidence occurs with regard to that statue which was recently acquired from the Farnese collection for the British Museum, and is named Diadumenos, a supposed copy of one of the most famous works of Polycletus.—This work comprises a series of elaborate comparisons of the "New Canon" with other systems, ancient and modern, and with antique statues.

FINE-ART GOSSIP.

THE private view of the Winter Exhibition of the Society of Painters in Water Colours takes place to-day, Saturday. The Gallery will open to the public on Monday next.

The whole of the distemper pictures on the walls of the Chapter-House, at Westminster, are in a much injured condition. It is now under consideration whether or not they shall be restored, or

rather preserved. Mr. Richmond has offered to superintend the works which may be necessary in this case. We trust nothing of the "restoring" kind will be attempted. Few, indeed, are the relics of such Art as these pictures represent—the more need that their true character, be it what it may,—good, bad, or indifferent,—in design should be retained in a perfectly untouched state. The end of such works as are now begun in the Chapter-House is, we aver, not to make a fine and handsome interior, or smart show-place. This is easily attainable, although not by the process which made the Chapter-House at Salisbury so popularly attractive. Preservation only is desired for the Westminster Chapter-House, so that whatever time and the thoughtless have spared may remain original. This edifice is to be looked upon, and we trust will be accepted, not as a supplement in small to the Parliament House over the way, but as a relic to be retained for its own sake. A lamentable blunder will be made if anything like a common "restoration" is attempted for this famous chamber. We trust to take the public voice with us in this matter, and to have it insisted on that the structure shall remain without intrusion of new works of any kind. The secret of the destruction of all our ancient works lies, we believe, in the intrusion into them of new elements. Once the new, or sham old, and the really ancient things are brought together, the incongruity of one to the other is shocking to all, and the building which should remain in all its venerable, mournful decay, is renovated to be "as good as new." Our architects seem to mistake their duty when they make old buildings look new. We trust the public will not mistake the case of Westminster Chapter-House as a new or seemingly new building. It may serve to display the learning and taste of Mr. G. G. Scott, its restorer; but it will, by that very process, cease to be an historical relic. To replace whatever remains exist of the really original work, carvings, sculptures, and the like,—to make the building strong and weather-tight, and to remove intruded matter and rubbish, is all that ought to be done.

Messrs. Robinson & Hatley sold last week the pictures and drawings which were the property of Mr. Gurney. Of the latter, the following were noteworthy:—W. Hunt, Primroses, 157 guineas (White), White Grapes, Strawberries, and a Peach; another, Bunches of Grapes and a Pear, 162 gs. (Turner), The Monk, 190 gs. (Vokins).—Pictures: Gainsborough, Portrait of Mrs. Sparrow, of Worthingham, Suffolk, 240 gs. (Toovey).—Old Crome, View of Old Hethel Hall, Norfolk, and a smaller Landscape, with figures, 106 gs. (Herring).—G. Vincent, Cottage-Scene, with figures, 90 gs. (Cox).—M. Grönlund, Still Life, 200 gs. (Knight).—Mr. W. Linnell, Heath and Common (Graves).—Mr. W. Cooke, The Thames at Milwall, 215 gs. (King).

St. Anne's, Soho, one of the ugliest churches in London,—the reader who, like ourselves, has tried to find out the worst amongst these will know what that means,—has been improved, internally, by Mr. A. W. Blomfield, by the addition of a low, carved-oak screen, and choir-seats within it, and the formation of a chancel in one of the bays of the nave, paving with tiles, raising the floor of the choir by one step, the east end by three steps. The old paint has been taken off parts of the woodwork and coloured decorations and gold applied. A marble reredos and altar, inlaid, and otherwise enriched, have been added. Altogether there appears to be a good deal of what is now called "ritualism" imported into this hideous church.

Part XV., comprising the letter H, "Heger" to "Hysplenz," and the letter I, "Iadara" to "Impact," of the 'Dictionary of Architecture,' of the Architectural Publication Society (Conduit Street, Regent Street), has been issued. This appears to have been due in 1862. There can be no doubt of the great value of this most carefully compiled and elaborate work; the lengthy delays of its appearance are the only defects we are able to discover. The subjects are carefully treated, and, if not always at what appears to a sufficient length, they are accompanied by ample references to

larger accounts of the matters. The choice of headings is very minute: see the reference to Heimo, architect of the choir at Maestricht. In thus quoting the names of the architects of noteworthy buildings, good service is done, so that the book before us is valuable to the general student as well as to those who are more properly to be styled architectural students. Architects of all schools are thus treated, biography being a large portion of this text. We think the topographical notices are needlessly long in some instances and require judicious editing; at present they are neither terse nor complete; considerations of space would hardly admit the latter quality to these articles, but should compel the former. The same may be said for the article 'Hindoo Architecture.'—We have also received 'Illustrations to the Dictionary of Architecture,' Part I. of the volume for 1863-4-5, "Fortress" to "Triforium." This work is a very fine and most serviceable one in all respects. We wish it were further advanced, and that the plan of publication were simpler than it is, so far as the titles of the respective parts are concerned, together with the bewildering references and the long-delayed title-pages. The manager of this publication should have mercy on those who are now required to master trivial details of the most intricate nature, such as are suggested by his successive offers of receipts for subscriptions; these receipts are declared to be in at least ten different colours! The indexes to this book are anything but indicative. It is a pity thus to confuse good services and much zealous intelligence, such as the able editor affords us freely.

M. Meissonnier's well-known picture, 'La Rixe,' the gamblers' quarrel, has been, with great spirit as to the design and expressions, engraved by M. Paul Chenay. This print, which bears the signature of M. F. Sartorius, Rue de la Seine, Paris, as *éditeur*, lacks that richness of colour and chiaroscuro which we desire so greatly in a first-class engraving. It is capitally drawn; the modelling is excellent.

Very complete arrangements for the proper exhibition of stained glass have been made at Paris. The clerestory of the Grande Vestibule is to be devoted to the representation of this art; the whole of the west side is assigned to the works of the United Kingdom. The following artists have signified their intention to send their finest works, which in some cases, where they are already erected, have been liberally promised by the proprietors of them. It may, therefore, be expected that this exhibition on the part of Great Britain, at least, will far surpass any previous display by British Artists. Messrs. Clayton & Bell, Mr. D. Cottier, Messrs. Cox & Sons, Mr. Tony Dury, Messrs. A. Forrest & Sons, Messrs. Hardman & Co., Messrs. Heaton, Butler & Bayne, Messrs. Lavers & Barrard, Messrs. Morris & Co., Messrs. A. & W. H. O'Connor, Messrs. J. Powell & Sons, Mr. Wailes, Messrs. Ward & Hughes.

MUSIC AND THE DRAMA

CONCERTS.—It is impossible to come into contact with any work by Handel on any unfrequent meeting, and not to be struck afresh by his almost unparagoned versatility. Take his secular *Cantatas*,—his 'Acis,' his 'L'Allegro,' his more operatic 'Semele,' his 'Choice of Hercules,'—and in each will be found a humour, whether musical or dramatic, entirely distinct from that which animates its brother-works. Of this we are once more reminded when returning to 'Alexander's Feast,'—a work only once performed here in our recollection, under the presidency of Mr. Hullah; though among Handel's *Cantatas* it is perhaps the one most in favour and circulation in Germany.

We find in it a certain audacious fire and spirit which set it apart. One must not—or rather, must one not?—talk of false brilliancy when Dryden's genius is in question:—the genius of the pompous, splendid poet of the 'Annus Mirabilis,' an exercise in a form of versification well-nigh as inexorable as the triple rhyme of the Dantesque *Italiani*,—the genius which could produce the 'Abraham and Achitophel,'—which could fling out such a lyric as 'Britons, strike home,' for Purcell to set,

the pith, vigour and dramatic excitement of which cannot be better appraised than by comparing its words and music with the hybrid 'Rule Britannia,' written by a Scotchman, and set by Arne in a piece of patchwork cribbed from Handel's 'Occasional Oratorio,' and yet which by chance has become the rallying tune of British loyalty and arrogance. There can be small question that Dryden's Cecilian Ode, howbeit brilliant, howbeit majestic, is withal somewhat bombastic. What a line is that—

The king seized a flambeau with seal to destroy!
Of the brilliancy and the majesty of the poet his fellow-worker availed himself with wondrous power; but Handel's music has in it nothing bombastic or stilted, though it contains the most extreme expressions of some of his most brightly imaginative qualities. Let us merely specify in the First Part the short seven-part chorus, "The listening crowd," the drinking-song and chorus, "Bacchus ever fair and young," with that wondrous setting of the words—

Sweet is pleasure after pain;

and the effective use therein of the pedal bass,—the following air and chorus, "He sung Darius," the air "Softly-sweet in Lydian measures," and the final chorus, "The many rend the skies." The last is worth dwelling on for a moment. Its first movement in $\frac{3}{4}$, B major,—a bright key, so far as we can recollect, rarely used in choruses by Handel,—is one of those amazing specimens of free writing on a ground bass (his "Envy" choruses in 'Saul' being another) which show what power the ancients had as compared with the moderns. As, again, in the case of Bach's stupendous 'Crucifixus' (in his Mass in B minor) it is only by the eye that we can detect the trammels within which the great genius of the composer resigned itself to teach. What said Wordsworth on a subject something analogous, the inexorable rhythm of the Sonnet!—

Nuns fret not at the convent's narrow room,
And hermits are contented with their cells.

Here we admire the Giant, who never apparently stepped more freely and majestically than in self-imposed fetters. The *Allegro*, "So love was crowned," with its shorter, chopped-up phrases, is less happy; and in style may pair off with the chorus, "The dead shall live," in Handel's other Cecilian Ode. In the Second Part it is almost superfluous to mention the great bass air, "Revenge, Timotheus cries," because that is the best-known number of the work; but attention cannot be too earnestly drawn to the subsequent song and chorus, "Thais led the way," in its freedom of figure and delirious passion standing almost alone in Handel's works. The more familiar music of *Polyphemus* is not more dramatic. It is the only instance we recollect in Handel's mass of choral writings in which the voices (in the final passage with triplets, "She fired another Troy") have to scream downwards from a note so high as B in alt, thus producing a resistless rage and passion of effect. From this point both poem and music break down. When Dryden began to moralize on *Cecilia's*

mother wit and arts unknown before,
even Handel could not help becoming dull.

The above is, of course, a very meagre sketch of a few of the features of the superb poem on Saturday last happily revived at the Crystal Palace. The singers were Madame Lemmens-Sherrington (who cannot simulate, let her try ever so hard, the voluptuous fire of *Thais*), Mr. Wilbye Cooper (who of late has been heard too sparingly), and Mr. Lewis Thomas.

It is rumoured that the concerts of the *Musical Society* may, possibly, not be resumed next year.—Those of the *Philharmonic Society* will commence on Monday, the 11th of March. Mr. Stanley Lucas has been elected secretary, to replace Mr. Campbell Clarke. The new conductor is not yet named.—The chamber concerts of the *New Philharmonic Society* commenced on Tuesday, with Mr. Holmes, who is rising to his right place as principal violinist. We have had of late few such sterling acquisitions to our resident force of musicians as this excellent artist.—The *National Choral Society* gave a performance of 'Elijah' on Tuesday, with Mr. Santley singing the part of the Prophet better than ever, which was better than it

has ever been sung before. Some other singers less known to fame were tried, of whom there is no need to speak. Miss Lucy Franklein must be mentioned, because she may have a future as a *contralto*; but she has much to learn, and will hardly be encouraged to do so by the injudicious applause which called on her to repeat "O, rest in the Lord." *Jezebel's* recitative was much better delivered, in spite of an indistinctness of articulation, which cannot be too soon amended. The Oratorio, familiar as it now is, did not go well. That Mr. Martin wants decision as a conductor was expressly to be felt in the smatches of chorus, in antiphony with the solo voices which form such an important feature in the work.—The annual report of the *Sacred Harmonic Society* gives a satisfactory account of the concerns of that body, now the first musical institution of its kind in Europe. Its subscribers apparently increase in number, and with them its funded property. Seeing that promise of works to be produced does not enter into the report, we may once again, without indiscretion, represent to the managers of the Society that they could well afford to indulge in a little enterprise, without prejudice to the interests or wishes of their subscribers.

The pieces selected for Madame Arabella Goddard's performance at Monday's *Popular Concert*, were a Solo Fugue by Handel, and a Prelude and Fugue by Mendelssohn, and Beethoven's noblest Pianoforte Trio, No. 1, Op. 78.—Herr Wilhemj will play there on Monday next, also Mr. Halle.

The last-named gentleman's concerts at Manchester seem this year, as yet, to be more choral, also somewhat more conservative, than those of former seasons. However, at one he has adventured the Ball Scene from the 'Fantastic Symphony' of M. Berlioz, containing one of the freshest ideas of a composer who does not shine in freshness. We observe with pleasure that Mr. Sims Reeves is said to have been singing at his best. At one of the last concerts he sang an air from Mr. C. Horsley's 'Gideon,' a work which, had it been more carefully wrought and re-considered, might have been wrought up into a good Oratorio.

We have news from Glasgow of a very good concert, given the other evening there by the *Choral Society*, conducted by Mr. Lambeth, at which, among other music, Signor Rossini's 'Stabat' was performed. The singers consisted of Madame Sainton-Dolby's touring party, with Miss Edith Wynne for *soprano*.

DRURY LANE.—On Monday Miss Helen Faucit appeared, according to announcement, for the first of the twelve nights of her engagement, and supported the character of *Rosalind* in Shakspeare's pastoral drama of 'As You Like It'; and on Friday she performed *Pauline* in Lord Lytton's popular comedy of 'The Lady of Lyons.' Of her merits in these two characters we have already written so much—and so many years ago—that further criticism would be superfluous. On alternate nights 'Faust' still continues to be acted, after which the Shakspearean adaptation, called 'Katherine and Petruchio,' has been performed during the week.

HER MAJESTY'S.—The great event of the week has been the opening of this capacious theatre by Mr. Edmund Falconer, as its manager for the winter dramatic season,—a fact well calculated to awaken interest in professional circles. As enlarging the means of employment for numbers who live by the stage, it was, moreover, an event of importance. A large audience, accordingly, gathered on Monday to witness the proposed performance. This consisted of the burletta entitled 'No!' and a new drama by Mr. Falconer himself, "illustrative of peasant life in Ireland fifty years since;—constructed from some of the classical and most popular of the prose idylls of the Irish," and entitled 'Oonagh; or, the Lovers of Lisnamona.' Mr. Falconer's success in this species of drama justified an expectation that his new work would inaugurate his management in a manner answerable to the prestige already attached to his name. 'Oonagh' is in five acts, illustrated with spectacular scenery, and including at least one sensation-scene, an admirable ballet,

arranged by Mr. Oscar Byrne, and some situations that were effective. But those advantages were all thrown away because of one grave error. Mr. Falconer had prepared us for such a fatality by a confession which he made in a previous address—that his play was long. The first act alone occupied an hour and a half; the second and third more than an hour each; and then the audience began to move, until only those were left who remained to enjoy sport, and impeded the action of the play by laughter and clamour. The fact is that the public have spoilt Mr. Falconer. In all his previous plays he has introduced a quantity of didactic conversation, and the public have submitted to be lectured. He naturally thought that they had accorded him a privilege, which he was tempted to use in excess. His patriotism, too, appears to have betrayed him into this fault. It was in the second act, at a meeting of the Whiteboys, that dissatisfaction was first felt. These worthies met in a quarry under the Corrig-an-Dhionl, or Devil's Craig, and here they indulge in political tirades about the wrongs of Ireland, which the audience were clearly unwilling to hear. This augers ill for the future success of the Irish drama; and it is probable that the public have had enough of it. As to the story of the present, it has evidently been compiled from the works of Miss Edgeworth and Mr. William Carleton, and embodies similar incidents and characters to those in a melo-drama now acting at the Grecian, under the title of 'The Storm-Signal,' with success. The failure of Mr. Falconer's drama is, therefore, not owing to its argument, but to its structure and length. The leading character is that of a miser, *Fardoulougha O'Donovan* (played by Mr. Falconer himself, and well suited to his personal figure and style), who, like Shylock, is divided in his affections between his child and his money, and hesitates to provide a marriage portion for his son, and also to advance the fee to the lawyer for that son's defence. He draws a cheque, however, for the latter, only to find that his bankers have failed, and goes nearly mad with despair. A long trial-scene occupies the fourth act, in which counsel address the Lord Lieutenant in behalf of the accused youth in elaborate speeches, which were continually interrupted by the audience. At length, *Connor O'Donovan* (Mr. Edward Price) was found guilty. In the fifth act, all this is reversed, and we return to the hay-field of the first act, where the peasantry are enjoying a harvest festival, and where Connor and his sweetheart, *Oonagh O'Brien* (Miss Fanny Addison), are happily re-united. Perhaps Mr. Falconer, by compression, may yet be able to save his play; but the task will be difficult.

ADELPHI.—The drama of 'Ethel' having been withdrawn, that of 'Victorine,' according to wont and custom, has been substituted; and Miss Neilson, late of the Princess's, has essayed the character. This lady needs much instruction and practice before she can be entrusted with the lead in important parts, and it is to be hoped that she will seek it in the provinces before she ventures again before a London audience.

MUSICAL AND DRAMATIC GOSSIP.

Mr. Mapleson's opera performances closed this day week with a performance of 'Don Giovanni,' said to be very successful. Of Mr. Santley's *Leporello*, and Mr. Tom Hobbler's *Don Ottavio*, we must speak on some future occasion.—It now appears possible that Leicester Square may fall into the possession of Mr. Mapleson, whose plan, Rumour says, is to build a new and splendid opera-house there. The architect named is the gentleman whose new theatre, just opened at Liverpool, is described on every hand as so perfect; unique, at least in England.

Among other signs of musical life may be mentioned a series of lectures on church music by Dr. French Flowers, one main object of which appears to be the production of that gentleman's sacred compositions.

The new ballet, 'La Source,' with music by M.M. Minkous (a Russian composer) and M. Délibes, just produced at the Grand Opéra, seems

to have entirely succeeded.—The new opera, 'Mignon,' by M. Ambroise Thomas, has been produced at the Opéra Comique. We may speak of it in more detail next week.

A new comic opera, in two acts, 'Une Charge de Dragons,' by M. Brion, is in preparation. Another, 'La Rose de Castille,' by M. Debillemont, has been accepted by the director of Les Bouffes Parisiens.

M. Bizet, who made a promising first appearance as an opera composer in 'Les Pêcheurs de Perles,' will produce a second work at M. Carvalho's theatre, on the story of Scott's 'Fair Maid of Perth.'

A Cecilian fête was to be held at Rouen, the day before yesterday (on the Saint's day), under the direction of M. Amédée Méraux, a mass by whom will be executed on the occasion.

The following is from a Correspondent in Milan: "The first representation of 'L'Africana,' given on Wednesday evening, the 7th inst., at La Scala, was in nearly every respect successful. La Signora Destina (who has sung in London—Ed.) made her first appearance on the Italian stage as *Selika*, and acquitted herself well. Signor Fancelli took the arduous part of *Vasco di Gama* with success; his performance would have been very good had he exhibited more passion. *Nelusko* was intrusted to Signor Brignoli, an artist unequal to the part; the public, however, did not show any sign of disapprobation. The *duetto* for soprano and tenor, in the fourth act, was enthusiastically received.—The ballet, 'Devadacy,' has made an immense success.—Donizetti's 'Poliuto' is in rehearsal.—During the Carnival season we are promised 'Norma,' and 'Don Sebastiano,' with Madame Vilda and Signor Carrion. The autumn season at the Carcano Theatre commenced with 'La Vestale' of Mercadante, without success. The last week in January, Carlotta Patti, with her party, will give six concerts at this theatre. We are also promised David's 'Lalla Roukh.' Signor Picco, the blind Sardinian minstrel, is playing at the Teatro Radegonda."—The above, it will be owned, is anything but inspiring as an account to those who recall the glorious days of Milan.

Madame Parepa's second journey to America appears to be even more successful than her first one was. Nothing can be more droll than the tone of the American critics. Our guest "Artemus" is hardly more comical than the following "cutting" from the *Boston Gazette*—the extracts from which, as follows, are textually reprinted:—"On Wednesday, Mozart's 'Non temer' with Mr. Rosa's Violin Obligato was a delicious bit, tastefully rendered. 'Quinto Amore' Donizetti's famous duet from 'L'Elisir' with Signor Ferranti excited a furor of delight. It was replete with humor and life. 'Be sure you call as you pass by,' was another of those taking ballads which Madame Parepa gives with such enticing naïveté, sung for the first time, and we must not forget to add circumstances favored a hearing of a very charming song by Mr. Hutton which he has compared expressly for this lady since their arrival in Boston, entitled 'Happy thoughts.' It found a way to the hearts of all persons at once which was manifested by a demand for a repetition which was duly given. It will prove a valuable addition to her extensive repertoire. Friday evening, the programme was of the better class, more good things than we had had for some time, 'Qui la voce' again found Madame Parepa in rare vocal condition. It received a most superb interpretation, every appliance of the art was forthcoming in the delicacy and fervor with which she invested it. Bellini himself, could he have listened to it, would have been thankful that his music found such an able exponent. Dudley Buck, Jr., was indeed honored by having his 'Ave Maria' presented to the public by so distinguished an artist as Madame Parepa. It was well received. As a composition it is only clever, it has point, but it 'repeats itself' too frequently to be very effective. The closing note on double flat was sustained with that ease and grace for which she is remarkable. 'The Sailor's Wife' was again sung by request, appearing more lovely if possible by acquaintance. It is of a class of songs that cannot fail of becoming popular whenever introduced by her.

She responded to the encore it elicited by singing for the first time this season Gounod's 'Serenade' with violin obligato. As much as we have heretofore admired the music it seemed to have possessed additional charms at this time. Her voice responded to the romantic theme of music and poetry with an emotion so marked for its purity and delicacy of expression, accompanied as it was with Mr. Rosa's best tone and shading, that it left nothing to be desired, the audience appearing seemingly reluctant to break the spell it had produced by applauding at its close."

Signor Rossini, who possesses the "esprit de bête" in higher perfection than almost any other man living, and whose sayings and doings keep him perpetually before the world, has just done another gracious act, thus recorded in the *Gazette Musicale*. "At one of his last soirées" (says that journal), "Mlle. Nicolo (the daughter of Isouard, the composer) played an *Andante* of her composition, which produced a great effect. After the liveliest applause and congratulations on the part of the company and of Rossini, the master added, 'You must publish this work. I have found the publisher—myself, and will take charge of the title.' So a few days later the music shops displayed among their novelties 'Une Plainte,' *Andante* for the piano, by Mlle. Nicolo, published by her friend, and her father's admirer, G. Rossini."

The *Orchestra* announces the death of Madame Gassier as having lately taken place at Milan. She was a singular and disagreeable singer; not without a certain cleverness of its coarse kind. Her voice was one of those sour and acute *soprani* which have been curiously common of late in these days of the raised diapason; less pleasing in quality than the voice of Mlle. Carlotta Patti,—and she does not with us pass for an enchantress. Like that lady, Madame Gassier affected the repertory of astonishing *alissimo bravuras*; but she was less metallically neat in her execution than her successor. Still, the effect she produced, in certain parts, by the dash and audacity of her execution, when she sang at the Italian Opera at Paris, was such that Meyerbeer, in firm of purpose, and who was more easily seduced by special peculiarities, if they had anything in them calculated to attract and amaze the herd, than so great a musician should have been, absolutely, we know, had the notion of bringing about her engagement to sing as *Caterina* in his 'L'Étoile,' at our Royal Italian Opera, though it then possessed Madame Bosio—a notion of which he was only dispossessed by the lady's utter physical unfitness for a part demanding travestie in male attire being pointed out to him. Her last appearances in London were during a short season of Italian Opera at the Lyceum Theatre. Then, Time had exaggerated every peculiarity to an almost repulsive point. Her first were made as Signora Pasini, under the auspices of Mr. Lumley. These were not happy, as the record kept by the *Athenæum* commemorated,—in spite of the stress laid by the journalists retained to laud every singer, good, bad, or indifferent, who then appeared at Her Majesty's Theatre, on her Arab eyebrows. In brief, Madame Gassier deserves a word as one who might, under different conditions, have done better things than she ever accomplished.

Two new Italian plays are mentioned in *Il Trovatore*. 'Maurizio,' by the Avvocato Ciampi, produced at Rome,—it is added, with uncommon success,—and a comedy, by the same author, 'Il Medico Tutore.'

A Correspondent writes:—"You have probably seen the announcement of the death of Col. Peter Bernard in the *Times*. It may be interesting to you to know that he was one of the best grounded and most scientific musicians among all our English amateurs. During a two years' residence at Frankfort-on-the-Maine, in the years 1833-4, he placed himself under the tuition of the celebrated Schnyder von Wartensee, who often told me that he considered him one of his best pupils. Col. Bernard was the author of several charming songs, &c.; but I believe few of his productions have been published. AMATEUR."

M. Duveyrier, the dramatic author, who wrought largely in company with Scribe in Scribe's best

days,—witness their 'Michel Perrin,' 'La Chatte Metamorphosée,'—and 'Oscar,' died the other day.

MISCELLANEA

Hell Opened.—As a Catholic priest, who has for nearly half a century had the charge of souls, I must enter my protest against that part of Mr. Peacock's letter in the *Athenæum* of the 10th inst., which speaks of the well-known little treatise of Pinamonti, 'Hell opened to Christians, to caution them from entering into it.' Mr. Peacock, I believe, professes to be a Catholic. As such, he must believe in the fire of Hell, and that eternal punishment is incurred by mortal sin. He has read in the little book, which he presumes to censure, the memorable sentence of St. Augustine; "Quicquid vis, dicis de eternitate, quia quicquid dixeris, minus dicis" (St. Aug. Ps. lx). Yet he censures this book as containing *blasphemies*. I doubt if he understands what is blasphemy; but I am certain that he cannot point out a single sentence or expression in 'Hell Opened' that is blasphemous. I have known the book from childhood, and often read it, and meditated upon it, I hope with profit. I have been accustomed all through my pastoral career to place this book in the hands of both children and adults; and my experience will lead me to do so to the end. I leave others to their opinions, and to the consequences of them; but I earnestly protest against the sentiments and language of Mr. Peacock as inconsistent and very unbecoming in one who professes to be a Catholic. F. C. HUSENBETH, D.D.

Shakspeare Readings.—Regarding amendments of the diction of Shakspeare, it appears to me that the safest and almost the only useful mode of dealing with the vastly pregnant, and therefore necessarily involved and elliptical, style of a genius and intellect like Shakspeare's is to take the language as he has given it to us, and by inquiries into the use and signification of words in his time and in his works, and from a consideration of the drift of the passage, to evolve the meaning. This is likely to yield us results more trustworthy and valuable than any other course. With these views I do not regard as "notoriously corrupt" the passage from 'Hamlet,'—

The dram of eale
Doth all the noble substance of a doubt
To his owne scandele.

It seems to me simply incomplete, interrupted by the entrance of the ghost and the exclamation of Horatio. I should print it thus—

The dram of eale
Doth all the noble substance, of a doubt
To his owne scandele.—[Enter Ghost.
HORATIO. Look, my lord, it comes!

If completed it might be read

The dram of eale
Doth all the noble substance, of a doubt
To his owne scandele taint.

J. D. M.

Herodotus on "Lake Habitations."—The interesting review of Dr. Keller's 'Lake Dwellings of Switzerland,' in the *Athenæum* of November the 10th, reminds me of an equally curious account of the lake habitations of Italy, contained in the *Athenæum* of July 29, 1865. I allude to the review of the work of Bartolomeo Gastaldi, translated by Mr. C. H. Chambers. I must at once confess that I do not know much about lake dwellings; but after that admission, I may perhaps be allowed to ask why the word "pre-historic" is so often applied to them by the able writers who treat of them. In the time of Herodotus there was actually a lake community existing close to the Ægean Sea, and within half a day's walk of the modern Salonika. The "father of history" wrote his short account of this singular race with his usual terseness and simplicity, little dreaming, probably, that a phenomenon which did not much surprise him would agitate the civilized world two thousand years later. After relating how Darius sent one of his great captains with orders to transplant the Pœonians to Asia, and how that commander partially succeeded, he goes on to say:—"But the Pœonians about Lake Prasias itself were not conquered at all by Megabe-

zus. Yet an attempt was even made to subdue those in the lake who dwell there in the following manner. Beams fastened together are fixed on lofty piles in the middle of the lake, having a narrow approach from the shore by a single bridge. And all the citizens in common have been wont from some very ancient time to plant the piles which support the beams. And this is the custom followed as to planting the piles. They bring them from a mountain called Orbelus, and every bridegroom plants three piles for each woman that he marries; and every man marries a great many women; and they live in the following manner: each man possesses beams and a hut, in which he lives, and a trap-door through the beams, opening downwards to the lake. And they tie the little children by the foot with a cord, fearing lest they should tumble down into the lake. And they give to their horses and cattle fish for their food; and the multitude of fish is so great that when a man opens the trap-door and lets down an empty basket into the lake, after waiting only a little while, he draws it up full of fish. And there are two sorts of these fish, which they call *paprakes* and *tilones*.—*Herod. v. 16*. It may be remarked that this account is not accompanied by any of those qualifying expressions which Herodotus always uses when he has any doubt about the authenticity of his information. All readers of the history of Herodotus will remember how often such expressions occur, and will attach the more value to a statement which he makes without doubt or hesitation, respecting a people residing close to the sea, and within about 200 miles of Athens, then the centre of the civilized world. He speaks in a very different manner of the sources of the Nile, and does not scruple to hint that his informant, the worthy schoolmaster of Sale, was probably "chaffing" him (*ἡμῶν γε παίζων ἱστορεῖ*) when he discoursed of Kroph and Mophi, and the fathomless springs. Yet even as to that point it seems not unlikely that the researches of modern travellers may confirm to some extent the vague statements which the cautious historian refused, on the isolated testimony of one man, to accept. As to the lake dwellings, however, the account given by Herodotus is "on all-fours," as the lawyers say, with the conjecture of your writer in the number for July 29, 1865. The writer supposes the aquatic race in Italy to have been identical with the Galli, who are said by Livy to have first descended into Italy in the reign of Tarquinius Priscus, about 600 B.C. They made four incursions, your writer tells us, and were probably discomfited (i.e., I presume, brought under the Roman sway) about 183 B.C. The period thus indicated includes, of course, the time of Herodotus; and if people were wont to live on piles in Italy at that time, there is no reason for doubting that the barbarous inhabitants of the extremities of Macedonia may have adopted a similar custom. As to Switzerland, no writer whose works are now extant knew much (if anything) about that country so early; but it seems not unreasonable to conjecture that there certain tribes may have adopted this mode of life as a protection from the aggressive bipeds and quadrupeds around them. The Poonians of the lake seem to have found an advantage in this, since they were safe from the attacks of Megabazus, while many of the surrounding clans were subdued and compelled to migrate to Asia. It is certain that lake habitations have been found, with living people in them, at much more recent dates than any of those above alluded to; for Venezuela was on piles when first discovered, and the Dyaks, I believe, use this mode of construction at the present time. In short, this mode of living would seem to be natural to men in an uncivilized state, when the means and appliances are at hand, and when there are hostile septs in the neighbourhood. It is singular that we learned moderns should have lived so long before we discovered how nearly, in his uncultivated condition, our noble race approaches to the beaver!

For CHRISTMAS and NEW YEAR
GIFT-BOOKS, Now Ready.

MILTON'S PARADISE LOST.

Illustrated with Large Designs by GUSTAVE DORÉ. Edited, with Notes, and a LIFE OF MILTON, by ROBERT VAUGHAN, D.D. In One Large Fob Volume, bound in cloth, 5l.

The HOLY BIBLE. Illustrated

by GUSTAVE DORÉ. Divisional Volume I. Fob. cloth, 11. 1s.

DON QUIXOTE. By Cervantes.

With about Four Hundred Illustrations by GUSTAVE DORÉ. In One Handsome Quarto Volume, bound in cloth, 11. 10s.; in half morocco, 21. 5s.; in best morocco, lines, 31. 10s.

"The contrast of fact and fancy, of stoutness and leanness, of shortness and height, of the leathern jerkin and the rusty mail of the smug donkey and the skinny steed, is invariable yet ever fresh."—*Pall Mall Gazette*.

THE HISTORY of CROQUEMI-

TAINE, and the CHIVALRIC TIMES of CHARLE-

MAGNE. Illustrated throughout by GUSTAVE DORÉ.

The Text freely rendered from the French by TOM

HOOD. 4to. cloth, printed on Toned Paper, 11. 1s.

"This book deserves a place by the more dignified 'History of Don Quixote'; it is a tale of chivalry in which romance is made ridiculous, while ridicule is softened by pathetic touches and a undercurrent of morality."—*Pall Mall Gazette*.

"The book is worth its value to all who collect M. Doré's drawings."—*Spectator*.

THE LEGEND of the WANDER-

ING JEW. (Cassell's English Edition.) With Twelve

Large Designs by GUSTAVE DORÉ. Large Fob.

cloth, 15s.

IDYLLIC PICTURES. Drawn by

PINWELL, HOUGHTON, PAUL GRAY, BARNES,

&c. Royal 8vo. cloth gilt, 10s. 6d.

"A beautiful volume, containing more than fifty clever illustrations by able artists. It is difficult to do justice to this work, so great is the variety and beauty of its contents."—*Sunday Times*.

The CHILD'S GARLAND of

LITTLE POEMS. With exquisite Illustrative Borders

by GIACOMELLI, and Original Poems by MAT-

THIAS BARR. Square 8vo. cloth gilt, 7s. 6d.

"This is another of the volumes that must gladden a child's heart, while a man may glance over it with pleasure. It contains a series of charming little tales and nursery rhymes, written in verse as pleasant and rhythmical as any of comprehension. The entire book is a gem."—*Sunday Times*.

BRIGHT THOUGHTS for the

LITTLE ONES. Twenty-seven Original Drawings

by PROCTOR. With Prose and Verse by GRAND-

MAMMA. Square 8vo. cloth gilt, 7s. 6d.

FOXES BOOK of MARTYRS.

Now ready at all the Libraries,

LOVE AND DUTY: A STORY of ENGLISH HOME LIFE.

By the AUTHOR of 'BASIL ST. JOHN.'

With Frontispiece and Vignette, small 8vo. 12s.

" 'Love and Duty' possesses many merits. We will not say that its brevity—for it is scarcely larger than an ordinary one-volume novel—is one of these merits, for that would imply that it needs an effort to read it. So far from this being the case, it is an especially readable book. The authoress—for we cannot be mistaken in attributing the book to a lady's hand—writes with much ease and elegance, her language is remarkably well chosen, and her style, though distinguished by very singular originality, is in itself attractive, apart from the subject-matter."—*Times*.

Edinburgh: EDMONSTON & DOUGLAS.

London: HAMILTON, ADAMS & Co.; and all Booksellers.

THE CHRISTMAS BOOK.

ILLUSTRATED after DESIGNS by HARRISON WEIR and Others,

GUTCH'S LITERARY AND SCIENTIFIC REGISTER AND ALMANACK For 1867.

"Carefully revised, corrected, and enriched from year to year with new matter, this excellent little annual continues in 1866 to be worthy of the high reputation which it has enjoyed for a quarter of a century. In a library, as well as in a mechanical point of view, it is a marvel of fullness and handy compactness. Within a very small space it contains a cyclopædia of facts and figures pertaining to subjects of daily interest; also a useful almanac. Among readers and writers there are few, whatever be the extent of their learning or the tenacity of their memory, who might not find it for their advantage to have such a prompter always at hand."—*Daily Telegraph*. "A more portable compendium can scarcely be imagined."—*Times*. "Excellent, and full of information."—*Athenæum*.

W. STEVENS, 421, Strand, London.

IMPORTANT WORK on BRAZIL, with 150 Illustrations, 8vo.

NATIONAL MANUSCRIPTS.

FAC-SIMILES OF NATIONAL MANUSCRIPTS, FROM WILLIAM THE CONQUEROR TO QUEEN ANNE;

SELECTED UNDER THE DIRECTION OF
 THE MASTER OF THE ROLLS,

AND PHOTO-ZINCOGRAPHED BY COMMAND OF

HER MAJESTY QUEEN VICTORIA.

By Colonel Sir HENRY JAMES, R.E. F.R.S.,
 Director of the Ordnance Survey.

With Translations and Notes.

Published by Authority of the Lords Commissioners of Her Majesty's Treasury.

This series of PHOTO-ZINCOGRAPHIC FAC-SIMILES of some of the most interesting of our NATIONAL MANUSCRIPTS, copied by order of Her Majesty's Government, by Colonel Sir HENRY JAMES, R.E., Director of the Ordnance Survey; with TRANSLATIONS AND INTRODUCTORY NOTES by ARTHUR SANDERS, Esq., Assistant-Keeper of Her Majesty's Records; consisting of Royal Charters, Grants, and the Letters of Royal and Eminent or Remarkable Persons, has been selected under the direction of the Right Hon. Sir JOHN ROMILLY, Master of the Rolls; by THOMAS DUFFUS HARDY, Deputy-Keeper of Her Majesty's Records; and includes some of the most remarkable Original Manuscripts deposited in Her Majesty's Record Office, together with a few from other repositories, including the most perfect Original Copy of Magna Charta now extant. They are not only of the highest historical interest, but at the same time illustrate the changes which have successively occurred in language and handwriting from the reign of William the Conqueror to the reign of Queen Anne. Fac-similes are arranged chronologically, and the Translations are interleaved so as to appear opposite to each page of the Fac-simile of the Original Manuscripts.

The Series will be published in Four Parts. Price 21s. each Part.
 Parts 1 and 2 are now ready.

London: EDWARD STANFORD, 6, Charing Cross, S.W.,

sold by Appointment for the Sale of Ordnance Survey Maps, Geological Survey Maps, and Admiralty Charts.

Now publishing,

—NOTICE IS HEREBY GIVEN, that the First L.L.B. EXAMINATION for the current Academical year will COM-
MENCE on WEDNESDAY, the 2nd day of January, 1867.
By order of the Senate,
WILLIAM B. CARPENTER, Registrar.
Burlington House, Nov. 23, 1866.

**THE CAMDEN SOCIETY, for the PUBLI-
CATION OF EARLY HISTORICAL and LITERARY
REMAINS.**
A SPECIAL GENERAL MEETING will be held at No. 25,
Parliament-street, Westminster, on Wednesday next, the 5th
instant, at Half-past Three o'clock, for the Election of a President
in the place of the Most Hon. the Marquess of Camden, K.G.,
deceased.
WILLIAM J. THOMS, Hon. Secretary.

The Subscription to the CAMDEN SOCIETY is One Pound per
annum, payable in advance on the 1st of May in each year. No
Books are delivered until the Subscription for the year has been
paid.
Applications for Prospectuses, or from Gentlemen desirous of
becoming Members, and all Communications on the subject of
Subscriptions to be addressed to JOHN GOUGH NICHOLS, Esq.,
25, Parliament-street, S.W., to whom all Subscriptions are to be
paid, and all Post-Office Orders for the payment of the same to be
made payable at the Post-Office, Parliament-street, S.W.

**ACCLIMATISATION SOCIETY OF GREAT
BRITAIN and
ORNITHOLOGICAL SOCIETY OF LONDON.**
Office and Council Room,
EXHIBITION-ROAD, SOUTH KENSINGTON, W.
(Adjoining the Royal Horticultural Society's Gardens).
22nd November, 1866.

The Council of the Acclimatization and Ornithological Society
GIVE NOTICE that, in accordance with No. 3 of the Society's
Rules, they hereby SUMMON a SPECIAL GENERAL MEET-
ING to be held in the Council Room of the ROYAL HORTI-
CULTURAL SOCIETY, South Kensington, on FRIDAY, the
7th of December, 1866, at 1 o'clock P.M. to amend the Rules of
the Society, by the introduction of a power to fill up vacancies,
or to add to the number of the Council in the interval between
one Annual General Meeting and another.
By order of the Council,
B. WATERHOUSE HAWKINS, Secretary.

**THE LONDON COLLEGE OF THE INTER-
NATIONAL EDUCATION SOCIETY (Limited).**
Head Master—L. SCHMITZ, Esq., Ph.D., LL.D., F.R.S.E., late
Rector of the High School of Edinburgh.

The aim of this College is to afford an education of the highest
order, harmonising with the wants and spirit of the age. A
prominent place is assigned to Modern Languages, the Natural
Sciences, and Mathematics. Neither Latin nor Greek is begun
until the Pupil are familiar with the Grammar of their Mother-
tongue, whereby more rapid progress in the Ancient Languages
is insured than is otherwise attainable.

The Next Term will begin on the 18th of January, 1867.
For Prospectuses, and any further information, apply to Dr.
Schmitz, at the College, Spring-grove, Middlesex, W.; or to the
Secretary, at the Society's Office, 24, Old Bond-street, W.

ST. ANDREW'S COLLEGE, BRADFELD,
near READING.—Endowed Foundation School, Incorporated
by Royal Charter.

Warden—Rev. THOMAS STEVENS, M.A., Oriel College,
Oxford, Rector of Bradfield, the Founder.
Honorary Secretary—J. H. PATTISON, Esq., 1, Elm-court,
Middle Temple, London.

All necessary information may be obtained on application
either in person or by letter to the Warden at the College, Brad-
field, near Reading; or to the Honorary Secretary, at his
Chambers in the Temple.

BOROUGH OF LIVERPOOL.
—SEPTON PARK COMPETITION.
TO LANDSCAPE GARDENERS AND OTHERS.

The Council of the Borough of Liverpool offer Two Premiums
for the BEST PLANS for LAYING OUT THE SEPTON PARK,
viz.:—A First Premium of 300 Guineas. A Second Premium of
150 Guineas.

On and after the 24th of November the Conditions of the Com-
petition, together with a Lithographed Contour Plan of the Site,
will be sent to any address on receipt of Post-office Order for One
Guinea, which latter will be returned if Plans are received accord-
ing to the Conditions.

Application to be made to Mr. E. R. ROSSON, Architect and
Surveyor, Town Hall, Liverpool.

**CRYSTAL PALACE.—PICTURE GAL-
LERY.**—The accurate and important Gallery Pictures of
Ancient and Modern Jerusalem by MULLER and WHITLOCK have

VACANCY occurs in a First-class Ladies School where a
Finished Education is acquired under the careful supervision of
the Principals, with the aid of Professors. References given and
required.—Address I. K., care of Messrs. W. Hunt & Co., 23,
Holles-street, Cavendish-square, London, W.**

**EDUCATION.—BRIGHTON.—There are
THREE VACANCIES in a long-established School for the
DAUGHTERS of GENTLEMEN, situated in the healthiest part
of the West Cliff. French and German Governesses are resident,
and the first Masters attend. This Advertisement is addressed to
Parents who desire REALLY SOUND INSTRUCTION and a LADY-LIKE
HOME for THEIR DAUGHTERS, and do not object to pay fairly
remunerative terms in return for these advantages.—For Pro-
spectuses, with References, address E. E. D., Messrs. Treacher's, 1,
North-street, Brighton.**

**ARMY and CIVIL SERVICE PREPARA-
TION IN PARIS.—An Experienced TUTOR, who resides
with Two Pupils in the Neighbourhood of Paris, has a VACANCY.
First-class Masters attend. Every facility for acquiring French.

SCHOLAR, Graduate of Cambridge University, experi-
enced in Tuition, PREPARES EVENING PUPILS for
University and other Public Examinations.—Address E. R., 9,
Regent's Park-terrace, N.W.**

**THE LATE HEAD-MASTER of a Grammar
School would receive ONE Gentleman as a PRIVATE
PUPIL and COMPANION. Terms 100l. per annum. Healthy
situation; four large gardens, &c.—Address J. N., Wighton Hall,
Cambridgeshire.**

**AN M.A., who obtained first place at every
College and University Examination in which he competed
for Classical honours, and who has very high Testimonials from
eminent scholars, is desirous of obtaining a PROFESSORSHIP,
or a MASTERSHIP in a SCHOOL where there is no (or very
light) extra duty.—Address M.A., Adams & Francis, 56, Fleet-
street, E.C.**

**THERESA HOUSE, BELSIZE PARK-ROAD,
Hampstead.—Miss BIRD** begs to announce to her Pupils
and Friends that she has lately removed her well-known First-
class Educational Establishment, so successfully carried on for
many years, to the above locality. It has been selected as one of
the most healthy in the vicinity of London, and the house is
replete with every comfort and accommodation for Pupils. There
are two Foreign Governesses resident in the house, French and
German being constantly spoken by the Pupils. Miss Bird super-
intends the whole management of her Establishment, and every
care is taken of each Pupil confided to her charge. Eminent
Professors in all branches attend daily.

INTERVAL between School and College.—
The Rev. JAMES RUMSEY, M.A., Pembroke College,
Rector of Llandough, Glamorgan, late Vice-Principal of St.
Edmund Hall, receives THREE PUPILS for OXFORD
MATRICULATION.—Address Llandough Rectory, Cowbridge,
Glamorgan.

ARMY, the NAVY, and the CIVIL SERVICE.—A Gentle-
man of high standing and great Experience in Tuition, has
VACANCIES for TWO PUPILS of good position. The highest
References given.—Address F.R.S., 9, Arundel-gardens, Notting-
hill, W.**

**PRINTSELLER and ARTISTS' COLOUR-
MAN.—A YOUNG MAN, having Ten Years' Experience as
above, would be OPEN to an ENGAGEMENT in the beginning
of January. First-class Testimonials and References.—Apply to
J. D. S., Adams & Francis, 56, Fleet-street, E.C.**

**MUSIC.—A Lady, Pupil of Madame Arabella
Goddard, and certificated by Prof. Bernardi Bonnetti,
wishes to meet with a few more PUPILS to INSTRUCT in
MUSIC, or would be happy to make arrangements with a School.
—Address A. Z., Marshall's Library, 21, Edgeware-road, W.**

**TO PUBLISHERS.—The Advertiser, an expe-
rienced Canvasser, is desirous of representing an established
Paper or Magazine, which could be pushed amongst the Mer-
chants, Companies, and Manufacturers of BIRMINGHAM.—
Address CANVASSER, care of Mr. G. Street, 20, Cornhill, Lon-
don, E.C.**

EDITORIAL or OTHER ASSISTANCE.—
A GENTLEMAN, of Good Education, who has had con-
siderable Experience in reading Proofs, and otherwise in assisting
the Editors of Important Works, is OPEN to an ENGAGEMENT,
of long or short duration, to occupy a few hours of his spare time
daily. Also, as an Accountant, Auditor, Secretary, and in many
other ways his Services would be found available.—Address R. H.,
care of Messrs. Vickers & Harrington, Advertisement Contractors,
14, Princes-street, Westminster, S.W.

LITERARY.—WANTED, a GENTLEMAN
with about 200l. at his command to join the Advertiser in
carrying on an old established Periodical. He must possess a
taste for literature and be willing to throw time and energy into
the work. An immediate income will be secured and an introduc-
tion to first-class literary society. Apply by letter to Dixon, care
of Mr. Smith, 11, Duke-street, Adelphi.

LITERARY PROPERTY FOR SALE.—
The CHURCHMAN'S FAMILY MAGAZINE is FOR
SALE, the Proprietors desiring to discontinue the Publication
for the present.—Apply to the Publishers, St. Bride's-avenue,
Fleet-street, London, E.C.

**THE PRESS.—A Gentleman accustomed to
Writing for the Press will be glad to SUPPLY ARTICLES
WEEKLY, written in a popular, genial tone, to a Conservative
Journal.—Address 'D & D,' care of Wm. Winkley, Esq.,
Harrow Press, Harrow-on-the-Hill, N.W.**

REPORTER.—WANTED, a REPORTER
for a Weekly Newspaper in the Country; must have a good
practical knowledge of the Printing Business.—Address Editor
of the Guardian, Cardiff.

**LITERARY EMPLOYMENT.—An Oxford
M.A. (B.A. Christmas, 1861) DESIRES LITERARY EM-
PLOYMENT.—Address M.A., 32, University-street, Gower-street,
W.C.**

**LAW.—TO GRADUATES, &c., a LONDON
SOLICITOR to long standing would RECEIVE under
ARTICLES a Gentleman, who, having the necessary capital and
ability, when qualified, might succeed him, and receive an
interim income. A liberal premium expected.—Address (confiden-
tially) B. G. M., Mr. Layzell's Newspaper Office, Hand-court,
Holborn.**

**CO-OPERATIVE LITERATURE.—A few
Clergymen, desirous for the better dissemination of sound,
instructive, and, at the same time, interesting reading on Reli-
gious, Statistical, and Economical Topics, especially adapted to
the Poor, invite the aid of other persons, and to FORM a
SOCIETY for the purpose.—Apply to STATESMAN, Mr. R. J.
Kennett's, 14, York-street, Covent-garden.
P.S. See Advertisement in this week's Saturday Review.**

**CONFIDENTIAL EMPLOYMENT.—A
Gentleman holding a responsible position, would gladly
occupy his leisure time in PREPARING or AUDITING
ACCOUNTS, Catalogues and Arranging Books and
Papers. Retaining MSS. &c. Terms very moderate.—SILEX, Temple
Post-Office, Devereux-court.**

TO PERSONS OF SCIENTIFIC TASTES.—
A favourable opportunity offers for the investment of a
small Capital by any one desirous of engaging in a light and very
agreeable occupation, principally in connexion with Natural
History.

Full particulars may be obtained by addressing SCIENCE AND
ART, care of Mr. Charlton, Somerset House.

**A GENTLEMAN, proceeding to the Paris
Exhibition on a Literary Mission connected with the
Press, would be glad to enter into an Arrangement to supply
Detailed REPORTS or SCIENTIFIC ARTICLES on the Above.
—Address F. G. S., care of Mr. Murray, 50, Albemarle-street,
London.**

**RELIC OF CROMWELL.—TO BE SOLD,
A HANDSOME CABINET, once the Property of CROMWELL,
having been purchased with the Mansion of Upwood, Hunting-
donshire, by the Ancestor of the late Admiral Sir Richard Bick-
erton, Bart.—For further particulars apply to P. H. C., Box 67,
Swansea.**

**NOTICE.—This day is published, price 6d.,
ENGLAND and her SUBJECT-RACES, with SPECIAL
REFERENCE to JAMAICA. By CHARLES SAVILE
ROUNDELL, M.A., Fellow of Merton College, Oxford, Secretary
to the late Royal Commission in Jamaica.
MACMILLAN & Co. London.**

THE ELECTRIC TELEGRAPH: was it INVENTED BY PROF. WHEATSTONE?
By WILLIAM FOTHERGILL COOKE, Esq.

Abstract from "AWARD," page 14.

"Mr. Cooke is entitled to stand alone, as the gentleman to whom this country is indebted for having practically introduced and carried out the Electric Telegraph as a useful undertaking."
(Signed) "MC. ID. BRUNEL."
"J. F. DANIELL."

Subjoined Letter from the Parties.

"Gentlemen,—We cordially acknowledge the correctness of the facts stated in the above document, and beg to express our grateful sense of the very friendly and gratifying manner in which you have recorded your opinion of our joint labours, and of the value of our invention."
(Signed) "WILLIAM F. COOKE."
"C. WHEATSTONE."

"Sir M. Isambard Brunel, and J. F. Daniell, Esq., Professor, &c."

Cooke's Letter to Wheatstone.

"THE READER," November 10, 1866.

"The award cannot be both true and false. If it is true, why have you not acted in accordance with it? If it is false, why did you put your name to a cordial and grateful acknowledgment of the correctness of the facts stated in it?"

Fourth Edition, price Sixpence.
Sold by W. H. Smith & Son, Strand.

The Stand is light and firm; the movement in altitude and azimuth is smooth and steady; and the quality of the Object-glass first-rate.—T. SLATER, Optical Works, 136, Euston-road, N.W.

SHELLS, FOSSILS, MINERALS.—Mr. E. DAMON, of WYEMOUTH, will, on application, send an abridged CATALOGUE of his extensive Stock, in the following Departments:—

1. FOREIGN SHELLS.
2. BRITISH SHELLS.
3. FOSSILS AND ROCKS.
4. MINERALS.
5. PUBLICATIONS.

SALOM'S NEW OPERA AND FIELD GLASS, AND THE RECONNOITERER GLASS, price 10s. 10d., sent free.—This "Tourist's Favourite," through extraordinary division of labour, distinctly shows small windows 10 miles off, landscape at 30 miles, Jupiter's moons, &c.—THE MARCHES OF CARMARTESS: "It gives me complete satisfaction, and is wonderfully good."—CAPT. SENDRY, Royal Small Arms Factory, Enfield: "I have found it effective at the 1,000-yards range."—F. H. HAWKES, of Farnley, Esq.: "I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many a glass combining so much power for its size with so much clearness."—THE FIELD: "We have carefully tried it at an 800-yard rifle range against all the Glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price."—NOTES AND QUERIES: "What intending tourist will now start without such an indispensable companion to a pleasure trip?"

The celebrated "HYTHE" GLASS shows bullet-marks at 1,200 yards, and men at 34 miles, price 31s. 6d. All the above Glasses, respectively bearing the registered trade-marks, "Salom," "Reconnoiterer," and "Hythe," are only to be had direct from SALOM & CO., 10, Princes-street, EDINBURGH, and 137, Regent-street, LONDON.

No Agents of any kind anywhere.

THE PROPRIETOR of a PENNY WEEKLY SERIAL is desirous of making an Arrangement for a DOMESTIC TALE. Price no object, if style can be suited to what is required.—Address K., 163, Strand.

This Annual contains original Christmas contributions from Mrs. Henry Wood, Miss A. B. Edwards, Shirline Corpe, Charles Rosa, Arthur Sketchley, J. Hain Friswell, G. Manville Penn, Andrew Halliday, Thomas Miller, H. W. Longfellow, and F. C. Burnand. 100 original illustrations (some on toned paper) by William Brunton, Charles Ross, and Walter Crane.
George Routledge & Sons, The Broadway, Ludgate-hill.

"The best shilling's worth of the kind."
ROUTLEDGE'S CHRISTMAS ANNUAL
for 1867. 35,000 copies of this, the largest, best and cheapest Annual ever published, have been sold in ten days. Another edition of 20,000 is now ready, for which immediate orders are requested.

The chief characteristics of this Annual are—
1. It contains Christmas contributions by the very best living Authors.
2. It is illustrated by the very best Artists.
3. It contains 128 closely-printed pages.
4. The type is large, clear and distinct.
5. The paper is very thick and good.
6. The beautiful cover is printed in six colours.
George Routledge & Sons, The Broadway, Ludgate-hill.

NEW WORK ON POPULATION.
Just published, in 1 vol. 8vo. price 15s.

FECUNDITY, FERTILITY, STERILITY,
and ALLIED TOPICS. By J. MATTHEWS DUNCAN, A.M. M.D., Lecturer on Midwifery in Surgeons' Hall Medical School, Edinburgh.
Edinburgh: Adam & Charles Black.

Just published, demy 8vo. 690 pp. price 2s. 6d.

THE GLORIOUS GOSPEL UNFOLDED.

By HENRY WEBB.
"This is an elaborate and comprehensive volume. Mr. Webb thinks for himself, but is no rash, self-confident specialist, spoiling his book and attempting to corrupt his readers by ruin philosophy. He bows throughout in a devout and reverent spirit before the teachings of inspiration, and unfolds its doctrine in the manner of the oldest theology."
—*Representative Magazine*.
Stimpkin, Marshall & Co. Stationers' Hall-court, London.

Just published, 8vo. price 6d.

 will be commenced in the January Part of the FAMILY TRE
 SURE, an illustrated Monthly Magazine, price 6d.
 T. Nelson & Sons, 20, Paternoster-row, London.

The ILLUSTRATED LONDON NEWS, in reference to pure literature, says—
—“The FAMILY HERALD, that joy to tens of thousands of innocent English households.”

THE FAMILY HERALD:

A Domestic Magazine of
USEFUL INFORMATION AND AMUSEMENT,

REGISTERED FOR TRANSMISSION ABROAD.

Weekly, 1d.; Monthly, 6d.; Volumes, 7s. 6d. Complete Sets, 23 Volumes, 9l.

ALL THE BACK NUMBERS ARE IN PRINT,

And may be had by Order of any Bookseller.

The SATURDAY REVIEW says—

“The Family Herald stands at the head, both in age and popularity, of all the penny serials.”

The BRITISH QUARTERLY REVIEW says—

“The Family Herald is well considered, with reference to its aims, and is various and amusing, with a fair amount of utility intermixed. Of all these weekly serials, we are inclined to consider the Family Herald the best.”

The LITERARY GAZETTE says—

“It must be said of the Family Herald, that it is the purest reading of all purely amusing literature.”

The BOOKSELLER says—

“For amusing reading, such as may be admitted to one's household without fear of consequences, we may recommend the Family Herald. You get portions of a well written novel, novelettes, useful information interspersed throughout, Answers to Correspondents, alone worth the money, and other matters, which will make readers either merrier or wiser, or perhaps both.”

LEIGH HUNT, in his ‘Autobiography,’ says—

“I call out every week for my Family Herald, a penny publication qualified to inform the best of its contemporaries.”

LEADING AND SCIENTIFIC ARTICLES.

“There is a well-considered leading article or essay, every week, upon some subject of an instructive or thoughtful character.”—*British Quarterly Review*.

“The essays are excellent specimens of strong, vigorous writing.”—*Cheltenham Journal*.

NOVELS AND TALES.

“Its novels and tales are quite as well written as the best circulating library stories.”—*Saturday Review*.

“Under the head of the ‘Story Teller,’ we have novels and tales simpler and purer in structure than in the pages of the other penny serials.”—*British Quarterly Review*.

“Many of its tales, if given as three-volume novels, would find their way to every reading-room and library in the kingdom.”—*Plymouth Herald*.

ANSWERS TO CORRESPONDENTS.

“The editor is the confidant and confessor in every station of life. The Answers to Correspondents cannot be fictitious, a romance and a life history being embodied in almost each of them.”—*Saturday Review*.

“Its Correspondence is great upon curious matters, elucidating old customs, and opening up forgotten treasures.”

Gloucester Chronicle.

“The Answers to Correspondents afford an insight to the operations of the heart and mind of society which cannot be obtained elsewhere.”—*Welchman*.

POETRY.

“There are charming verses let into its pages, like sunshine, to brighten them.”—*British Quarterly Review*.

“Its poetical contributions are of a high character, and show that a clever supervision is exercised over this interesting department of the paper.”—*Derby Telegraph*.

RANDOM READINGS.

“An anthology of stray humour, most judiciously selected.”—*British Quarterly Review*.

“Its Random Readings are the recognised modern Joe Miller.”—*Brighton Gazette*.

FAMILY MATTERS.

“Recipes and instructions in household matters, excellent in their way, are given week by week.”

British Quarterly Review.

“It contains admirable instructions to housekeepers, on the choice of provisions, and housekeeping generally.”

Derbyshire Advertiser.

THE RIDDLER.

“A fund of amusement is afforded to the home circle in its capital riddles, puzzles, enigmas, charades, and rebusses.”—*Brighton Examiner*.

“The beginner will learn considerably from its arithmetical and mercantile questions; while the more practised will find much to work at in the mathematical, astronomical, nautical, and scientific questions, with the advantage of solutions, which are given in extenso.”—*Cambridge Chronicle*.

SOLD BY ALL BOOKSELLERS.

Sound.

"The Museum of Science and Art" is the most valuable contribution that has ever been made to the scientific instruction of every class of society."—*Sir David Brewster in the North British Review*.

"The whole work, bound in six double volumes, costs but the price of a keepsake; and when we consider the liberality and beauty of the illustrations, the charm of the writing, or the durable interest of the matter, we must express our belief that there is hardly to be found among the new books one that would be welcomed by people of so many ages and classes as a valuable present."—*Examiner*.

SMITH'S HISTORY OF THE WORLD.

Complete in 3 vols. 8vo. Illustrated by Maps and Plans, price 2l. 2s. cloth lettered.

An ANCIENT HISTORY, from the

EARLIEST TIMES to the FALL of the WESTERN EMPIRE; forming the First Period of the 'History of the World.' By PHILIP SMITH, B.A., one of the Principal Contributors to Dr. Smith's Classical Dictionary.

"His points of transition are well chosen, and his wide and various panorama of principalities, powers, and dominions clearly arranged. He has availed himself liberally of the new light thrown by recent discovery and philology upon the annals of the East, and in all that relates to the Oriental empires and African kingdoms or republics his work is far in advance of any Ancient History in our language."—*Saturday Review*.

"The style is sustained with the equal tone of the single, able, unimpassioned and dignified historian throughout."—*Athenæum*.

Dr. SMITH'S CLASSICAL CYCLO

PÆDIA. Complete in 6 large volumes, extensively illustrated, price 11l. 17s. 6d. cloth lettered. Sold also separately.

I. DICTIONARY of GREEK and ROMAN ANTIQUITIES. 1 vol. 2s. 2d.

II. DICTIONARY of GREEK and ROMAN GEOGRAPHY and MYTHOLOGY. 3 vols. 5l. 15s. 6d.

III. DICTIONARY of GREEK and ROMAN GEOGRAPHY. 3 vols. 4s.

"I have great pleasure in expressing my sense of the invaluable services rendered to the cause of Greek and Latin Literature, and of classical education generally, by the great and laborious work of Dr. William Smith, which are extensively used, and with great profit, at Harrow, as in all the public schools of England."—*Rev. C. J. Vaughan, D.D.*

"The fame and success of Dr. Smith's Dictionary are their best recommendation. I consider their publication to have conferred a great and lasting service on the cause of classical learning in this country."—*Rev. Dr. Liddell*.

BIBLICAL ILLUSTRATION.

The ENGLISHMAN'S HEBREW

and CHALDEE CONCORDANCE of the OLD TESTAMENT; being an Attempt at a Verbal Connection between the Original and the English Translation. With Indexes. List of Proper Names and their Occurrences, &c. Second Edition, revised. 2 vols. royal 8vo. 32. 15s. 6d.

The ENGLISHMAN'S GREEK CON

CORDANCE of the NEW TESTAMENT; being an Attempt at a Verbal Connection between the Greek Original and the English Translation. Uniform with 'The Englishman's Hebrew and Chaldee Concordance.' Third Edition, revised. Royal 8vo. 2l. 2s.

"No other work exists in our language affording the same facilities to one who desires to search the Sacred Scriptures, or any work rendering so simple and so secure the business of Bible interpretation. The entire work is a marvel of industry; and from the care and the scholarship which have been brought to it preparation there is no risk of its ever losing the high place which it has already secured among modern contributions to sacred literature."—*Rev. Dr. James Hamilton*.

** W. & M.'s Descriptive Catalogue will be sent by post (free) to any one writing for it.

London: WALTON & MABERLY, 137, Gower-street

66, BROOK-STREET, W.

**MESSRS. SAUNDERS, OTLEY & CO.'S
NEW PUBLICATIONS.**
VICTORY DEANE: a Novel By
CECIL GRIFFITH, Author of 'The Uttermost Farthing.'
3 vols. [Ready.]

**The UNIVERSITIES' MISSION to
EAST CENTRAL AFRICA**, from its commencement to its
withdrawal from the Zambesi. By the Rev. HENRY
ROWLEY, one of the two Survivors of Bishop Mackenzie's
Clerical Staff. 1 vol. 8vo. with Portraits, Maps, and numerous
Illustrations. 21s. [Ready.]

**The AMERICAN CRISIS; or, Pages
from the Note-Book of a State Agent during the Civil War.**
By Colonel JOHN LEWIS PETTON, L.B. F.R.G.S., &c.
3 vols. post 8vo. [In the press.]

**MEMOIRS and SERVICES of the
late Lieut-General Sir S. B. ELLIS, K.C.B. &c.** Royal
Marines. From his own Memoranda. Edited by LADY
ELLIS. 1 vol. 8vo. 21s. [Ready.]

**SCRIPTURAL STUDIES; or, Our
Church and Our Times.** By the Author of 'Thoughtful
Moments.' 1 vol. post 8vo. [In the press.]

ANGELO LYONS: a Novel. By
WILLIAM PLATT, Author of 'Yorke House,' &c. 3 vols.
post 8vo. [Ready.]

HENA; or, Life in Tahiti: a Novel.
By Mrs. ALFRED HORT. 3 vols. post 8vo. 21s. [Ready.]

THE HISTORY of a BIT of BREAD.
Being Letters to a Child, on the Life of Man and of Animals.
By JEAN MACÉ. Translated from the French, and edited
by Mrs. ALFRED GATTY, Author of 'Parables from Nature,'
&c. Part I. MAN. Pp. 8vo. the Third Edition, 5s.
cloth. [Ready.]

 Also, Part II. ANIMALS, completing the Work, the Second
Edition, fcap. 8vo. 4s. 6d. cloth. [Ready.]

**THE LITTLE KINGDOM; or, the
Servants of the Stomach.** A New Series of Letters to a Child
upon the Life of Man and of Animals. From the French of
JEAN MACÉ. 2 vols. small 8vo. Uniform with 'The His-
tory of a Bit of Bread.' [Just ready.]

**THE PRINCESS ILSEE: a Fairy
Legend.** With numerous Illustrations. By E. FROMENT.
Fcap. 4to. [Just ready.]

THE MAIDEN of the ICEBERG:
a Tale in Verse. By SELINA GAYE, Author of 'Ivon,' &c.
Post 4to. with 9 Page Illustrations. [Just ready.]

**BAREFOOTED BIRDIE: a Simple
Tale for Christmas.** By T. O'T. Edited by CHARLES
FELIX, Author of 'Velvet Lawn,' &c. Fcap. 8vo. with
Illustrations. 2s. 6d. [Ready.]

 "The whole story is like a gleam of bright sunshine and summer
weather just stealing in upon the cold tops and winds of Christ-
mas, and telling of brighter days to come in spring and summer,
and of brighter seasons still in the far-off golden land, where 'they
need no candle nor light of the sun,' to which 'Birdie' and her
little brother Stevie won their happy way. 'Birdie' will be read
by many, and must please all who are worth pleasing and care to
be pleased. We have had nothing so good since Andersen's 'Little
Match-Girl,' of whom 'Birdie' reminds us."—*Herald*.

METÁ'S LETTERS: a Tale. By
Mrs. E. J. ENSELL. 1 vol. post 8vo. [In the Press.]

**TALES at the OUTSPAN; or, Ad-
ventures in the Wild Regions of Southern Africa.** By Captain
A. W. DRAYSON, Author of 'Sporting Scenes in South
Africa,' &c. New and Cheaper Edition. Post 8vo. illustrated

**THE ROMANCE of MARY CON-
STANT.** Written by HERSELF. 1 vol. post 8vo. 10s. 6d.
bevelled boards. [Ready.]

 "A thoroughly healthy book like this, equally pure in thought
and diction, with ample interest, and with almost every character
drawn with a firm and accurate hand, is a great boon."

Church and State Review.

 "The story is well written from first to last."—*Reader*.

**ESSAYS on LITURGOLOGY and
CHURCH HISTORY.** By the Rev. JOHN MASON NEALE,
D.D., Warden of Hackley College. With an Appendix on

Edition, revised, with Additions. 8vo. price 24s.

 London: LONGMANS, GREEN, READER,
and DYER.

**CASELL'S ILLUSTRATED
VOLUMES**
**For CHRISTMAS and NEW YEAR
GIFT-BOOKS.**
DORÉ'S ILLUSTRATED MILTON. 5l.

 "The book of the year."—*Saturday Review*.
"One of the finest monuments that typography and the art o
book decoration have ever furnished to the honour of one of the
greatest—perhaps the greatest but one—of our English poets."—*Illustrated London News*.

DORÉ'S ILLUSTRATED DANTE. 2l. 10s.

 "The most Dantesque work on Dante that ever was produced
from the Pontificate of Leo X. to that of Pius IX. M. Doré's
sketches have for a considerable time obtained a European cele-
brity, and any words that may be suggested to us by the splendid
English edition now before us can scarcely add to or detract from
it."—*Times*.

 Messrs. Cassell & Co. have published a noble volume of Cary's
text and Doré's illustrations. The publication is a sumptuous
one, and reflects the highest credit on the enterprising publishers.
Saturday Review.

**DORÉ'S ILLUSTRATED DON
QUIXOTE. 1l. 10s.**

 "The contrast of fact and fancy is invariable, yet ever fresh."
Pall Mall Gazette.

 "Rare qualities of inventive fancy, humorous expression, and
powerful artistic execution."—*Illustrated London News*.

**DORÉ'S ILLUSTRATED BIBLE. Vol. I
1l. 1s.**

 "Doré's Bible will be a monument—the culminating and vastest
work of his life as a work of illustration. Many of Doré's Bible
illustrations are conceptions of the most daring and astonishing
originality, in perfect harmony with the Oriental largeness of the
narrative."—*Fine Arts Quarterly*.

 "The grandeur, the tenderness, the awe of the inspired volume
are unapproached by clever conceits, by brilliant trickery, or sombre
nightmare fancies."—*Daily Telegraph*.

 "No commentary ever written has the instructive value of these
illustrations."—*Builder*.

**DORÉ'S ILLUSTRATED CROQUEMI-
TAINE. 1l. 1s.**

 "The 'Croquemitaine' is a perfect treasure of humorous art."
Saturday Review.

 "Deserves a place by the more dignified 'History of Don
Quixote.'"—*Pall Mall Gazette*.

**DORÉ'S ILLUSTRATED BARON MUN-
CHAUSEN. 1l. 1s.**

 "A true *livre de luxe*."—*Saturday Review*.

**DORÉ'S ILLUSTRATED WANDERING
JEW. 12s.**

 "The *Saturday Review* says, 'Messrs. Cassell have devoted
themselves to the work of giving the English bookbinder Gustave
Doré, in all the profusion of his prodigious pencil. This year, at
any rate, may be pronounced to be the Doré year. We resist the
too obvious solicitations of a sorry joke, but we hope it will be a
golden year to those enterprising publishers, who send us the
'Bible' with Doré illustrations, 'Dante' with Doré illustrations,
'Paradise Lost,' 'Don Quixote,' 'Munchausen,' 'The Wandering
Jew'—all from the same dashing and vigorous artist. Here are
seven most sumptuous volumes, all handsomely printed, and with
paper and type 'de luxe,' and all from the same artist and entre-
preneur. They may be proud of each other.'"
Saturday Review.

FOXES BOOK of MARTYRS. 12s.

 The Rev. C. H. Spurgeon, referring, in the *Sword and Trowel*, to
this edition of 'Foxe's Book of Martyrs,' says, "This magnificent
volume should be the Christmas present to his children of every
father who can afford it. In these days of the threatened revival
of popery, the lover of his country, the lover of liberty, the lover
of God, can scarcely do a wiser thing than add the circulation
of this precious volume. The edition before us is worthy of
any drawing room table; it is profusely illustrated, beautifully
printed, elegantly bound, and exceedingly cheap; and deserves to
be, as we have already said, the Christmas gift-book of the year."

**IDYLLIC PICTURES. With 50 Full-
page Engravings. 10s. 6d.**

 "Almost all these engravings are pretty, and some, like those of
Miss Edgewood, really graceful. We can conscientiously give the
book a good word."—*Pall Mall Gazette*.

SHAKESPEARE'S COMEDIES. 12s.

 "A noble volume nobly illustrated."—*Illustrated London News*.

**CHILD'S GARLAND of LITTLE
POEMS. 7s. 6d.**
**BRIGHT THOUGHTS for the LITTLE
ONES. 7s. 6d.**
THE QUIVER, Volume for 1866. 7s. 6d.
GULLIVER'S TRAVELS. 7s. 6d.

 "Mr. Morten's illustrations throughout are excellent, capitally
drawn, and most humorous."—*Art-Journal*.

ROBINSON CRUSOE. 7s. 6d.
GOLDSMITH'S WORKS. 7s. 6d.
**BUNYAN—The PILGRIM'S PRO-
GRESS. 7s. 6d.**
BUNYAN—The HOLY WAR. 7s. 6d.

 CASSELL, PETER & CO. 59, Ludgate-hill,
London; and 15, New York.

On the 26th inst. price One Shilling, the DECEMBER Number of

THE TEMPLE BAR MAGAZINE.

CONTENTS.

LADY ADELAIDE'S OATH. By the Author of 'East Lynne.'

- Chap. 25. The Rendezvous in the Wood.

LEGENDS of a STATE PRISON; or, Visions of the Tower. By PATRICK SCOTT, Esq. Fcap. 8vo. 6s.

LETTERS from HELL. By a Danish Pastor. In 2 vols. post 8vo. 21s.

"The author's conception of hell includes a very strong resemblance to our own world. This is, in fact, the main principle of the book; and the ghastly mimicry of human occupations and passions is described with some literary force."—*Saturday Review*.

The INGOLDSBY LEGENDS. A New Illustrated Edition, containing all the Illustrations of LEACH, CRICKSHANK, and TENNELL; with New Illustrations by DU MACHIER. Crown 4to. 21s.

Publisher in Ordinary.

18, Great Marlborough-street.

HURST & BLACKETT'S NEW WORKS.

NEW AMERICA. By William HEPWORTH DIXON. 2 vols. 8vo. With Illustrations. [In the press.]

A BOOK ABOUT LAWYERS. By J. C. JEAFFRESON, Barrister-at-Law, Author of 'A Book about Doctors,' &c. 2 vols. 8vo. 39s. bound.

"These volumes will afford pleasure and instruction to all who read them, and they will increase the reputation which Mr. Jeaffreson has already earned by his large industry and by his great ability. We are indebted to him for about eight hundred pages, and that rare and valuable addition, a capital index, all devoted to the history and illustration of legal men and things. It is much that we can say for a book that there is not a superfluous page in it."—*Athenæum*.

"The success of his 'Book about Doctors' has induced Mr. Jeaffreson to write another book—about Lawyers. The subject is attractive. It is a bright string of anecdotes, skilfully put together, on legal topics of all sorts, but especially in illustration of the lives of famous lawyers. Mr. Jeaffreson has not only collected a large number of good stories, but he has grouped them pleasantly, and tells them well. We need say little to recommend a book that can speak for itself so pleasantly. No livelier reading is to be found among the new books of the season."—*Examiner*.

The LIFE of JOSIAH WEDGWOOD.

From his Private Correspondence and Family Papers. By ELIZA MTEYARD. Dedicated to the Right Hon. W. E. GLANVILLE. Complete in 2 vols. 8vo. embellished with Portraits and above 300 beautiful illustrations, 42s. bound.

"We have to congratulate the authoress on the publication of her Life of Wedgwood. We can award her the praise due to the most painstaking and conscientious application. She has devoted her whole mind and energy to her subject, and has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The two volumes before us are in themselves marvels of decorative and typographical skill. More beautifully printed pages, more creamy paper, and more dainty woodcuts have seldom met our eyes."—*Saturday Review*.

A WINTER with the SWALLOWS. By MATILDA BETHAM EDWARDS. 8vo. with Illustrations, 12s.

TRAVELS in FRANCE and GERMANY in 1865 and 1866; including a Steam Voyage down the Danube, and a Ride across the Mountains of European Turkey, from Belgrade to Montenegro. By Capt. SPENCER, Author of 'Travels in Circassia,' &c. 2 vols. 21s.

MY PILGRIMAGE to EASTERN SHRINES. By ELIZA C. BUSH. 8vo. with Illustrations, 15s. [Just ready.]

LIGHTS and SHADOWS of LONDON LIFE. By the Author of 'MIRK ABBEY,' &c. 2 vols.

"The reader follows the author with equal pleasure, whether through the glowing fancies of fiction, or the bright and humorous, the grave and realistic interpretations of things as they are in this world of London."—*Morning Post*.

CHEAP EDITION of CHRISTIAN'S MISTAKE. By the Author of 'JOHN HALIFAX.' Illustrated by Sandys. 6s. bound, forming the New Volume of 'HURST & BLACKETT'S STANDARD LIBRARY.'

THE NEW NOVELS.

MADONNA MARY. By Mrs. OLIPHANT, Author of 'Agnes,' &c. 3 vols.

"'Madonna Mary' is written with evenness and vigour, and overflows with the best qualities of its writer's fancy and humour. The story is thoroughly original, as far as its plot and leading incidents are concerned; and the strength of the narrative is such that we question if any reader will lay it aside, notwithstanding the fullness in his throat and the constriction of his heart, until he has shared in the happiness which is liberally assigned to the actors of the drama before the falling of the green curtain. But the principal charms of the work are the subtle humour, fineness of touch, and seeming ease with which Mrs. Oliphant delineates and contrasts her numerous characters."—*Athenæum*.
 "'Madonna Mary' is a book of great power and beauty—a perfect work of its kind."—*Morning Post*.

CHRISTIE'S FAITH. By the Author of 'No Church,' 'Owen,' 'Mattie,' &c. 3 vols.

ANNALS of a QUIET NEIGHBOURHOOD. By GEORGE MAC DONALD, M.A. 3 vols.

"The charm and value of Mr. Mac Donald's work need not be sought. They present themselves unasked for in the tender beauty of his description, whether of nature or of life and character; in his almost supernatural insight into the workings of the human heart and in his unceasing fertility of thought and happy exactitude of illustration. Whoever reads the book once will read it many times."—*Pall Mall Gazette*.

KINGSFORD. By the Author of 'SON and HEIR.' 2 vols. 21s.

"A very good novel, written with great spirit. The plot is of such ingenuity as to maintain the interest of the reader to the end. The descriptions of scenery are capital, and there is great skill shown in the drawing of character."—*Star*.

LEYTON HALL, and other Tales. By MARK LEMON. 3 vols. [Dec. 7.]
